Thank you for your interest in Securitech.

At Securitech, we are committed to providing you with the best products and world-class customer service to meet your forced-entry, vandal-resistance, operational and code-compliance needs. Our solution-driven products and innovative designs have proven themselves in the roughest locations.

Over twenty-five years of providing innovative solutions has created a wide-range of proven products and the foundation for new innovations. The binder is divided into two main solution sections: Electric Locking & Mechanical Locking.

To help you easily navigate within each section and efficiently locate the solution and products that you require, at the beginning of each product section you will find:

- Section Introductions, highlighting the products featured within that section.
- Function Charts, quickly allowing you to find the electronic and mechanical functions required.
- Popular Model Guides, helping you by showing what is commonly specified.
- Model Building Guides, a great source of information that we encourage you to read and use to build the exact lock that your specifications require.

At Securitech, we pride ourselves on our superior product quality and durability. We offer a unique range of solutions, designed to answer your most difficult and perplexing locking scenarios.

Behind our products stand our customer service and technical departments, ready to assure your 100% satisfaction. Building "Customized Locking Systems" is our specialty so please let us help you with those most challenging of systems. We have many more solutions, catalog cuts and customized product information. Please visit www.securitech.com (both the regular and "New Literature" sections) or contact us directly at 800-622-LOCK.

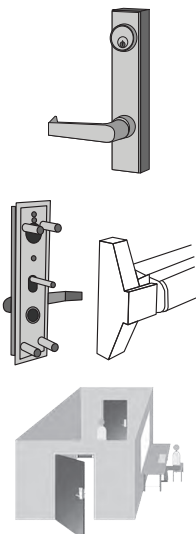

If there is anything that we can do for you, please do not hesitate to call us. We welcome the opportunity to work with you to fulfill all of your locking needs.

CONTROL TRIM

Electric Locking **Without** Electric Strikes, Electromagnetic Locks or Electrified Locks

GG TRIM

DESIGNED FOR ALL APPLICATIONS

Beauty, durability, and vandal resistance, the GG trim has it all. The attractive GG trim is available in most common plated finishes.

UG TRIM

VANDAL-RESISTANT

Designed to take a beating, the UG trim provides the highest level of security where aesthetics are not the primary concern. The UG trim is only available in a black powder coat finish.

*For medium to wide stile doors

GG Exterior Trim Features

- Narrow design with many finish choices
- Works with mortise cylinders
- Cylinder held in place at two points
- Independent coil lever spring prevents lever from sagging
- LeverExTM slip clutch lever handle (see page 2)
- Internal handle stop prevents rotation of lever beyond 70°
- ADA compliant lever handle
- Thru-bolted design

UG Exterior Trim Features

- Heavy duty
- Works with mortise cylinders
- Hardened Steel Cylinder protector resists drilling and prying
- Independent coil lever spring prevents lever from sagging
- LeverExTM slip-clutch lever handle (see page 2)
- Exterior handle stop prevents rotation of lever beyond 85°
- ADA compliant lever handle
- Thru-bolted design

GG Interior Trim Features

- Attractive architectural design
- Built-in lever movement restrictor
- ADA compliant lever handle
- Optional request-to-exit available

UG Interior Trim Features

- Security head fasteners
- Patented "Quick-Switch" cylinder replacement
- Built-in lever movement restrictor
- ADA compliant lever handle
- Optional request-to-exit available

Slip-Clutch Lever

The GG & UG style exterior trims include Securitech's LeverEx™ slip-clutch apparatus inside each trim exterior lever handle. If the handle is forced while in locked mode, it breaks away without unlocking the door and the lock and lever are not damaged.

Resetting the lever is easy and does not require any tools or replacement parts. If the lever is forced downward, simply pick it back up. It will "lock" back into the correct position.

GG TRIM

Securitech's GG trim uses the LeverEx2™ slip-clutch system.

The GG trim has an internal stop which prevents the lever from moving more than 70°.

UG TRIM

Securitech's UG trim uses the LeverEx™ slip-clutch system.

The handle stop at the bottom of the UG trim prevents the lever from rotating beyond 85°.

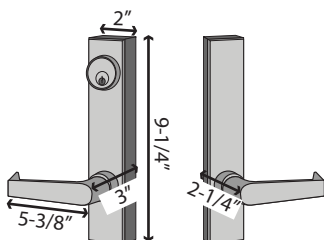

SMASH AWAY!

Use the UG trim for the toughest locations. The locked lever is designed to take a beating and not break. The UG trim can be used in place of the GG trim in most instances. To order a UG trim contact the factory.

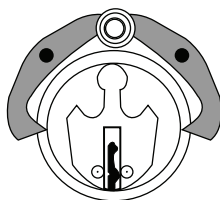

*Recommended for medium to wide stile doors.

GG DIMENSIONS

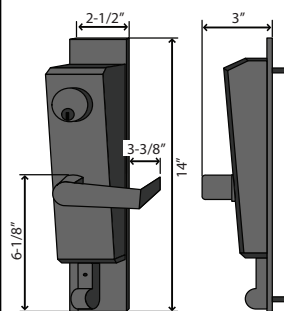

When required, custom mounting plates are available for use with different manufacturers' exit devices. See the LEXI section on page E2.0.

GG & UG CYLINDERS

Cylinders are held in place at two points, not one point as in ordinary locks and trim. Used on both the UG and GG trims.

UG DIMENSIONS

QUICK-SWITCH CYLINDER

The inside and outside trim plates are not removed to exchange a cylinder. A special access hole, protected underneath the interior trim provides access to the cylinder locking bolt. When the bolt is loosened, the cylinder may be removed, replaced and re-installed. Other series might require removal of the interior trim to access the hole.

Trim Finishes	676	630	605	606	611	612
	 Powder Coated Black UG TRIM Only available in Powder Coated Black (676)	 Satin Stainless Steel GG TRIM Comes standard in the Satin Stainless Steel (630) finish. Other options are shown here.	 Bright Brass	 Satin Brass	 Bright Bronze	 Satin Bronze

CONTROL TRIM SERIES

Electric Locking **Without** Electric Strikes, Electromagnetic Locks or Electrified Locks

LEXI™
 ELECTRA™
 ACCED™
 ARTE™
 RACHIE™

What is 1Solution?

What is 1Solution? It is our electric locking and signalling via control trim solutions for both retrofit and new construction applications. Our control trim solutions can be used in thousands of applications from schools, universities and apartment buildings to hospitals, government facilities and office buildings. Our GG style control trim is used with all of our electric locking solutions to give you a uniform look and common method of entry throughout your facility.

It is our control trim that can be integrated with most access control or remote release systems, and can be installed on virtually any door.*

It is our 24vDC electric release solenoid inside the trim, eliminating the need for electric strikes. This allows for easier installation and greater reliability and durability.

