NO CHARGE FOR CASES OR CARTAGE.

FILLING ORDERS.

In filling orders we are particular to see that goods are correct, both in quantity and quality, and that they are properly packed and shipped as per shipping directions. With our large floor space we are enabled to lay out many orders without the danger of wrong packing, which frequently results from cramped space. With our largely increased stock we can guarantee immediate shipment of all orders. Customers at a distance may rely on receiving the same treatment as though present in person.

PRICES.

While we have exercised the greatest care in the preparation of this volume, with the addition of prices which are all *net*, yet we cannot guarantee them beyond a reasonable length of time, as they are subject to market changes. As a standard book of reference it may, however, be safely used and relied upon. We would suggest that for large contracts, itemized lists of Hardware be made out which may enable us to quote special prices. To such of our customers as request our services in the furnishings of their houses, we will be glad to assist them in making out a bid for the Hardware from plans and specifications.

TERMS.

To those known to us, or others with well established credit, 30 days from date of invoice, unless otherwise agreed upon. We would request Philadelphia references, as far as possible, from those who have had no previous dealings with us. In all other cases cash must accompany the order.

C. O. D.

We will send any goods contained in this catalogue C. O. D.; but as an evidence of good faith we require the parties so ordering to remit with order a sum sufficient to cover the Express charges both ways, which will be deducted from amount of bill. We do not recommend this plan, however, as it materially increases the cost.

CASH DISCOUNT.

A cash discount of two per cent. will be allowed on all bills, if cash accompanies order, or if paid in 10 days from date of invoice. Under no circumstances will we allow the discount unless paid within that time.

INQUIRIES.

We wish it understood that we are at the service of our patrons and will be glad to answer any inquiries for information not contained in this book.

We thank our friends for the very liberal patronage extended, and solicit a continuance of the same, together with the patronage of all buyers of Hardware.

DESIGNS AND FINISHES.

DESIGNS—Terminal Letters.

The Terminal Letters refer only to pattern or design:

Terminal **A**, Arcadia Design.
Terminal **E**, Ekado Design.
Terminal **P**, Plain Real Bronze.

FINISHES—Prefixed Letters.

Real Bronze Goods.

A (Prefixed) Antique or Statuary Dark Bronze.
C " Chocolate Background, Raised Surface in Polished Natural Color.
L " Lined on Highly Polished Plain Real Bronze or Brass.
M " "Imperial"—Black Background, Raised Surface in Polished Natural Color.
V " Oxidized Silver.

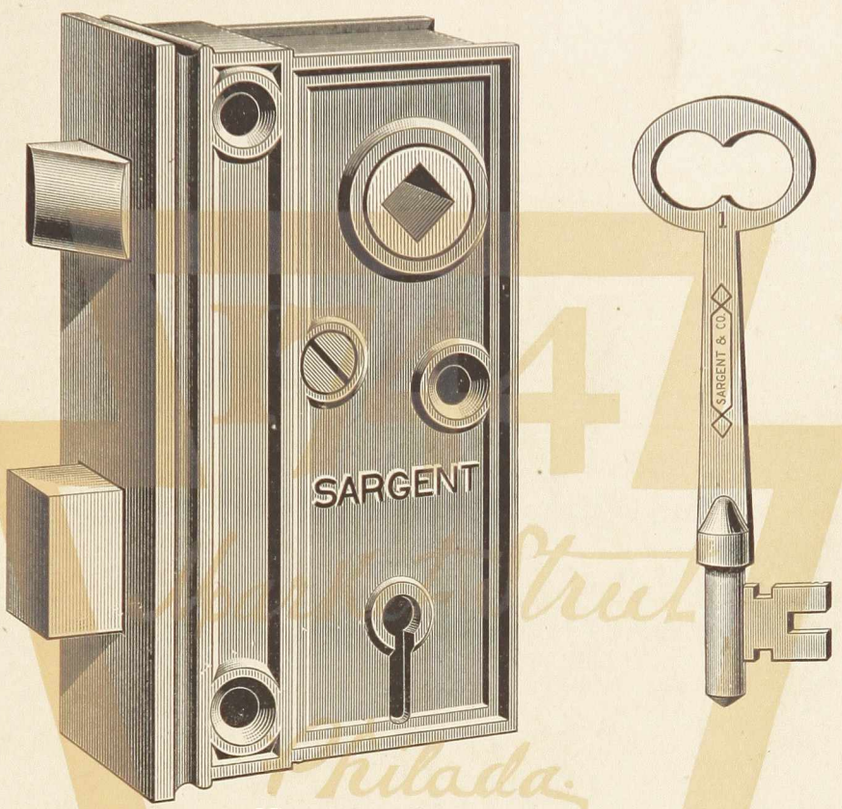

Unless otherwise ordered, the Ekado Design Goods will be sent in the **C** Finish, and all other Designs in the Standard Natural Light Bronze.

Ornamental Iron Goods.

The standard finish for Iron is Berlin Bronzed and is without a prefixed letter; other finishes are designated by a prefixed letter as follows:

P (Prefixed) Copper Plated, Polished Raised Surface.
K " Tokio Bronzed. Plated Light Real Bronze, Black Background, Polished Raised Surface.
Y " Yeddo Bronzed. Plated Light Real Bronze, Polished Raised Surface.

