

NOD398

5-Megapixel Outdoor IR Dome Camera

1/3" Lumii sensor, H.264, triple streaming, remote zoom and auto focus, ICR day/night, 20m (65ft) IR, WDR, 3DNR, SDXC/SDHC card slot, IP67, IK10

The NOD398 is a professional 5-megapixel motorized IP dome camera designed for detail-demanding outdoor surveillance, delivering superior high definition video quality up to 30fps. A true day/night camera, the NOD398 features enhanced sensitivity backed by proprietary low light technology, IR night vision and 3DNR to provide unprecedented image clarity under the cover of darkness. The built-in heater and the weatherproof enclosure ensure the camera is suited for outdoor deployment. The NOD398 also features installation-facilitating motorized zoom with auto focus and the unique modular design for recessed mount, making it a versatile solution across various applications.

ONVIF

Motorized Lens for Remote Zoom and Auto Focus

The motor-driven zoom functionality enables configuration over the network to achieve the optimized viewing angle of the monitored area. Auto Focus can be also done with just one simple mouse click, simplifying the installation significantly for faster and easier setup.

True Day/Night with Mechanical ICR

Featuring IR Cut Filter Removable (ICR) function, the camera is perfect for capturing truer color images at day time by filtering out IR. At night, IR is allowed for the camera working in B/W mode and being more sensitive to IR, thereby capturing clearer monochrome images.

Flexible Installation with Dual Mount Design

With no extra bracket needed, the camera's detachable modular housing design uniquely allows for the option of recessed in-ceiling mount in addition to surface mount, providing installers with greater flexibility to deploy the camera for discreet installation locations.

Built-in Heater Powered by PoE

The camera is equipped with built-in heater that can be powered by PoE without requiring extra power supply. It is an ideal feature for extreme weather applications, ensuring camera operation at as low as -40 °C (-40°F).

3D Noise Reduction

The 3DNR technology takes traditional DNR a step further, removing digital artifacts and grainy appearance from frame to frame, while maintaining image sharpness at low light settings, which results in more efficient bandwidth utilization and less storage space consumption.

ONVIF Profile G Compliant

Profile G refines the interoperability between live video, video storage and recording. NOD398 can be integrated with third-party video management systems of Profile G specification, and support SD/mSD card on-board video storage, search and retrieval capabilities, and media playback.