Our control trim uses internal switches, activated by lever movement that can send request-to-exit signals and release electromagnetic locks.

*Not applicable on all glass doors.

Solutions

LEXI™	Control trim can be retrofitted to essentially any existing exit device hardware. Use this to electrify all of your doors without replacing hardware. The LEXI™ series uses specially designed mounting plates and operators to retrofit to various exit devices. See page E2.0 for more information.
ELECTRA™	Control trim packages for mortise or cylindrical openings. Use these in both retrofit of new construction applications. All the hardware is included. See page E3.0 for more information.
ACCED™	Control trim packages with panic exit device. Use this for new construction applications requiring exit devices and control trim. All hardware is included. See page E4.0 for more information.
ARTE™	Control trim for doors that only need a signal. Eliminates the need for pushbutton, IR sensors and other magnetic releases. Provides a request-to-exit or electromagnetic lock without the use of a keyed or electric release trim. See page E7.0 for more information.
RACHIE™	Double sided control trim for mantraps, sally ports, interlocks, secured wards and other entry & exit control systems. The RACHIE™ provides 24vDC electric release to both sides of the door. Customized for psychiatric hospitals, detention facilities, laboratories, financial institutions, government facilities and retail stores to name a few. See page E6.0 for more information.

How to determine the swing of the door

Door Handing

The door handing is determined by looking at the door from the exterior (key) side of the door.

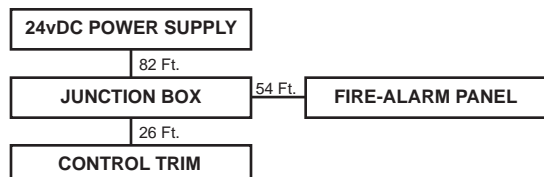

Look at the hinges and determine if the door swings in to the room or out of the room.

ELECTRICAL WIRING DATA

54-60 46th Street, Maspeth NY 11378 | 800.622.LOCK | local: 718.392.9000 | fax: 718.392.8944 | www.securitech.com

EXAMPLE:

In the example above, 4 items are being connected: a 24vDC power supply; a junction box; a fire-alarm panel, for emergency release of the door in case of fire; and a control trim.

First, determine the distance between each of the items:

The 24vDC power supply is connected to the junction box. The distance is 82 feet.

The junction box is connected to the fire-alarm panel and the control trim. The distance between the junction box and fire-alarm is 54 feet. The distance between the junction box and the control trim is 26 feet.

Next add the distances (82, 54, 26) together. The total distance is 162 feet.

Refer to the chart for 24vDC. Locate the nearest distance (250 feet). The recommended wire size is 18 AWG.

NOTE: For more wiring information, please contact Securitech for assistance

These recommended, minimum wire sizes are for reference only. Verify compliance with the local codes before installation.

The charts are base of the following criteria:

Current

The amount of current from the power supply to the control switches, contacts and the electrical product.

Distance

The distance, in feet, that the current travels from the power supply to the control switches, contacts and the electrical product.

Wire Size

Minimum size required for controlling the electrical product. Larger sizes can be used to meet code.

Wire Length

Length of wire in one direction.

Solenoid

Providing sufficient voltage to the solenoid of one product. If more products are used, the distance should be multiplied by the number of products used. Our electric release solenoid has a low current draw allowing easy access control system integration without requiring special power supplies.

DISTANCE (in feet)

VOLTAGE	25	50	100	150	250	500	750	1000
24vAC (30VA)	18 AWG	18 AWG	18 AWG	18 AWG	16 AWG	14 AWG	12 AWG	10 AWG
24vDC	18 AWG	18 AWG	18 AWG	18 AWG	18 AWG	18 AWG	16 AWG	14 AWG

TRANSFORMER

Solenoid	Resistance	Draw
AC	5 OHMS	2 AMPS
DC	90 OHMS	.003 AMPS

LEXI™

Retrofit Control Trim For Exit Devices

The Universal Access Control Solution For Electrifying Exit Devices

Easy Installation To Existing Doors

Does not require cutting into frame for electric strike.

Easy "No Special Knowledge" Operation

Unlock the lever by key, card access, keypad, intercom, push-button or other release.

Slip Clutch Lever Handle

Stands up to abuse; will break-away when forced; easily reset by just lifting up.

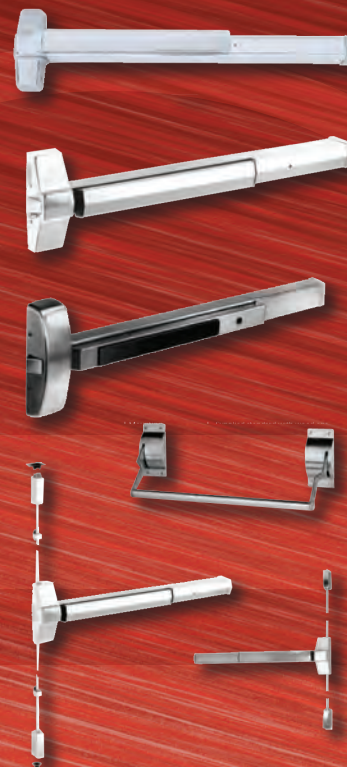

Stainless Steel Lever

Durable, rugged one-piece construction. Meets ADA Code.

Dual Point Cylinder Holder

The cylinder is fastened to the trim with locking arms extending into a groove on each side of the cylinder.

Use the LEXI™ across a campus, school system or other institutional facility with many different exit devices. Retrofits to all major manufacturer's exit devices!

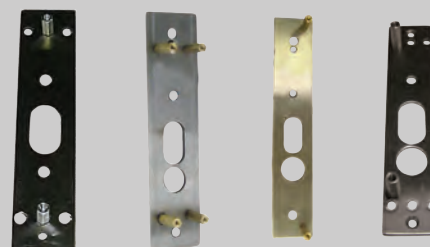

MOUNTING PLATE & OPERATOR

Give your doors a uniform look without changing all the hardware.

Retrofitting our LEXI™ Control Trim to various exit devices is made possible by Securitech's Mounting Plates & Operators (MP&O). Each MP&O is created specifically with a certain exit device in mind. We are always creating new MP&O's if you find that we do not have a MP&O for your device, please contact Securitech.

The MP&O is mounted to the back of the LEXI™ Control Trim. This is bolted through the door to the exit device allowing the trim and device to work simultaneously.

Mounting Plates

See MP&O Finder on page E2.3-E2.5 for complete listing.

Operators

See MP&O Finder on page E2.3-E2.5 for complete listing.

Single Entry			

FAIL-SECURE LOCKING

Fail-Secure locking is available in Single-Entry Storeroom Function or Classroom Function. Fail-Secure models stay locked at all times, unless unlocked by key. In the event of an emergency the locks remained secured.