Door Bumpers.

Half-size Cut.

No. 910

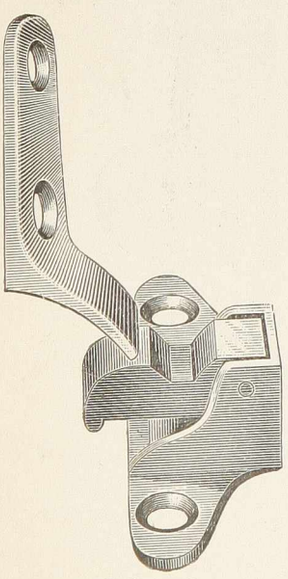

THE object of the Door Bumper is to prevent the jar and noise in shutting a Door. It consists of a Cast Iron Cup with a Brace attached to screw it to the Door. A Rubber Ball is pressed into the Cup so that it will not fall out.

A piece of Rubber made fast to the Jamb Casing over the Door for the Ball to strike against completes the contrivance. The Rubber over the Door may be increased or lessened in thickness, so that when the Rubber Ball comes in contact, it requires some little pressure to make the Door latch. The effect is to have the Door shut without the noise and jar that sometimes so annoyingly accompanies the shutting of a Door.

Price, . . . each, $1.00

Wollensak's Patent Transom Lifter and Lock.

Class 3.
Hinged at Top.

Class 1.—Hung on Centres.—Works either way.
To "Pull Down," or, to "Push Up."

Class 4.
Hinged at Bottom.

With these devices Transoms may be raised or lowered at will, with great ease, and locked in any position. No other fastenings are required. Class 1 and 3 are the same device, and may be used in three different ways, as shown.

REQUIREMENTS.

For Dwelling Transoms, use ¼ inch.
For Office Transoms, use 5-16 inch.
For Store Transoms, use ⅜ inch.
For Extra Heavy Store Transoms, use ½ inch.
Extra Heavy Transoms, when hinged either on top or bottom, should have a Lifter on each side.

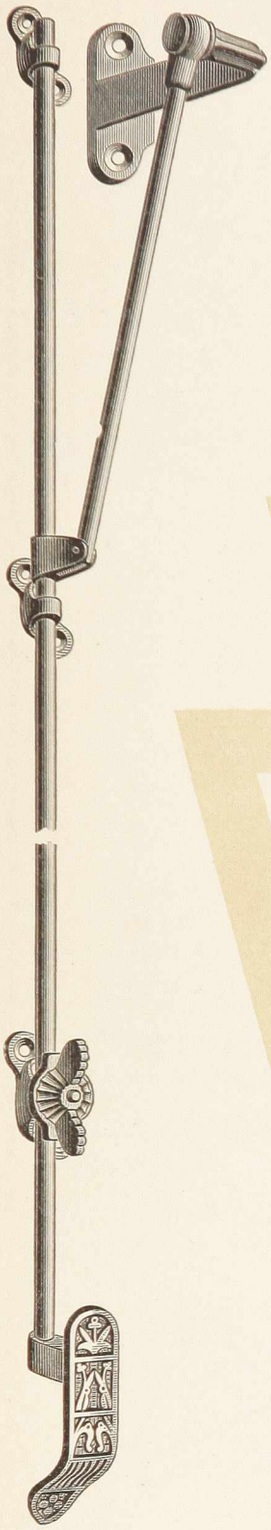

Class No. 1 and No. 3	DESCRIPTION	Each
3 ft. x ¼ in.	Copper Bronzed Rods and Fixtures	.60

France's Shutter Holders.

Shutter Locked.

Shutter Bowed.

Opened or Stayed Back.

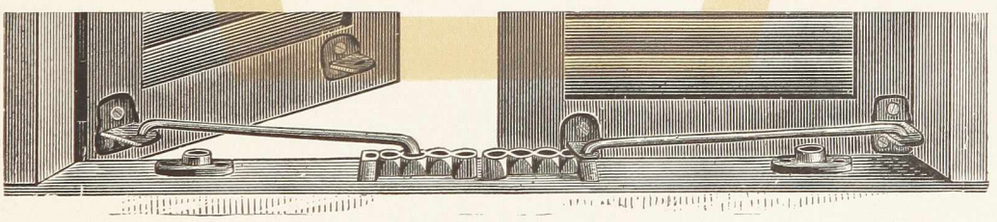

No.	Size Inches	DESCRIPTION	Per Dozen Pairs, no Screws	Per Pair, with Screws
705	7	France's Japanned Shutter Holders	$2 50	.30
705	8	France's Japanned Shutter Holders	2 60	.30
705	10	France's Japanned Shutter Holders	3 20	.35
706	7	France's Galvanized Shutter Holders	3 10	.35
706	8	France's Galvanized Shutter Holders	3 20	.35
706	10	France's Galvanized Shutter Holders	4 25	.45

France's Shutter Holder does away with Bolts and Turnbuckles, and bows either Shutter independent of the other, at any desired angle.

It is much more secure than a bolt, and cannot rust and stain the shutters, or in any way get out of order. It is simple in construction, and sells for less money than the old fasteners now in use.

