

# HEAVY DUTY WALL MOUNT

## WALL MOUNT RACK

---

**24"/12U, 36"/18U, 48"/26U**  
PREMIUM DATACENTER PRODUCTS

---

The Heavy Duty Wall Mount Rack is designed to support load capacities up to 300 pounds. It is constructed with a fully welded tubular steel internal chassis encased in formed sheet metal to prevent deflection under heavier loads. The rack also has a continuous safety edge for use in high-traffic areas.

The enclosure features swing-out capabilities for front and rear equipment access. The lockable rear sub-panel is removable and can be wall mounted prior to hanging the enclosure body. Cable knockouts in the top and bottom provide flexibility for specific cable and conduit configurations. The vented top and bottom panels promote proper cooling and accept fan kits and filters. The locking rack door is removable and reversible and is available in a Plexiglas or solid configuration.

### APPLICATION

---

- Retail/Schools
- Space Limited Areas
- Warehouse
- Security Systems

### SPECIFICATIONS

---

- Fully Welded Construction: 300 lbs. weight capacity
- 19" rackable per EIA-310-D Standard
- (2) sets of adjustable mounting rails
- Right or left hinge locations available, (Right-side standard)
- Locking door and rear compartments, keyed alike
- NEMA and custom configurations are available
- UL Listed

### MODEL SIZES

---

- Height: 24"/12U, 36"/18U, 48"/26U
- Width: 22"
- Depth: 24", 30"
- Rails: 10-32 Tapped
