# KEKAB KEY SECURITY CONTROL SYSTEMS

KEKAB-60

The variety of sizes and capacities of these KEKABS are ideally suited for key storage in homes, hotels, apartment buildings, motels, industrial plants, schools and institutions.

KEKABS offer a handy, central location for keys, under security conditions. KEKAB doors and panels have piano type hinges, and are locked by a five disc tumbler cam lock.

No. KEKAB-30 (30 Keys) 12 x 8 x 2½ inches. Shipping Weight: 4 lbs.

No. KEKAB-60 (60 Keys) 17 x 13 x 3¼ inches. Shipping Weight: 10 lbs.

No. KEKAB-110 (110 Keys) 17 x 13 x 3¼ inches. Shipping Weight: 11 lbs.

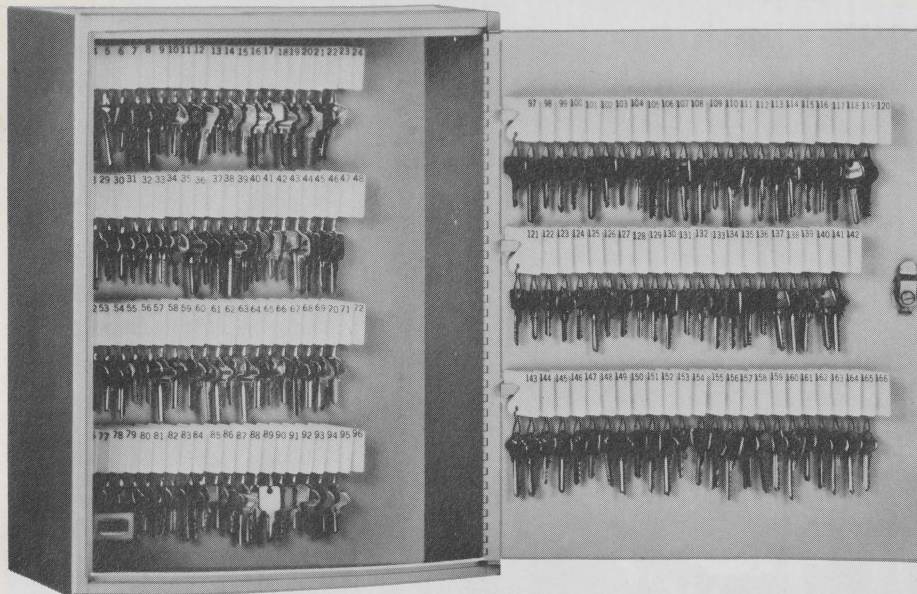

# KEKAB KEY SECURITY CONTROL SYSTEMS

## TWO EXPANDABLE KEKABS

WITH ALL HARDWARE AND INSTRUCTIONS

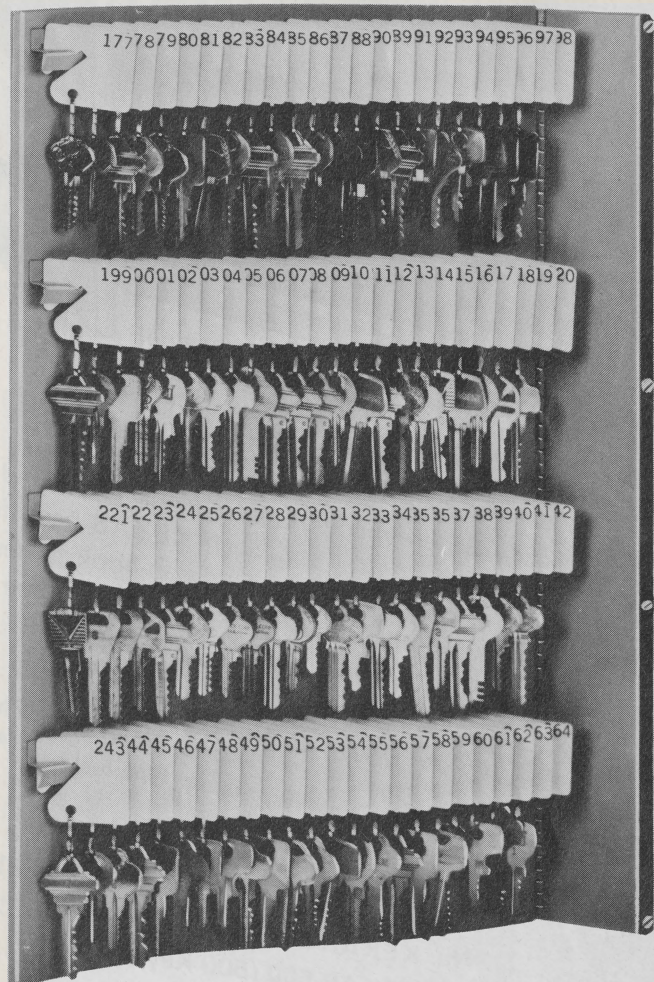

KEKAB-160X (SHOWN ABOVE) AND  
KEKAB-260X ARE SPECIALLY  
DESIGNED TO ACCEPT THE  
ADDITION OF THE EXPANSION LEAF

### EXAMPLE OF AN EXPANSION LEAF

**No. KEKAB-A** — Expansion Leaf Kit is for use with No. KEKAB-160X shown above. It increases the capacity to 330 keys. All attaching hardware is included. Has tags numbered 161 thru 330, with snap hooks — plus a control chart.

**No. KEKAB-B** — Expansion Leaf Kit is for use with No. KEKAB-260X shown above. Increases the capacity to 500 keys. All attaching hardware is included. Has tags numbered 261 thru 500, with snap hooks — plus a control chart.

**No. KEKAB-160X**, 160 Key Capacity. 20" x 16½" x 5". Shipping Wt. 18 lbs. Expandable to 330 key capacity. See Expansion Leaf below.

**No. KEKAB-260X**, 260 Key Capacity. 25¼" x 17¾" x 5½". Shipping Wt. 24 lbs. Expandable to 500 key capacity. See Expansion Leaf below.

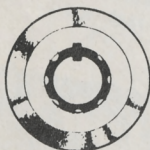

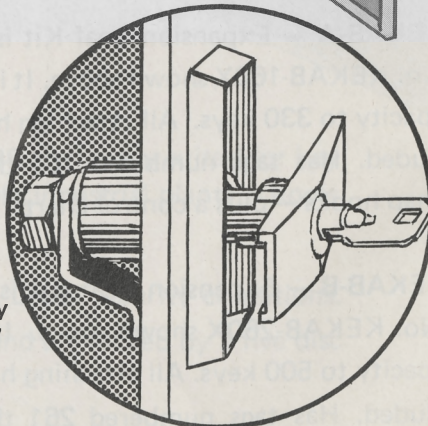

# KEKAB KEY SECURITY CONTROL SYSTEMS

KEKABS are made of heavy gauge metal and finished in a textured neutral tan. Each KEKAB has a full complement of numbered tags with snap hooks. These KEKABS offer a full view of all key panels and come with a key control chart.

**NOTE:** KEKAB-260X, 500 and 730 have a heavy duty locking "T" Handle, incorporating a high security 7 pin tumbler, tubular type lock.

- No. KEKAB-240 (240 Keys) 20 x 16½ x 5 inches. Shipping Weight: 23 lbs.
- No. KEKAB-330 (330 Keys) 20 x 16½ x 5 inches. Shipping Weight: 23 lbs.
- No. KEKAB-500 (500 Keys) 25¼ x 18 x 5½ inches. Shipping Weight: 33 lbs.
- No. KEKAB-730 (730 Keys) 25¼ x 18 x 7 inches. Shipping Weight: 48 lbs.

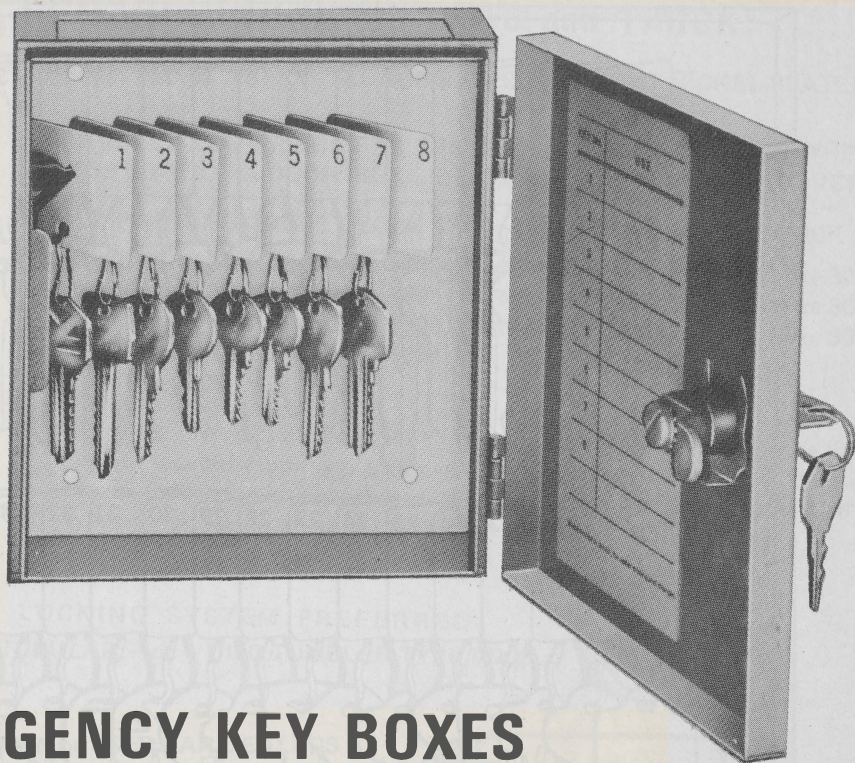

# KEBOX-8 CABINET

## No. KEBOX-8

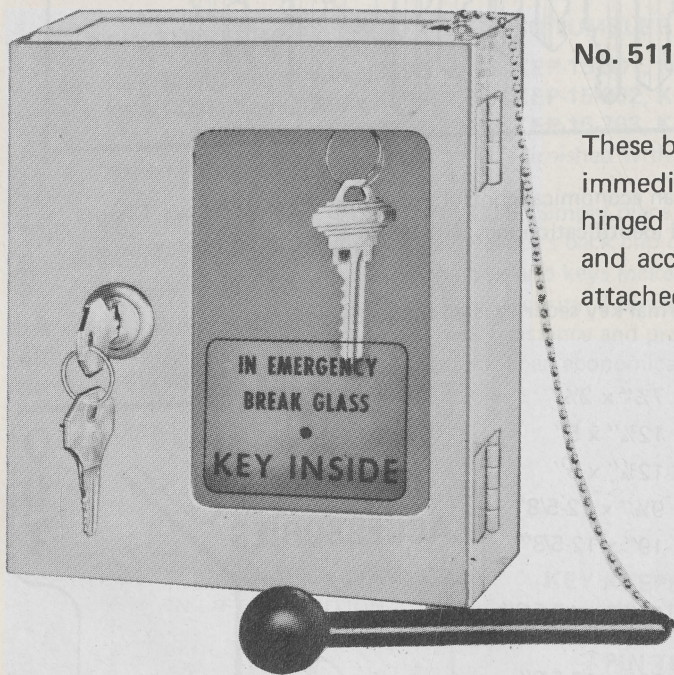

5 $\frac{3}{4}$ "W x 6 $\frac{5}{8}$ "H x 2"D

This compact, 8 key capacity cabinet offers an opportunity for security control of a lesser number of keys for offices, gas stations, homes, etc. A convenient, locked central location.

*ALL CABINETS ON THIS PAGE ARE CONSTRUCTED ACCORDING TO THE SAME HIGH QUALITY STANDARDS OF MATERIAL AND WORKMANSHIP, AS USED IN THE GENERAL KEKAB LINE.*

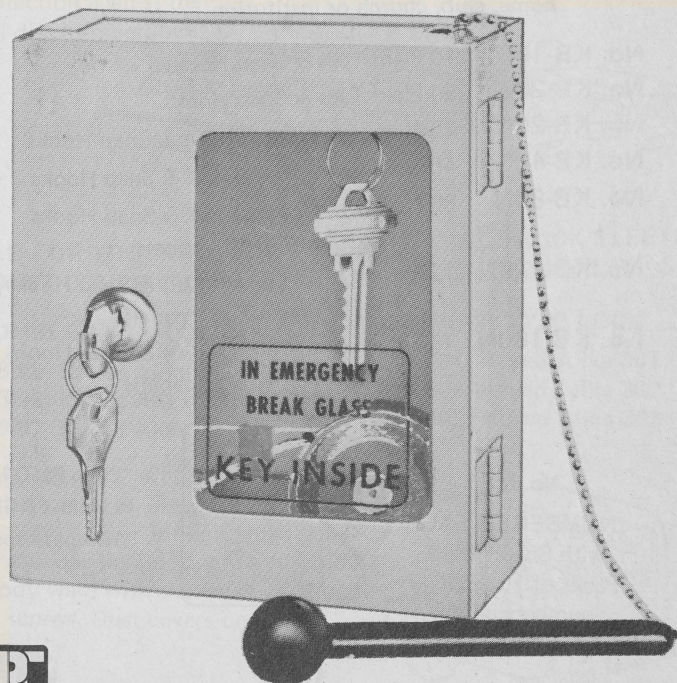

## EMERGENCY KEY BOXES

### No. 511 - 5 $\frac{3}{4}$ "W x 6 $\frac{5}{8}$ "H x 2"D

These boxes are designed to house a restricted door key at the immediate location. The bright red steel box has a key-locking hinged door with a glass window. When an emergency arises, and access to a specific key is necessary, break glass with the attached hammer. Replacement glass panels are available.

### No. AL-511

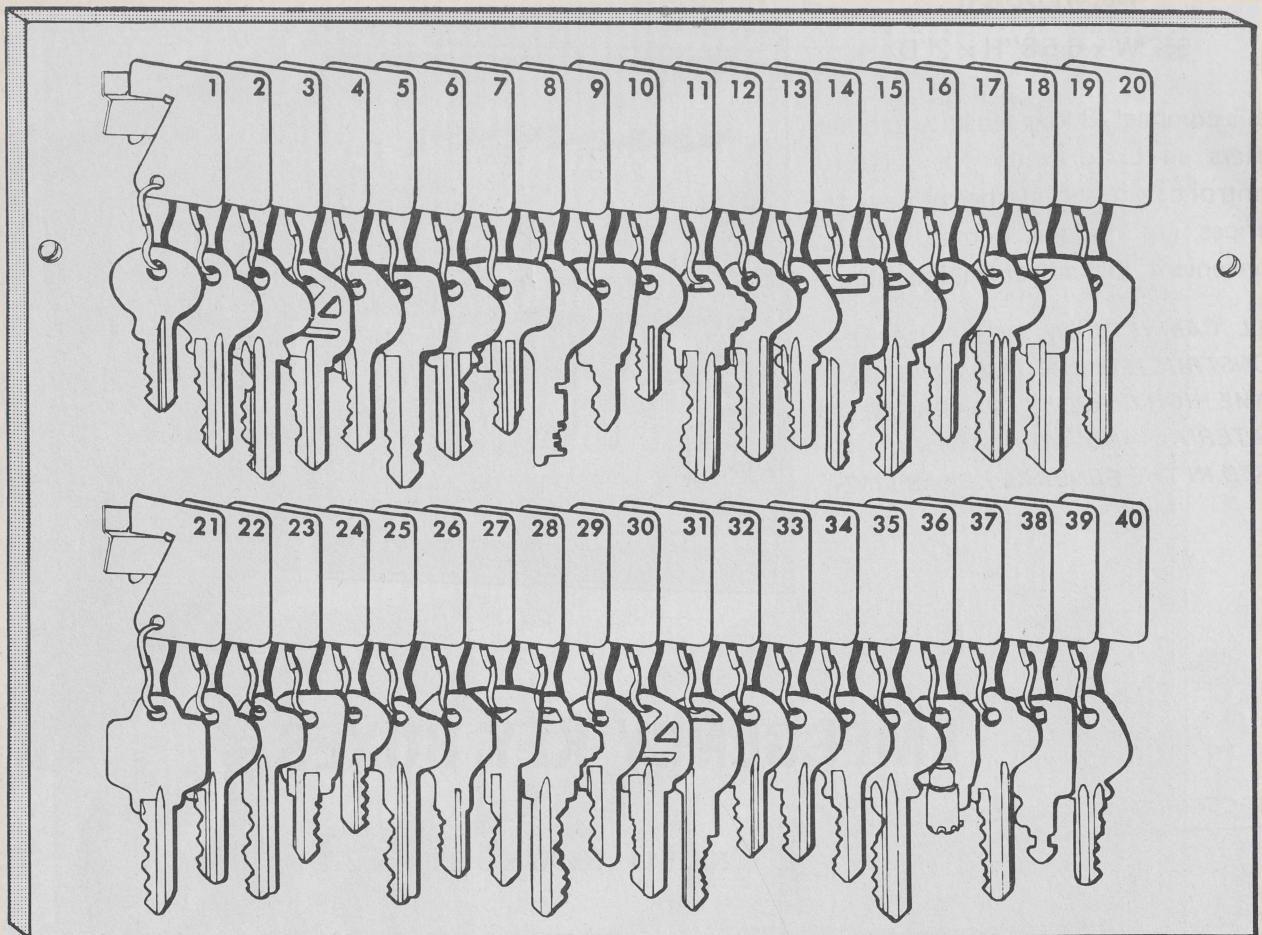

— WITH AN ALARM!

*A LOUD, CONTINUOUSLY SHRIEKING HORN BECOMES ACTIVATED ON BREAKING GLASS!*

# KEKAB KEY CONTROL RACKS

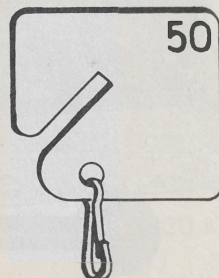

These KEY CONTROL RACKS are designed to offer an economical control system for 10 to 160 keys. Choose the rack size required. The open file arrangement and identification tags with hooks, provide an open-view and ready convenience in a central location.

This should prove to be a desirable system where informal key security is all that is needed. Ideal for use in any home, club, church or institution.

No. KEP-14-96, Keyed Alike 3396  
No. KEP-14-97, Keyed Alike 3397  
Furnished With One Key Per Box

### DISC TUMBLER TYPE LOCK

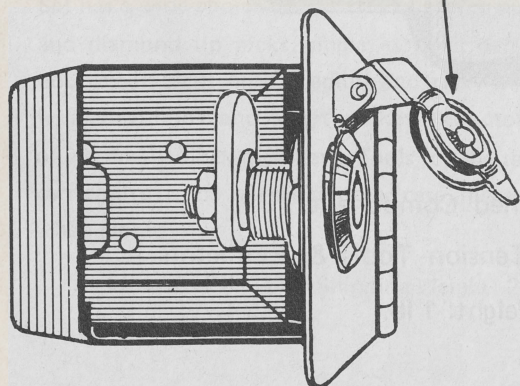

No. KEP-15-301, Keyed Alike 301  
No. KEP-15-302, Keyed Alike 302  
No. KEP-15-303, Keyed Alike 303  
Furnished With Two Keys

END LOSS OF AUTO KEYS ON CAR LOTS! Simply place car's keys into box. Lower the door window and slip the Key Keeper's back clip over the top edge of the glass. Rolling window up, secures the box and keys locked within, against all but extreme and deliberate vandalism. High security 7 pin tumbler tubular lock with dust cover, offers both excellent pick resistance and protection against the elements. Choose a 7 pin tumbler tubular lock or an economical disc tumbler lock.

SPRING ACTION DUST COVER  
IN LIFTED POSITION

**KEY KEEPER FOR TRUCKING FIRMS, COMMERCIAL TRUCK FLEETS**  
With DUST COVER OVER LOCK. BOX SIZE: 2 1/2" x 2 1/4" x 1 1/2"

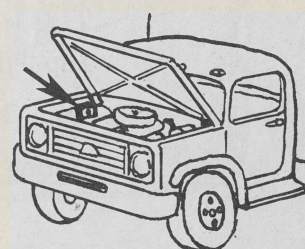

### 7 PIN TUMBLER KEY LOCK

No. KEP-16-95, Keyed Alike 3395  
No. KEP-16-96, Keyed Alike 3396  
No. KEP-16-97, Keyed Alike 3397

### DISC TUMBLER TYPE LOCK

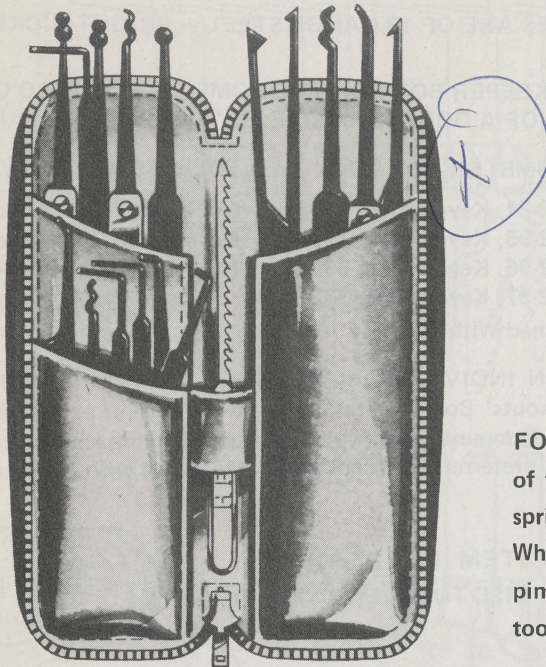

No. KEP-17-301, Keyed Alike 301  
No. KEP-17-302, Keyed Alike 302  
No. KEP-17-303, Keyed Alike 303

KEEP KEYS SECURE WITHIN A TRUCK. Helps to eliminate loss of ignition keys for large fleets. Key Keeper is like a small bank vault. Mount under the hood, onto an inside fender or body wall, with the three, included sheet metal screws. Dust covers on locks.

## DELUXE PICK SET

Shirt Pocket Size

Top Grain Leather Case

Tools are of Spring Steel

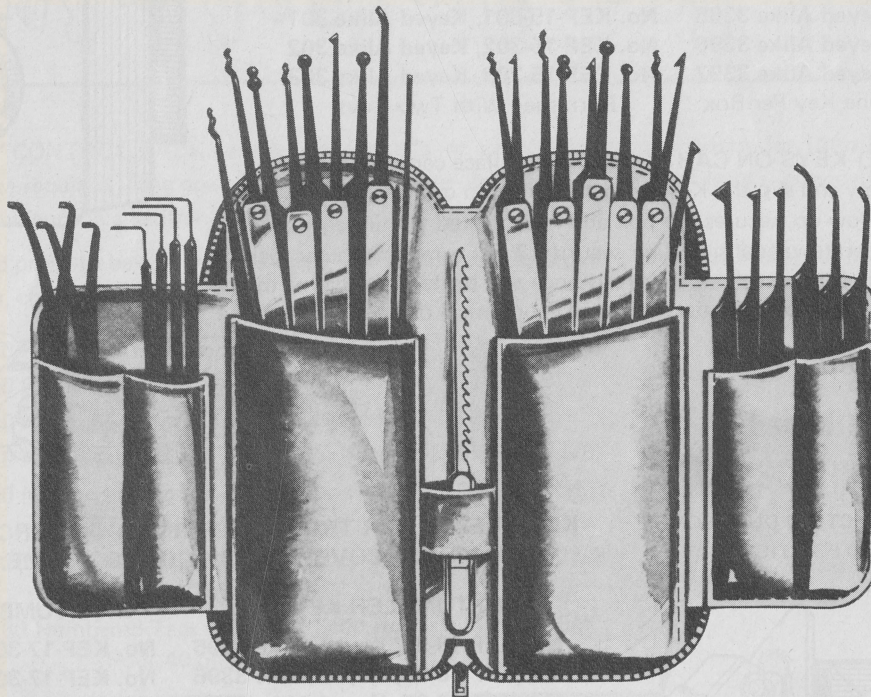

16 Picks, Tension Tools, & Extractors

Shipping Weight: 5 ounces

No. NDPK

FOR YEARS, H.P.C. picks have been the standard choice of the industry. Each pick is made of hard finished clock spring steel, tempered to the correct degree of hardness. Whether the subject is wafer tumbler locks or six and seven pin tumbler locks, H.P.C. picks provide the best quality tools for the particular job at hand.