It avoids the danger of reaching out of the window to fasten the shutters back, and the very great inconvenience of rusty and frozen bolts. The Hooks are 7, 8 and 10 inches long, Japanned or Galvanized.

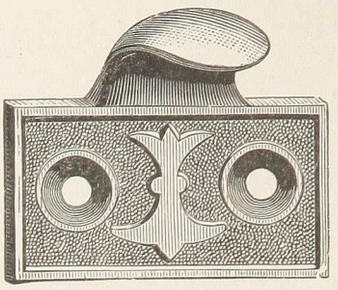

Zimmerman's Shutter Holders.

Cut shows one Shutter Bowed and the other Locked.

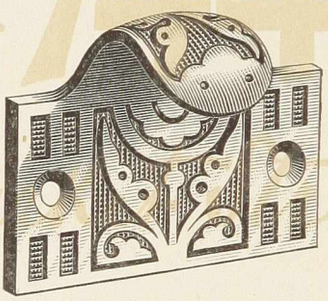

No.	Size Inches	DESCRIPTION	Per Dozen Pairs, with Screws	Per Pair, with Screws

Richard's Improved Sliding Door Hangers.

Improvements have recently been made in these Hangers that will enable them to retain this reputation which they are so well and justly entitled to.

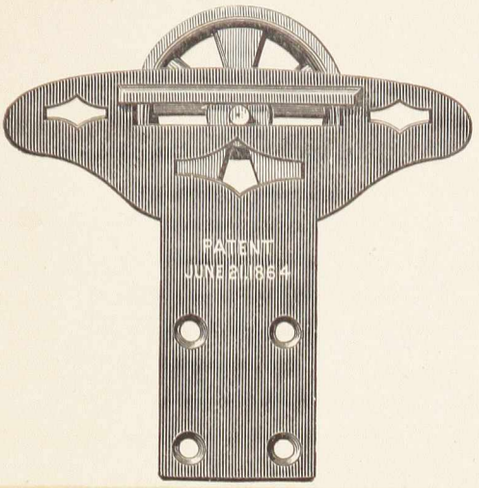

In the Improved Hangers, to secure a perfect and rigid adjustment, a new locking device has been added to the Plate which holds the Set Screw and Yoke firmly in position. They are also so constructed that the incline on the Yoke rests and slides on a corresponding incline on the Plate, thus giving a *double and absolutely perfect adjustment.* The Lugs are made of polished steel, perfect in finish and size, and the holes are drilled with special machinery designed expressly for this purpose, thus insuring a perfect fit and making them interchangeable.

No *cutting* or *defacing* of Doors, either upon the upper edge or *side* for *Plate or Set Screw*, is required to place these Hangers in position, this having been done away with entirely in the Richard's Improved Hanger.

The following number of pieces compose one set: 4 pieces of Wood Track 7 feet each, 4 Yokes, 4 Wheels, 4 Plates, 4 Set Screws, 2 Pockets, 2 Stops, 2 Floor Guides, 4 Buffers.

Price, - - - - - - Per set, $5 00

174 Market Street Philada. Shannon & Co.

Shannon's Improved Sliding Door Hangers.

No. **1**—Shows a 6-inch Sheave with Hand Rail Nut, suitable for a Door three feet or more in width, and one and three-quarter inches or more in thickness.

No. **2**—Gives a 4-inch, same style of Nut, and intended for lighter Doors than just mentioned, in which a lighter Sheave than the 6-inch may be used.

No. **3**—Displays a 6-inch, with flat frame, to be used where individuals object to boring the Doors for the Hand Rail pattern, and also where appearance is not a matter of importance. Where this form is used the bar is let in flush or level with the surface and painted over.

No. **4**—Exhibits a 4-inch Sheave of the same fashion as No. 3.

The Frames are all made entirely of Wrought Iron. The Wheels of Iron with a Composition Pin.

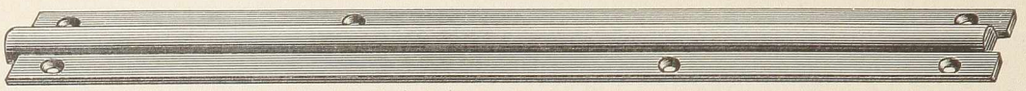

The Rail is a Wrought Iron Bar, two inches wide and one-quarter of an inch thick, dressed semi-cylindrically or round on the upper edge to fit the Sheave, and drilled for Screws to fasten it on a horizontal piece of Timber which is attached to the studding.

The Rail may be made heavier if desired.

4	5½	Ice-House Door Fasteners . . . . . For Lager Beer and Family Boxes.	.25	.30	.60	.75

PROPER PLACE TO BORE THE HOLE.

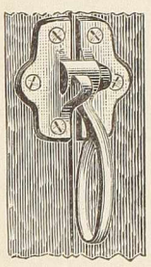

For No. 1 bore with 13-16 bitt and 1⅛ inches from edge of door to centre of hole on the wall of house (*not on door*). Pass the Bolt through Friction Plate and nut up on inside of wall with washer against the wood (*not too tight*). Then close the door and screw the hook or pull on the door close to edge with inside of hook about level with under side of lever when it is drawn down across the door; after this is done, with cold chisel upset a little the thread of Bolt just back of the nut to prevent working loose.