FAIL-SAFE (STAIRWELL) RE-ENTRY LOCKING

Re-Entry (stairwell) locking fills the need where a door needs to be secured during normal operation, but is also a means of escape or refuge in the event of an emergency. Many building codes mandate re-entry every fourth floor in a high-rise building. Build a Fail-Safe, Stairwell, Re-Entry Model using the "R" Functions.

FEATURED MP&O

UNIVERSAL MOUNTING PLATE (U1A)

Add a U1A to any exit device where 75° or less rotation of rim tail piece will operate (nightlatch)

EDT-G20-D11-J2F1-630-(RHR or LHR)

Electric release trim for Jackson concealed vertical rod exit devices.
Compatible with Jackson CVR-885, 1085, 1285, 2085
Popular finishes; satin stainless steel (630) or oil rubbed bronze (613)

Function; 24vDC release, single entry, fail-secure

EDT-G20-D13-J2F1-630-(RHR or LHR)

Electric release trim for Jackson concealed vertical rod exit devices.
Compatible with Jackson CVR-885, 1085, 1285, 2085
Popular finishes; satin stainless steel (630) or oil rubbed bronze (613)

Function; 24vDC release, single entry, fail-secure, key usage switch

EDT-G20-D11-D4G2-630-(RHR or LHR)

Electric release trim for Doromatic concealed vertical rod exit devices.
Compatible with Doromatic CVR-1690, 990
Popular finishes; satin stainless steel (630) or oil rubbed bronze (613)

Function; 24vDC release, single entry, fail-secure

EDT-G20-D13-D4G2-630-(RHR or LHR)

Electric release trim for Doromatic concealed vertical rod exit devices.
Compatible with Doromatic CVR-1690, 990
Popular finishes; satin stainless steel (630) or oil rubbed bronze (613)

Function; 24vDC release, single entry, fail-secure, key usage switch

EDT-G20-D11-V1A1-630-(RHR or LHR)

Electric release trim for Von Duprin rim exit devices.
Compatible with Von Duprin Rim-99EO, 99NL(cyl), 99TP, 99K, 9927EO, 9927NL(cyl), 9927L, 9927K, 9947EO, 9947NL(cyl), 9947L

Function; 24vDC release, single entry, fail-secure

EDT-G20-D13-V1A1-630-(RHR or LHR)

Electric release trim for Von Duprin rim exit devices.
Compatible with Von Duprin Rim-99EO, 99NL(cyl), 99TP, 99K, 9927EO, 9927NL(cyl), 9927L, 9927K, 9947EO, 9947NL(cyl), 9947L

Function; 24vDC release, single entry, fail-secure, key usage switch

EDT-G20-D11-Y1A1-630-(RHR or LHR)

Electric release trim for Yale exit devices.
Compatible with Yale VR7110, SQB-7150(n), CVR-7140(n), Rim-7200(w), CVR-7240, Rim-ED5200(n), SVR-ED5400(n), CVR-ED5800(n), Rim-ED4200, SVR-ED4400, SVR-ED4800, Rim-ED6200, SVR-ED6400(E0), CVR-ED6800(E0)

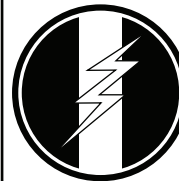

Function; 24vDC release, single entry, fail-secure

EDT-G20-D13-Y1A1-630-(RHR or LHR)

Electric release trim for Yale exit devices.
Compatible with Yale VR7110, SQB-7150(n), CVR-7140(n), Rim-7200(w), CVR-7240, Rim-ED5200(n), SVR-ED5400(n), CVR-ED5800(n), Rim-ED4200, SVR-ED4400, SVR-ED4800, Rim-ED6200, SVR-ED6400(E0), CVR-ED6800(E0)

Function; 24vDC release, single entry, fail-secure, key usage switch

FAIL-SAFE (STAIRWELL) RE-ENTRY MODELS

For popular Re-Entry Models replace "D" Function with "R" Function.

R11	Re-Entry DC, Single Entry, Fail-Safe
R13	Re-Entry DC, Single Entry, Fail-Safe, Key Usage Switch

Re-Entry (stairwell) locking fills the need where a door needs to be secured during normal operation, but is also a means of escape or refuge in the event of an emergency. Many building codes mandate re-entry every fourth floor in a high-rise building. Build a Fail-Safe, Stairwell, Re-Entry Model using the "R" Functions.

Example: EDT-G20-R11-Y1A1-630-LHR

All LEXI models are Fail-Secure unless a Re-Entry function (e.g. R11) is selected.

Universal Mounting Plates

MP&O	LEVEL	WIDTH	HEIGHT
U1A1	II	2"	13"
U2A1	II	3"	13"
U3D2	II	3"	13"
U4A7	II	2.5"	14.25"
U1D6	III	2"	13"
U1D7	III	2"	13"

Universal Mounting Plates do not match a specific manufacturer's templating and do not thru-bolt to exit devices. They are designed to thru-bolt around the exit device head and can be used with various, but not all exit devices.

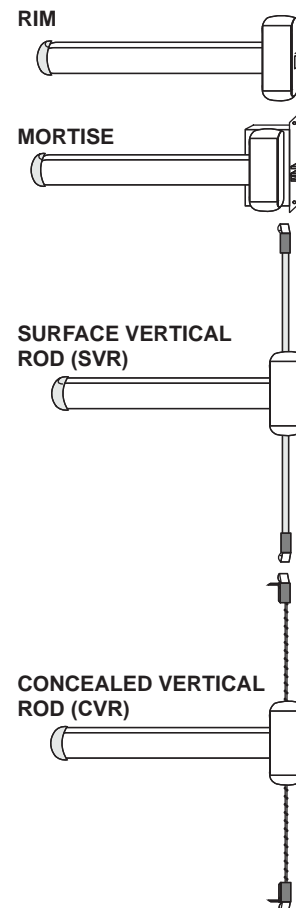

All Universal Mounting Plates include 4 thru-bolts except the U3D2 MP&O which comes with 2 thru-bolts.

U1A1 & U2A1 replicate rim cylinder tailpiece

D2 operator used for Monarch 18 CVR

D6 operator used for lifting motion on different CVR devices

D7 operator used for lifting motion on Sargent CVR devices

We are constantly adding MP&O's based upon customer requests. If the MP&O for an exit device you need is not listed, please contact the factory and we'll work with you to meet your needs.

ED5000 Series

All exits will accept trims.

Function of device is in trim not in the exit head.

The narrow Y1 plate should be used on new construction or doors not yet prepped for Corbin Russwin 700/900 trims.

The Y3 backplate is the same dimensions as the escutcheon for the 700/900 trim by Corbin Russwin. Use on retrofit projects.

ED4000 Series

All narrow-stile exits will accept trims.

Function of device is in trim not in the exit head.

The Y1A1 MP&O bolts directly to the head of the exit device.

ED8000 Series

Trim bolts thru door above and below device as well as once to head of device for alignment

*For retrofit. Covers old exterior trim holes.