## SUPERIOR PICK SET

No. NDPK-32

Hip Pocket Size

Hand Finished Components

Top Grain Leather Case

32 Picks, Tension Tools & Extractors

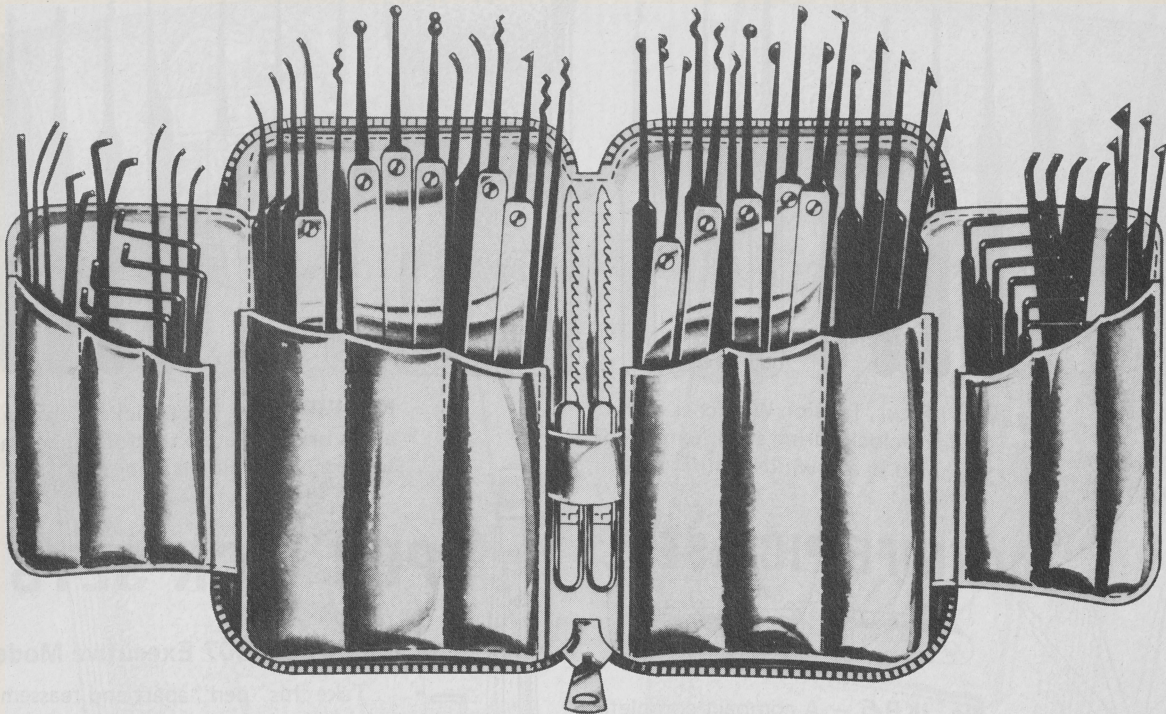

Spring Steel Tools

Shipping Weight: 1 lb.

# PROFESSIONAL PICK SET

No. NDPK-60 Shipping Weight: 1 lb.

The Professional Pick Set is a wise choice for either the newcomer or master locksmith. It is a general assortment of the most popular picks, tension wrenches, key extractors and feelers, manufactured by the world's largest producer of locksmith picking tools.

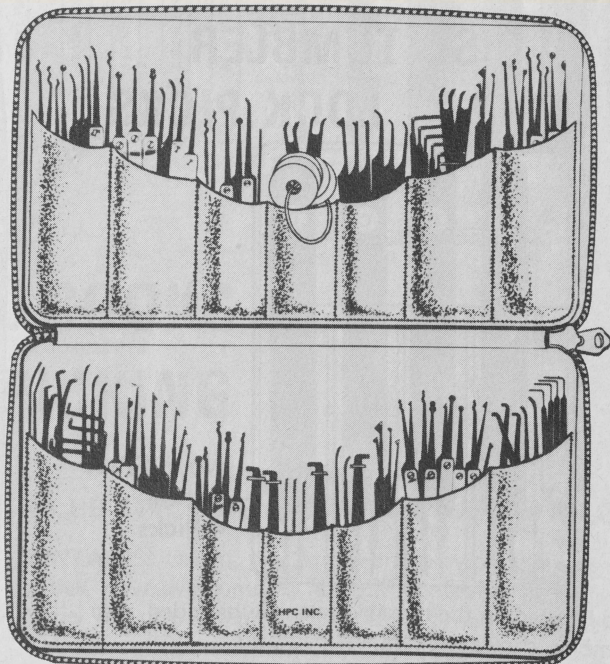

Contains full, half and three-quarter rakes and diamond tip picks, single, double, half double ball picks; light, medium and heavy weight tension wrenches of various lengths and styles, hook and saw type key extractors, and many more tools vital to the trade.

## PARAMOUNT PICK SET

The Paramount Pick Set is available for the discriminating locksmith who desires an extensive assortment of lock picking tools, so that replacements will be unnecessary for some time.

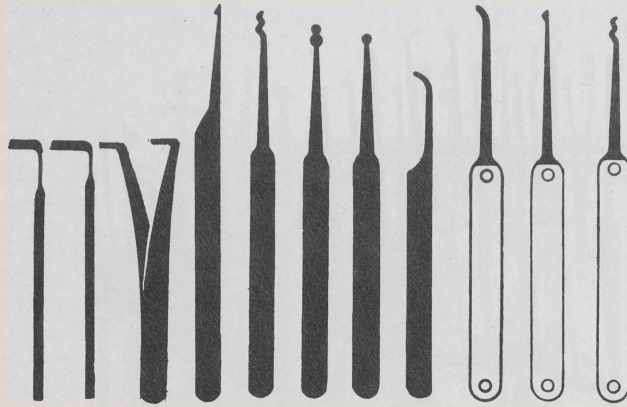

Set has a wide choice of full, half and three-quarter rakes and diamond tip picks; single, double, half single and double ball picks; light, medium and heavy weight tension wrenches; hook and saw type key extractors and a set of warded padlock pick keys. Tools for the technician, all carried in a handy leather zippered case, measuring 9"x 6" when closed.

No. NDPK-100 Shipping Weight: 2 lbs.

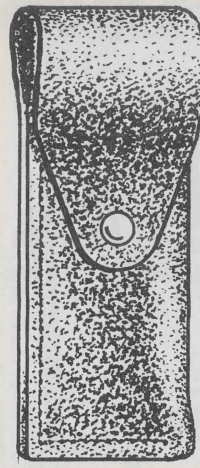

## NOVICE PICK SET

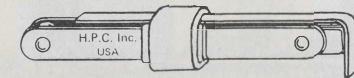

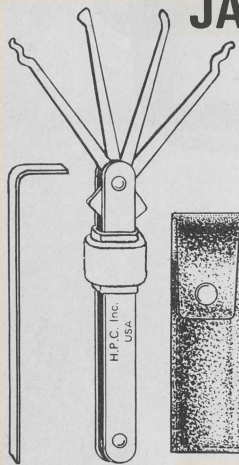

**No. PIP-13** — Contains 11 Picks, Tension Wrenches and a broken key extractor. Made of clock spring steel, tempered to the right hardness. Contained in a cowhide leather case.

## TYRO PICK SET

**No. PIP-15** — Has 9 Picks, Tension Wrenches and a broken key extractor, all contained in a top-grain, cowhide leather case.

## JACKNIFE PICK SET

**No. JKP-5** — A compact complete Pick Set to use on pin and disc tumbler locks. Has 2 rakes, 1 diamond 1 hook and 1 tension wrench. A big performer, that folds into a small, self-contained unit.

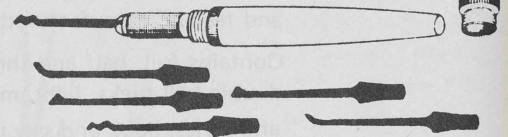

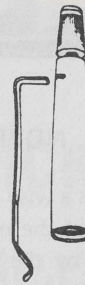

Have one — in your pocket, on the workbench and in your travel kit.

An **OPTIONAL LEATHER CASE** is available. **No. JPO-1**, 4" L x 3/4" W.

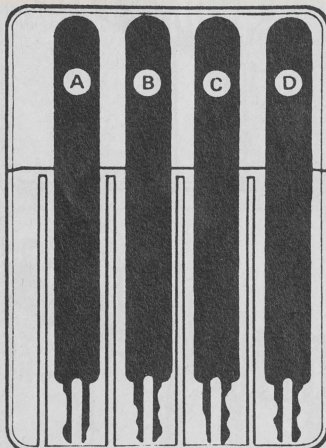

## PEN PICK SETS

### No. EP-007 Executive Model

Take this "pen" apart and reassemble it into an effective pick set. Complete with 3 types of picks, a holder and a tension wrench. Can be quickly put to use as a lock pick.

## DOUBLE-SIDED DISC TUMBLER LOCK PICKS

**No. DSP-1**  
Set of  
4 Picks

To be used on the most popular double-sided, disc tumbler, showcase, cam and padlocks.

Replacements available. Specify **No. DSP-A, B, C, or D**; when ordering.

*LOOKS LIKE A PEN, but it is easily converted to become an effective PICK SET!*

### No. VIPS-1 — has a DOUBLE-END COLLET!

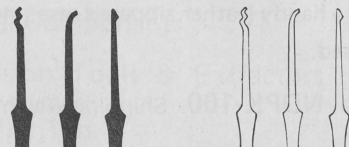

CAST  
ALUMINUM  
BODY

Unscrew the lower half-section. Inside are stored two sets of the most popular types of picks. The black are .025" thick and the silver ones, .020" thick.

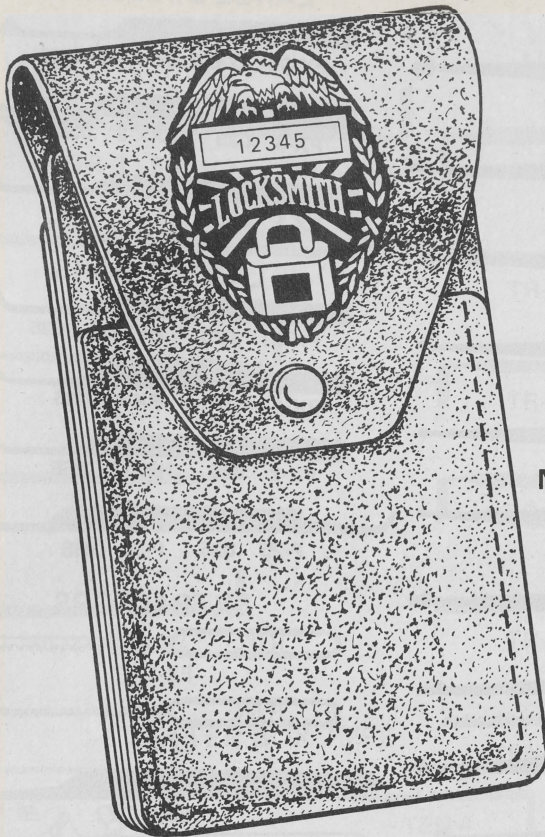

Unscrew the double-end collet from the upper section. Use the black picks in the black end of the collet and only the silver picks go into the silver tip.

Turn the black top-piece to release the clip. The clip serves as the tension wrench!

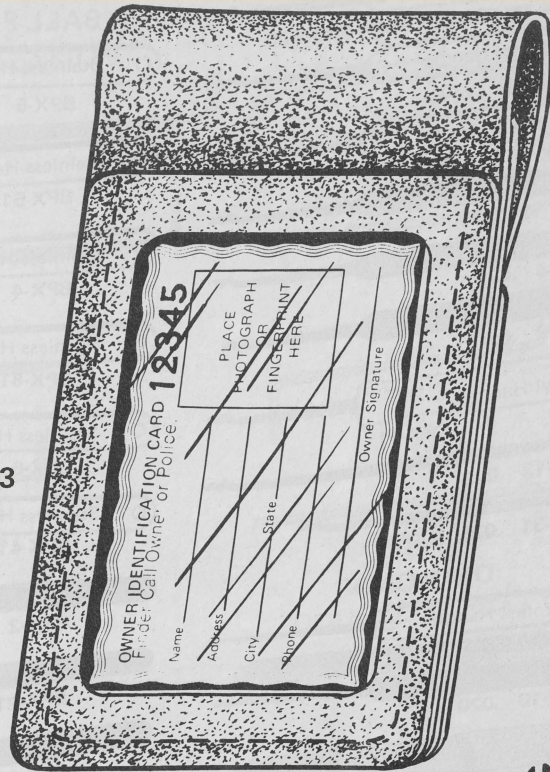

# I.D. BADGE PICK SET

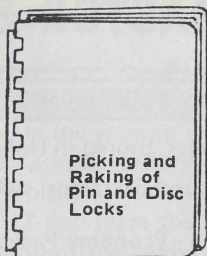

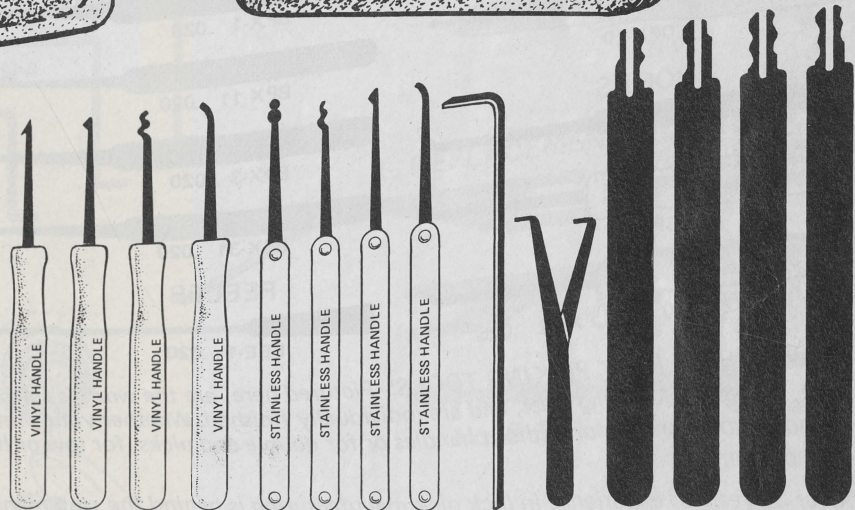

No. PIP-23

A handy way to carry a lock picking set AND a means of identification in the same unit! On the front side is a heavy, rhodium plated metal, black enameled badge with an inscribed registered number. On the back, there is a pocket containing an identification card with the same registered number and space for a photograph or thumbprint of the bearer.

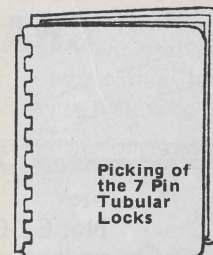

Inside this top grain leather case is a complete pick set consisting of 4 vinyl handled picks, 4 stainless steel handled picks, 2 tension tools and a set of 4 double-sided picks for disc tumbler locks.

## No. BB-1 PICKING and RAKING of PIN and DISC TUMBLER LOCKS

CONTAINS: Preliminary preparations before picking. Picking procedures. Proper tools and how to use them on various types of tumbler locks.

## PICTORIAL BOOKS on LOCK PICKING

## No. BB-2 PICKING of the 7 PIN TUBULAR LOCK

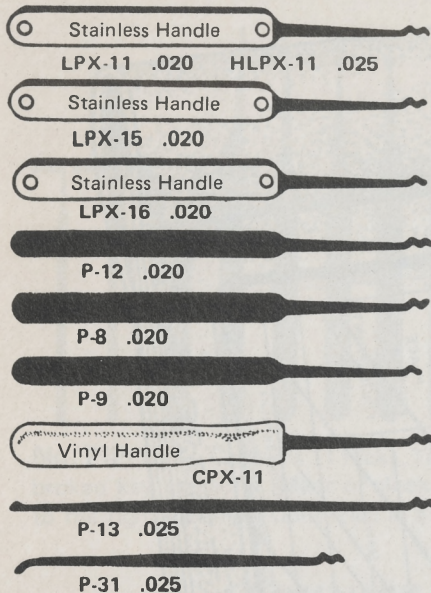

CONTAINS: Origin, pinsettings and previous picking difficulties, now overcome by the H.P.C.-Gruber picking tool. Proper use of picking tool for tubular type locks. The new "Open-Face" type tubular lock, and the picking tool for it.

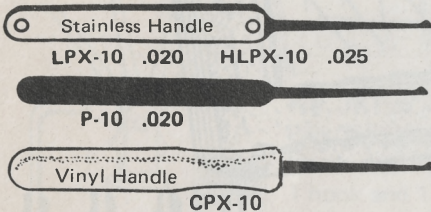

# PICKING TOOLS

## LARGE HOOKS

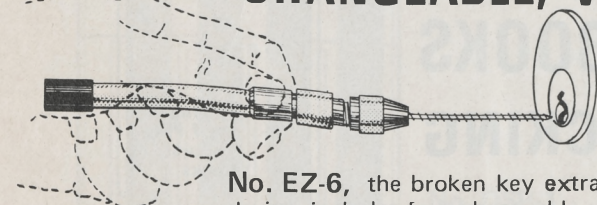

## EXTRACTORS

**ABOUT THESE LOCK PICKING TOOLS:** Pictured here, are the world's finest lock picking tools. They are produced from blue, oil tempered spring steel, and are individually finished. Whether your preference is for light or heavy weight rakes, diamond or hooks — with or without handles or for double end picks, for saw or hook type extractors; the required tool can be found here.

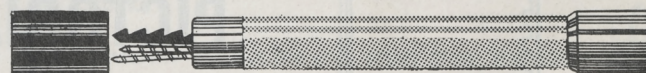

Over 38 years of experience in lock pick manufacturing is behind the statement of "H.P.C. Picks — the Best". A majority of locksmiths, the world over, prefer and rely on H.P.C. lock picking tools. They are made of American materials, in America.

## CHANGEABLE, VISE-HEAD KEY EXTRACTOR SET

**No. EZ-6**, the broken key extracting device, includes four changeable extractor blades. By removing the plastic cap at the back end, the hollow handle can be found to contain:

- One saw type extractor blade
  - Two round extractors, .040" diameter
  - One round extractor, .050" diameter
- Firmly secure one for use, into the split, 4-jawed vise head

Enlarged View of Extractor Blades, Stored in Hollow Handle  
Enlarged, Tip-End View of Round Extractor

### REPLACEMENT BLADES - Economy Packs of 10

#### No. EZ-7A

10 Saw type extractor blades only

#### No. EZ-7B

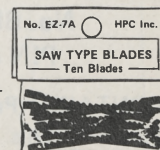

10 Round type extractors, .040" diam.

#### No. EZ-7C

10 Round type extractors, .050" diam.

#### No. EZ-7D

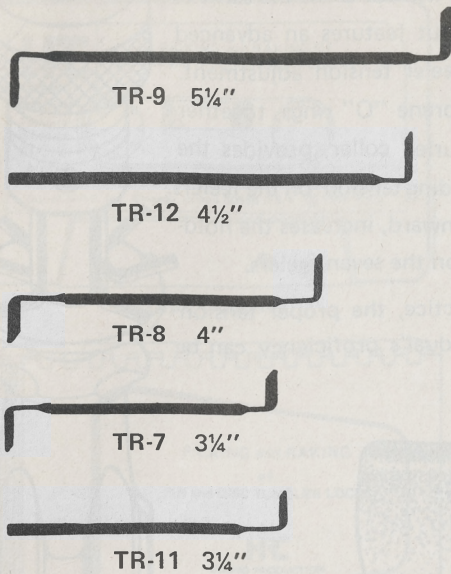

10 assorted — 4 of 7A, 4 of 7B, 2 of 7C

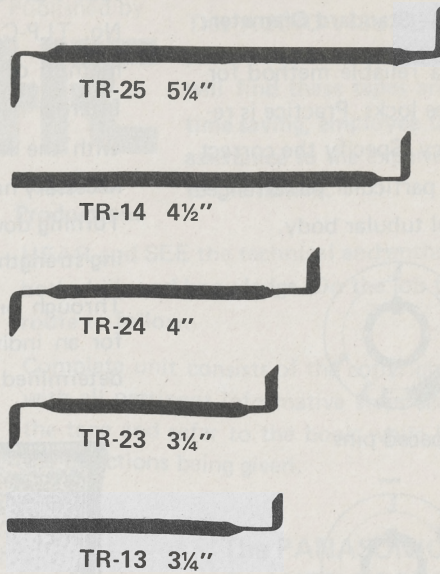

# TENSION WRENCHES

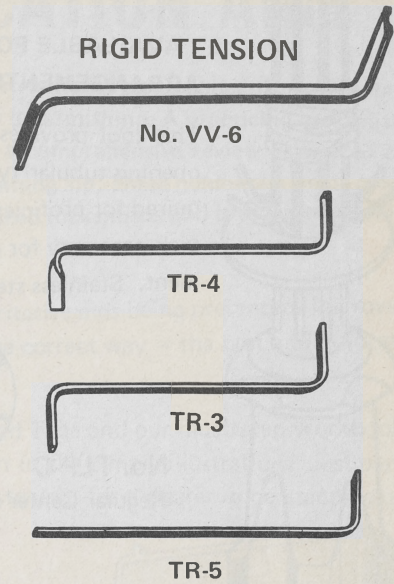

## LIGHT TENSION

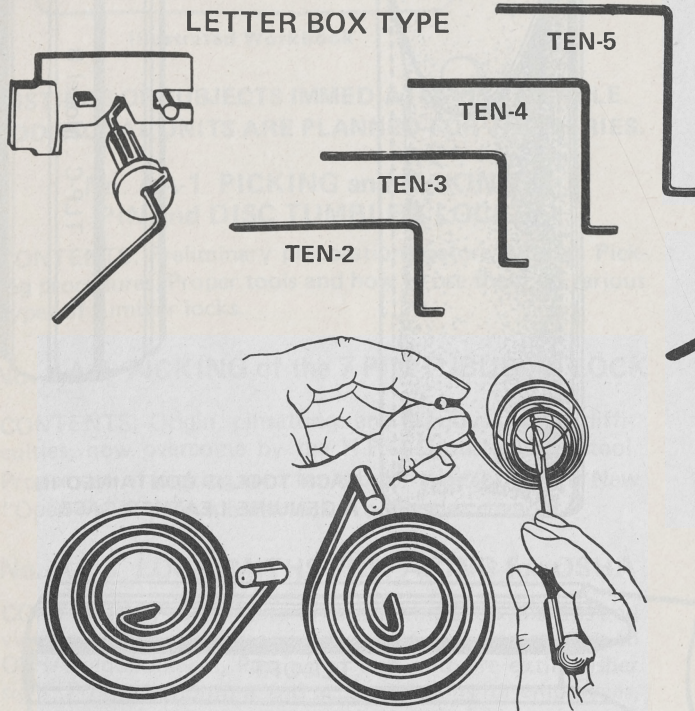

## MEDIUM TENSION

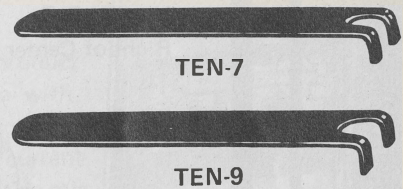

## RIGID TENSION

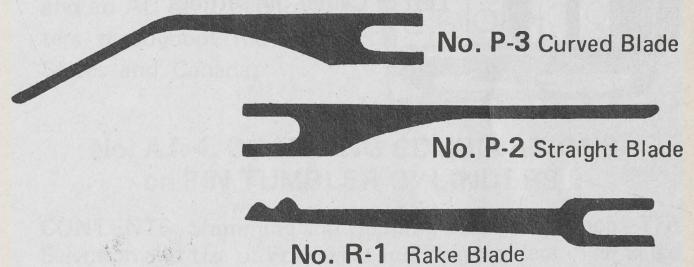

## LETTER BOX TYPE

## DOUBLE-SIDED TYPE

## REPLACEMENT PICK NEEDLES

## The FLIP-IT . No. TO-2

If, when picking a lock you find that the core has been turned the wrong way in the attempt to open, do not release and begin to re-pick! Insert a small screwdriver into the lower portion of the keyway on the picked lock to keep the tension. Then choose the correct FLIP-IT and place the centered tail-end of the coil into the upper section of the keyway. Holding the handle of the coil, vigorously wind the FLIP-IT towards the direction that the core is to be turned; quickly withdrawing the screwdriver. This action will *FLIP* the core to the picked position.