No. 2 bore with 11-16 bitt and ⅞ inch from edge of door to centre of hole, and place hook or pull close to edge and on the door.

No. 3 bore with 9-16 bitt and ¾ inch from opening to centre of hole.

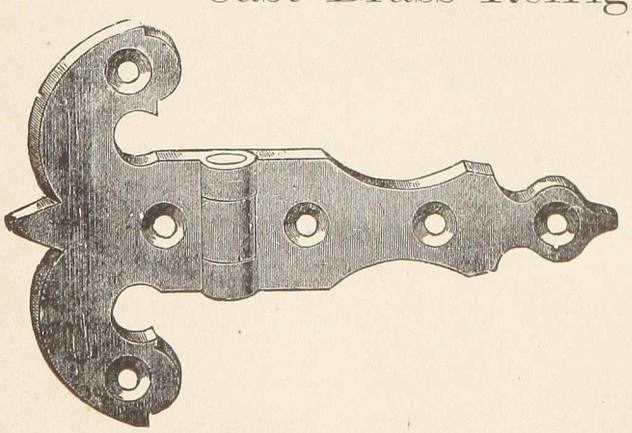

No. 4 bore with 7-16 bitt and place the plate fair with edge of opening and mark the hole through it.

Conroy's Refrigerator Door Fasteners.

Can furnish above Gate Hinges with Hooks to screw in, or Hooks with Bolts and Nut, at a slight advance over Regular Price.

Patent Floor Clamps.

SAILER'S  PATENT.

For Laying Floors and other Clamping Purposes it has no equal.

Most secure and easily adjusted of all others.

Occupying little room, they can be used in many places where others are of no use.

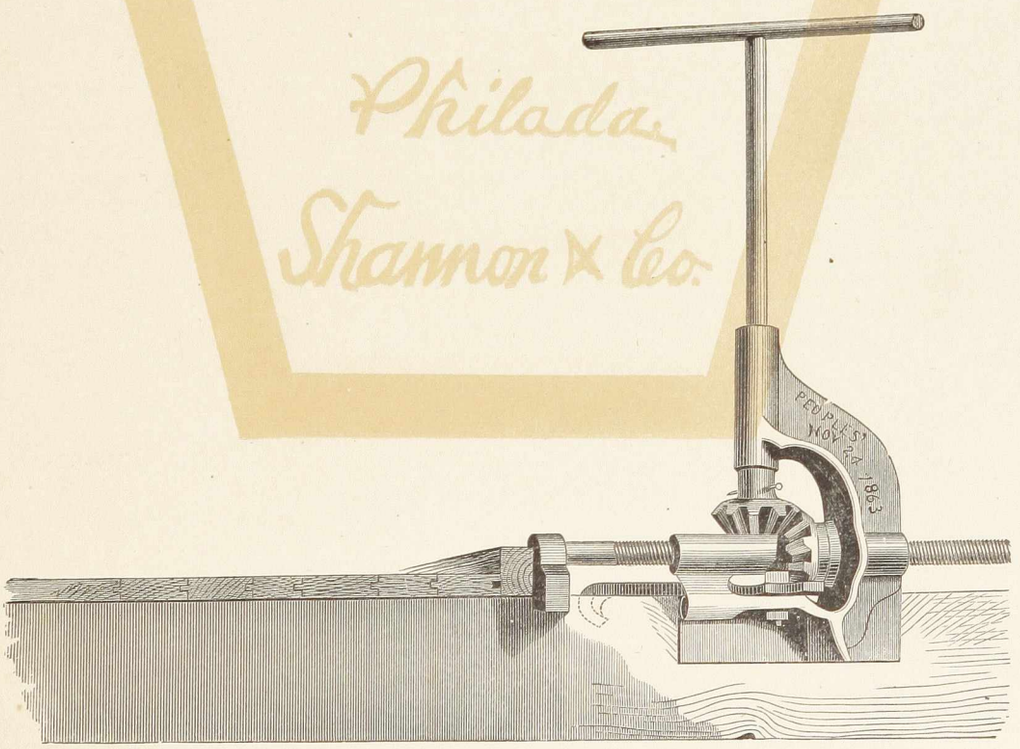

No complicated Springs or Screws to get out of order.

Securely adjusted in a few seconds and taken off in an equally short space of time.

Once adjusted it is impossible for them to move.

Price, - - - - - each, $2 co.

People's Patent Floor Clamps.

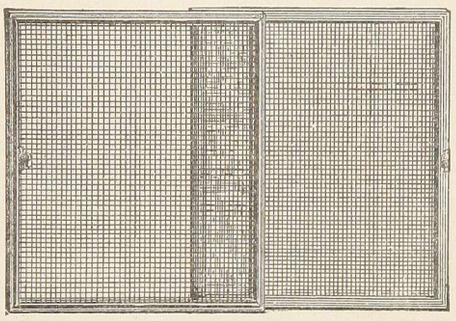

Require no Nailing or Wedging, and can be applied or released instantaneously.

Price, - - - - - each, $4 25.

