

IP SpeedDome IP Programmable Dome Cameras

Features That Make a Difference:

- ONVIF-compatible
- Uses the intuitive Illustra Connect tool to make installation and configuration fast and easy
- Improved video and audio streaming
- 22x and 35x optical zoom
- Supports 30ips NTSC and 25ips PAL in H.264, MJPEG, MPEG-4 and ACC
- PoE leverages existing IT network infrastructure to reduce installation and startup costs
- 35x series offers 540 TVL, Electronic Image Stabilization, True Day/Night, and Wide Dynamic Range
- Time-stamped video and audio can provide synchronized information
- Up to 32 privacy zones
- Supports up to 96 preset positions with user-defined titles and 16 preset sequences
- Built-in web server
- Fully compatible with VideoEdge NVR v4.01 and Intellex IP

Leveraging the same innovative features found in the analog programmable dome cameras and adding the power of IP, IP SpeedDomes are available with either 420x total zoom (35x optical zoom with 12x digital magnifier) or 242x total zoom (22x optical zoom with 11x digital magnifier).

The 35x series includes powerful features that contribute to IP SpeedDomes high image quality including Electronic Image Stabilization, Wide Dynamic Range (WDR) and True Day/Night.

IP SpeedDomes offer de-interlacing which significantly improves picture quality by removing artifacts caused by capturing moving images at separate points in time. De-interlaced images enhance visual quality, reduce the workload for downstream image compression, and save storage space.

ONVIF compatibility allows the IP SpeedDome ready interoperability with other ONVIF-compliant third party NVRs. The Illustra Connect tool allows you to find this camera anywhere on the network.

Compatible with VideoEdge NVRs and Intellex IP, the IP domes support H.264, MJPEG, MPEG-4 and Active Content Compression (ACC) technology. Powerful bandwidth management capabilities allow the domes to monitor a single IP stream

and limit the amount of compressed data to a user-controlled threshold.

A built-in web server allows you to configure the domes and stream video using Internet Explorer version 6 and higher. An intuitive control interface lets you adjust images per second and resolution based upon specific viewing/recording requirements. In addition, you can easily access presets, patterns, and other programmable features.

Up to 16 streaming clients simultaneously are now supported. There is also added support for RTSP/TCP, RTP/RTSP/TCP, and RTP/RTSP/HTTP/TC, and full stream sharing to multiple clients.

Based on privilege level, you can access all or some of the functionality via the web:

- Live video and camera controls, as well as configuration of video, presets, patterns, scans/sequences, privacy zones, audio and camera settings.
- Configuration of the PTZ functionality overlay settings, areas within the field of view, alarms, sequences, scheduled tasks, video settings and audio.
- Networking configuration of camera date and time, TCP/IP, user rights, SMTP, FTP, firewall, general maintenance and advanced settings.