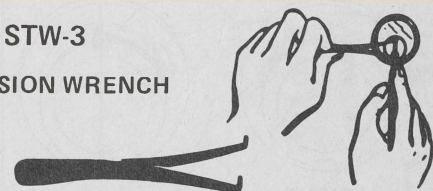

Two tools are in the set. One winds and turns to the right, while the other works to the left.

## CORRECT TENSION WRENCH USAGE

Proper use of the tension wrench will determine the degree of success in lock picking. Different keyway shapes require different sizes and types of wrenches. In general, a user with a "heavy hand" will have better results with light weight wrenches.

Only through practice can one determine the correct type of wrenches needed.

## STW-3 TENSION WRENCH

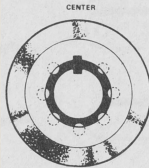

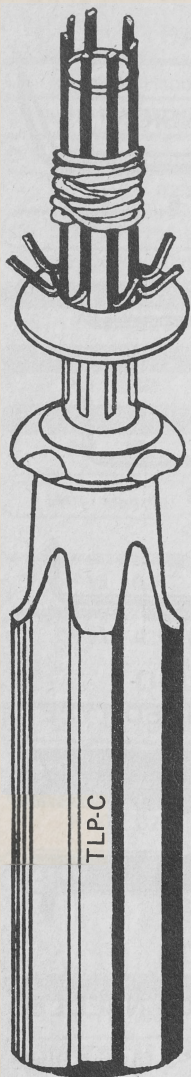

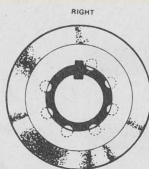

# TUBULAR LOCK PICKS

## AVAILABLE FOR ALL THREE PIN ARRANGEMENTS — Standard Diameter.

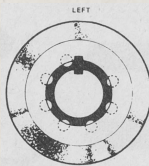

This tool provides a reliable method for opening tubular type locks. Practice is required for proficiency. Specify the correct pick necessary for a particular pin arrangement. Stainless steel tubular body.

**No. TLP-C**  
Regular Center spaced pins

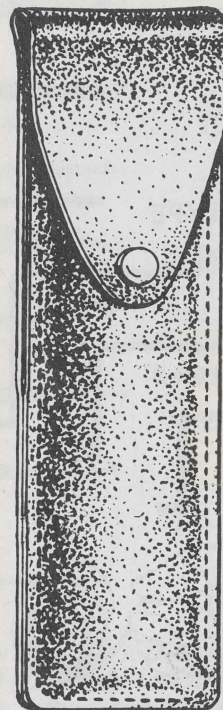

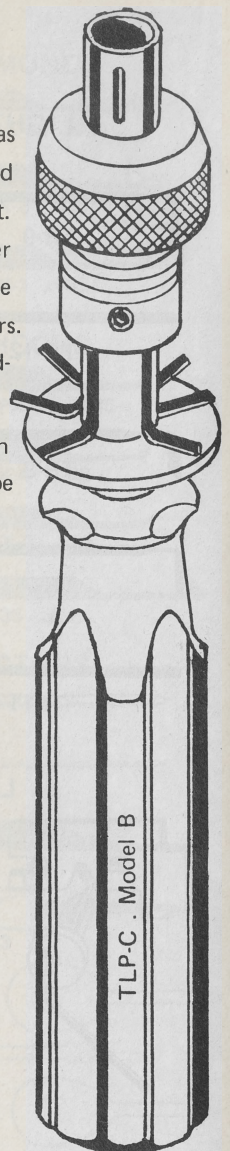

**No. TLP-R**  
Right of Center pin setting

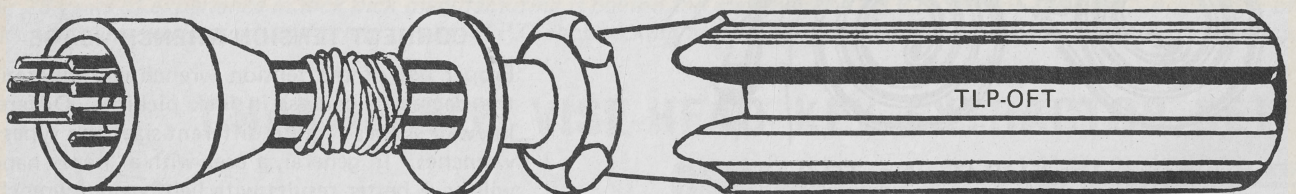

**No. TLP-L**  
Left of Center pin settings

**No. TLP-C, Model B** - is the same as No. TLP-C, but features an advanced method of feeler tension adjustment. Internal neoprene "O" rings, together with the knurled collar, provides the necessary holding tension on the feelers. Turning downward, increases the holding strength on the seven feelers.

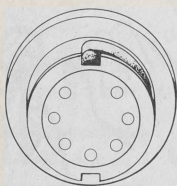

Through practice, the proper tension for an individual's proficiency can be determined.

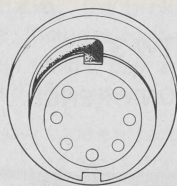

EACH TOOL IS CONTAINED IN A GENUINE LEATHER CASE.

## LOCK PICK FOR THE "OPEN-FACE" TYPE OF TUBULAR LOCK

**RIGHT TURNING**

**LEFT TURNING**

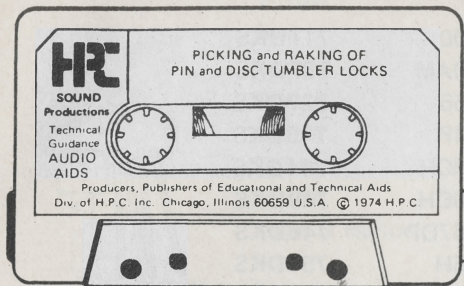

## **No. TLP-OFT**

This is a hand crafted tool that has a stainless steel tube, holding and guiding seven pick-feelers. The tube is permanently bonded to a comfortable handle. Thoroughly inspected and tested with instructions for proper use included.

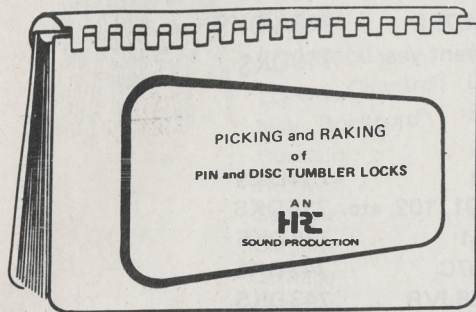

# AUDIO-VISUAL TECHNICAL EDUCATION AIDS

Tape Cassette

Illustrated Workbook

LISTINGS OF SUBJECTS IMMEDIATELY AVAILABLE.  
ADDITIONAL UNITS ARE PLANNED FOR THIS SERIES.

## No. AA-1 PICKING and RAKING of PIN and DISC TUMBLER LOCKS

CONTENTS: Preliminary preparations before picking. Picking procedures. Proper tools and how to use them on various types of tumbler locks.

## No. AA-2 PICKING of the 7 PIN TUBULAR LOCK

CONTENTS: Origin, pinsettings and previous picking difficulties, now overcome by the H.P.C.-Gruber picking tool. Proper use of picking tool for tubular type locks. The New "Open-Face" type tubular lock. Tool is also covered.

## No. AA-3 LOCKSMITHS PREPARING for OSHA

CONTENTS: Federal rules on preventing shop mishaps and violations, to avoid fines and penalties. Keeping records to OSHA requirements. Posting of exit and fire extinguisher signs. Proper conditions and accommodations for employees, equipment, machinery and hazardous materials.

Published by

SOUND  
Productions

This AUDIO-VISUAL instructional series concerns many vital procedures in the field of locksmithing. A practicing locksmith will find these tapes are a comprehensive review as well as a time saving, employee training aid. These guides can be of great assistance to the experienced locksmiths and is most invaluable to the novice.

HEAR and SEE the technical and authoritative aids being presented. Improve both skills and knowledge. Do the job the correct way — the best and quickest route to follow.

Complete unit consists of the copyrighted Tape and our illustrated Workbook with all pertinent informative steps seen in the simple illustrations. Just play the tape and refer to the book while listening, for a clearer understanding of the directions being given.

## The PANASONIC TAPE PLAYER-RECORDER No. PCTR-1

Quality name brand product recommended for use with H.P.C. Sound Productions. Battery or AC house current powered, built-in sensitive microphone, automatic stop system, earphone jack, batteries and an AC cord. Service Centers throughout the United States and Canada.

## No. AA-4 CHANGING COMBINATIONS on PIN TUMBLER CYLINDERS

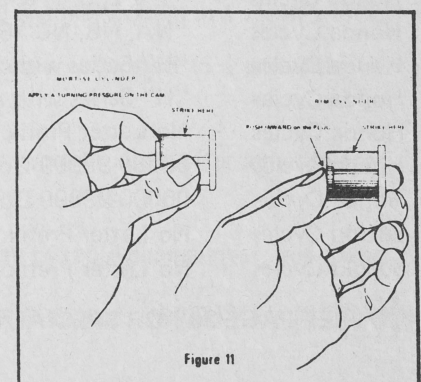

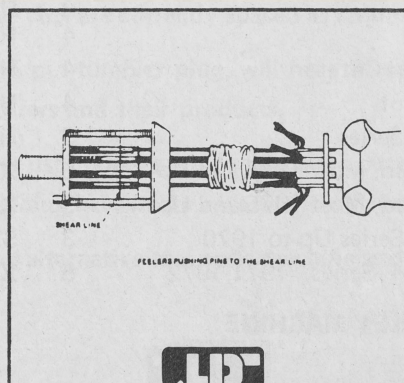

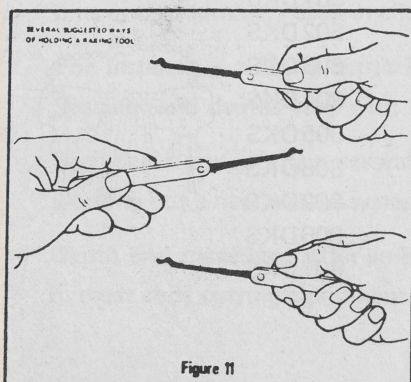

CONTENTS: Shimming and Rapping a Cylinder Open - The Selection and Use of Followers and Plug Holders - The Selection and Use of Pin Kits - Loading the Plug by "The Eye Method", "Miking the Key and Plug Diameter" and "The Pin Decoder Method".

## LEVER TUMBLER LETTERBOXES

Cutler	Cutler mail chute "C" series	7	78 Taylor	765DKS
--------	------------------------------	---	-----------	--------

A SET OF DEPTH and SPACE KEYS contains a cut key for each of the different depths used in a given series or a particular locking mechanism. All the cuttings on a key are to the same depth, repeated as many times as the number of pins or disc tumblers used in a lock. These cuts are correctly spaced as required by the tumbler system in a specific lock.

For instance — a No. 3 depth key for a 5 pin tumbler plug, will have 5 correctly spaced cuts; each to a No. 3 depth. Spacings and depths vary with manufacturers and their products.

Such depth key sets have several time-saver uses. They are valuable when cutting a key by code. They offer a method for working out a new master system or for adding keys under an established system.

Depth and space keys offer an inexpensive alternative to a code machine and the ability of rapid change-over, not found in most code cutting equipment.

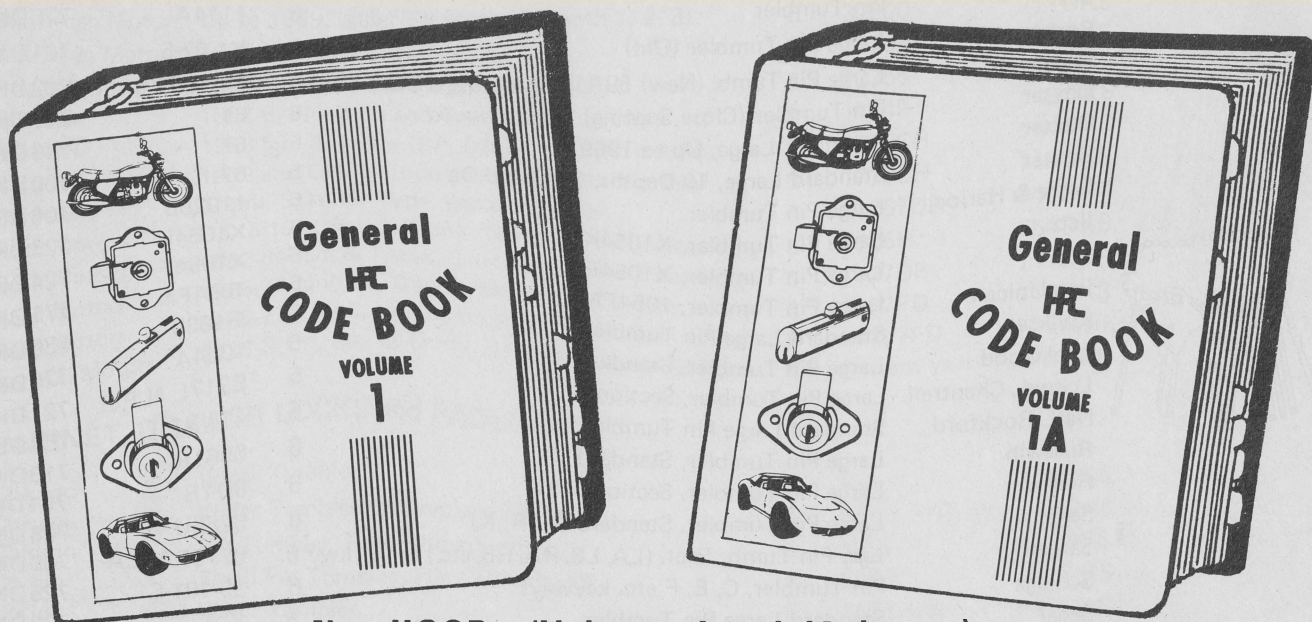

SEE PAGE 30 FOR SPECIAL DEPTH KEY MACHINE

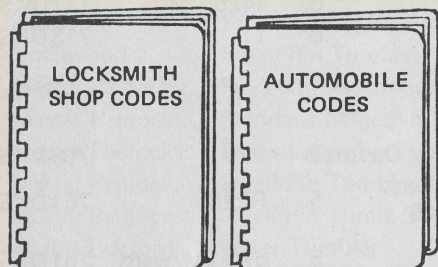

# GENERAL CODE BOOKS

**Most Widely Used — *Because they are THE BEST!***

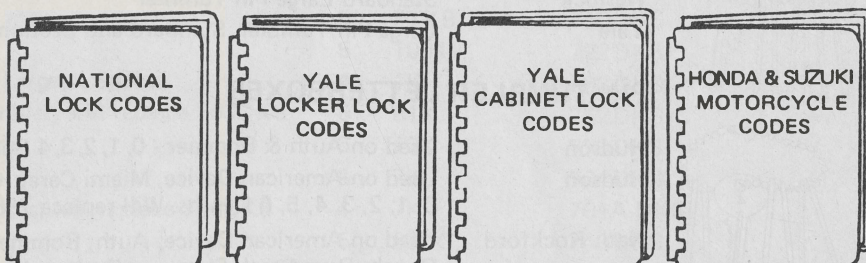

**No. HGCB (Volumes 1 and 1A in set)**

**Volume 1 contains these two books**

**Volume 1A contains these four books**

**VOL. 1 —** Contains a large variety of miscellaneous codes for Cabinet locks, drawer locks, letterbox locks and padlocks. Covers products by Auth, Bommer, B & S, Chicago, Corbin, Couch, Eagle, Ilco, Illinois, Keil, and others. This collection has the variety of codes needed in the daily shop routine of fitting keys.

Included are the hard-to-get codes for Chicago "FR" and "AMG" series, used on bowling alley equipment; and the pin tumbler type letterbox locks in the "BH" series.

Also has the most up-to-date automobile codes for General Motors, Ford, Chrysler, American Motors, Studebaker, Kaiser, Diamond, Harley Davidson — and more.

**VOL. 1A —** Has National of Rockford code listings for their wafer and pin tumbler drawer, file cabinet and cylindrical knob locks.

Codes for flat steel key types of Yale locker locks. Proper methods and steps in cutting locker keys and handling problems that are common to this type of lock, are included.

Codes for the Yale wafer and pin tumbler drawer locks, padlocks, locking handles and other Yale locking devices.

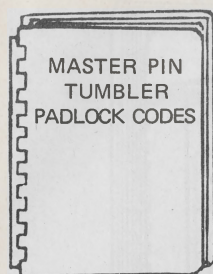

Explains the coding method for the popular Honda and Suzuki motorcycles. Fit keys for about 70% of these locks, instead of resorting to disassembly or the impression method.

**\* \* \* SEE NEXT PAGE, REGARDING THE SUPPLEMENTARY BINDER FOR VOLUME 1 \* \* \***

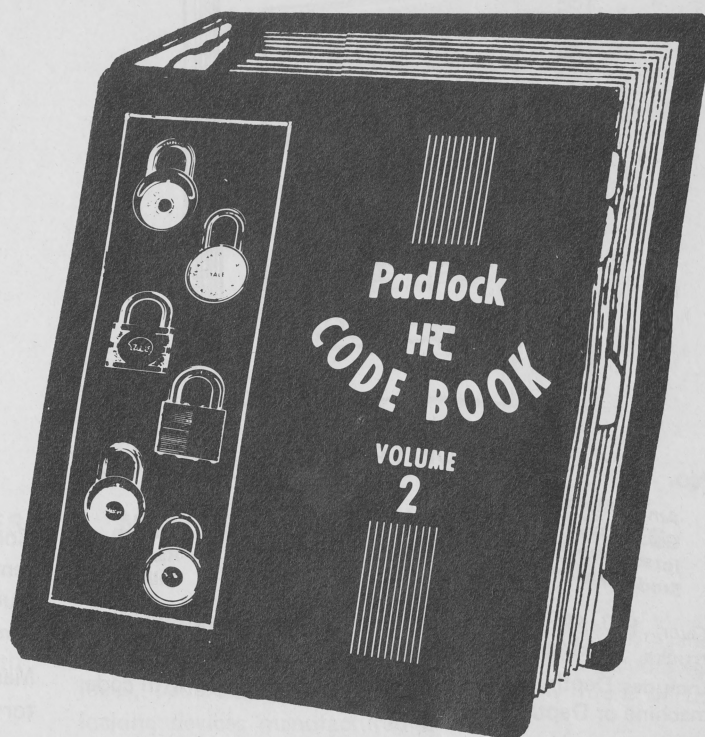

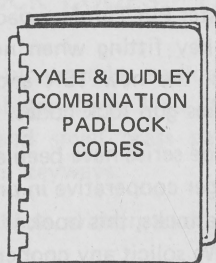

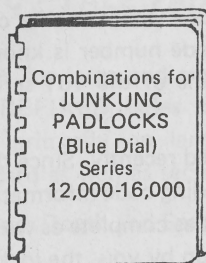

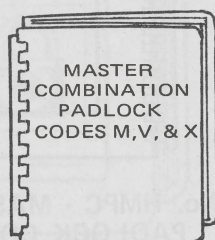

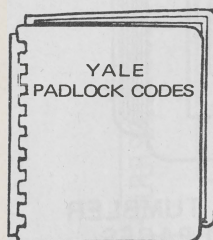

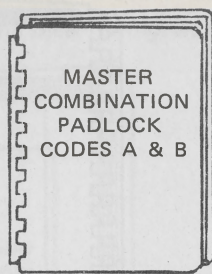

# PADLOCK CODE BOOK

Volume 2  
Includes  
These Six  
Individual  
Books

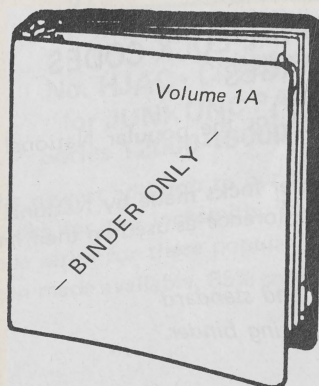

**No. HPCB**

**TO HAVE A COMPLETE SET, INCLUDE THE PADLOCK CODE BOOK AS A MATE TO THE GENERAL CODE BOOK SET.**

Volumes HGCB and HPCB have 8½ x 11 inch pages of Eze-Eye tinted paper, large page numbers, five page-securing rings and a heavy duty, washable, vinyl coated hard cover. Section dividers with plastic tabs, provide rapid code location.

There are over 175,000 codes contained in its 700 pages. It presents the popular Master pin tumbler padlocks, combinations for Master A, B, M, V and X series, Yale large pin tumbler padlock codes 1-28, 086, combinations for Yale and Dudley dial type padlocks and includes most combinations for Junkunc-American, Blue Dial combination padlocks.

New code supplements for all three volumes shall be printed as soon as they become available. These additions will be distributed through the locksmith jobber. Supplement pages will be punched to fit into these code books; including new indexes. For continued convenience, keep your code library current by adding the latest supplements.

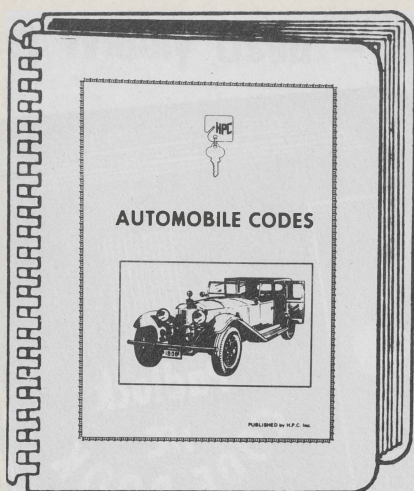

**FOR OWNERS OF THE SINGLE VOLUME BOOKS, BOUGHT PRIOR TO 1973  
PROVIDE MORE SPACE FOR YOUR GENERAL CODE BOOK VOL. 1  
by getting this Supplementary Binder — No. CBB-1A**

With recent additions of new code sheets, your older single Vol. 1 is probably crowded. Add **No. CBB-1A** to your set. Matches the Vol. 1 cover, except that it has 2½" metal rings. Place the last 4 sections of your old Vol. 1 binder into this empty expansion binder, and add the cross reference index and tabs. You will enjoy the same rapid location of codes common to all HPC Inc. code books. Complete with instructions.

