Left Hand Door - LH
Right Hand Reverse - RHR

Right Hand Door - RH
Left Hand Reverse - LHR

- "DA" suffix (Delayed Action) is an optional feature.
- **NOTE:** For special applications a separate door and frame preparation template is packed with these instructions. Use this instruction sheet for installation sequence and closer adjustments only.
- Doors should be hung on ball bearing or anti-friction hinges.
- A separate door stop is recommended.
- Door and frame must be properly reinforced.
- Always adjust spring power before adjusting control valves.
- Adjust closing time speed between 3 and 7 seconds from 90° to 0°. Greater closing times may be required for elderly or handicapped.
- These door closers should NOT be installed on the exposed side (weather side) of exterior doors.

8000 Series

Non Hold Open Door Closers — Top Jamb Arm

Mark and Drill Holes

This template for use with standard butt hinges or 3/4 offset pivots.
For all other hardware, please consult factory for template.

Opening	Dimension "A"
	Inches (mm)
To 100°	7-1/2 (190.5)
100° to 130°	6-0 (152.4)
131° to 180°*	4-1/2 (114.3)

*Door/Frame/Hardware/Wall conditions permitting.

Centerline of Hinge or Pivot

7701-A Connecting rod required for reveals greater than 3" (76).

- Do not scale drawing.
- **Right hand door shown**, left hand opposite.
- Dimensions are in inches / (mm)
- Hollow metal door require channel or box type reinforcement when through bolt mount is specified.

- Sex bolts required for wood or plastic faced fire door mounting.
- Minimum thickness recommended for reinforcements in hollow metal doors and frames: .146" (2.66mm) unless otherwise specified.
- Maximum width hinge for this template is 5" (127).

Installation Sequence

Arm Placement in Shoe

Pinion Cap or Optional Cover

8300 Series

Screw pinion cap onto pinion shaft by hand or with a Phillips screw driver - DO NOT OVER TIGHTEN.

*Optional 8500M Metal Cover Installation

8000 Series

Spring Power Adjust

(Use 5/16" Socket or Adjustable Wrench for this Adjustment)

The closing force for series 8101, 8301 & 8501 door closers is adjustable from a size 1 to a size 6, as outlined in ANSI Standard A156.4. When these series of door closers are installed and adjusted to conform to ADA reduced opening force requirements (5 lbs max.) for interior doors, they may not have adequate closing force to reliably close and latch the door. Power adjustments charted on this page are recommended where possible, to ensure proper door control.