**For use with PANELINE 350 Doors

***Requires upgrade cassette in exit device head to accept trim

****The C2 Plate will not cover all old thumbpiece holes

We are constantly adding MP&O's based upon customer requests. If the MP&O for an exit device you need is not listed, please contact the factory and we'll work with you to meet your needs.

Yale 7100 Series

All exit devices will accept trims. Function of device is in trim not in the exit head.

Y1A1 - The Y1 is a narrow plate and should be used on new construction or doors not yet prepped for Yale wide-stile trims.

Y3A1 - The Y3 is a wide backplate and uses the same dimensions as the escutcheon for the 520/620 lever trims. Use on retrofit projects.

The Y1 plate used with 7100 devices uses 4 thru-bolt studs.

Yale 7200 Series

All narrow stile exits will work with lever trims. Function of device is in trim not in the exit head.

Y1 plate bolts directly to head of 7200 narrow stile exit device in the middle 2 locations.

ELECTRA™

Complete Control Trim Packages With Mortise & Cylindrical Devices

Easy Installation To Existing Doors

Does not require cutting into frame for electric strike.

Easy "No Special Knowledge" Operation

Unlock the lever by key, card access, keypad, intercom, push-button or other release.

Slip Clutch Lever Handle

Stands up to abuse; will break-away when forced; easily reset by just lifting up.

Stainless Steel Lever

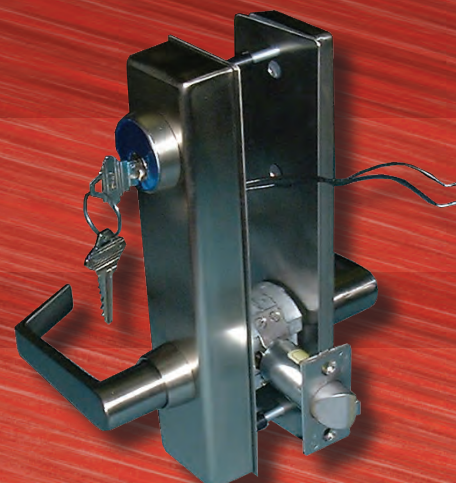

Durable, rugged one-piece construction. Meets ADA Code.

Eliminates Request-To-Exit Devices

Models available with request-to-exit built into the interior lever.

ELECTRA™ Mortise

ELECTRA™ Cylindrical

ELECTRA™ Mortise

Designed for doors with mortise openings. Mortise lock body options allow installation on different types of doors, including steel, wood, narrow stile aluminum or gates. Complete package includes hardware.

**"A" Series
Mortise Lock**

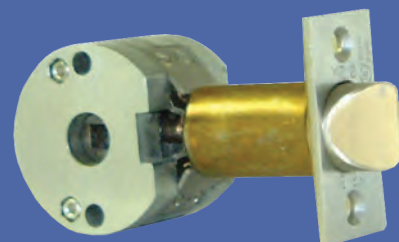

Mini-Mortise Lock

**Narrow Stile
Lock**

ELECTRA™ Cylindrical

Designed for doors with cylindrical openings. Complete package includes hardware.

**Cylindrical Prep
(Fits 2 1/8" x 1" cross
bore door prep)**

*Fields 4 & 5 are optional.

FAIL-SECURE LOCKING

Fail-Secure locking is available in Single-Entry Storeroom Function or Classroom Function. Fail-Secure models stay locked at all times, unless unlocked by key. In the event of an emergency the locks remained secured.

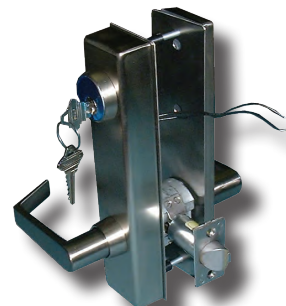

FAIL-SAFE (STAIRWELL) RE-ENTRY LOCKING

Re-Entry (stairwell) locking fills the need where a door needs to be secured during normal operation, but is also a means of escape or refuge in the event of an emergency. Many building codes mandate re-entry every fourth floor in a high-rise building. Build a Fail-Safe, Stairwell, Re-Entry Model using the "R" Functions.

R24 Function; 24vDC re-entry release, single entry, fail-safe, request-to-exit, key usage switch, latch position switch

MLN-G20-D21-630-(RHR, RH, LHR, LH)

Complete control trim package with mortise lock for narrow stile aluminum door or gate
D21 Function; 24vDC release, single entry, fail-secure, request-to-exit

CLS-G20-D21-630-(RHR, RH, LHR, LH)

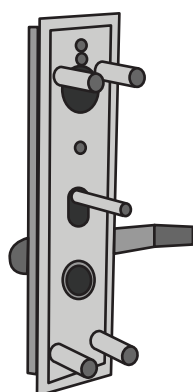

Complete control trim package for cylindrical lock opening; including fire-rated deadlatch
D21 Function; 24vDC release, single entry, fail-secure, request-to-exit

CLS-G20-D24-630-(RHR, RH, LHR, LH)

Complete control trim package for cylindrical lock opening; including fire-rated deadlatch
D24 Function; 24vDC release, single entry, fail-secure, key usage switch, latch position switch, request-to-exit

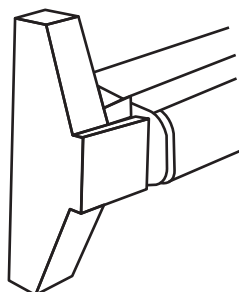

ACCED™

Complete Control Trim Packages With Exit Devices

Exterior Lever

Electric Release
protected within
trim

Exit Device

Available in Rim (R),
Mortise (M), Concealed
Vertical Rod (CVR),
Surface Vertical Rod
(SVR) and Rim Bolt (RB)
Exit Devices

For use on steel or wood doors, wide-stile aluminum doors, aluminum doors with mid-rails or gates with mounting area.

Electric strike is not required; Electric release is within exterior trim

Exterior trim is released by key or electric release

Free egress from interior at all times

“No Special Knowledge”

Request-To-Exit available

UL Listed as Panic Exit Hardware, Fire-Rated models also available

Thru-bolted Design

Independent lever springs resists sagging

Internal clutch and lever movement restrictors protect the devices

Power transfer (electrified hinge, cable, door cord or other method) to door is required (see page E5.1 for options)

Patented cylinder holding method grasps cylinder at two points

FAIL-SECURE LOCKING

Fail-Secure locking is available in Single-Entry Storeroom Function or Classroom Function. Fail-Secure models stay locked at all times, unless unlocked by key. In the event of an emergency the locks remained secured.

FAIL-SAFE (STAIRWELL) RE-ENTRY LOCKING

Re-Entry (stairwell) locking fills the need where a door needs to be secured during normal operation, but is also a means of escape or refuge in the event of an emergency. Many building codes mandate re-entry every fourth floor in a high-rise building. Build a Fail-Safe, Stairwell, Re-Entry Model using the "R" Functions.