# BASIC CODE BOOKS

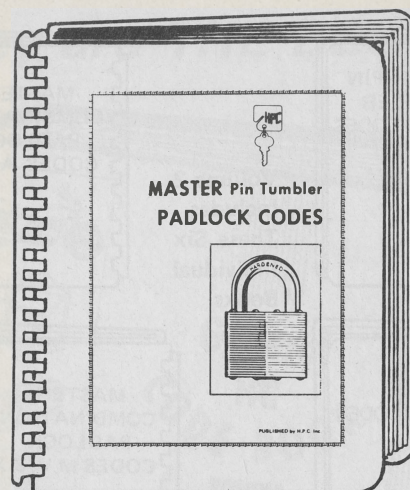

## No. HAC - AUTOMOBILE CODES - 312 PAGES

Amer. Motors	Chrysler	Crosley	Ford
Gas Caps	Gen. Motors	Henry J	Hudson
International H.	Kaiser-Fraser	Packard	Rambler
Studebaker			Willys

Over 100 code series listed for domestic automobiles, trucks, locking gas caps, etc.

Includes Depth and Space Charts for easy cutting with code machine or Depth Key set.

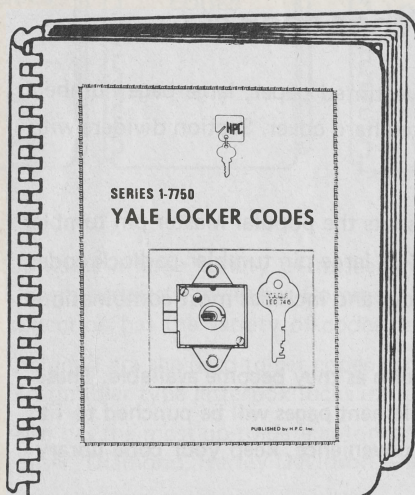

With our easy-to-add supplements, your auto book won't become out dated each year. All books are up dated and bound every 90 days, assuring you of the latest information.

## No. HMPC - MASTER PIN TUMBLER PADLOCK CODES - 150 PAGES

Codes for Master Pin Tumbler padlocks. Directions for cylinder removal and key fitting when no code number is known. Includes 80% of the new 10N and 60% of the 10T series and some "L" series gun lock codes.

Many new code series have been added recently. Since the factory is no longer cooperative in providing code information for servicing these locks, this book is not as complete as we would like it to be. We solicit any cooperation by you, the locksmith, in helping us to add more codes.

## No. HDSL - YALE LOCKER LOCK CODES 36 PAGES

1-7770 code listings for Yale flat steel type IED, IEA, DSL, 15WB, 9M, N9M. Also used on some locks by National of Rockford.

Includes instructions for cutting locker keys by code, aided by depth keys. Depth keys not included.

## No. HNLC - NATIONAL LOCK CODES 133 PAGES

Disc and pin tumbler codes for the popular National of Rockford locks.

Includes codes for pin tumbler locks made by National for Auth, Bommer, Couch and Florence as used on their letter boxes.

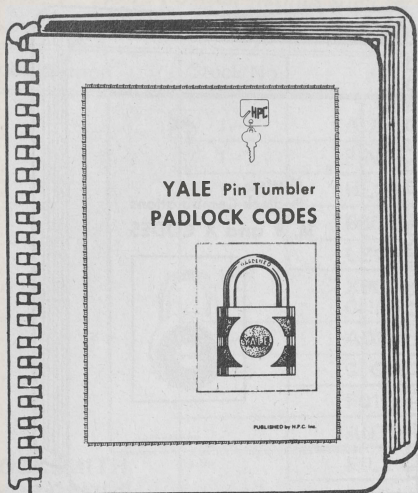

*When new supplement code pages become available, each will be die-cut and standard three ring punched, to fit into either the spiral bound book or a three ring binder.*

# BASIC CODE BOOKS

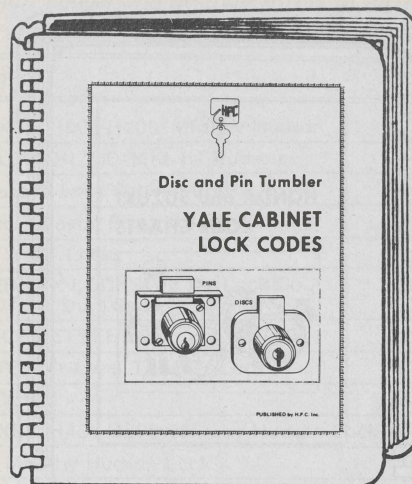

Each book has 8½" x 11" sheets of Eze-Eye tinted pages, large page numbers and a clear, concise index; bound by a 19 ring, washable vinyl cover. Book always lies flat when open.

## **HYPC - YALE PADLOCK CODES - 113 PAGES**

Codes for large and small pin tumbler padlocks using the UNPREFIXED series numbered from 1 to 28,086. It is used primarily on large and small brass padlocks with standard as well as sectional keyways.

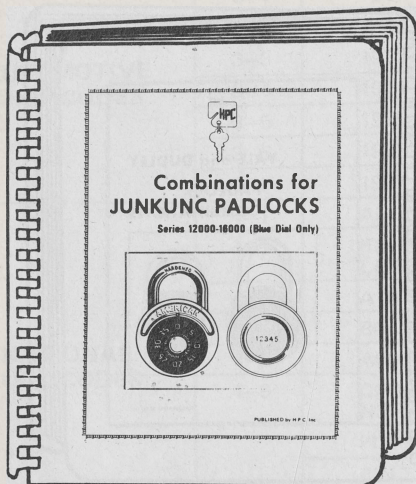

Includes Depth and Space charts, with instructions.

## **No. HYC - YALE CABINET LOCK CODES 165 PAGES**

Over 175 series listed covering codes for Yale discs and small pins. Contains extensive code listings for drawer locks, padlocks, locking handles and many more of the locking devices manufactured by Yale.

Does not cover codes for larger pin tumbler locks.

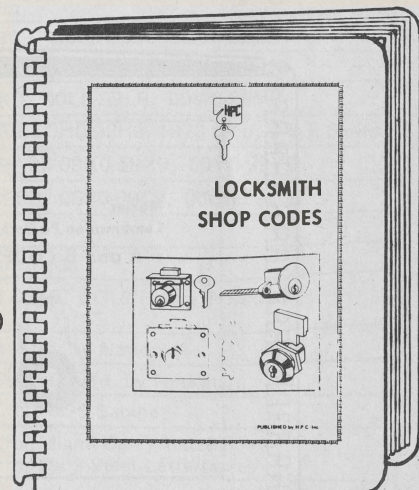

## **No. HJAC - COMBINATIONS for JUNKUNC PADLOCKS Series 12000-16000 (Blue Dial)**

The newest addition to our library of useful code books for the locksmith. The heretofore elusive code series for these popular American locks have been made available. 85% complete.

American	Arrow
Chicago	Clum
Dexter	Eagle
Florence	Harloc
Junkunc	Kenedy
Letter Boxes—	Lockwood
(flat steel keys)	Sargent
Taylor	Welch

Auth (Flat)	Bommer
Corbin	Couch (Flat)
Excelsior	Falcon
Iico	Illinois
Kwikset	Labelle
Motor Boats	Russwin
Schlage	Segal
Weiser	Weslock

## **No. HLSC - LOCKSMITH SHOP CODES 248 PAGES**

NEW. Contains some codes for Auth and Bommer pin tumbler locks by Hudson. More to be added as they become available.

**SILHOUETTE CODES** For "H" series Chicago double sided and "KF" motor boat ignition keys.

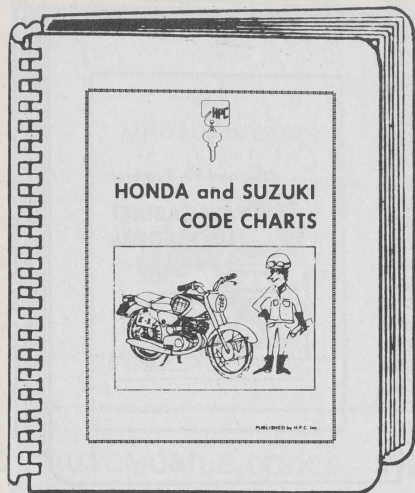

Codes for double sided Wonderlock's showcase locks. Flat key silhouettes for old and new style Couch, Auth "S" series and the Bommer "R" series.

# BASIC CODE BOOKS

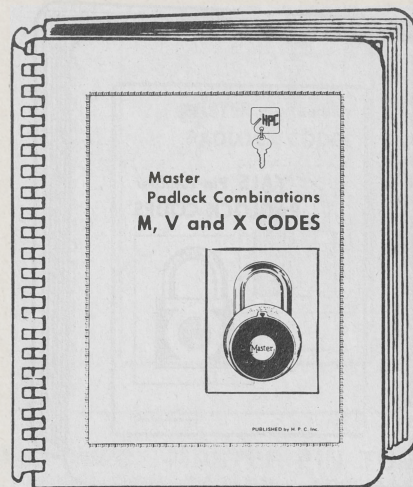

Each book has 8½" x 11" sheets of Eze-Eye tinted pages, large page numbers and a clear, concise index; bound by a 19 ring, washable vinyl cover. Book always lies flat when open.

**No. HSMC - HONDA & SUZUKI  
MOTORCYCLE CODES - 21 PAGES**

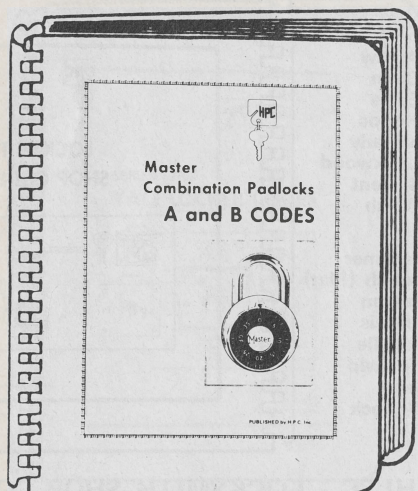

Charts and explanatory information covering Honda and Suzuki motorcycle codes. Makes possible the fitting of keys by number, to 70% or more of these two popular motorcycles. Includes the latest information for double-sided key used for 1975 and on.

**THE ONLY BOOK OF ITS KIND!**

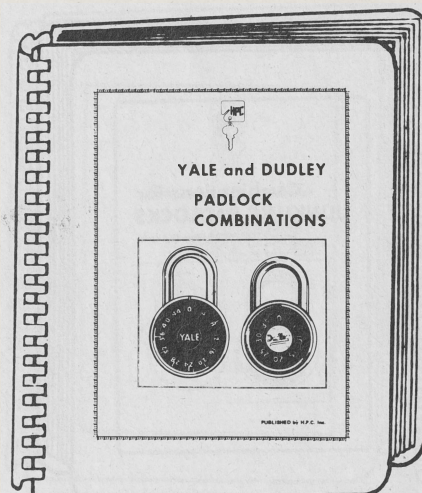

**No. HMCCX - MASTER COMBINATION  
PADLOCK CODES M, V, X - 140 PAGES**

All currently available M, V & X combinations for No. 1500 series combination padlocks. Covers many of the key controlled Master combination padlocks as well as the standard dial type. Has all known "X" series. Includes the current No. 9 series covering 900001-903072.

**No. HMCC - MASTER COMBINATION  
PADLOCK CODES A & B - 335 PAGES**

Over 85,000 Master A & B combinations for popular No. 1500 series combination locks. Contained in one volume. A useful aid for the locksmith or security officer.

**HYD - YALE & DUDLEY COMBINATION  
PADLOCK CODES - 75 PAGES**

12,000 "K" codes for Yale. Includes some "N" series. Partial listing of Dudley "ABS" and "ES" series.

*When new supplement code pages become available, each will be 19 ring punched, to fit into books using 19 rings; or the new large 5 ring binders.*

# CODE BOOK SUPPLEMENTS

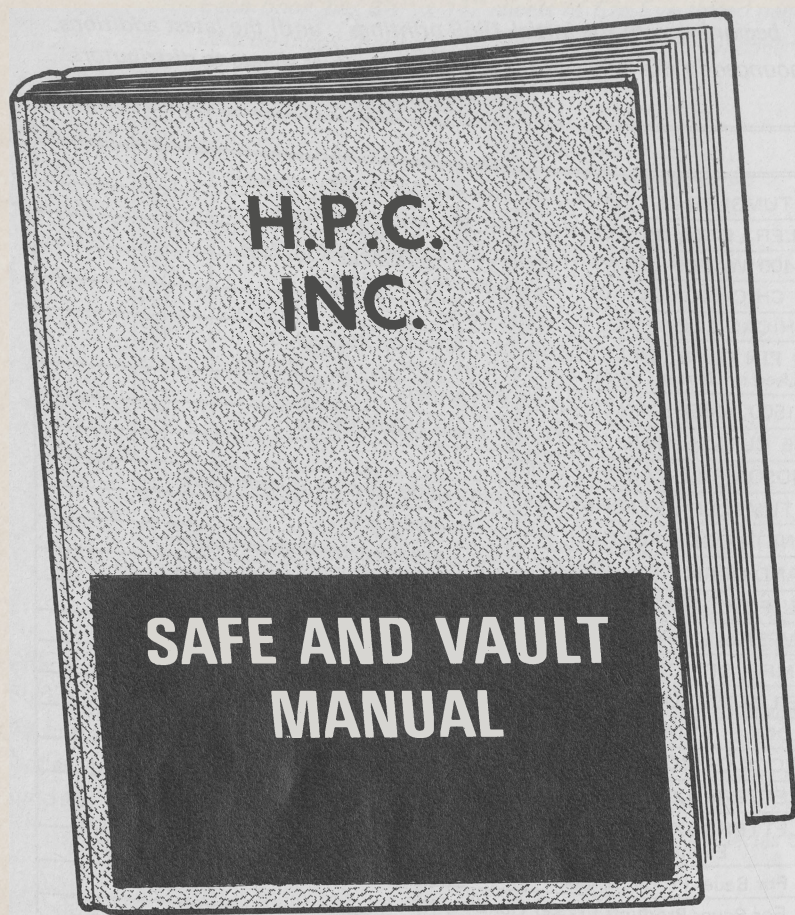

*This is a complete listing of Code Supplements, beginning with the initial 1969 printings, until the latest additions, as of May 1, 1977. Further listings shall be announced in the Locksmith Ledger and by flyer sheets to distributors.*

SAFE AND VAULT MANUAL  
THE FOURTH EDITION — 221 PAGES

The SAFE AND VAULT MANUAL is generally recognized as the "Safe Man's Bible". Whether you are new to safe work or an old timer interested in broadening your knowledge of safe locks, you will find this book contains valuable information covering a wide variety of safe lock topics. Contains over 250 illustrations, 1000 factory try-out combinations and a newly added section on original factory methods of safe and vault combination changing.

No. SVM

## STORY OF SAFE DEPOSIT BOX LOCKS

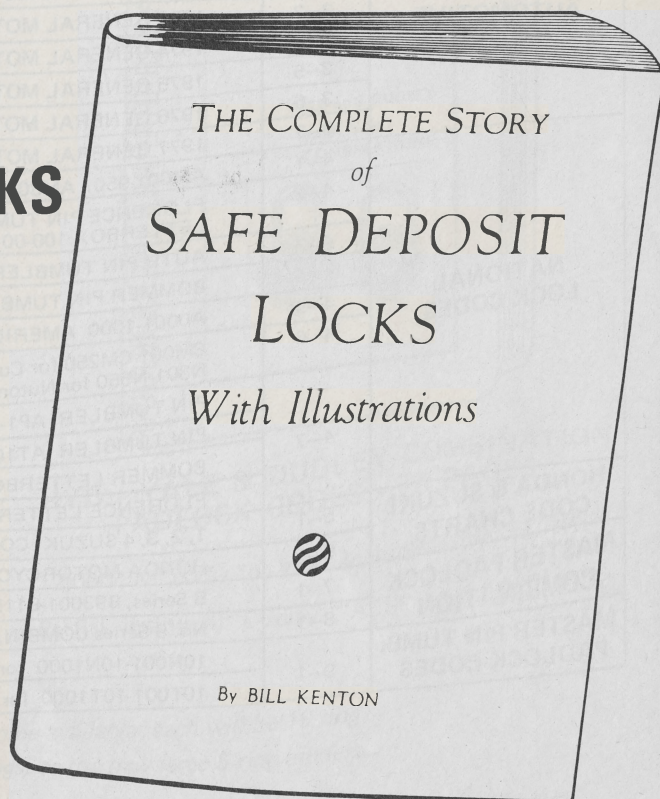

### METHODS DESCRIBED:

- Open by Picking
- Use of Door Pullers
- Open by the Hinge Method
- Open by the Drilling Method
- Plugging Holes and Refinishing
- Classification of Types

### SAFE DEPOSIT LOCKS

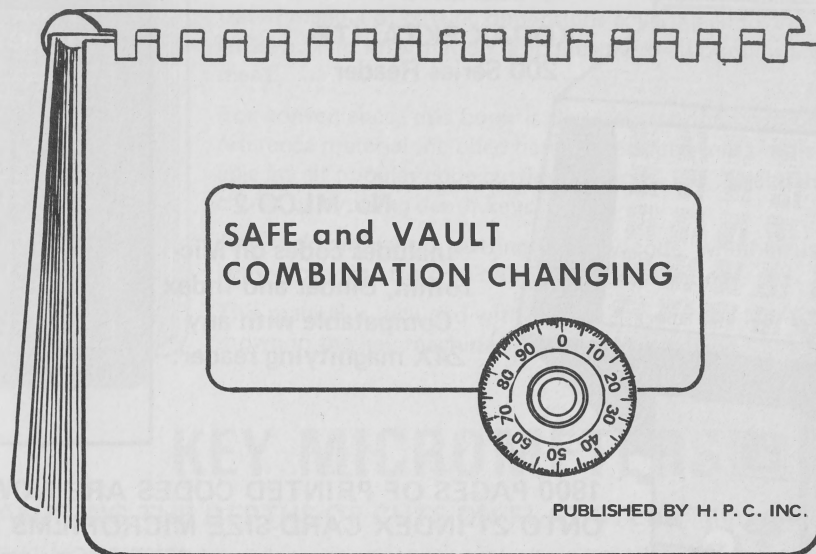

This book explains procedures on opening safety deposit box locks. Contains valuable information for servicing locks by Bates, Diebold, Eagle, Herring Hall Marvin, Miller, Mosler, Remington, Sherman, S & G, Victor, Western, Yale, and York.

No. SDL-15

# SAFE COMBINATION CHANGING

## ORIGINAL FACTORY METHODS

A collection of original direction sheets on how to operate and change combinations, written by the safe lock manufacturers. Has 85 pages and hundreds of illustrations and diagrams. Covers combination changing information on most of the safe locks manufactured during the last 75 years. This book helps the Locksmith BE SURE that he will get the best results in the shortest possible time, by using the proper procedures. Includes combination changing information for Diebold, Eagle, HHM, S & G, Yale and York safe locks.

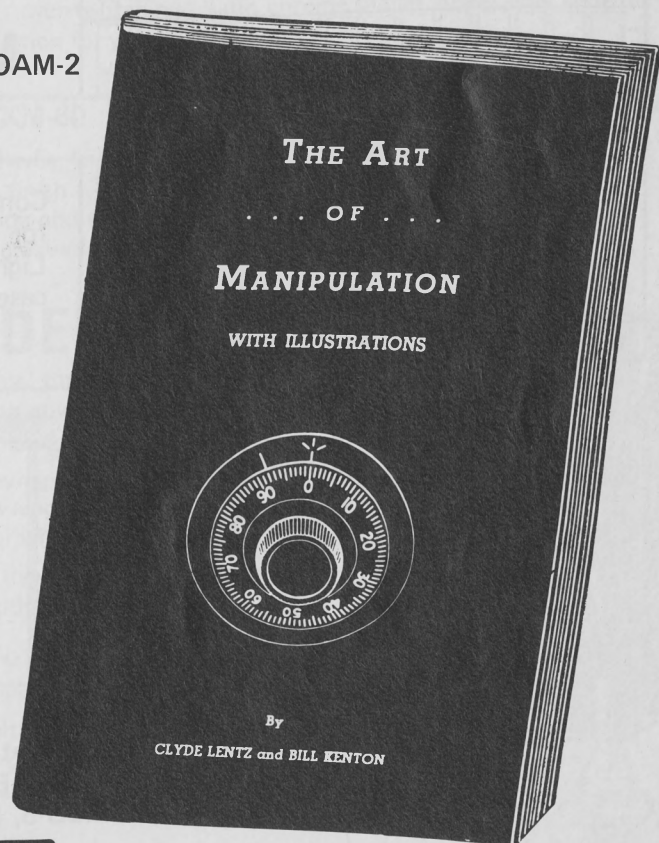

No. SCC

## THE ART OF MANIPULATION

No. TOAM-2

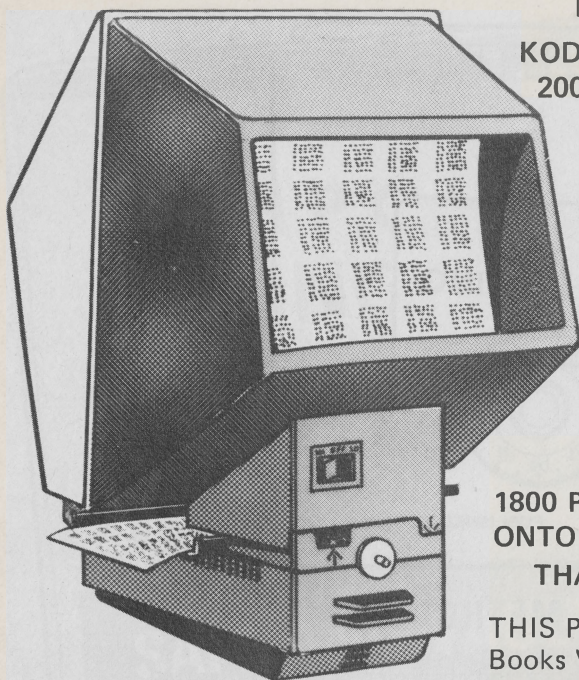

### OPEN COMBINATION LOCKS WITHOUT DRILLING, BURNING OR FORCING

A practical work method clearly explained and easy to understand. The combination lock opening system of Hear, Feel and See is called "Manipulation." It was discovered and developed in the past two decades by a small group of safe experts. After much deliberation two of these experts decided to pass on their information to other safe men and published this invaluable book, titled, THE ART OF MANIPULATION. Due to the highly confidential information in this book, the sale shall be restricted to established Safe Men and Locksmiths. SAFE MANIPULATION IS AN ABSOLUTE FACT, NOT A MYTH. GET THIS VALUABLE BOOK AND LEARN THE FACTS.