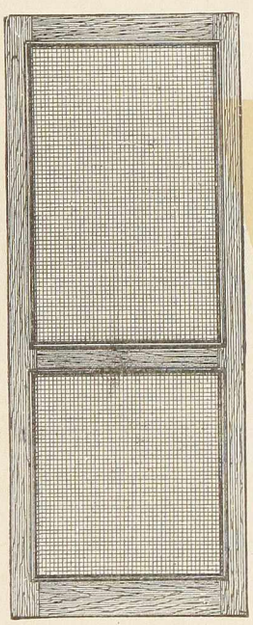

1744 Market Street Philada. Shannon & Co.

Wire Screen Doors.

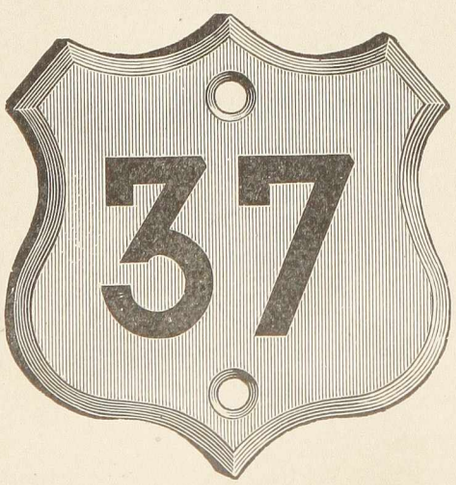

Size	DESCRIPTION	Each
2 ft. 8 in. x 6 ft. 8 in.	Wire Screen Doors	$1 50
3 ft. x 7 ft.	Wire Screen Doors	1 75

We keep two sizes covered with green wire cloth complete. Stained imitation walnut color.

They can be reduced two inches in height and width, by sawing off a strip from the sides and ends, and all ordinary doors fitted from these two sizes, thus avoiding the necessity of keeping a large variety in stock. If these sizes are a little scant for irregular doors, pieces can be nailed on at the sides or ends.

Decorated Porcelain Number Plates.

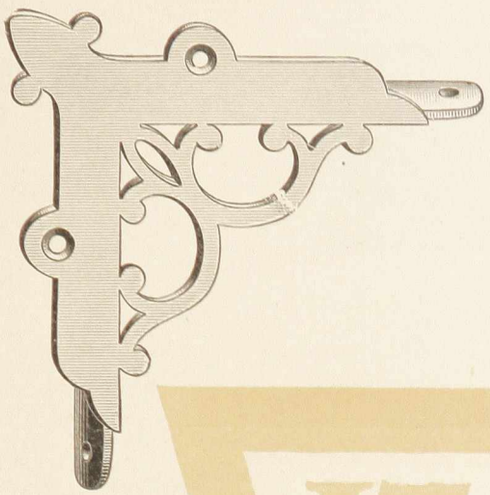

No.	Size Inches	DESCRIPTION	Per Dozen

19	2	Galvanized Wire Netting	.01	.67

A Full Roll contains 150 lineal feet of a size.

Weather Stripping.

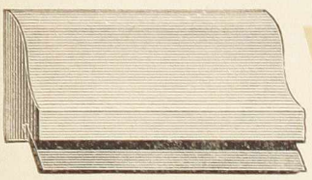

No. 2

Rubber Edge in 12-foot lengths.

No. **2** is used for the bottoms of light inside doors, and also for the bottom rail of French sash—the rubber to press firmly on the sill. Close the sash or door and apply *inside*, if it opens inward, or *outside*, if it opens outward.

Use 1 inch screws.

Walnut and White Paint, - - - -	Per Foot, 8 cents.
Oak and Imitation Walnut, - - - -	Per Foot, 6 cents.

No. 3

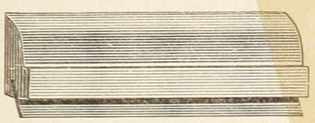

On Windows, No. **3** is applied to the sash bead or casing *inside* for lower sash, and *outside* for the upper sash. The edge of the rubber presses lightly against the sash, and not only excludes all draft, but holds the sash firmly in its place, and entirely prevents the annoying rattling of windows.

The corners should be neatly mitred. Use 1 inch finishing nails.

On Doors, No. **3** is applied to the frame and lintel *outside*, with the rubber edge toward the door, pressing gently against it.

Use 1 inch finishing nails.

Walnut and White Paint, - - - - - -	Per Foot, 4 cents.
Oak and Imitation Walnut, - - - - - -	Per Foot, 3 cents.

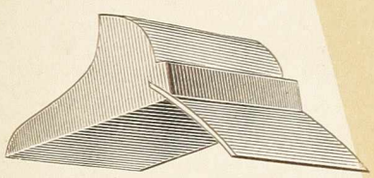

No. 4

No. **4** is used on the parting bead of the upper sash, *inside*, where none can be put outside. Cut off a little of the meeting rail of the lower sash before applying, so as to allow it to move freely over the strip. It is also used in any place where No. 3 is too large.

Use ¾ inch finishing nails.

Walnut and White Paint, - - - -	Per Foot, 4 cents.
Oak and Imitation Walnut, - - - -	Per Foot, 3 cents.

