

# FLIR TCX

THERMAL MINI BULLET CAMERA

The **FLIR TCX Mini Bullet** is the first class of security cameras to combine high-contrast thermal video, intrusion detection, and accurate video alarm verification in one affordable device. Not affected by changes in lighting or inclement weather, the TCX Mini Bullet outperforms comparably priced visual cameras at night and in challenging lighting conditions, helping eliminate false alarms. Providing safety, and thermal monitoring of halls and areas surrounding buildings, the TCX Mini Bullet has the flexibility to integrate anywhere you need it, indoors or outdoors – even in cold climates. Perfect for public buildings, industrial facilities, commercial businesses, and high-end residential, the TCX Mini Bullet enables a whole new range of applications for thermal imaging in one affordable device.