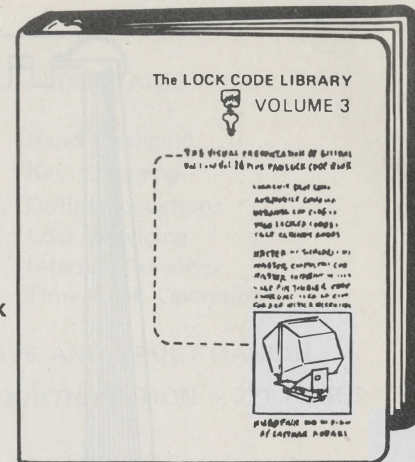

# MICROFILMED LOCK CODE LIBRARY

No. MRO-1  
KODAK EKTALITE  
200 Series Reader

No. MLCO-2  
Includes codes on Microfilm, Binder and Index  
Compatible with any 24X magnifying reader.

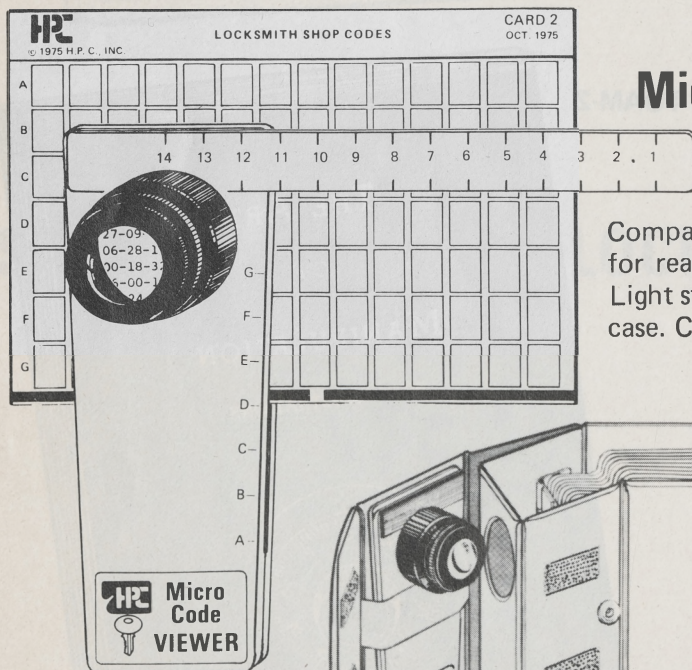

1800 PAGES OF PRINTED CODES ARE NOW CONDENSED ONTO 21 INDEX CARD-SIZE MICROFILMS (MICROFICHE), THAT HAVE BEEN PROCESSED BY EASTMAN KODAK.

THIS PROJECTION PRESENTATION consists of General Code Books Vol. 1 and Vol. 1A, plus Padlock Code Book Vol. 2, which includes the following:

LOCKSMITH SHOP CODES  
AUTOMOBILE CODES  
NATIONAL LOCK CODES  
YALE LOCKER CODES

YALE CABINET LOCK CODES  
HONDA, SUZUKI CODE CHARTS  
MASTER PIN TUMB. PADLOCK CODES  
MASTER COMBINATION A & B CODES

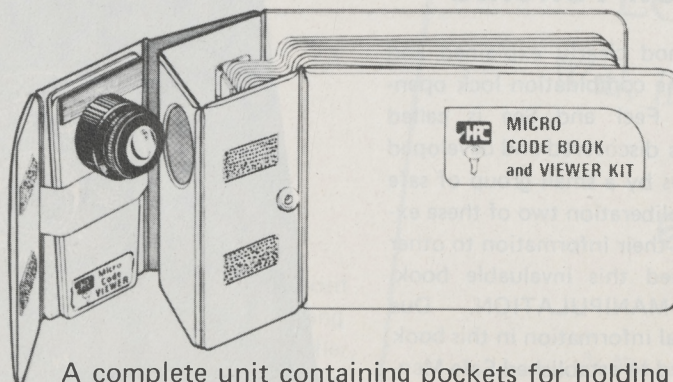

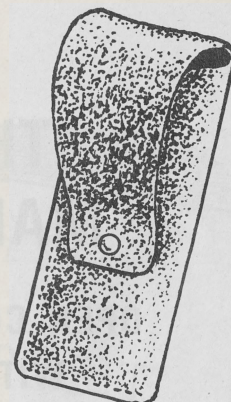

MASTER COMBIN. M, V & X CODES  
YALE PIN TUMBLER PADLOCK CODES  
YALE and DUDLEY PADLOCK COMBIN.  
JUNKUNC PADLOCK COMBINATIONS

## Micro-Code VIEWER

No. MRO-3

Compact hand-held magnifying viewer for reading the Microfiche Code Cards. Light sturdy plastic, housed in a leather case. Convenient portability.

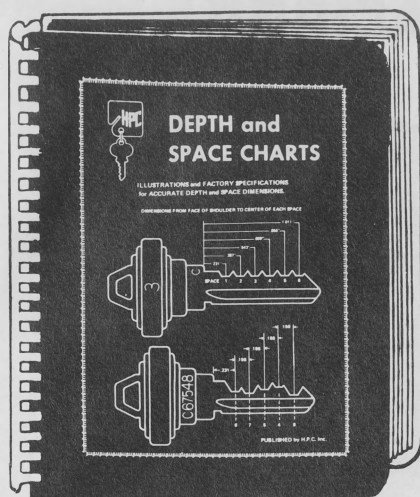

No. MLCO-4  
Micro Code  
BOOK and  
VIEWER

A complete unit containing pockets for holding microfilm reductions of the HGCB General Code Books and the HPCB Padlock Code Book, plus a manual viewer. No. MLCO-5, Book and Microfiche set ONLY.

## DEPTH CHARTS

**No. HSCB** — For cutting keys when using depth keys or codes. A completely illustrated manual of cutting dimensions covering almost all domestic pin and disc tumbler keys. This information is applicable to all popular and current code cutting equipment.

For convenience, this book is divided into four sections, containing 95 charts. The reference material included here is presented in a simple, direct manner, made applicable to all popular code cutting methods, i. e., Dial, Disc, Bar or Card type code machines or by using depth keys.

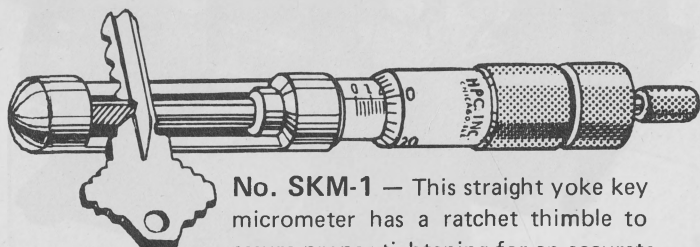

Any locksmith shop, cutting keys by code, whether using code machines of depth keys — cannot afford to be without these listings.

This manual is included with the purchase of the No. 9310DKM Depth Key Machine, shown in the key machine section of this catalog.

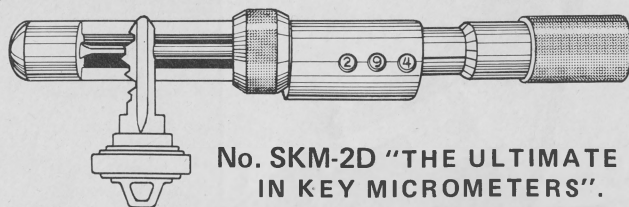

## KEY MICROMETERS

### FOR MEASURING THE DEPTHS OF CUTS ON FLAT STEEL AND CYLINDER KEYS

**THE STRAIGHT YOKE TYPE** key micrometer is designed to support the cut key while checking the depths. Has a hardened anvil, thin enough to check all cylinder keys; as well as flat steel keys with cuts as narrow as .030" in width. These advanced key micrometers are encased in a genuine leather pouch.

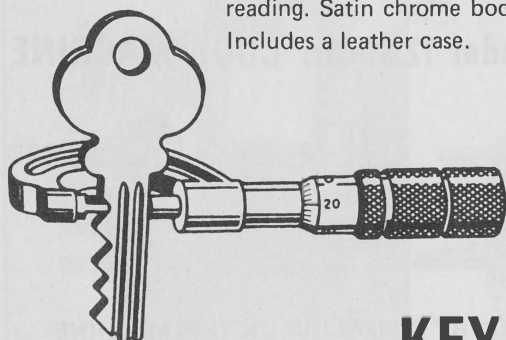

**No. SKM-1** — This straight yoke key micrometer has a ratchet thimble to assure proper tightening for an accurate reading. Satin chrome body and yoke. Includes a leather case.

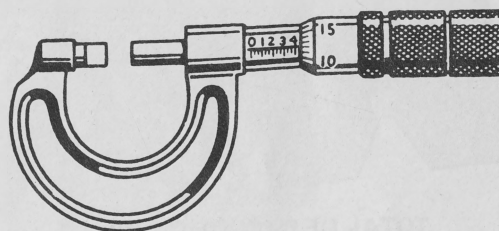

**No. SKM-2D "THE ULTIMATE IN KEY MICROMETERS".**

A new, easy to see feature gives *Instant readings* of depths of cuts, without eye strain. Friction thimble keeps user from over-tightening. Satin chrome plated, heavy duty construction for years of service.

**No. KM-60**

Forged steel frame, with a satin chrome finish. Tool steel anvil, slide and screw. Clear precise graduations.

## KEY DECODER

**No. HKD-75** — This handy, pocket size decoder kit determines the original factory depths of most popular domestic pin and disc tumbler cylinders and automotive keys. Does **NOT** measure in thousandths of an inch. **NOT** intended for adjusting or setting up any key machine.

Ideally suited for giving the correct bottom pin size when re-keying new or worn cylinders. Also an effective time saver when used along with a pin assortment's length chart, such as is included with the very popular original, precision color pin assortment or when using original pins.

Simply insert the correct information card into the top slot of the decoder. Lowering the depth pin into each cut, from bow to tip, will indicate the correct depths, in the window at the top.

Each of the more than fifty 2"x 4" information cards, also lists the correct factory depths and space specifications.

The heavy duty construction, with just two internal moving parts, will assure years of trouble free service. Each decoder and information card set is packed in a black vinyl case.

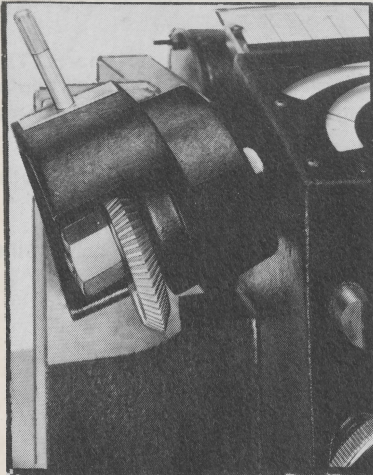

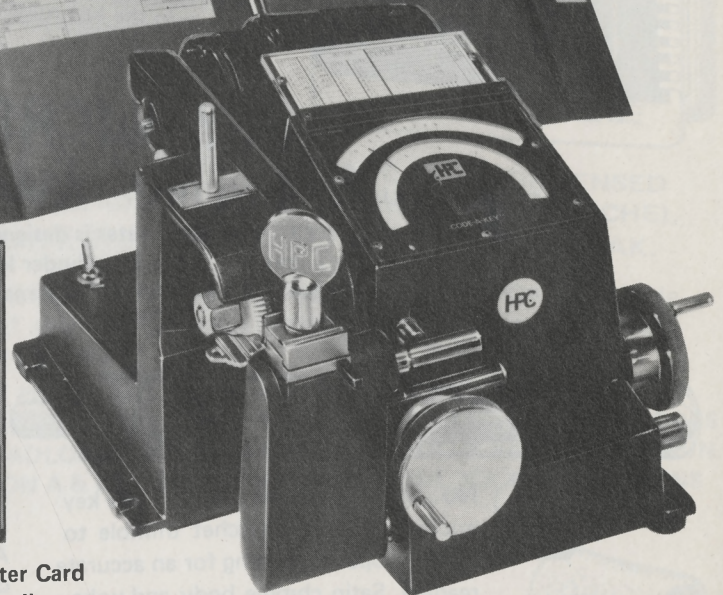

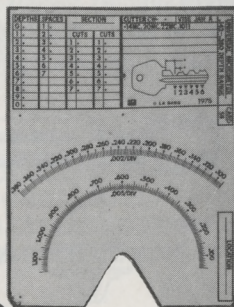

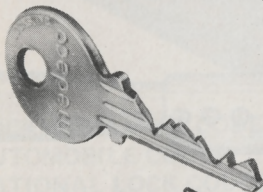

# A Most Versatile CODE MACHINE

CUTTER HEAD SWIVELS  
TO CUT MEDECO KEYS

EASEL TYPE BINDER for Code Card storage and  
fully illustrated instructions included.

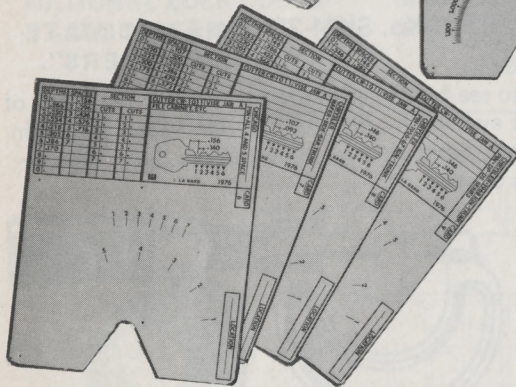

OPTIONAL CUTTER and JAW  
allows for the effective cutting  
of commercial Medeco keys.

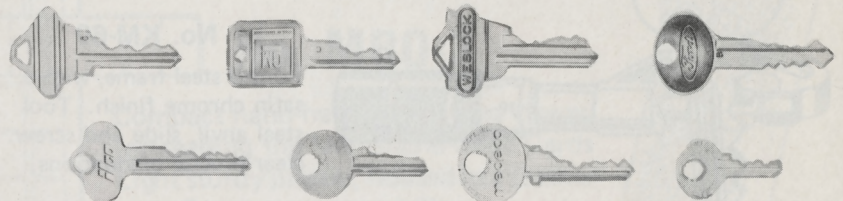

Micrometer Card  
for Dial Indicator  
type flexibility.

## Model 1200CM CODE MACHINE

TOTAL OF 59 CODE CARDS  
ARE INCLUDED

TYPICAL KEYS CUT BY DIMENSION ON THIS MACHINE

### THIS REVOLUTIONARY CODE MACHINE MADE ALL OTHERS OBSOLETE!

THE MODEL 1200CM CODE MACHINE combines all the features necessary to make accurate cylinder keys by dimension, quickly and easily. The ease of changing from one set-up to another is **UNPARALLELED!** . Even radically different set-ups are accomplished in 10 to 30 seconds — without wasting any key blanks.

This dramatic advancement is made possible through the use of plastic cards, which are easily inserted for information guidance. Quite often, just replacing the code card is all that is required to change from one set-up to another. No additional depth or space adjustments are required.

*THIS EXTREMELY ACCURATE AND RELIABLE MACHINE incorporates the following features:*

- Two standard, tool steel cutters ● Cutter shaft rotates within ball bearings ● Stainless steel jaw ● Built-in tip gauge
- 59 plasticized, washable code cards ● Two micrometer cards allow flexibility of dial indicator machine
- Will cut angle cuts of standard commercial Medeco with use of optional jaw and cutter.

*Optional Medeco Jaw, No. MJ-1 — Optional Medeco Cutter, No. CW-1012*

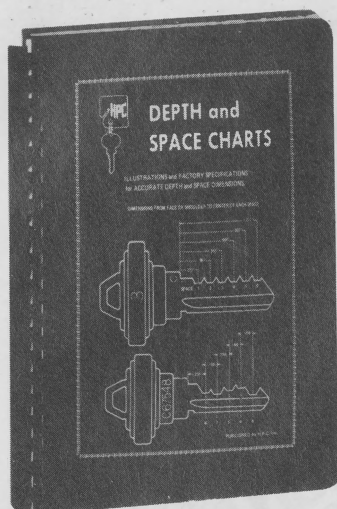

# THE SPEEDEX "DEPTH KEY MODEL"

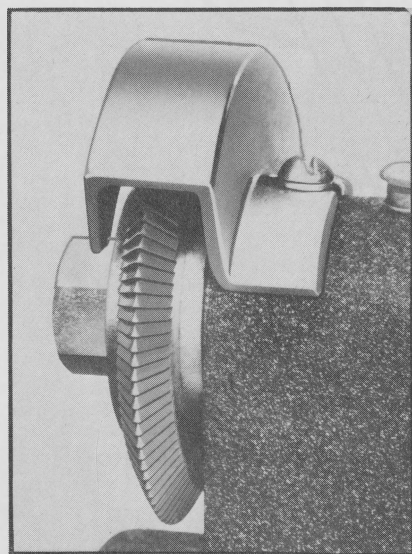

THE ONLY KEY MACHINE DESIGNED EXCLUSIVELY FOR  
MAKING ACCURATE CYLINDER KEYS BY CODE,  
THROUGH THE USE OF DEPTH KEY SETS.

(DEPTH KEY SETS NOT INCLUDED)

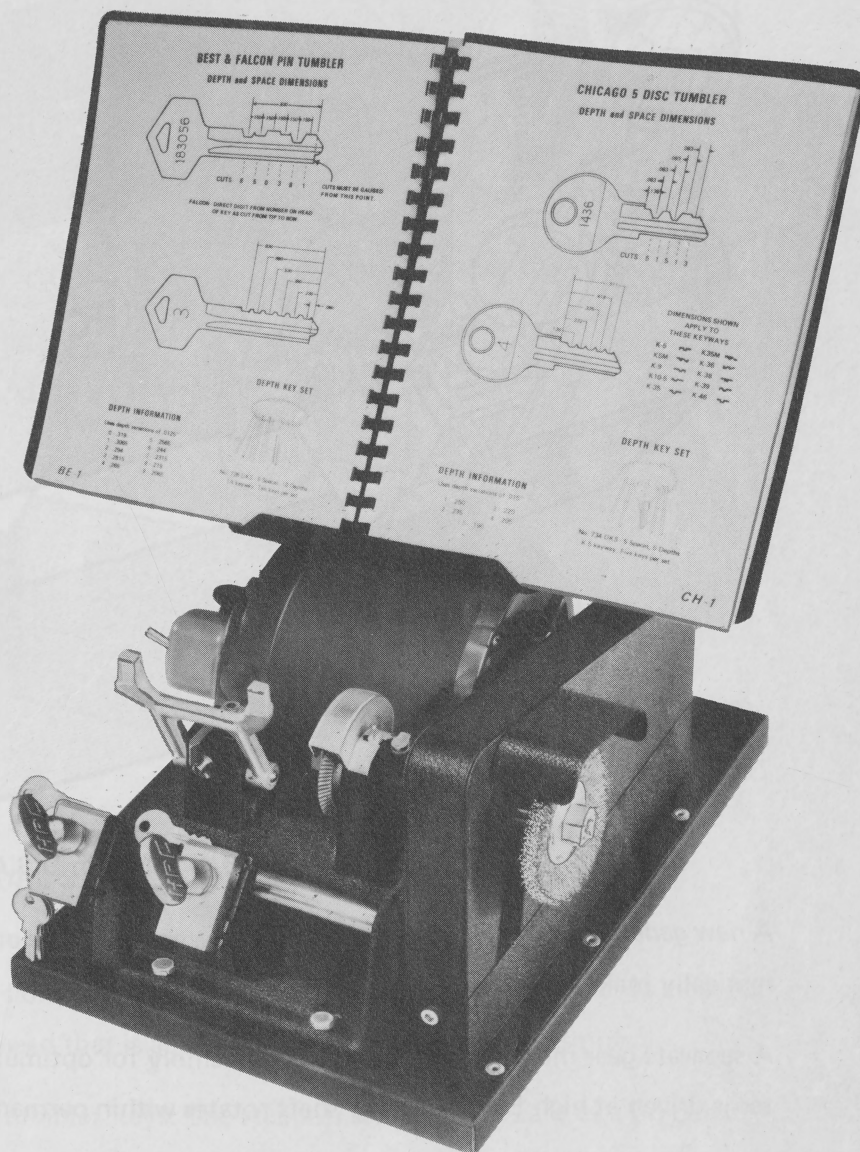

THIS MANUAL OF KEY CUTTING  
DIMENSIONS IS INCLUDED. SITS  
ON MOTOR-MOUNTED PEDESTAL  
AS SHOWN.

Book ONLY available. See page 28.

USES No. CW-10  
DOUBLE ANGLE MILLING CUTTER

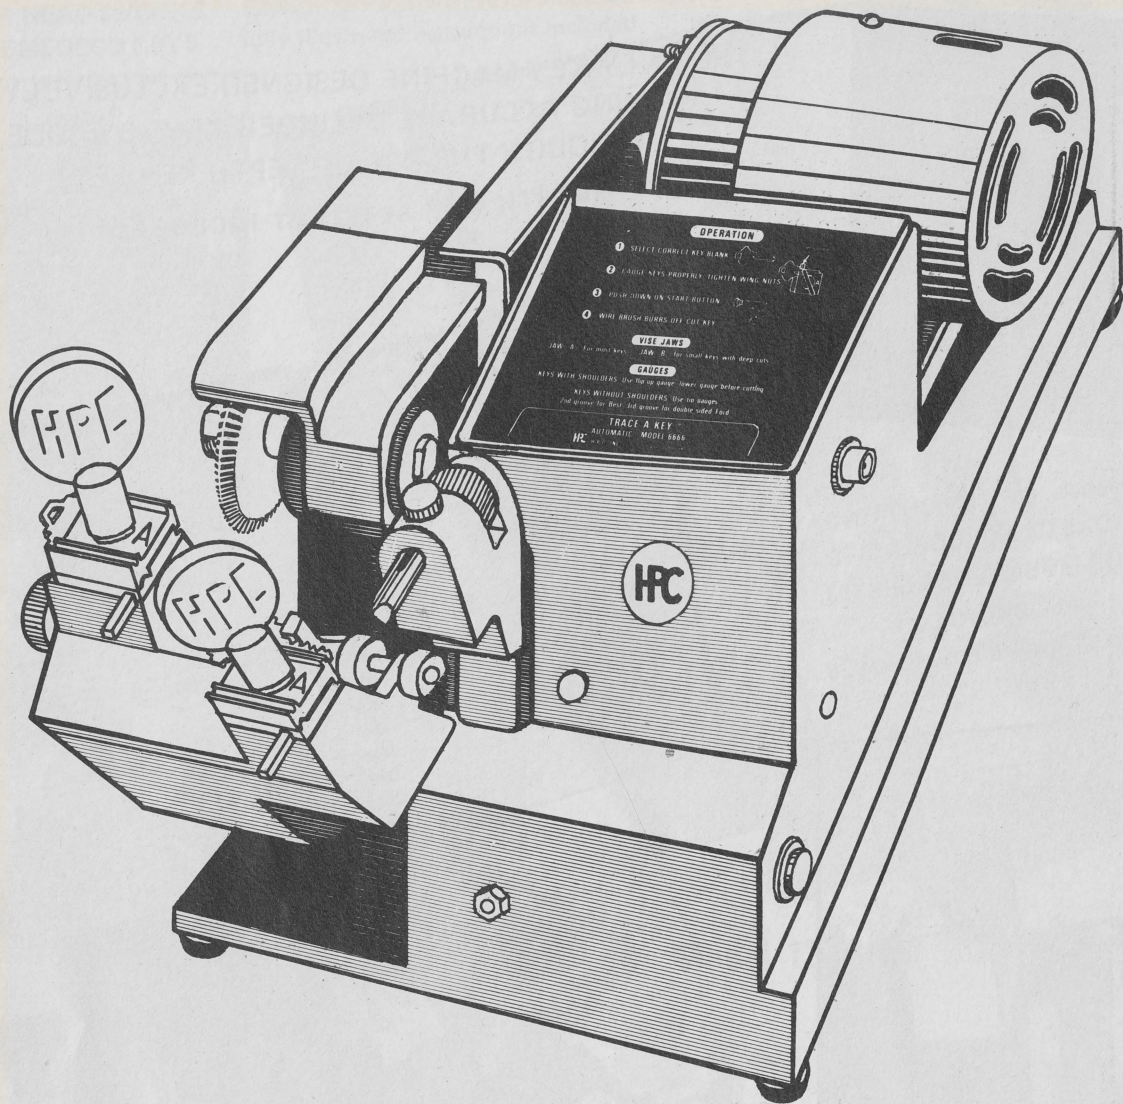

MODEL No. 9310DKM - Supplied with No. CW-10 Double Angle Milling Cutter and a 110V A.C.  
1/6 H.P., 1725 R.P.M. motor. Includes depth and space charts, book  
pedestal, fully enclosed belt guard and wire brush. Mounted  
on a 14½"x 11"x 1" metal base. Shipping weight: 43 lbs.

