

Trident™-D ELAYED EGRESS

New Feature!

Simply The Best, Now Inside & Out!

You've always trusted Trident for superior forced entry protection. Introducing the revolutionary Trident Delayed Egress System.

Now you don't have to choose between superior forced entry protection or delayed egress locking. Trident gives you both!

Best of all, the Trident Delayed Egress System can be supplied with a new Trident Multi-Point Exit Lock or as a Retrofit Kit to any existing Trident lock. No need to replace your older Trident locks, just replace the alarm.

- **Put A Stop To Grab & Run Theft**
Code Compliant Delayed Egress
- **Revolutionary Delayed Egress System**
15 or 30 Second Selectable
- **Additional Entry Protection**
D.E. Module Adds Locking Point
- **Retrofits To All Existing Trident Locks**
Manual or Self-Locking
- **Trident Re-Locks Independently**
Secure The Door, Even Before The Delayed Egress System Is Reset

New Delayed Egress Locking Module & Alarm

The patent pending locking module contains a unique pivot bolt which is held in the locked position when energized.

Initiation of the delayed egress sequence is by depression of the Trident paddle. Once pressed, it cannot be reversed and sounds a countdown alarm until releasing the delayed egress module. A continuous alarm sounds until reset by key.

Fire alarm system integration provides for immediate unlocking of the delayed egress function upon signal from the fire alarm system, meeting code requirements.