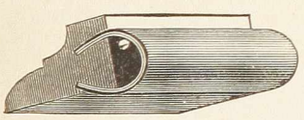

No. 5

No. **5** is used on the central or meeting rail of sash windows; it is *screwed* to the upper part of the lower sash, *inside*. The rubber extending over and bearing on the other sash. Notch the rubber where it comes in contact with the frame. Where there are fastenings, they are sometimes applied *outside*, and up-side down.

Use ¾ inch screws.

Walnut and White Paint, - - -	Per Foot, 6 cents.
Oak and Imitation Walnut, - - -	Per Foot, 5 cents.

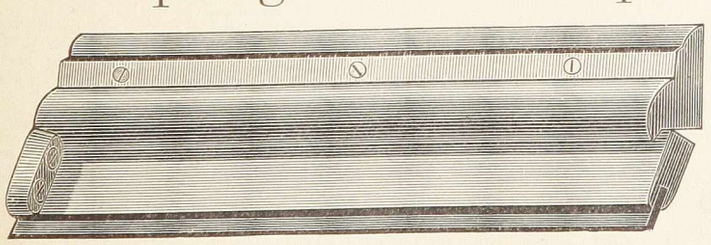

No. 7

No. **7**, or Cushion Weather Strip. This is an entirely new and superior arrangement. Its cushion shape makes it more elastic, and consequently more effective. It is applicable to double and single doors, and French windows. Close the door or French window, and brad the strips to the jamb or frame *outside* so that the cushion rubber presses very gently against the door or sash.

Walnut, - - - - - -	Per Foot, 5 cents.
Oak and Imitation Walnut, - - - -	Per Foot, 4 cents.

Spring Bottom Strips for Outside of Doors.

This Strip has rubber in the lower edge and is pressed down tight on the sill, when the door is closed.

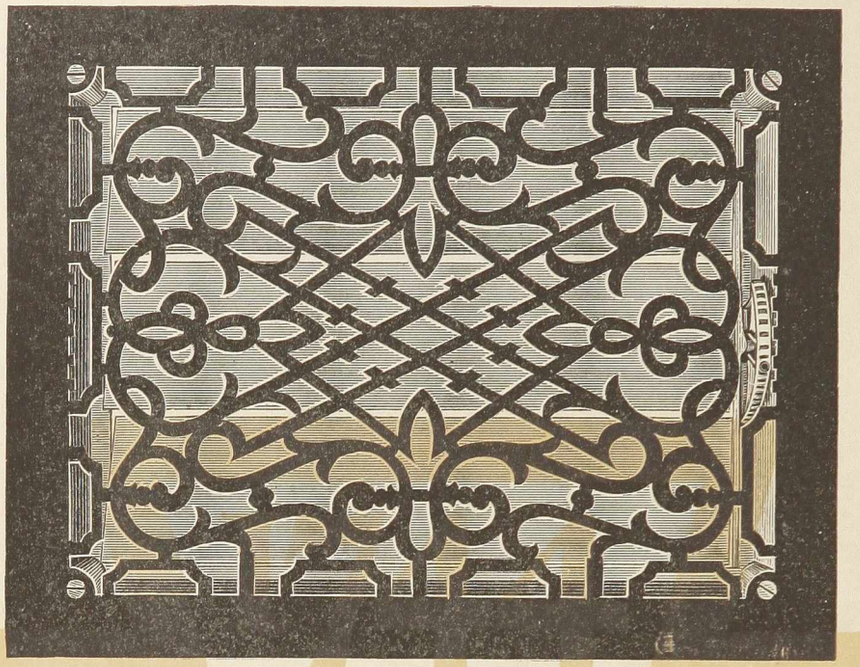

In applying cut the Strip to width between door-jambs; screw on the Strip, and then screw the Striker to the jamb on the opening side.

Price, - - 75 cents each.

Discount for quantity.

Cellar Window Grates.

Grate, Screen and Glass Combined.

Front or Outside View.

A B C

Back or Inside View.

No.	Size	DESCRIPTION	Each
0	26½ x 28½	Arch Top Cellar Window Grates with Central Opening	$5 60
1	18 x 30	Square Top Cellar Window Grates	4 55
2	15½ x 25½	Square Top Cellar Window Grates	3 50
3	13 x 21	Square Top Cellar Window Grates	2 80

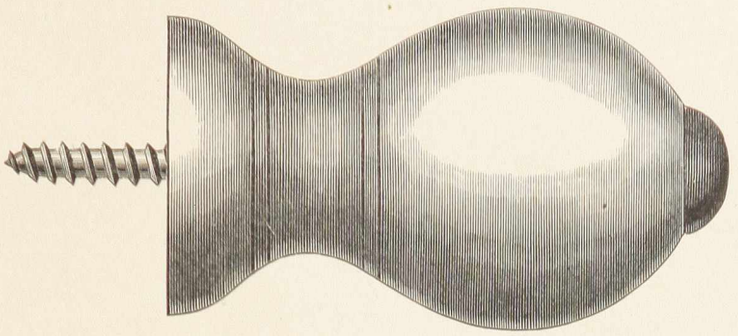

Simplest, most Durable and most Economical Grate ever produced for Windows in Cellars, Barns or Out-Houses; supplanting the old unhandy way in a single combination so simple and handy that a child can operate it. The points of superiority are rich ornamentation and attractiveness. Contains more points and less parts than any ever produced. Absolutely Burglar-Proof; without Bolt or Padlock. Frame, Grate, Sash, Glass and Screen combined in so simple a manner as to be readily opened and shut, for either ventilating, admitting coal, etc., or for keeping out air and cold. Excludes flies, vermin, etc., when ventilating. Is cheaper than any other arrangement for the purpose; can only be opened from Inside; has no Bolts to get rusted and out of order.

