

Our focus is making professional video surveillance easy for everyone

Safe data storage and excellent usability

BOSCH

Invented for life

Frank Moore, owner of Keymusic

“I don’t know the first thing about security systems”

Having a lot of valuable instruments in stock, I wanted to make sure nothing happens to them. As much as I know about musical instruments, I’m really not into video security systems and computers. Since they hooked me up with the DIVAR IP 2000 storage unit and IP cameras, I can access my professional surveillance system with my smartphone or tablet from anywhere at any time, to make sure my shop is okay.

Frank

**“What I needed
was a solution
that’s both easy
and reliable.”**

Setting up an IP video security system **was never this simple**

With the DIVAR IP 2000 storage device it is now possible to equip a small or medium business with the most professional and user-friendly video surveillance solution in no time. Even the maintenance is hassle-free, because the DIVAR IP 2000 and the Bosch IP cameras can be updated remotely.

Out-of-the box installation in just three steps!

Installers can get to work instantly. There's no need to be an IP specialist; after the cameras have been mounted, the system can be up and running in about 15 minutes. All that's needed is a tablet or notebook to complete the installation. Our set-up wizard will provide step by step guidance for easy installation.

**“Let the wizard
do the installation.”**

Rick Dailor, independant installer

“I was honestly surprised how easy it can be to install a cutting edge system like DIVAR IP 2000”

It's that easy!

**1**

Install the cameras

There are four different DIVAR IP 2000 kits to choose from, each with different Bosch IP cameras to meet a variety of security needs. Depending on the size of the facility, it is possible to connect up to 16 IP cameras to the DIVAR IP 2000. After mounting the cameras, they can be connected to the DIVAR IP 2000.

**2**

Connect the DIVAR IP 2000 storage unit

The DIVAR IP 2000 can be placed anywhere in the building - even in a reinforced cabinet or safe - to make sure it is protected at all times. When all the cameras are connected, go to the web address to start the configuration.

**3**

Set-up and configure with our web-based wizard

The configuration is a matter of running through a few quick steps. Our web-based wizard offers a simple guide through the process and works on any PC or tablet with LAN access. It takes as little as fifteen minutes and automatically recognizes the DIVAR IP 2000 and the connected IP cameras.

Complete access and control from anywhere at any time

The free Video Security app, together with Dynamic Transcoding technology from Bosch - standard in the DIVAR IP 2000 -, offers instant access to smooth live streams or HD images from a mobile device, regardless of available bandwidth. Because camera streams can be accessed using a tablet, there's no need to connect a keyboard or monitor to the DIVAR IP 2000.

Additionally, it is possible to control the cameras or retrieve the right data quickly from stored video. The app allows specific camera footage to be shown in a given time zone instantly. This offers maximum freedom and flexibility to monitor a facility from anywhere at any time.

Bosch Video Security App

- Intuitive user interface
- Works on iOS / Android mobile devices
- Smooth live streaming video and HD images, regardless of bandwidth
- Access and control from anywhere 24/7
- Quickly retrieve the correct data (forensic search)

**“Now I don’t need
to be in my store
to take a look around.”**

Surveillance solutions designed around your needs

Depending on the intended use, Bosch offers four different DIVAR IP 2000 kits. Every kit is designed around specific installation conditions to make choosing the right one as easy as possible. All kits offer 24/7 remote access to live video or recordings and high definition images for effective retrospective analysis. Whichever kit is chosen, the system can be easily expanded with extra storage capacity and additional cameras.

Choose your security solution kit

DIVAR IP 2000 Kit 1: indoor

Installation examples: restaurants, small retail shops or home security.

Designed for small indoor installations. The cameras can be mounted on a wall or shelf and are perfect for constant and homogeneous lighting conditions with indoor lighting at night.

Contents

- 2 x TINYON IP 2000 HD camera
- 1 x DIVAR IP 2000 (2 x 2 TB) recording unit (4 TB: 60 days 24/7 recording for 2 cameras)
- 1 x Network switch: 8 network ports with 4 supporting PoE (Power over Ethernet)

Order No.: DIP-2042EZ-NPC1

DIVAR IP 2000 Kit 2: design indoor

Installation examples: hospitality, clothing shops and small offices.

Designed for small indoor installations where, in addition to video security, aesthetics play an important role. The cameras can be mounted on the ceiling and are perfect for constant and homogeneous lighting conditions with indoor lighting at night.

Contents

- 2 x FLEXIDOME IP micro 2000 HD dome camera
- 1 x DIVAR IP 2000 (2 x 2 TB) recording unit (4 TB: 60 days 24/7 recording for 2 cameras)
- 1 x Network switch: 8 network ports with 4 supporting PoE (Power over Ethernet)

Order No.: DIP-2042EZ-NUC1

“To me it’s not just about valuable stuff. I’d like to give my employees a sense of security.”

DIVAR IP 2000 Kit 3: surveillance and intrusion

Installation examples: restaurants, small retail shops or home security.

Designed for small and medium-sized indoor installations where video surveillance is combined with intrusion technology. The cameras feature a built-in passive infrared (PIR) sensor and a 720p HD imaging sensor and can be mounted on a wall or shelf. They are perfect in situations with constant and homogeneous lighting conditions without the need for indoor lighting at night.

Contents

- 4 x TINYON IP 2000 PIR camera
- 1 x DIVAR IP 2000 (2 x 2 TB) recording unit (4 TB: 30 days 24/7 recording for 4 cameras)
- 1 x Network switch: 8 network ports with 4 supporting PoE (Power over Ethernet)

Order No.: DIP-2042EZ-NPC2

DIVAR IP 2000 Kit 4: indoor and outdoor

Installation examples: hospitality, clothing shops, offices and gas stations.

Designed for small and medium-sized indoor/outdoor installations where aesthetics are important. The indoor cameras can be mounted on the ceiling and are perfect for constant and homogeneous lighting conditions with indoor lighting at night. Outdoor security in dark, poorly lit areas (e.g. parking lot, driveway) is done by the outdoor camera that can be mounted on a wall.

Contents

- 3 x FLEXIDOME IP micro 2000 HD dome camera
- 1 x FLEXIDOME IP outdoor 4000 IR weather resistant dome camera
- 1 x DIVAR IP 2000 (2 x 2 TB) recording unit (4 TB: 30 days 24/7 recording for 4 cameras)
- 1 x Network switch: 8 network ports with 4 supporting PoE (Power over Ethernet)

Order No.: DIP-2042EZ-NUC2

The black box

DIVAR IP 2000 storage unit

Designed for video surveillance

The DIVAR IP 2000 storage unit is specifically designed for video surveillance and 24/7 operation. This means the hard drives withstand continuous reading and writing, whereas traditional NAS servers are mainly built for storing pictures and other files.

Third party camera support

The DIVAR IP 2000 supports ONVIF profile S. The storage unit works seamlessly with a wide range of available IP cameras.

Ease of use

A smart, simple and fast way to install and use from a notebook or mobile device with network access. The intuitive set-up wizard will guide you through the installation and configuration process.

Fail-safe

Every single hard drive in the DIVAR IP 2000 storage unit runs its own operating system. Even if one or more hard drive(s) should fail, the storage unit will keep running.

Mirroring

It is possible to configure the DIVAR IP 2000 to mirror video data. When choosing the 'mirror' option during the installation process, the DIVAR IP 2000 meets RAID-1.

Extended warranty

At Bosch we offer a three-year warranty on all our products, including our hard disks.

“This black box holds the same technology that is used in airport security or government buildings.”