Example: EDR-G20-R24-AI-E0-630-LHR

D21 Function; 24vDC release, single entry, fail-secure, request-to-exit

FDR-G20-R24-AI-630-(RHR or LHR)

Complete fire-rated control trim package with rim exit device for 30" to 36" wide doors.

R24 Function; 24vDC re-entry release, single entry, fail-safe, key usage switch, latch position switch, request-to-exit

FDR-G20-R21-AI-630-(RHR or LHR)

Complete fire-rated control trim package with rim exit device for 30" to 36" wide doors.

R21 Function; 24vDC re-entry release, single entry, fail-safe, request-to-exit

POWER SUPPLIES

Power Solutions for Access Control, Intercom, Remote Release & Alarms

Single Door, Two Door and Timed Release Power Supplies

Securitech offers a wide range of power supplies to meet door release needs and custom electric release requirements.

All power supplies include LED power light indicators on the cover.

Please note: Standard 24vDC release is provided by many access control system power supplies and may eliminate the need for a Securitech power supply.

Single Door Power Supplies

Access Control, Intercom (Dry Contact) or Remote Release

PS-D111	24vDC Release	Trim Function Begins With "D"
PS-A111	24vAC (30VA) Release	Trim Function Begins With "A"
PS-R111	Re-Entry DC Power	Trim Function Begins With "R"

Intercom Voltage (16vAC) Release (Wet Input) or Dry Contact

PS-A112	24vAC (30VA) Release	Trim Function Begins With "A"
---------	----------------------	-------------------------------

Access Control For Double Sided Trim With Fail-Safe Exiting, Fail-Secure Entry

PS-D121	24vDC Release	For locations requiring access control on both sides of the door; Becomes Fail-Safe with loss of power. Custom ELECTRA™ Model - Contact Factory
---------	---------------	--

Electromagnetic Lock Power Supplies

-E	Add the following designation to any power supply listed above to add power for Electromagnetic Lock 24vDC Electromagnetic Lock Power

Common Applications: Employee Entrances, Schools, Laundry Rooms, Restrooms

PS-D141	24vDC Release	Trim Function Begins With "D"
PS-R141	24vDC Release	Trim Function Begins With "R"

POWER TRANSFERS

Door Cords

An inexpensive method of transferring up to 8 wires where aesthetics and vandalism are not great concerns. Features stainless steel armored cable. For use on hollow metal or aluminum doors.

DC1-18 18" Loop; Stainless Steel Cable
DC1-24 24" Loop; Stainless Steel Cable

Available in Aluminum (A) or Duronodic (D) finish

The wires are connected and covered under the cap

Panic Bar Retrofit Cords

An armored cable to be installed below the panic bar when adding a LEXITTM trim to an existing bar. Package includes wire, mounting clips for under bar and steel clips for mounting to the frame.

PTC-48 For doors up to 36"; Stainless Steel Cable
PTC-60 For doors up to 48"; Stainless Steel Cable

Cable provided to reach across door, create loop, and mount on frame

Electric Mini-Hinges

Geared continuous hinges are used on high-traffic doors. Geared mini-hinges may be added to existing doors when electrified trim is used. The entire hinge need not be replaced. The top 1-1/2" is removed and the mini-hinge installed in it's place. Mini-hinges are much friendlier to installers than full-length electrified hinges. A serviceman can check connections without removing the entire door when a mini-hinge is used.

ECHFM-R Full Mortise; Matches Roton 780-112 (available with 4 or 6 wires)
ECHFM-Z Full Mortise; Matches Zero 910 (available with 4 or 6 wires)
ECHFS-R Full Surface; Matches Roton 780-157 (4 wires)
ECHFS-Z Full Surface; Matches Zero 935 (4 wires)
ECHHS-R Half Surface; Matches Roton 780-054 (4 wires)
ECHHS-Z Half Surface; Matches Zero 920 (4 wires)

Available in Aluminum (AL) or Duronodic (DU) finish

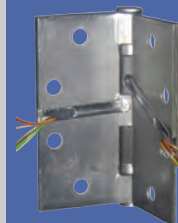

Geared hinge manufacturers do not share common sizes. Please identify mfr. and model when ordering.

Electrified Hinges

The cleanest method of transferring power from the frame where the door is hung by hinges. Recommended for new construction or retrofit into frames without concrete. Available in 4, 6, 8 or 10 wire models. See price list for available sizes. Optional door position switch provides valuable information to access control system.

EH4040-626-4 4 wires, 4" tall, 4" wide; Satin Chrome Finish
EH4540-626-4 4 wires, 4.5" tall, 4" wide; Satin Chrome Finish
EH4545-626-4 4 wires, 4.5" tall, 4.5" wide; Satin Chrome Finish
EH5045-626-4 4 wires, 5" tall, 4.5" wide; Satin Chrome Finish
EH5050-626-4 4 wires, 5" tall, 5" wide; Satin Chrome Finish

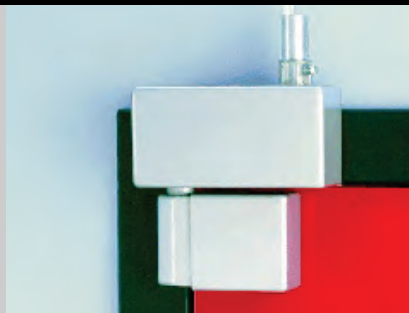

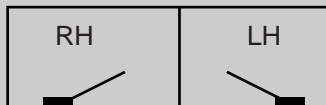

An electrified hinge must match the existing hinge. Determine the height. Determine the open width by measuring across the two leaves and knuckle when open.

TransXTM

TransXTM connects multiple wires from the door to the frame in a concealed, protected manner. Trim wires run through the door into the TransXTM door module (the lower box). The wire passes from the frame module to the bottom side of the terminal strip. Access control technicians or electricians bring their low voltage wires through conduit into the TransXTM frame module and connect to the upper side of the terminal strip.

PTB-106-(hand) 6 Terminal Strips; Mounts On Pull Side Of Door, Designate LH or RH
PTB-110-(hand) 10 Terminal Strips; Mounts On Pull Side Of Door, Designate LH or RH

TransX is mounting on the pull side of the door. To designate handing stand on the interior side of the door, check if the hinges are on the right or the left.

YAMAKATM

An innovative method for hollow metal, aluminum (YMK-20) or wood doors (YMK-21). The module (A.) mounts in the top of the door, with the spring loaded tips protruding above the door. As the door closes, the tips make contact with the transfer plate (B.) which is mounted to the frame. Tested for 1 million cycles. Not for Fail-Safe applications.