\* SEE PAGE 17 and 18 FOR LIST OF DEPTH KEY SETS.

# AUTOMATIC KEY MACHINE

MODEL 6666 — Made in U.S.A.

A new generation Automatic Key Machine has arrived! This unusual key duplicator will automatically make duplicate keys in an amazingly fast cycle.

A separate gear motor drives the carriage assembly for optimum speed while the tool steel cutter is driven at high R.P.M. Cutter shaft rotates within permanently sealed ball bearings.

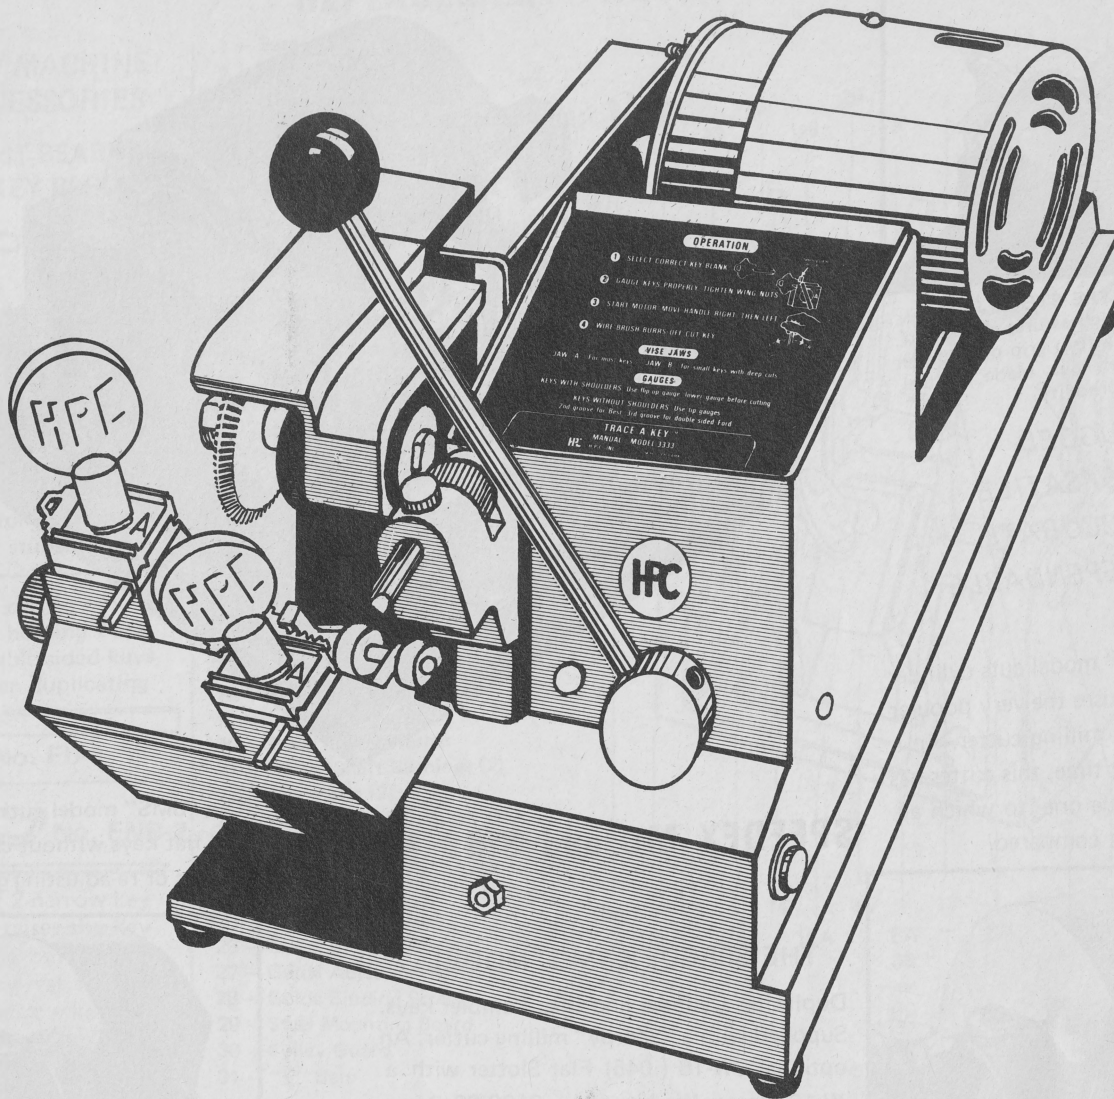

Vise jaws are made of stainless steel and incorporate built-in tip gauges. Unique design offers the rigidity required for accurate duplication for a variety of single sided, as well as some double sided keys.

This device has a family resemblance to the No. 1200 CM Code Machine and has the same outstanding qualities that have set new standards in the industry.

# MANUAL KEY DUPLICATOR

MODEL 3333

Made in U.S.A.

This machine is a MANUAL version of the Automatic Key Machine, Model 6666. It incorporates amazing accuracy, with a speed that is appreciated by today's busy locksmith.

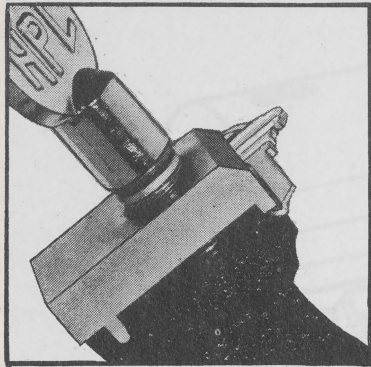

Cuts most cylindrical and disc tumbler keys. The stainless steel vise jaws are of a unique design, offering the rigidity required for accurate duplication of a variety of single sided, as well as some double sided keys.

This rugged machine is designed for durability, so as to faithfully and accurately perform the day to day duplication of cylinder keys. This device is made in U.S. A.

# SPEEDEX KEY CUTTING MACHINES

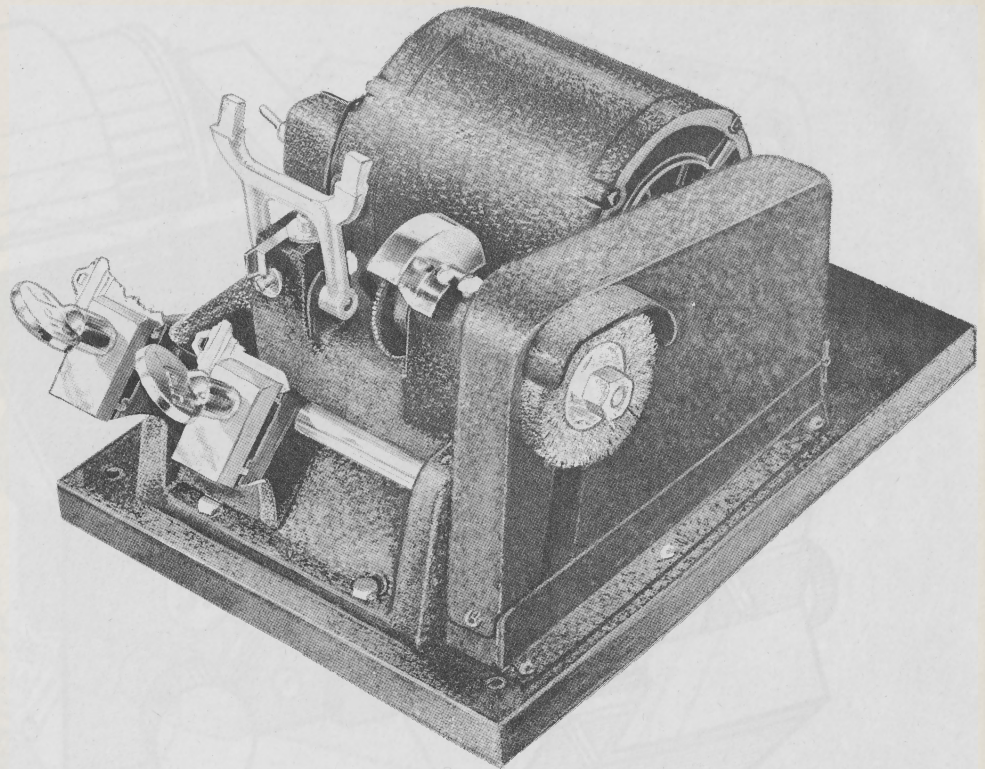

## NEW TYPE STEEL JAW

This new design assures maximum leverage for a firm grip on cylinder and flat steel keys. Made of steel for added durability.

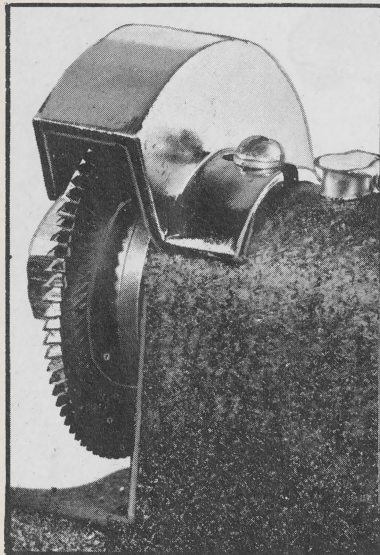

- *RUGGED*
- *VERSATILE*
- *ACCURATE*
- *DEPENDABLE*

The "MC" model cuts cylinder keys and uses the very popular "Sharpy" milling cutter. In a very short time, this cutter has become the one to which all others are compared.

## SPEEDEX MC and SMS MODELS

The "SMS" model cuts cylinder and flat keys without changing cutters or re-adjusting guides.

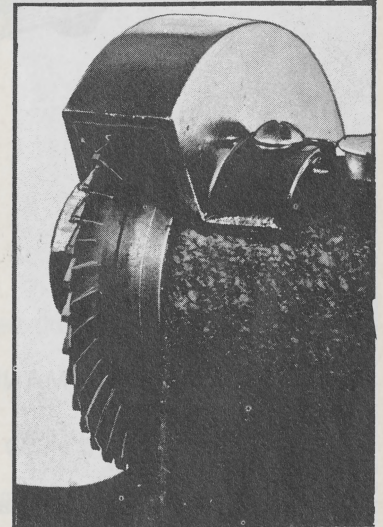

### THE SPEEDEX "MC" MODEL

Duplicates Cylinder and Disc Tumbler keys. Supplied with a "Sharpy" milling cutter. An optional CW-16 (.045) Flat Slotter with a W-16 Slotter Washer and a 9100-23 Copy Dog is used for cutting flat steel keys.

### THE SPEEDEX "SMS" MODEL

Duplicates either Cylinder or Flat keys with just a .045 thick, side-milling slotter.

### No. 9110MC Machine, Motor and Base

Supplied with a "Sharpy" milling cutter and a 110V, AC, 1/6 H.P., 1725 R.P.M. motor. Machine and motor are mounted on a 14½" x 11" x 1" metal base. Shipping Weight: 41 lbs.

### No. 9100MC Machine Only

Same machine as No. 9110MC, less motor and base. Bench space: 8" x 4". Shipping wt.: 16 lbs.

### No. 9110SMS Machine, Motor and Base

Supplied with an "SMS" side-milling slotter, wire brush and a 110V, AC, 1/6 H.P., 1725 R.P.M. motor. Machine and motor mounted on a 14½" x 11" x 1" metal base. Shipping weight: 41 lbs.

### No. 9100SMS Machine Only

Same machine as No. 9110 SMS, less motor and base. Bench space: 8" x 4". Shipping wt.: 16 lbs.

## REPLACEMENT PARTS AND PARTS LOCATIONS

## THRUST BEARINGS and KEY BLOCKS

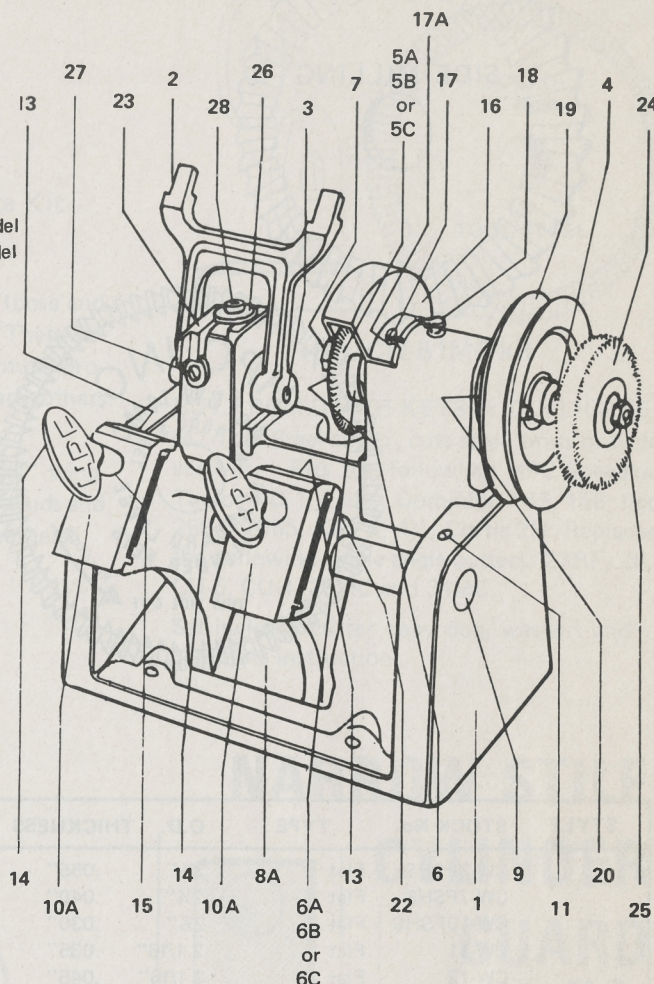

Set of two blocks for holding Ford double-sided keys, when duplicating.

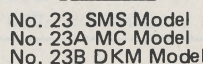

Set of 2 narrow key rests, raises the key off the bottom of the key rest, for cutting narrow keys or keys with very deep cuts.

# OVERSIZE WING NUTS

FOR ILCO and KEIL  
AUTOMATIC KEY MACHINES

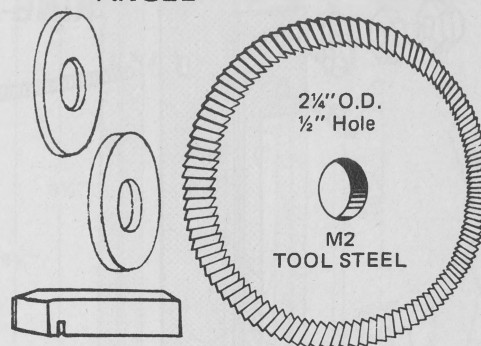

No. SNK-2 Complete Kit

Eliminates defective studs or loose and bent keys when duplicating. These enlarged, 2 inch diameter wing nuts, provide a 50% tighter grip than any others available.

Kit includes two "Super Nuts" wing nuts, two case hardened super studs and a pair of ball bearing thrust washers.

# CONVERSION

DOUBLE  
ANGLE **CUTTER**

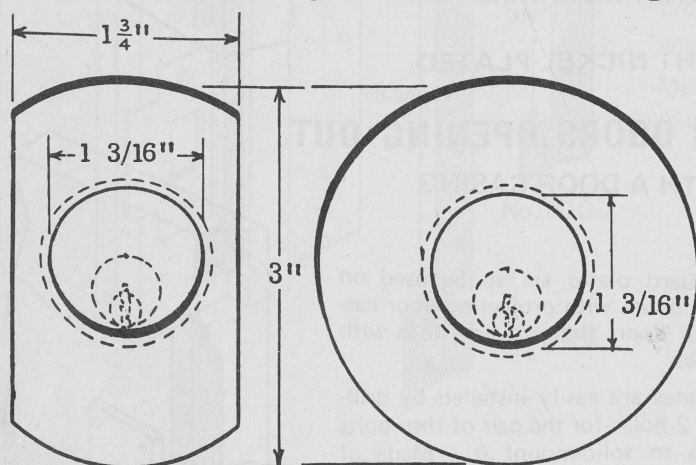

No. CW-51MC kit

CUT FROM DEPTH KEYS or DUPLICATE M2 Tool Steel cutter, cuts steel, brass or nickel silver. Fits the following: HPC Speedex, Taylor KD-1, 2 etc., Dominion 145, 146; Ilco 2584, 2585; Keil 4, 4 1/2; Curtis 2H. Replaces the following single angle cutters: 23RF, 26, CU-5, CU-1, 23MC and 34MC.

Set includes cutter copy dog, washers and complete instructions.

# CYLINDER SCAR PLATES

No. SPO-3 OVAL U.S.—3 Finish, Polished Brass

No. SPO-10 OVAL U.S.—10 Finish, Dull Bronze

No. SPO-26D OVAL U.S.—26D Finish, Dull Chrome

No. SPR-3 ROUND U.S.—3 Finish, Polished Brass

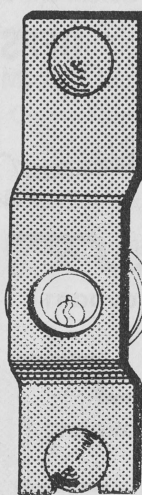

No. SPR-10 ROUND U.S.—10 Finish, Dull Bronze

No. SPR-26D ROUND U.S.—26D Finish, Dull Chrome

Use these plates to cover oversize cylinder holes or when the area around the cylinder hole is chipped, cracked or scarred. Covers an elongated cylinder hole after a replacement lock with a different backset must be used. The oval plate is ideal for narrow stile, aluminum doors. These plates "dress-up" any door.

# NARROW STILE CYLINDER GUARD PLATE

Attractive dull chrome finish of case-hardened plate and bolts. No special tools required. For either hand doors — in-swing or out swinging.

An attractive and effective device to protect against puller action on narrow stile door cylinders.

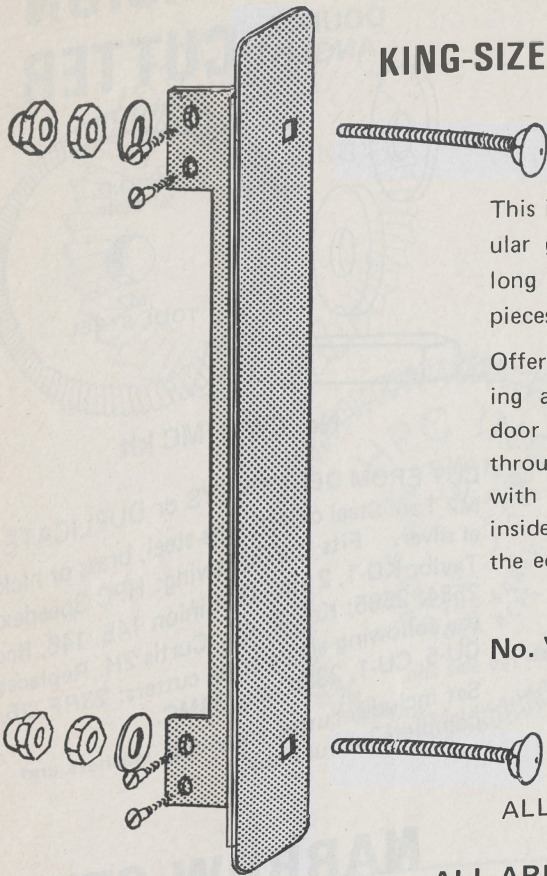

Quickly and easily installed; without appearing as an added-on feature. The innovative mounting system makes it simple to put on or take off. Complete, illustrated and easy to follow instructions.

No. ADG-1

# GUARD PLATES

## KING-SIZE — FOR DOORS OPENING OUT

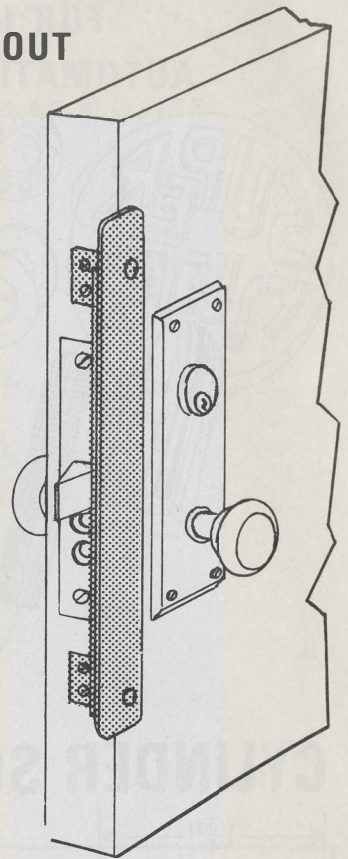

This is our strongest and most popular guard plate. It is 14 inches long and is made of two, welded pieces of steel.

Offers maximum resistance to prying and forcing. Mounted onto door with 2 carriage bolts, going through the door and anchored with a nut and cap nut on the inside. Four wood screws go into the edge of the door.

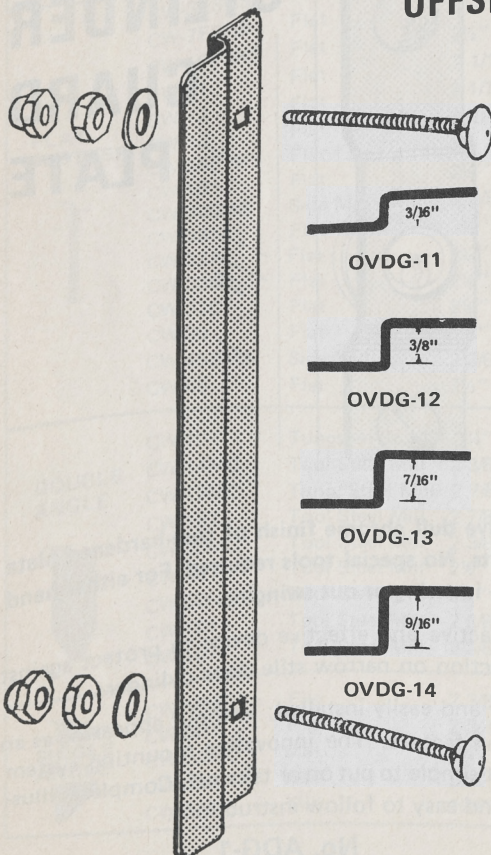

No. VDG-10 Bright Nickel Plated

COMPLETE WITH  
ALL NECESSARY HARDWARE

ALL ARE BRIGHT NICKEL PLATED

## OFFSET — FOR DOORS OPENING OUT AND WITH A DOOR CASING

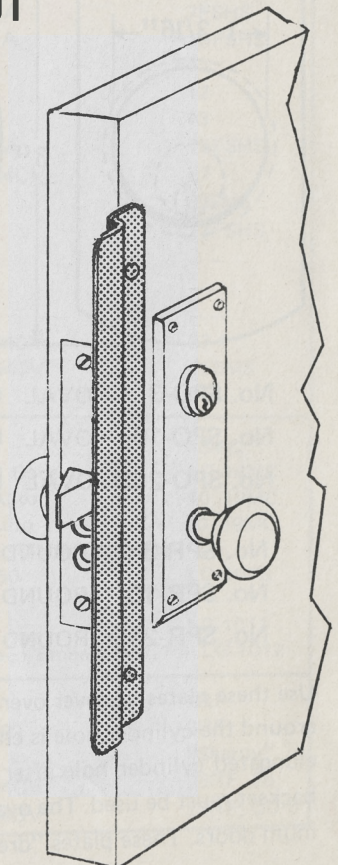

Offset guard plates are to be used on vestibule doors with projecting door casings. For doors that are not flush with the frame.

