

TUBULAR LID DISPENSERS/LID ORGANIZERS

LID DISPENSER MOUNTING INSTRUCTIONS:

Your new lid dispenser has been shipped to you partially unassembled so that you can quickly mount the dispenser in the location of your choice.

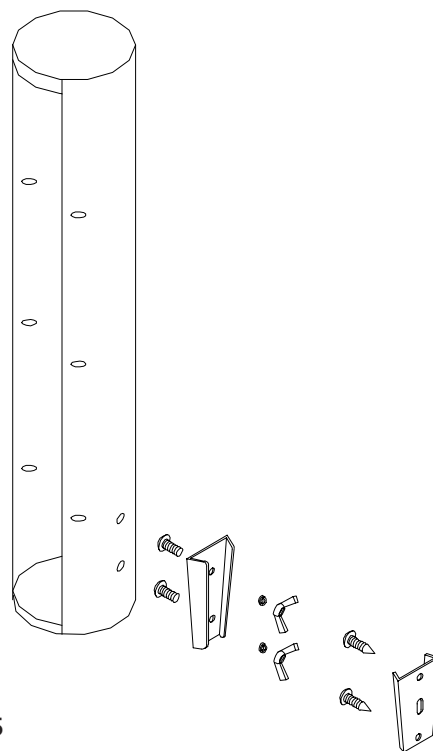

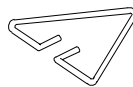

Using the enclosed screws and wingnuts, attach the longer bracket to the tube using 2 of the 6 provided mounting holes.

Attach the bracket so that the narrowest width is at the bottom.

Attach the shorter bracket to the desired mounting surface with the longer enclosed screws, also with the narrowest width at the bottom.

To add shelves, gently squeeze triangular shaped wire shelf dividers into desired slots.

This dispenser is made of stainless steel and can be easily cleaned with a non-toxic glass or general purpose cleaner.