YMK-20 Mounts on top of door, flat plate onto header, for hollow metal or aluminum doors
YMK-21 Mounts in frame, flat plate on door, for wood doors

RACHIE™

Entry & Exit Control Systems

CODE-COMPLIANT MANTRAPS & SALLY PORTS

Customized for:

- Psychiatric Hospitals
- Detention Facilities
- Laboratories
- Financial Institutions
- Government Facilities
- Retail Stores

Securitech Entry & Exit Control Systems provide:

- Basic Two Door Packages
- Custom Two, Three Or More Door Systems
- Fail-Secure & Fail-Safe Options
- Dual Security: Mechanical & Electromagnetic
- Custom Operating Scenarios

Special Entry & Exit Control Special Conditions:

- Emergency Key Override For Use By Staff
- Momentary Shunting To Move Groups Through The Sally Port or Mantrap
- Automatic Operators For Transporting Carts

How Does It Work?

Standard mantraps and sally ports provide a controlled passageway where only one door in the passageway can be opened at a time.

A mantrap or sally port may contain 2 or more doors.

A mantrap or sally port may be connected to an overhead door.

Securitech's basic two door Entry & Exit Control Systems expand on the basic mantrap or sally port system. By using dual-locking technology, Securitech can create systems which provide operational security and meet special operational and life-safety needs.

Securitech's Custom 2, 3, and 4 door Entry & Exit Control Systems start with a blank piece of paper; the end-user lists all of their requirements and Securitech creates the system which fulfills those needs.

TRIM IDENTIFICATION CHART

Securitech offers two types of out-of-the-box Interlocks, each with different operating scenarios, as described below.

RA-M100 series models include electrically and key released trim, mortise locks and electromagnetic locks. The key override is restricted by the interlock control.

RA-E100 series models include electrically and key released trim and mortise locks. The key overrides the interlock control at all times, so violations are possible.

The different systems in each series reflect the individual trim function at loss of power (fail-safe or fail-secure). RACHIE™ systems provide operational and life-safety compliance, in addition to the standard interlock.

FULL INTERLOCK SYSTEMS

Controller #	Description:
RA-M100	1. 2 door interlock controller 2. Card access, console or key release 3. Requires 110v hook-up 4. Fire-Alarm cut-off* 5. Used with RA-M101, 102, 103 or 104

INTERLOCK SYSTEM DESCRIPTIONS With Electromagnetic Locks

System #:	Lever Trim Locking Status At Power Loss			
	A Outer Exterior	B Outer Vestibule	C Inner Vestibule	D Inner Secure Area
RA-M101	Secure	Safe	Secure	Secure
RA-M102	Secure	Safe	Secure	Safe
RA-M103	Secure	Safe	Safe	Safe
RA-M104	Safe	Safe	Safe	Safe

Interlock Type: *Electrically or key released trim.*
Release of trim (by card access, console or key) unlocks lever momentarily. Lever may be pulled downward and retract latch and release electromagnetic lock only when the door in the interlock is closed.

FAIL-SECURE *Locked at all times, including loss of power*
Card access, console or key can unlock, subject to mantrap control.
Key required to release lever at loss of power.

FAIL-SAFE *Normally locked, unlocks at loss of power.*
Card access, console or key can unlock, subject to mantrap control.
Free operation (Fail-Safe, Re Entry) at loss of power.

Note: Fire Alarm cut-off is same as "Loss of Power"

KEY OVERRIDE AT ALL TIME SYSTEMS

Controller #	Description:
RA-E100	1. 2 door interlock controller 2. Card access, console or key release 3. Requires 110v hook-up 4. Fire-Alarm cut-off* 5. Used with RA-E101, 102, 103 or 104

INTERLOCK SYSTEM DESCRIPTIONS Electric Trim Only

System #:	Lever Trim Locking Status At Power Loss			
	A Outer Exterior	B Outer Vestibule	C Inner Vestibule	D Inner Secure Area
RA-E101	Secure	Safe	Secure	Secure
RA-E102	Secure	Safe	Secure	Safe
RA-E103	Secure	Safe	Safe	Safe
RA-E104	Safe	Safe	Safe	Safe

Interlock Type: *Electrically or key released trim.*
Release of trim (by card access, or console) unlocks lever momentarily. Pulling lever downward retracts latch of the other door in the interlock is closed.
Release of trim by key will violate mantrap and allow door to open at any time.

FAIL-SECURE *Locked at all times, including loss of power*
Card access or console can unlock, subject to mantrap control.
Key release lever at all times.

FAIL-SAFE *Normally locked, unlocks at loss of power.*
Card access or console can unlock, subject to mantrap control.
Key releases lever at all times.
Free operation (Fail-Safe, Re Entry) at loss of power.

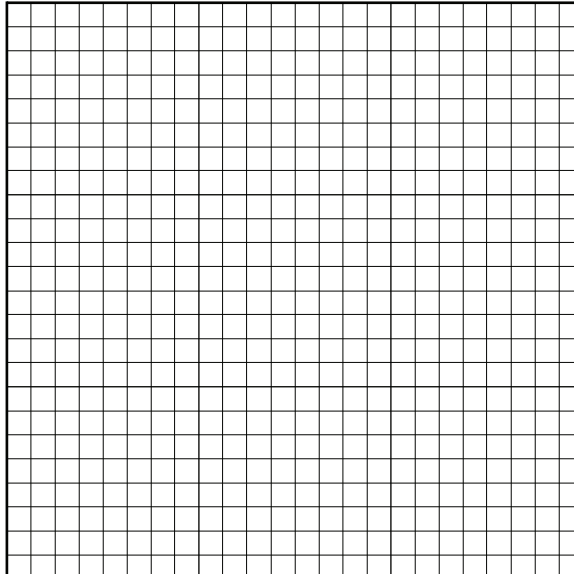

Note: Fire Alarm cut-off is same as "Loss of Power"

ARTE™

ADVANCED REQUEST-TO-EXIT
Lever Controlled Request-To-Exit Switch

Code-Compliant Release Of Electromagnetic Locks

**Eliminates the need for push-button, IR
sensors & other magnetic releases**

**Works With Access Control Systems
& Electromagnetic Locks**

Internal Lever Activated Switch

Switch Interrupts Power To Electromagnetic Lock

**Signal Switch Sends R-T-E Signal To
Access Control Or Alarm System**

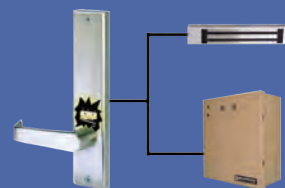

**Wide Variety Of Models,
Including Mortise & Cylindrical Latches**

**Internal Lever Movement Restrictors
Reduce Wear & Tear On Locks**

Lever Designed for ADA Compliance

UL Rated Switches

**Rigid Non-Switch Trim Available For Exterior Pull
(Non-Latch Lock Models)**

How Does It Work?