These plates are easily installed by drilling only 2 holes for the pair of thru-bolts and nuts to solid-mount it. Made of heavy gauge steel and is bright nickel plated. Complete with all necessary hardware.

The 14 inch overall length, extends three inches beyond the average lock face, presenting plenty of covered area to frustrate unauthorized, forceable entry.

Four sizes are available. Choose the offset depth that best fits the door and frame requirements.

No. OVDG-11 = 3/16" Offset  
No. OVDG-12 = 3/8" Offset  
No. OVDG-13 = 7/16" Offset  
No. OVDG-14 = 9/16" Offset

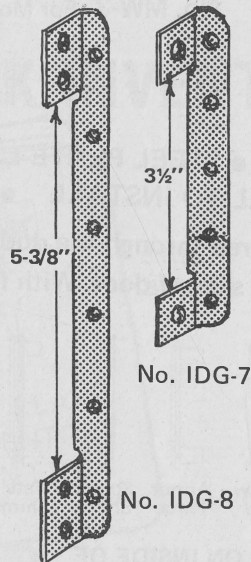

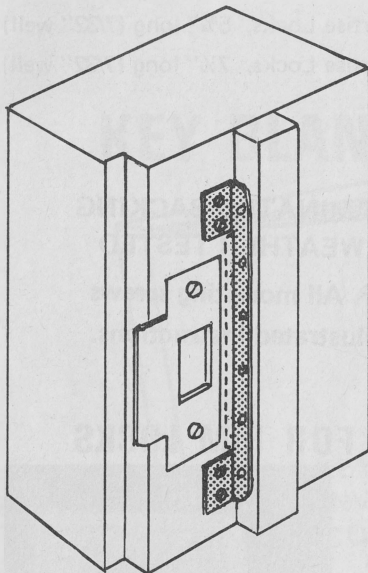

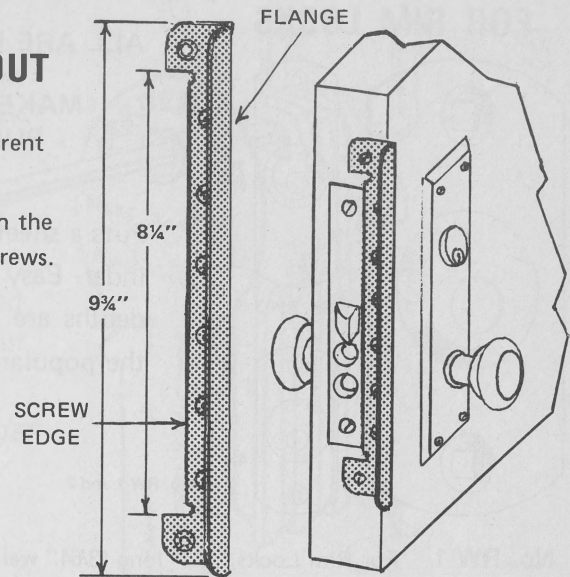

# GUARD PLATES

## VESTIBULE LOCK — FOR DOORS OPENING OUT

Because of variations in door thickness, fit of door in frames and different lock face widths, there are four sizes of these guards available.

They are designed for vestibule doors that swing out and are flush with the door frame. Each is bright nickel plated. Packed with all necessary screws.

Stock No.	Flange	Screw Edge
VDG-1	Wide	Wide
VDG-2	Wide	Narrow
VDG-3	Narrow	Wide
VDG-4	Narrow	Narrow

## LATCH LOCK — ON DOORS OPENING IN

These guards tie the door stop and the door frame together. An extended, 1/16 inch edge goes down into the wood frame itself, to provide more complete security. This effective barrier prevents any door openings by a knife or celluloid strip.

Many homes, hotels and motels still have unguarded latch locks in use. They are easy prey for even an inexperienced burglar!

Made of Nickel Plated Steel  
Countersunk Screw Holes  
Packed with Screws

No. IDG-7 3 1/2 inch Lock face opening

No. IDG-8 5 3/8 inch Lock face opening

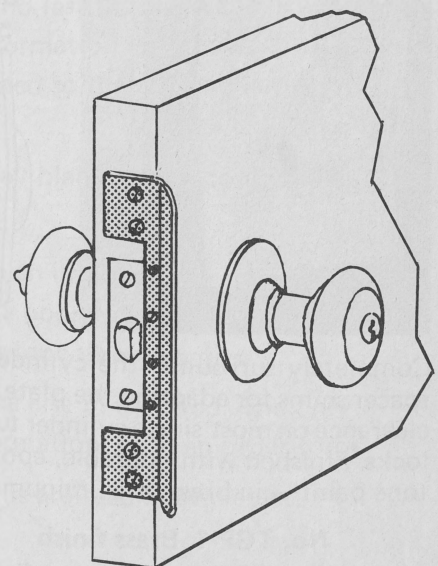

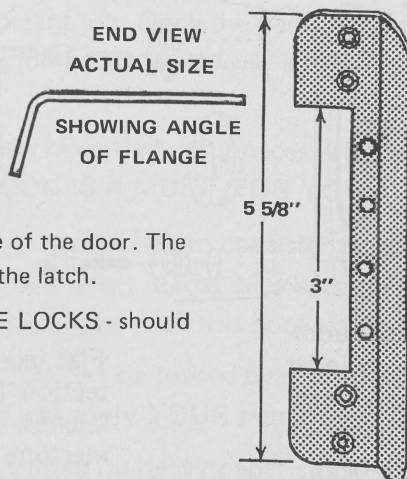

## LATCH LOCK ON DOORS OPENING OUT

Guard plate is screwed directly onto the edge of the door. The flange will keep any prying tools away from the latch.

ALL DOORS USING SPRING LATCH TYPE LOCKS - should have the added protection of a lock guard.

Made of Nickel Plated Steel  
Countersunk Screw Holes  
Packed With Screws

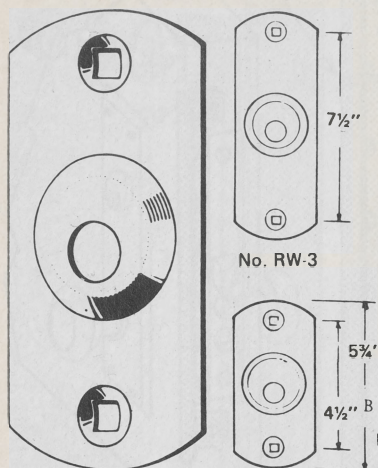

No. ODG-6

# CYLINDER GUARD PLATES

## FOR RIM LOCKS

No. RW-3

5 3/4"

4 1/2" B

No. RW-1 and 2

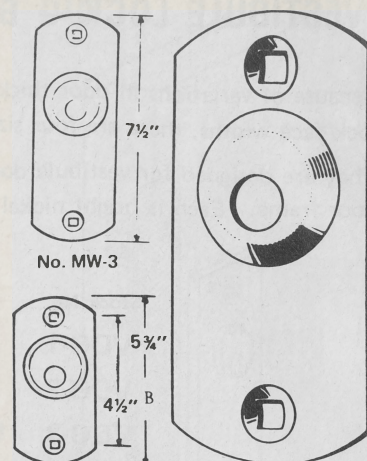

ALL ARE BRIGHT NICKEL PLATED

**MAKES CYLINDER LOCKS  
PULLER RESISTANT**

Puts a sheet of hard armor over the cylinder. Easy to install. Two different well depths are available. The 7/32" depth is the popular choice.

- No. RW-1** For Rim Locks, 5 3/4" long (3/64" well)
- No. RW-2** For Rim Locks, 5 3/4" long (7/32" well)
- No. RW-3** For Rim Locks, 7 1/2" long (7/32" well)

## FOR MORTISE LOCKS

No. MW-3

5 3/4"

4 1/2" B

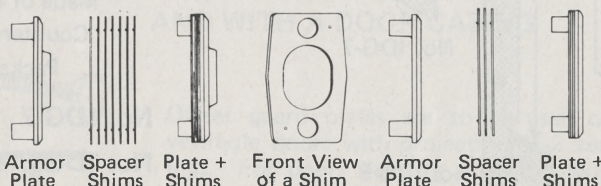

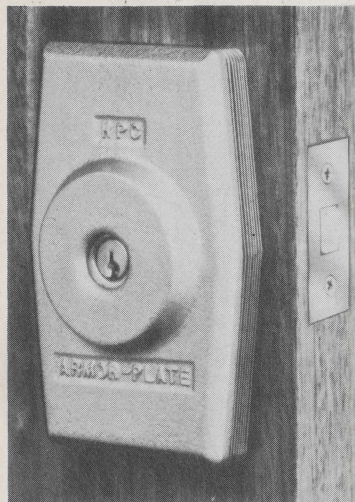

No. MW-1 and 2

- No. MW-1** For Mortise Locks, 5 3/4" long (3/64" well)
- No. MW-2** For Mortise Locks, 5 3/4" long (7/32" well)
- No. MW-3** For Mortise Locks, 7 1/2" long (7/32" well)

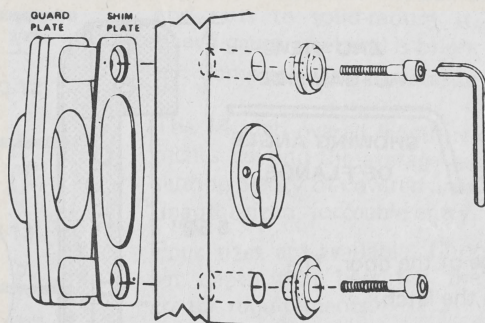

- HIGH TENSILE ALUMINUM ALLOY PLATES • STEEL PLATE LAMINATED BACKING
- NO EXPOSED BOLTS • NO LOCK REMOVAL TO INSTALL • WEATHER TESTED

Either plate requires just two 7/8" diameter holes bored through the door. All mounting screws and anchoring buttons are attached on the interior side of door. With illustrated instructions.

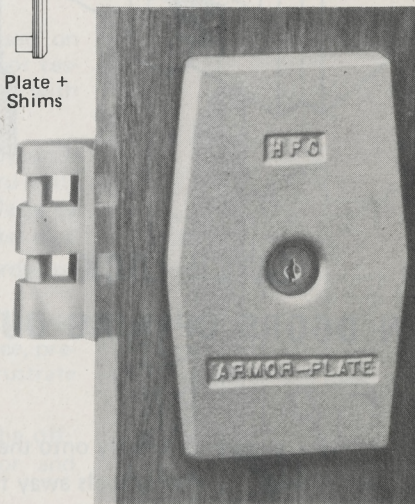

## FOR TUBULAR LOCKS

**PLATE MOUNTING SYSTEM ON INSIDE OF  
DOOR, FOR TUBULAR OR RIM LOCKS.**

## FOR RIM LOCKS

Completely surrounds the cylinder. Includes spacer shims for adapting the plate for cylinder clearance on most single cylinder tubular dead locks. Finished with a durable, epoxy hammer-tone paint — in brass or aluminum color.

- No. TGP-1** Brass finish
- No. TGP-2** Aluminum finish

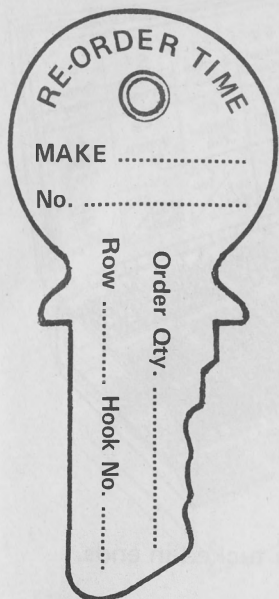

Flat face front offers streamlined cylinder protection for all rim type deadlocks and spring latches. Finished with a durable epoxy hammer-tone paint — in brass or aluminum color.

- No. RGP-1** Brass finish
- No. RGP-2** Aluminum finish

# KEY BLANK INVENTORY CONTROL

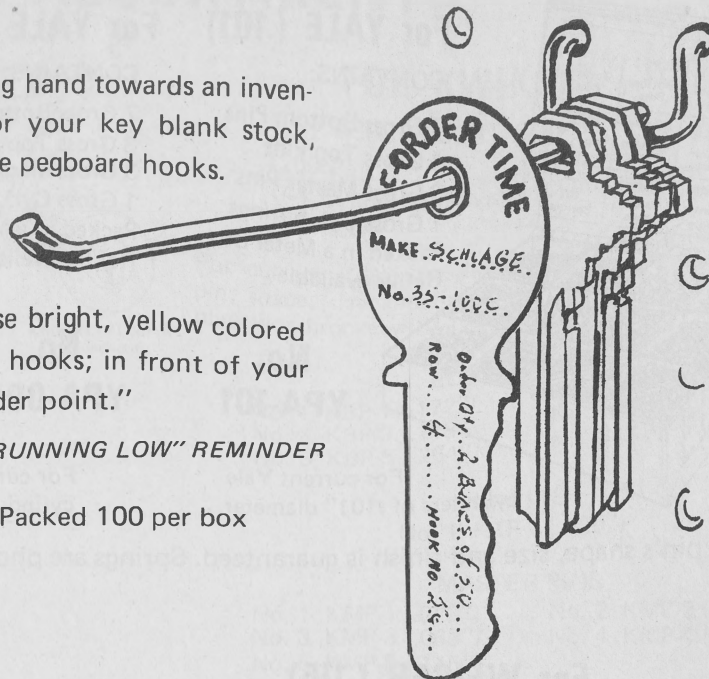

Here is a helping hand towards an inventory method for your key blank stock, hanging on those pegboard hooks.

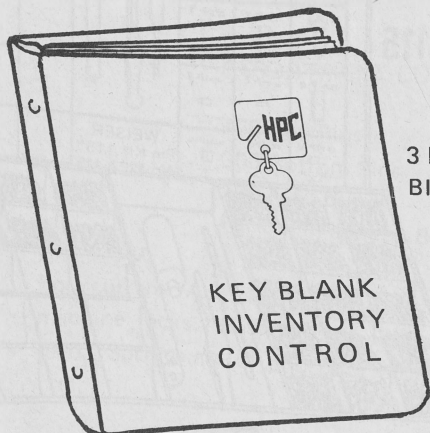

Just mount these bright, yellow colored tags on the key hooks; in front of your determined "order point."

*AN EXCELLENT "RUNNING LOW" REMINDER*

No. INV-1 Packed 100 per box

# KEY BLANK INVENTORY CONTROL BOOK

3 RING  
BINDER

TYPICAL  
PAGE

No. KBIC-1

**AT LAST** — a method of inventory control for key blanks! So easy and fast that even the newest man in your shop can do this important job. Once the permanent information is entered; there is no need to do this time consuming job by yourself, ever again. Designed so that no familiarity of key blanks is required.

If hundreds of dollars have previously been tied up unnecessarily in key blank stock; to the point of becoming an eye-sore — **THIS BOOK IS A MUST, FOR YOU!**

A shop owner may not always find it convenient to consistently keep an up-to-date inventory and ordering system — by himself. This can result in lost sales because of a poor stock or a costly overstocked situation. A few hours of spare time with this book can bring long-term benefits.

After setting-up this book, such a job can be turned over to someone else in the shop. The only skill necessary is the ability to read and apply **YOUR** permanent information, onto an order form.

Permanent information sheets are printed on heavy paper stock. Refills are readily available.

7 Gross Bottom Pins  
4 Gross Top Pins  
3 Gross Master Pins  
1 Gross Cyl. Springs  
Packed in a Metal Box  
Refills available

No.  
**YPA-101**

For current Yale  
cylinders of .101" diameter.

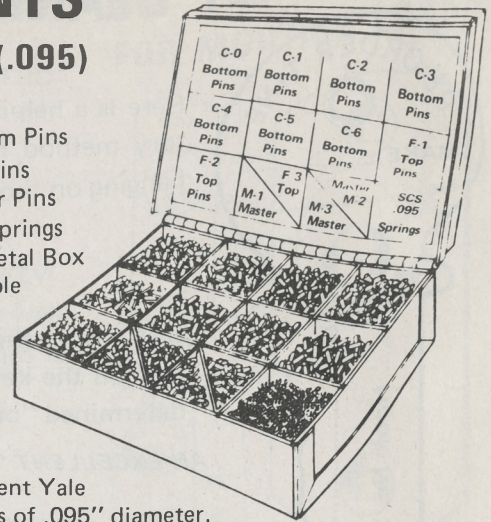

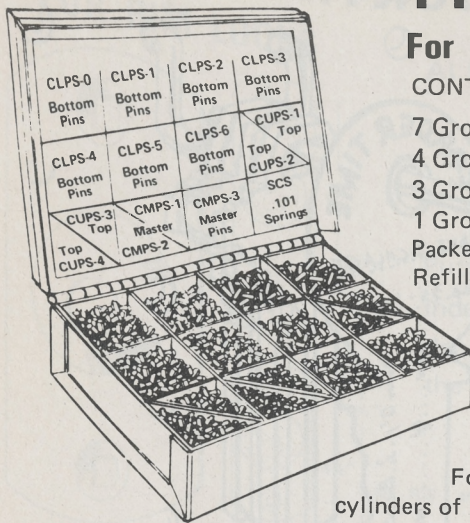

## For YALE (.095)

### CONTAINS:

7 Gross Bottom Pins  
3 Gross Top Pins  
3 Gross Master Pins  
1 Gross Cyl. Springs  
Packed in a Metal Box  
Refills Available

No.  
**YPA-095**

For current Yale  
cylinders of .095" diameter.

Each pin's shape, size and finish is guaranteed. Springs are phosphor bronze with tucked-in ends.

## For WEISER (.115)

Contains 100 each of Bottom Pins, Universal Top Pins, Master Pins and Springs — plus a Follower, Cap Tool, Shim Pick and a special Tweezer.

# CARRY-OUT KEYING KIT

## A SHOP IN A BOX

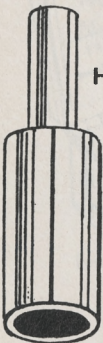

**No. COKO-5.** This handy kit contains almost everything needed to handle outside keying jobs. Follow thru tools, plug holders, pins, cylinder springs, tailpieces and tweezers; are all contained in this kit. An excellent machinist's vise swings up on a hinged plate, ready for instant use. The inside of the lid is lined with foam tape to keep all interior parts where they belong.

**No. KO-3 Carry-Out Kit Box ONLY.** With empty plastic bottles. Measures 17½" x 7½" x 3¼". A kit box for carrying miscellaneous parts, pins, wafers, springs, etc.

**HOLLOW DRILLS**  
Fit into Holder

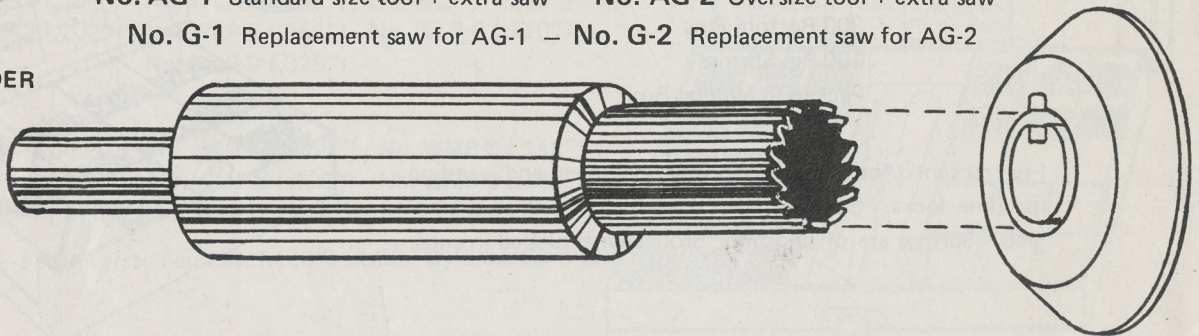

**HOLDER**

## TUBULAR LOCK DRILLS

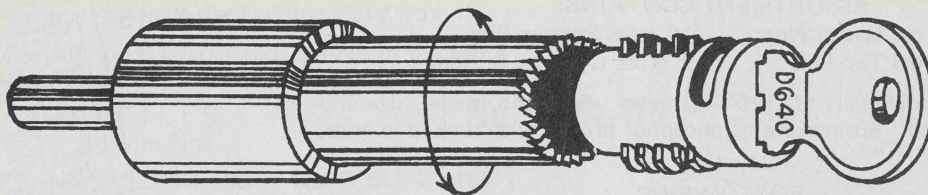

Lock-outs of tubular key locks can be serviced. These hole saws destroy the pins at the shear line. Hole saws are available for standard and oversize keyways. Saw life is approximately three openings. *Not for locks with hardened pins or ball bearings in the keyway.*

**No. AG-1** Standard size tool + extra saw — **No. AG-2** Oversize tool + extra saw

**No. G-1** Replacement saw for AG-1 — **No. G-2** Replacement saw for AG-2

## KEYING TOOL FOR JUNKUNC

**No. DGM-1** — GRINDS BLANK TUMBLER PLUGS TO ANY DOUBLE-SIDED COMBINATION

Key your own double-sided plugs for Junkunc padlocks in no time. Just buy a supply of *blank tumbler plugs* (Junkunc No. BTC.) and avoid waiting for special factory orders. Simply insert the cut key into the plug and hold it firmly in a vise by the head of the key. Insert the DGM-1 into the chuck of any ¼" electric drill and feed it 1/32" over the plug. Start the drill and the tool easily trims the tumblers, giving you a perfectly keyed plug. Also ideal for grinding blank tumblers as used in glove box locks on GM cars.

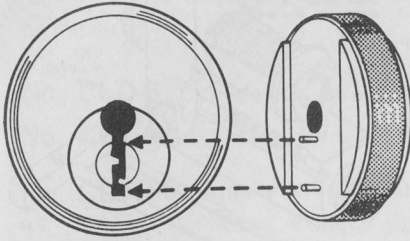

# CYLINDER DRILL JIGS

Occasionally, it is found that a mortise or rim cylinder is impossible to pick. Even the best lock picker may be foiled by a broken cylinder spring, corroded pins, etc. Drilling is the answer.

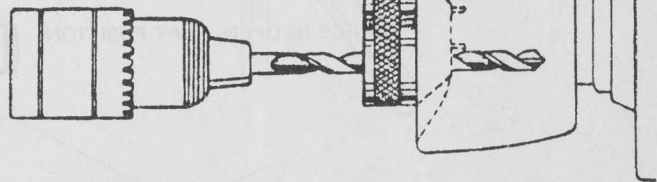

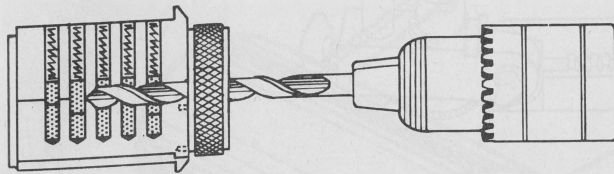

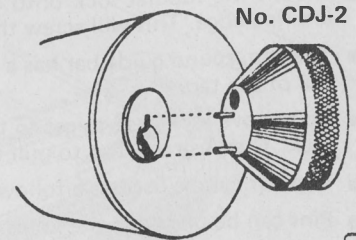

No. CDJ-1

The CDJ-1 and CDJ-2 drill jigs are designed for such situations. These Jigs will assure perfect alignment on the shear line for a drill bit.