It is no Novelty, but a Common-Sense arrangement, so simple as to need no explanation when once seen.

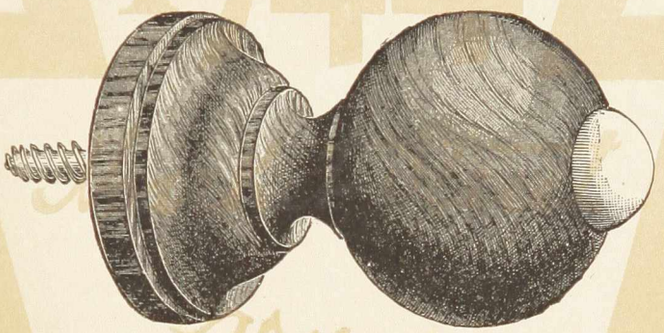

Explanation:

The Glass A and Screen B are connected to large grate. The Door C with glass, when shut, excludes the air and cold, and when open (as cut) admits ventilation,—the screen B preventing insects and rodents from entering. The large door has projections at the end where the door C joins the frame, and is held securely by the journals of the door C and can only be opened by removing the door C,—which is done at an angle of about 45 degrees, thus making it absolutely Burglar-Proof, and dispenses with the annoyance of Bolts and Lock. The Glass and Screen are held in position by wires moulded in the casting.

Right and Left, and Left-hand Fittings, not specified above, will be charged at 15 per cent. advance.

In describing reduced Tees, the run is first named, thus: $1'' \underset{1''}{\mathbf{T}} \tfrac{1}{2}'' = 1'' \times \tfrac{1}{2}'' \times 1''$.

744 Market Street Philada. Shannon & Co.

BUILDING PAPERS.

Rosin-sized Water-proof Sheathing.

No.	DESCRIPTION	Per Pound
14	Best Gray Rosin-sized Sheathing, 36 inches wide, rolls of 50 lbs. each, 12 square feet to the Pound	.04
14½	Second Quality Gray Rosin-sized Sheathing, 36 inches wide, rolls weigh about 50 lbs. each, 12 square feet to the Pound	.03
15	Best Red Rosin-sized Sheathing, 36 inches wide, rolls 50 to 75 lbs., 12 square feet to the Pound	.03½
16	Second Quality Red Rosin-sized Sheathing, 36 inches wide, rolls weight 50 to 75 lbs. each, 10, 12, 15 and 20 square feet to the Pound	.03¼

Tarred Roofing Felt.

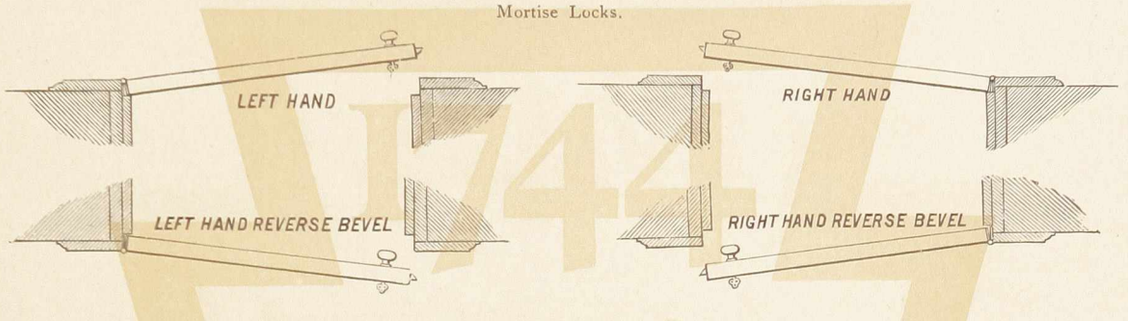

DESCRIPTION	Per Roll
2-Ply Tarred Roofing Felt	$1 50
3-Ply Tarred Roofing Felt	2 00

Each Roll will cover 100 square feet. Tin Caps for the above, 10 cents per Pound.

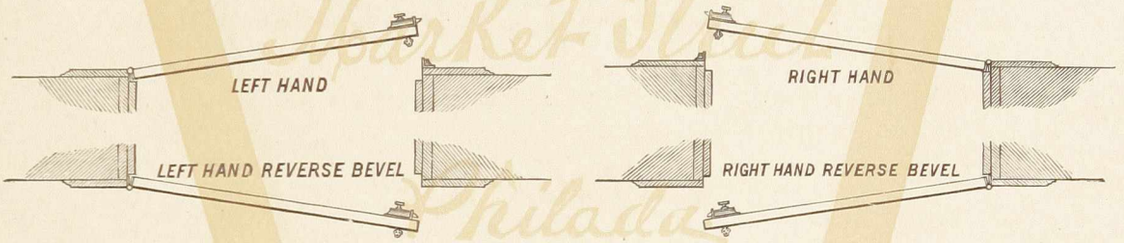

"Hand" of Locks, Latches, and Butts.