Moving the interior lever activates a switch or switches. This can release an electromagnetic lock, send a signal to an access control or alarm system or do both functions. In addition, the mortise and cylindrical latch models provide positive mechanical latching to keep the door in place and meet fire code requirements. Exterior trim does not contain a cylinder or electric release.

Designed To Fit Over Removable Core or Standard Cylinders

What is "Bumping"?

Burglars take a regular key and mill it down, creating a "Bump Key". It is inserted into the lock and with a tap of a hammer on the "Bump Key" the lock opens. It's so easy an eight-year-old can do it!

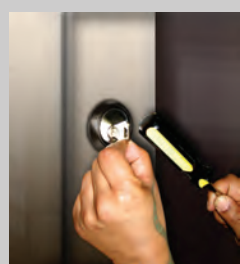

The technique has been around for over 20 years and is spreading like wildfire thanks to the internet.

SECURIGUARD™ Protects Against

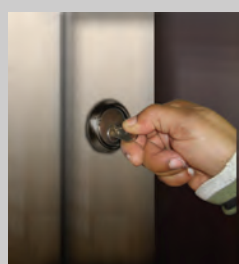

- Bumping
- Unauthorized Key Use
- Vandalism
 - Picking
 - Wrenching
 - Krazy Glue

SECURIGUARD™ Offers

- Bump Key Protection
- Simple Access Control
- 100% Cylinder Concealment
- Prevention Of Cylinder Icing
- Easy Installation
- Special Magnetic Keys That Cannot Be Duplicated
- Ease Of Use

PROBLEM

SOLUTION

MODEL #6300

Size

Height: 5 3/4"

Width: 2"

Depth: 1 3/8"

Finish: Clear Aluminum

Furnished with 2

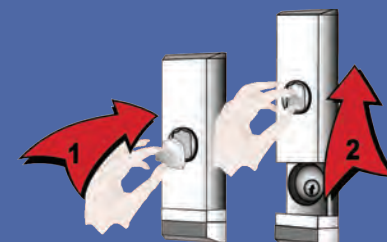

Magnetic Keys

SECURIGUARD™ Stops Krazy Glue & Bump Keys

Securiguard™ has a sliding shield that covers the cylinder. Prevents vandalism by Krazy Glue and "Bump Keys" cannot be used.

The shield is raised and lowered via a special magnetic key.

When the shield is up, the key can be used. When the shield is down, the cylinder is 100% concealed.

SECURIGUARD™ Key Info

There are millions of Securiguard™ key combinations. Additional keys can be ordered and Securiguard™ can be ordered to work with the same magnetic key. Regular magnets cannot open the Securiguard™.

MODELS	6300	Use Over Standard Or High-Security Cylinders. Furnished With 2 Magnetic Keys.
	6302	For Use With "Schlage" Deadbolts. Includes Modified Filler Plate & Collar.
	6305	Combination Of 6300 & BAP. For Use With "Best" Or Other Raised Face Removable Core Cylinders.
	6310	Identical To 6300, Furnished With 3 Magnetic Keys Per Securiguard
	6315	Identical To 6305, Furnished With 3 Magnetic Keys Per Securiguard
	63PP	Securiguard Is Mounted On A Stainless Steel Pull Plate For Use With Exit Device. Contact Factory With Specific Exit Device Name & Model Number For Custom Model.
	63MP	Securiguard Is Mounted On A Stainless Steel Plate For Use With Exit Device Or Other Lock. Contact Factory With Specific Exit Device Name & Model Number For Custom Model.
PARTS & OPTIONS	64	Change "63" To "64" For A Securigaard With Removable Bay <input type="checkbox"/>
	63BAP	Adapter Plate (Spacer) For Use With Raised Face I/C Cylinders
	63KEY	Additional Key
FINISH	63BAY	Replacement Locking Bay With 2 Keys <input type="checkbox"/>
	AL	Aluminum
	JB	Jet Black <input type="checkbox"/>

APPLICATIONS:

Areas where cylinders are prone to vandalism
Areas where cylinders are prone to weather issues
Doors where dual verification for entry is needed
Doors needing restricted access

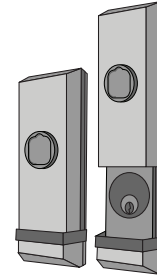

POPULAR MODELS:

6300-AL Standard unit with two keys; aluminum
 6300-JB Standard unit with two keys; jet black
 6305-AL Standard unit with adapter plate for use with "Best" or other raised face removable core cylinders; aluminum
 6305-JB Standard unit with adapter plate for use with "Best" or other raised face removable core cylinders; jet black

OPERATION:

The SECURIGUARD™ shield is raised by the magnetic key. The lock key may then be inserted and used.

The shield will remain open until lowered by use of the magnetic key.

KEY LOCK-OUT FUNCTION:

This function is used to lock-out keys and restrict access to the cylinder, in addition to cylinder protection.

Typically, a manager will raise the shield at the start of the day. Regular keys can then be used to operate the lock. At the end of the day, the manager uses the magnetic key to lower the shield.

KEY COMBINATIONS:

SECURIGUARD™ is available keyed different or keyed alike to a new or existing combination.

AVAILABLE FINISHES:

JB = Jet Black Finish.

AL = Aluminum Finish (clear).

ADDITIONAL KEYS:

SECURIGUARD™ keys can be ordered from the factory to match code numbers.

Keys are stamped with code numbers. Codes may be registered to prevent ordering by unauthorized individuals.

NOTE: SPECIAL CYLINDER CAPS:

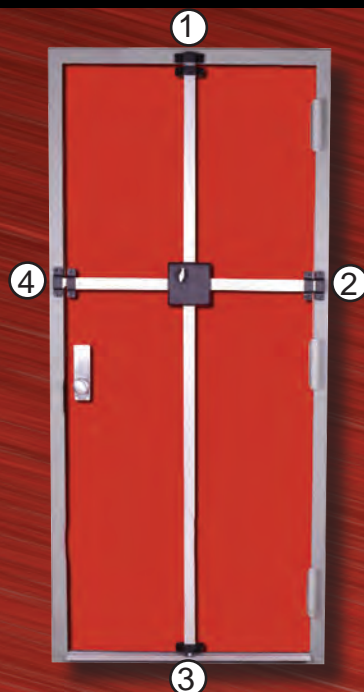

Some cylinders use special caps over the face of the cylinder for different finishes. Certain caps add too much to the diameter of the cylinder and need to be removed prior to insertion in the Securiguard. This does not affect the cylinder operation.

