

Fixed Cameras

Quality in means quality out. The only way to guarantee that a clear accurate picture appears on your monitor is to start with a camera capable of feeding clear accurate pictures into the system. American Dynamics fixed CCD digital cameras do just that, giving you the best image every time. Our color models reproduce superior hues and render truer flesh tones. Our black & white series penetrates light levels as low as .03 lux. Our Camera Pre-Packs take the guesswork out of installation, providing everything you need — camera, lens, housing, mount and mounting hardware — and are pre-assembled for your convenience at no extra charge. Whatever your requirements, American Dynamics has the right camera for the job.

Cameras Pre-Packs:

Standard Pre-Packs include color or black & white cameras with a choice of lenses as well as indoor and outdoor housing mounts. **LookOut Pre-Packs** are available in non-vandal and vandal resistant versions. The non-vandal resistant version combines two options in one housing — it can either be flush or surface-mounted — and ships with two bubble liners, one black and one white. Select from two different bubble options: one for covert use or one for maximizing low light performance. The vandal resistant version features a housing made of heavy-duty cast aluminum with a high impact polycarbonate bubble, tamper-resistant hardware and a thermostatically controlled heater that keeps the camera operable in a wide range of temperatures. The choice of cameras for this version includes a Night-Saver equipped model.

Vandal Resistant Pre-Packs provide housings built with the same sturdy construction and optional thermostatically controlled heater as the LookOut Pre-Pack vandal resistant version. Ideal for anywhere surveillance equipment is subject to abuse, these pre-packs include a high resolution color camera with a vari-focal auto iris lens that produces sharp pictures in true colors that meet or exceed most viewing requirements. **Mini- and Micro-Camera Pre-Packs** feature a low-profile fixed drone with a pre-installed camera that can be surface-mounted to any ceiling or wall. **Bullet Camera** and **Motion Detector Camera Pre-Packs** are also available.

Color Cameras:

Our color Digital Signal Processing (DSP) cameras produce natural rich images, making it easier to identify your subject or discern a red car from a green one in instances when knowing the difference really matters. We design and test for color accuracy in every imaginable kind of lighting from halogen, sodium vapor and mercury vapor to fluorescent and natural sunlight.

Each of our CCD color cameras can serve a multitude of applications. We offer economical, efficient models for entry level and general purpose installations where cost and reliability are paramount. We also offer high end advanced feature models equipped with auto iris lens type detection, Night-Saver mode, seven backlight compensation (BLC) zones and DVR-Saver mode, which conserves valuable space on your hard drive by reducing file size up to 30% when used with the Intellex Digital Video Management System.

Black & White Cameras:

Our black & white cameras feature full-performance high resolution imagers and perform amazingly in minimal light. All models are infrared light-sensitive, making them the perfect choice for covert operations when used with IR illuminators. When it means the difference between illuminating a dark area such as a parking garage or installing low-light cameras, these models can save you enough money to pay for themselves.

A COMPACT PACKAGE

LookOut Pre-Packs come fully assembled and ready to install. These small and discreet cameras fit almost anywhere.

Identical in appearance to the LookOut indoor mini dome, the housing-only LookOut drone provides an economical alternative for deterring crime.

1 CHOOSE FEATURES THAT MAKE A DIFFERENCE

VANDAL RESISTANT

- Vandal resistant cast aluminum housings with polycarbonate bubbles
- Surface dome, flush dome housing options
- Indoor and outdoor versions with light and dark tinted bubbles
- IP66 and NEMA4 rated (outdoor versions)
- 1/3" CCD high resolution color (480 TVL) and 1/3" CCD high resolution color (480 TVL) with Night-Saver camera options
- Wall and pendant mount kits available for surface housings
- 4-9 mm vari-focal auto iris lens installed
- 24 VAC and 12 VDC auto detect power connections
- Backlight compensation
- Video Service Connector (order separately - ADLOSLC)
- Internal or adjustable line lock
- ADLOVS series:
Dimensions: 100 x 138 x 98 mm
(3.94 x 5.43 x 3.86 in)
Weight: 1.2 kg (2.65 lbs)
- ADLOVFI series:
Dimensions: 120 x 140 x 98 mm
(4.72 x 5.51 x 3.86 in)
Weight: 1.0 kg (2.2 lbs)

NON-VANDAL RESISTANT

- 1/3" CCD high resolution color (480 TVL, NTSC only)
- 1/3" CCD standard resolution color (NTSC only)
- Includes two interchangeable bubbles (clear and tinted)
- Includes two interchangeable bubble insert liners (black and white)
- Includes two options in one housing (flush mount and surface mount)
- 4-9 mm vari-focal auto iris lens installed
- 2.9 mm fixed focal fixed iris lens option (ADLONDIS29N)
- 24 VAC and 12 VDC auto detect power connections
- Backlight compensation
- Video Service Connector (order separately - ADLOSLC)
- Internal or adjustable line lock
- ADLOND Series:
Dimensions: 100 x 138 x 98 mm
(3.94 x 5.43 x 3.86 in)
Weight: 0.5 kg (1.1 lbs)