The following cuts, showing the several positions in which Locks, Latches, and Butts may be used upon Doors, are inserted as a guide to enable customers, when ordering, to properly specify if Right- or Left-hand goods are required. In the illustrations adopted below we have conformed, after careful inquiry, to the general practice of the Hardware trade in this particular.

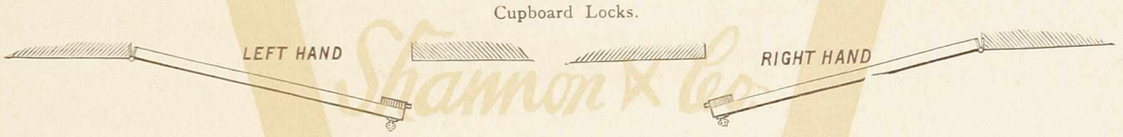

Mortise Locks.

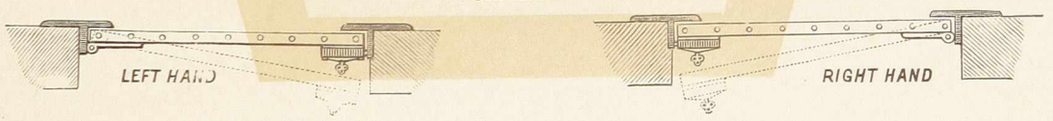

Rim Locks.

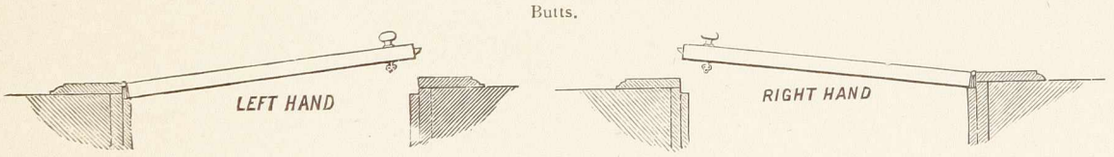

Cupboard Locks.

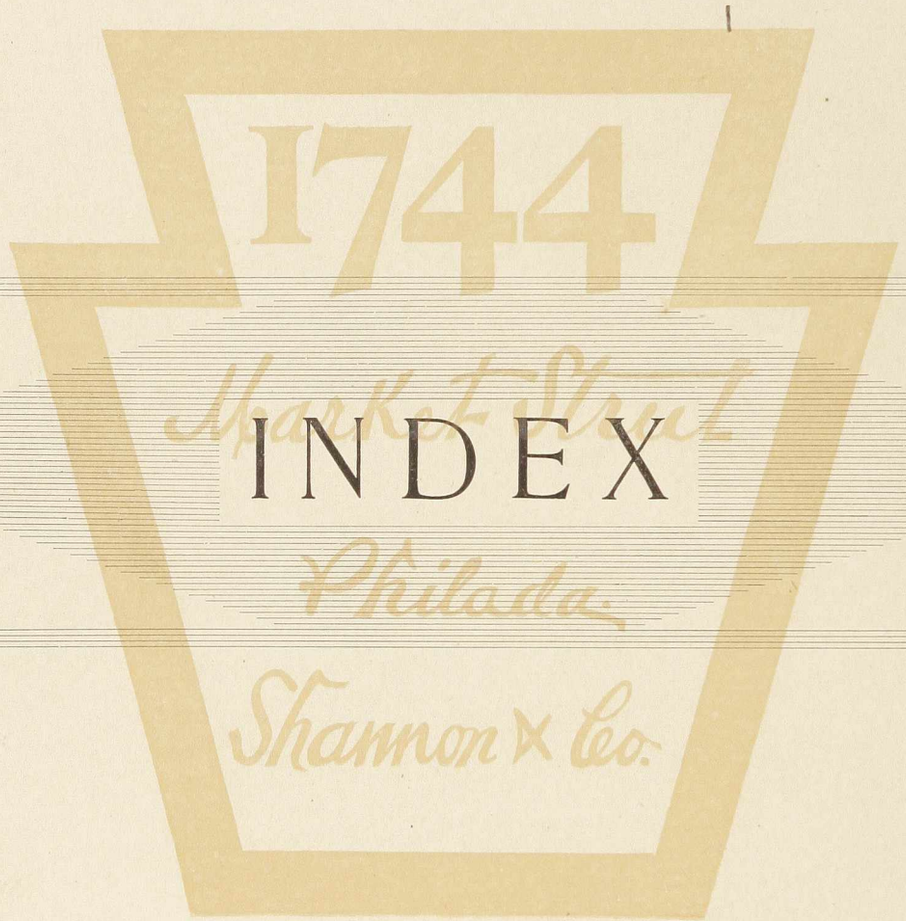

Cell Locks.

Butts.

Doors which require Right-hand Reverse Bevel Locks need Left-hand Butts, and *vice versâ*.