MP POLICE LOCK™

Surface Applied Multi-Point Locking Systems

Maximum Protection Against Break-Ins

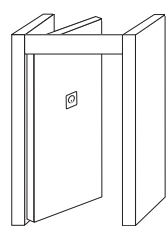

- Bolts the door to the frame at up to 4 independent locations
- Easy operation: One turn of the key or interior knob projects or retracts all of the bolts simultaneously
- Easy installation on any solid door
- 4" laminated steel bolts on inswing models project into steel strike brackets mounted on the frame
- 5" long, 5/8 diameter stainless steel deadbolts on outswing doors bolt into the frame
- Dustproof strike provided for rounded lower bolt on all 5-point models

Benefits of Multi-Point Locking

The typical break-in occurs when a burglar tries to pry the door from the frame at the lock area. Multi-point locking defeats this method by protecting the door like a bank vault. Use this retrofit or new construction solution on stock rooms, computer rooms, safe rooms, utility closets, firearms storage rooms, remote buildings and other non emergency doors.

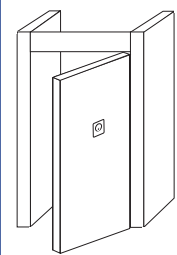

Bolt Type

Inswing Doors; Square Deadbolts (A)

Square laminated deadbolts project into strike brackets mounted on the frame.

Outswing Doors; Round Deadbolts (B)

Rounded deadbolts project into holes drilled into the frame.

Interior Options

Thumbturn (TT)

Standard diamond-shaped turnpiece

Elongated Turnpiece (LT)

Deadbolt Protection Against Break-Ins

Solid deadbolt assembly

Protection Against Hinge-Side Attack

Deadbolt provided to resist hinge-removal break-in

Superior Anti-Pry Installation

Thru-bolting & anti-pry plate are standard

Customizable To Meet Security & Operational Needs

Wide range of available alarms & options

Use On Steel, Wood Or Aluminum Doors

Special kit for mounting on glass doors

Easy Installation Without Special Kits

Lock fits all width doors with no special kits needed

Alarms Resist Damage By Moving Carts, Etc.

Wall-mounted alarms ideal for high delivery areas
Keeps sound inside where needed

Battery Alarms May Be Added Or Upgraded As Needed

Direct power upgrade kit available

Modular Configurations

Choose exterior option which meets your needs
(may not be available for glass doors)

Rugged Design, Ideal For Back-Of-House Doors

Stamped steel, not die cast, lock housing

APPLICATIONS:

Emergency Exit Doors

Receiving Doors

Emergency Exit Glass Doors (SEL-GK2 kit)

Doors Leading To Fire Corridors

SEL-210	Self-relocking model; with battery alarm (SEL-A10)
SEL-GK2	Glass door kit; for aluminum doors 34" or 36" wide

MULTI-BOLT™

Multiple-Point Locksets

* Door not to scale

Full Function Multi-Point Locking Mortise Lock & Exit Device

Latch lock by day, multi-point protection at night

Aesthetically pleasing with the vertical bolts concealed within the door

Superior protection against break-ins in a single device

5" long, 5/8" diameter stainless steel vertical deadbolts with 1" projection

One action locks or unlocks all the deadbolts simultaneously

Meets ADA and local code requirements for single motion exiting

Lock body fits into standard ANSI mortise lock preparation

Accepts 1 1/4" length mortise cylinder (standard and high-security)

Wide variety of standard and custom functions to meet specific locking requirements

Exterior lever contains vandal-resistant slip clutch

How Does It Work?

Multi-point mortise locks provide safety & security in one lockset. The traditional lock operation (key thumb turn or lever retraction) operates all the deadbolts simultaneously. The wide variety of available functions meet almost any need.

Securitech's TOUGHBAR™

Stainless Steel Device - Heavy gauge touch bar

Integrated, Retractable Ends - No protrusions when device is used

Full-Length Actuator Bar - Rugged anti-vandalism design

Downward Movement - Designed for switch activation

Interior Trim Options

Exterior Trim Options

HOVE Module

HOVE module deadbolt projects horizontally into the frame, not the floor. Prevents deadbolt jamming due to dirt and debris at the floor strike.

Stationary Bullet Bolt

Steel stationary bolt adds fourth point to the hinge side of the door.

As the door closes the bolt engages with the frame. It is not connected to the lock body.

Contact factory for additional models.

AUTO-BOLT™

Safety & Security Combined In One Lock

Instant Deadbolt Protection Each Time The Door Closes

Choose from single-point or 4-point models

Trigger activated automatic deadbolt locking

Heavy Duty Stainless Steel Deadbolts project one full inch in each direction

Optional multi-point feature bolts the door to the frame at up to 4 independent locations

Interior lever or UL listed panic bar

Can be rated for use on fire-rated doors up to 4' wide and 8' tall

Easy exiting: Interior lever or panic bar retracts all bolts simultaneously

Easy installation on hollow metal doors

Wide variety of exterior trim functions, including key-released lever trim, electric release and keyed pull handles

5" long, 5/8" diameter steel vertical deadbolts with a 1" throw

Dustproof strike provided for rounded lower bolt on multi-point models

How Does It Work?

Auto-Bolt locksets are trigger activated. When the trigger hits the strike, up to three stainless steel deadbolts project into the frame. Life-safety is provided for, as a single motion retracts all the deadbolts for easy exiting.

Securitech's TOUGHBAR™

Stainless Steel Device - Heavy gauge touchbar

Integrated, Retractable Ends - No protrusions when device is used

Full-Length Actuator Bar - Rugged anti-vandalism design

Downward Movement - Designed for switch activation

Storeroom Function Lever (44)

Rotating the key unlocks the lever temporarily. Removing the key relocks the lever.

Storeroom Function with Electric Release (46)

Same as Storeroom Function Lever with access control ability. Uses a 24vDC electric release.

Classroom Function Lever (45)

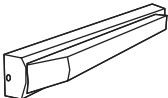

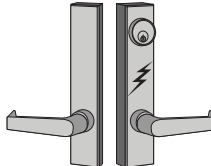

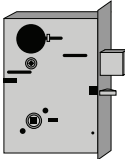

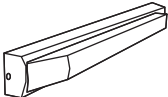

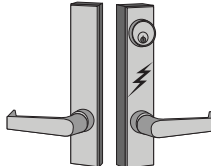

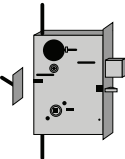

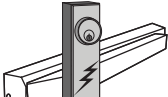

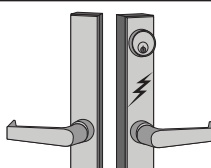

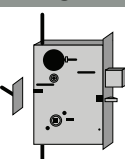

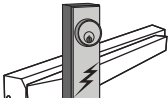

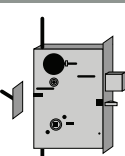

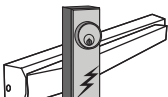

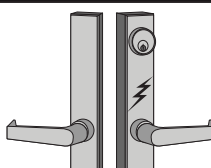

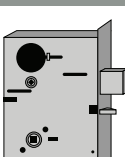

Rotating the key clockwise unlocks the lever until the key is reinserted and rotated counter clockwise.
