EL-411PIXIM
720TVL Indoor Box Camera

Sleek, yet powerful – the EL-411PIXIM box-style camera. This camera includes the I-Sniper chipset in a standard and convenient box-style camera chassis. The EL-411PIXIM incorporates the I-Sniper imaging chipset, allowing for outstanding WDR compensation, and superb low light performance. The camera itself supports a wide array of standard C/CS mount lenses. I-Sniper, the most accurate chip in the world, is an imaging solution created exclusively by Pixim for IC Realtime. I-Sniper cameras deliver clear, detailed images in real-world scenes, night and day, even under challenging, mixed lighting conditions. I-Sniper cameras have been custom tuned with camera settings specifically for ICRealtime's line of DVRs, resulting in 25-45% longer recording times vs. non-optimized, 3rd party cameras.

*Lens not included.