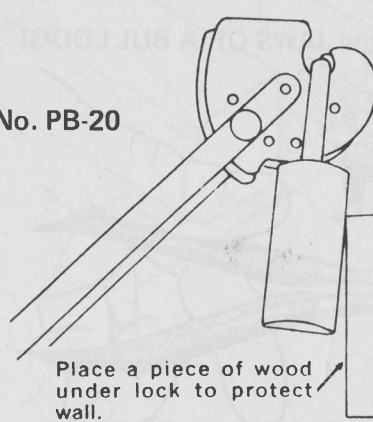

**No. CDJ-1** Cylinder Drill Jig and Drill Bit for a flat face cylinder.

**No. CDJ-2** Cylinder Drill Jig and Drill Bit for recessed Tulip design types.

## PADLOCK BUSTER

No. PB-20

### Method 1 (Normal Padlock)

Adjust the handle angles to approximately as shown above, by relocating the thumb screws.

**Method 3** — If the lock is not accessible by the methods 1 or 2, reverse one of the cams to make a left and right hand device and use as illustrated.

### Method 2 (Larger Padlocks)

For larger locks, use the opposite side of the cams.

By lever action, the curved disc draws padlock shackle out of lock body. Methods shown above, should provide at least one effective procedure.

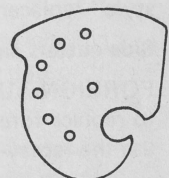

— PARTS ARE AVAILABLE THROUGH YOUR DISTRIBUTOR —

No. PB-20C  
CAM

# TUBULAR LOCK SERVICING FIXTURE

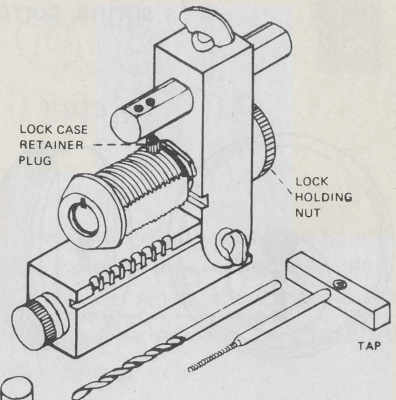

HERE IS A SMALL, COMPACT BUT AMAZINGLY VERSATILE DEVICE FOR SERVICING THE THREE LENGTHS OF TUBULAR LOCKS.

No. SUT-137

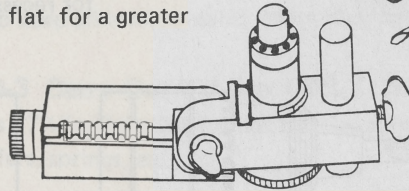

- Mount the tubular lock onto the fixture by turning the large flat washer with the knurled edge. This will screw the lock firmly back and against the upright post.
- The top, round guide bar has a forward hole as a drill guide and a second hole for the use of the tap.
- To remove lock case to get to the pins, drill hole into the holding plug on top of the lock. Then use the Tap to pull the plug, enabling removal of lock cover.
- Top bar can be used as a follow through, before casing is removed.
- Pins can be placed in the holes at the base of the fixture.
- Loosen thumb screw and the upright section can be laid flat for a greater working convenience.

OFFERS 4 DIFFERENT FUNCTIONS

- 1 — For RETAINING PIN REMOVAL
- 2 — As an ASSEMBLY TOOL
- 3 — A PIN DECODER
- 4 — A FOLLOW THRU

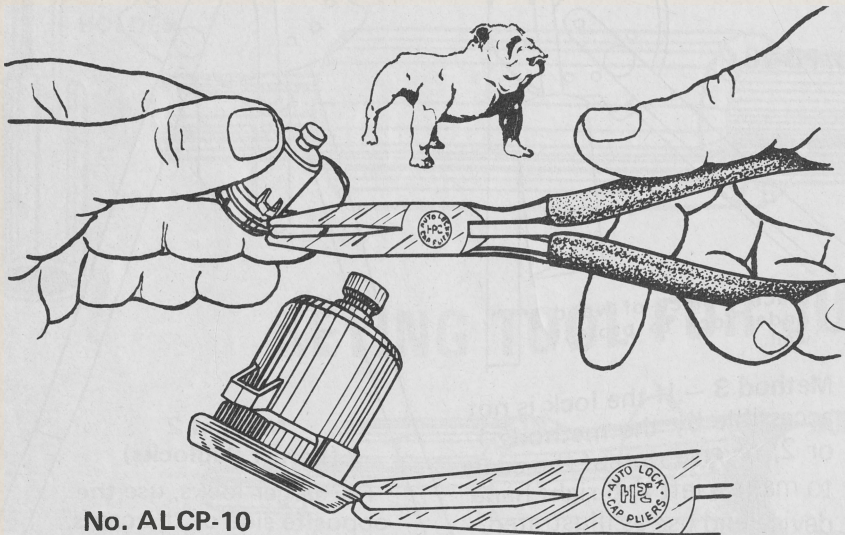

DEVICE IN OPEN, FLAT POSITION

## JIFFY DECAPPER

REMOVES AUTO LOCK FACE CAPS  
IN SECONDS . EASILY

The specially machined tips grip like the JAWS OF A BULLDOG!

No. ALCP-10

Quickly removes either the factory lock caps, using the rolled crimp, or the "Tab style" replacement caps.

Side cutters and cut fingers are now a thing of the past.

**FOREIGN AUTO CAPS** — With some care, it is possible to remove these hard to replace foreign caps with a minimum of distortion, thereby being able to re-use the removed caps.

This heavy duty forged pliers should give years of good service, and is a valuable addition to your auto lock service department.

## Impression File SAFETY CASE

THIS CLEAR TUBE  
CLIPS TO SHIRT  
POCKET. HAS A  
SPRING ACTION CAP.

PROTECTS  
WEARER

PROTECTS POCKET

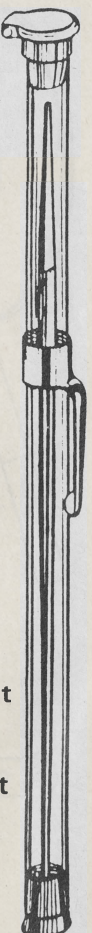

No. IFH-1 = File Holder

AMERICAN MADE

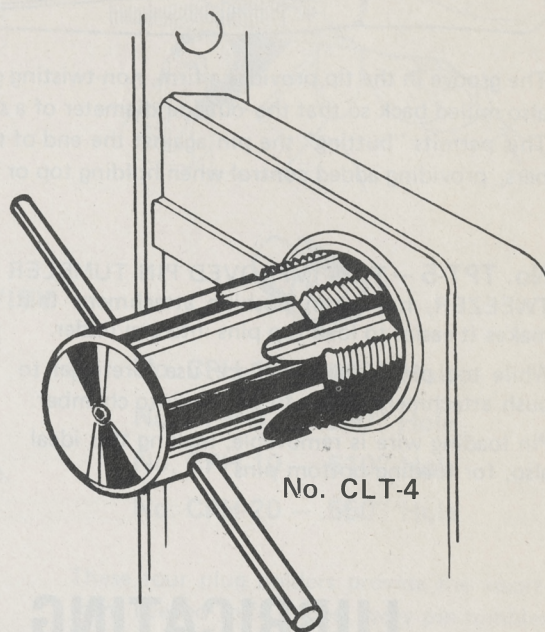

# MORTISE CYLINDER LOCK TAP & DIE SET

Bothered by stripped mortise cylinders and lock cases? How many times has a customer come into your shop with a stripped mortise cylinder, because he unscrewed it without loosening the retaining screw or fork? This kit offers the perfect solution to this problem as well as the more important task of rethreading cylinders and cases that are no longer manufactured and must be repaired.

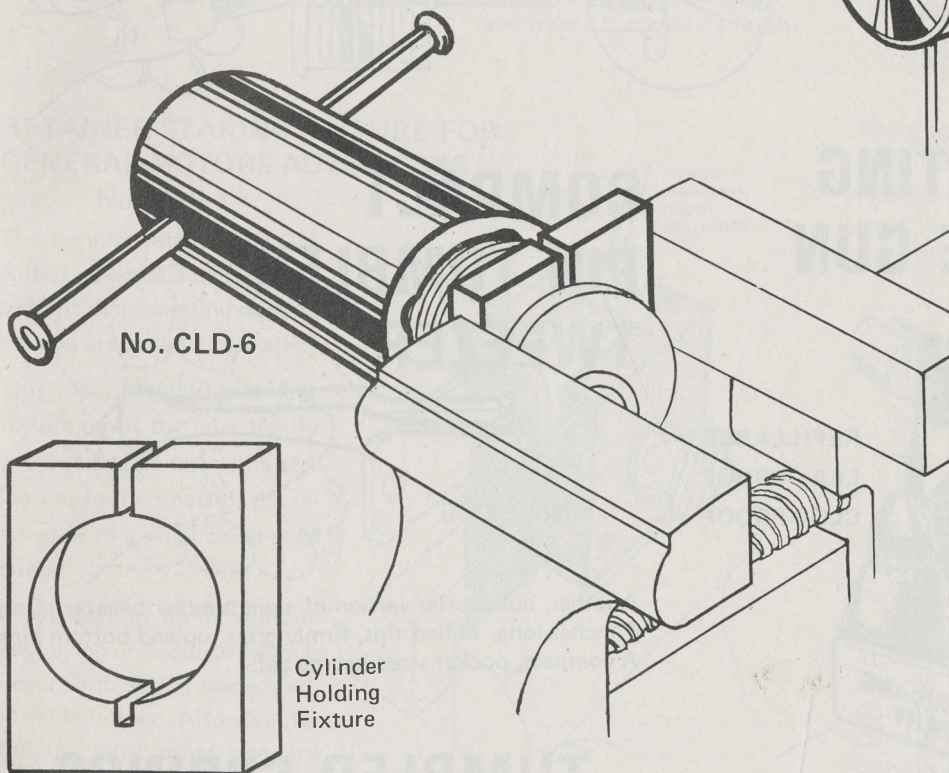

**No. CLD-6** Cylinder Re-threading Die Only and Holding Fixture

**No. CLT-4** Lock Case Re-tapping Tap Only

**No. CLTD-5** Complete Tap & Die Kit with Cylinder Holding Fixture & Metal Box

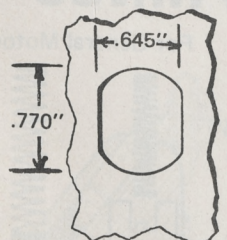

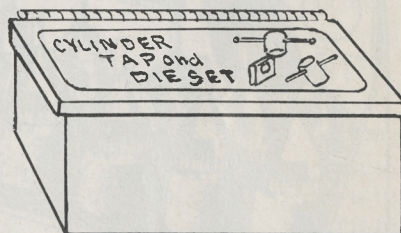

No. CLT-4

No. CLD-6

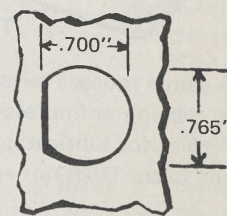

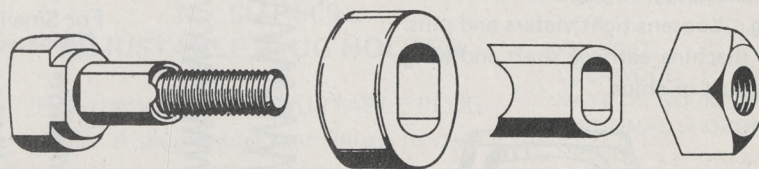

Cylinder Holding Fixture

Complete Set Is Contained in a Metal, Compartmented Box

DOUBLE "D"

## METAL PUNCH and DIE SETS

SINGLE "D"

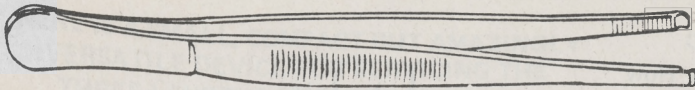

**No. HDPS-4** PUNCHES A DOUBLE "D" HOLE. A necessary aid to the locksmith for installing vending machine and cam type locks on metal cabinets, sheet metal lockers, filing cabinets and cash boxes made of single wall, sheet metal of 18 gauge or lighter.

**No. SDP-700** . PUNCHES A SINGLE "D" HOLE. As needed for many auto alarm cylinders and cam locks that have a single flat side on the threaded outside case. For 18 gauge or lighter sheet metal.

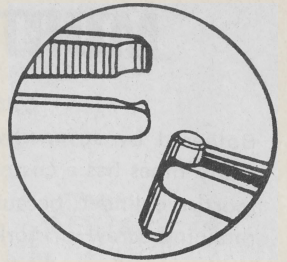

# PIN TUMBLER TWEEZERS

No. PTT-4

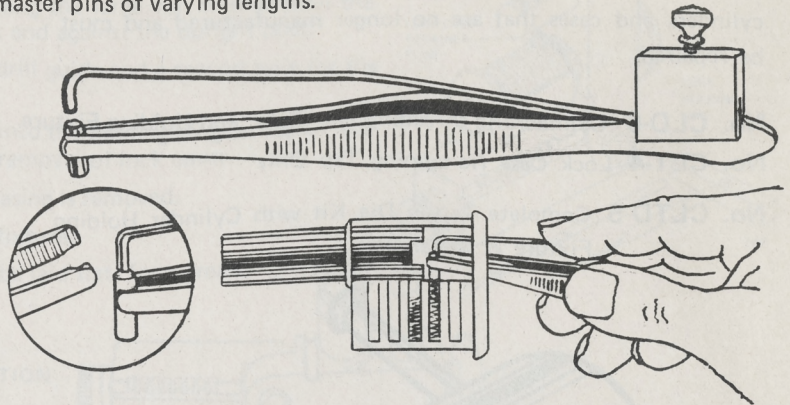

The groove in the tip provides a firm, non-twisting grip on cylinder pins for easy loading. The tip is also milled back so that the outside diameter of a standard .115" diameter pin extends past the tip. This permits "butting" the pin against the end of the plug follower when loading the upper chambers, providing added control when holding top or master pins of varying lengths.

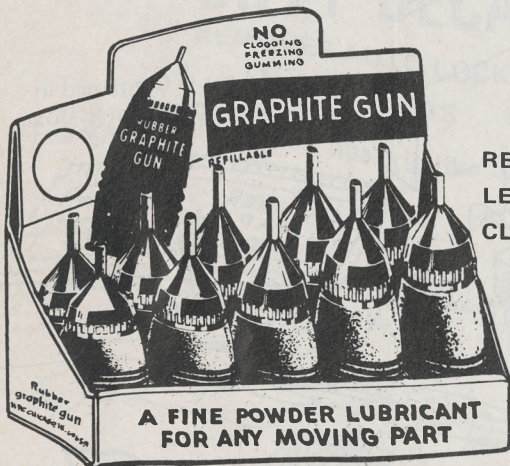

**No. TPT-5** — THIS IMPROVED PIN TUMBLER TWEEZER, has a pin pushing attachment that makes it easier to load top pins into a cylinder.

While top pin is held in place, use forefinger to push attachment down to set pin into chamber.

Pin loading wire is removable, making this ideal also, for loading bottom pins.

## LUBRICATING GRAPHITE GUN

REFILLABLE  
LEAK-PROOF  
CLOG-PROOF

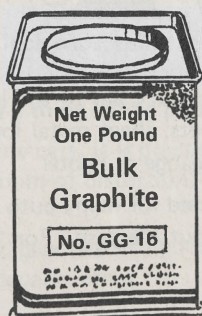

No. HGG

Ten Graphite Guns in a Display Carton

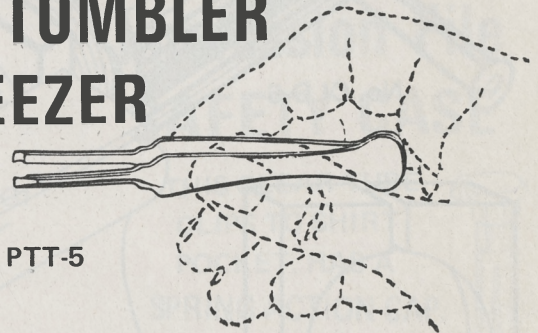

A gentle squeeze releases a fine spray of graphite. Used prior to picking or impressing. Loosens tight wafers and pins. Perfect for lubricating key machine carriage shaft and wing nut studs. Does not attract dust or chips.

### No. GG-16 BULK GRAPHITE

High quality, Finest Micro-Spray re-fill Graphite. One pound per can.

## COMPACT PIN TUMBLER TWEEZER

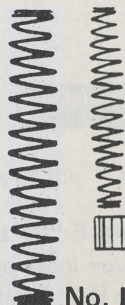

No. PTT-5

Another, but shorter version of a pin tumbler tweezer. Only 4 inches long. Milled tips, firmly grips top and bottom pins. A compact, pocket-sized keying aid.

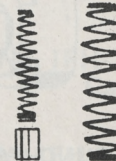

## TUMBLER SPRINGS

For .115" Diameter Standard Cylinder

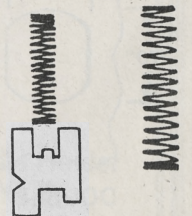

No. LCS  
pack of 144

For Small .095" Diameter Pins

No. SCS  
pack of 144

For General Motors

No. GMLS  
pack of 100

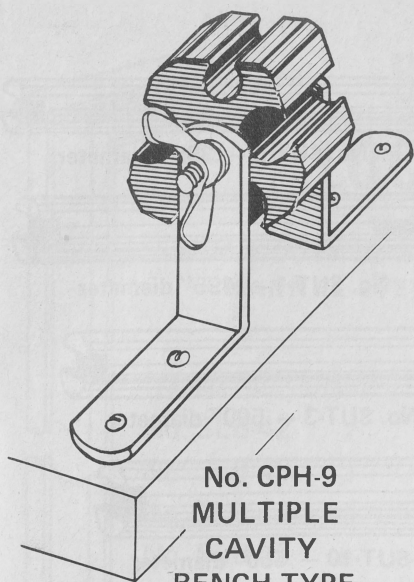

No. GMLS-500  
Economy 500 Pack

These phosphor bronze springs have tucked-in ends for easier loadings. They offer a maximum corrosion resistance and will give years of control over pins, without any tension loss or collapse.

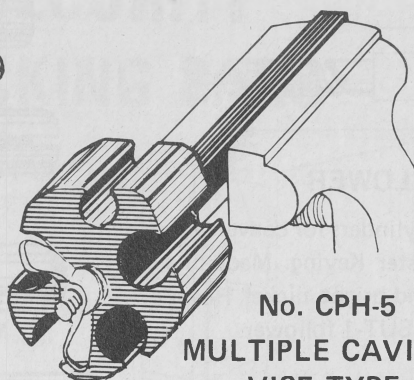

# PLUG HOLDERS

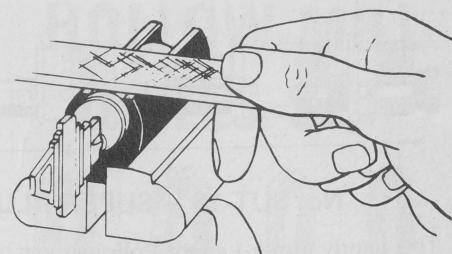

**No. CPH-9  
MULTIPLE  
CAVITY  
BENCH TYPE**

**No. CPH-5  
MULTIPLE CAVITY  
VISE TYPE**

FITS THE FIVE  
MOST POPULAR SIZES

Holder bodies are hardened  
and have a black oxide finish.

**No. CPH-15 — .405" Hole**

**No. CPH-8 — .500" Hole**

**No. CPH-10 — .510" Hole**

**No. CPH-20 — .550" Hole**

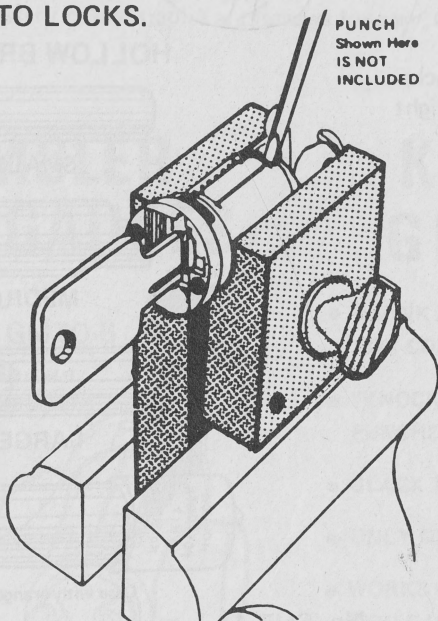

## RETAINER STAKING FIXTURE FOR GENERAL MOTORS AUTO LOCKS.

### No. RSF-1

The tumbler retainers on GM Auto Locks must be staked to prevent their popping out and causing unneeded "lockouts".

This case hardened vise-held fixture, grips the core tightly without distortion; while staking the four corners of the retainer with a small chisel-edge punch.

Rigid bottom holds without any giving or "bounce" as may occur with spring loaded, adjustable holder. Also ideal for holding most other standard pin tumbler cylinder cores.

PUNCH  
Shown Here  
IS NOT  
INCLUDED

These four plug holders provide the assortment needed to fit almost every pin tumbler lock core. They are made of hardened bar stock, so as not to become scratched by the file. Black oxide finish.

## No. SUT-600 ADJUSTABLE PLUG HOLDER

THE UNIVERSAL ADJUSTABLE PLUG VISE. A plug holder that adjusts its own hole size from .350" to .600" to give a perfect fit on many different cores. Plug vise body and slide are hardened and have a black oxide finish.

# PLUG FOLLOWERS

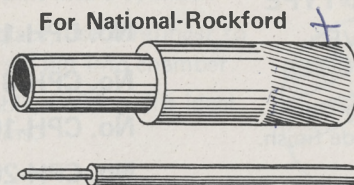

**No. SUT-18 — SUPER PLUG FOLLOWER**

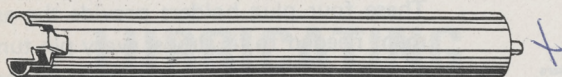

This handy **Super-Length Follower** can hold 12 cylinders for convenient PIN SERVICING. Ideal for multiple cylinder Master Keying. Made of a polished stock and finished in a gleaming black and bright nickel. Has removable cylinder stops at each end. Same size as SUT-1 follower.

## FOLLOWER and PIN PUNCH, No. SUT-24

Follower machined and zinc plated for smooth operation. Pin punch is plated and hardened.

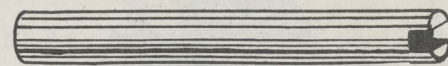

For National-Rockford

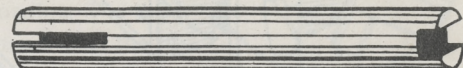

**No. SUT-23** — For Weiser Beverly design knob locks. Solid bar stock machined to perfect dimensions. Bright zinc plated.

**No. SUT-0** — .395" diameter

**No. SUT-1** — .495" diameter

**No. SUT-3** — .500" diameter

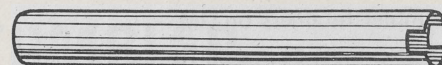

**No. SUT-10** — .550" diameter

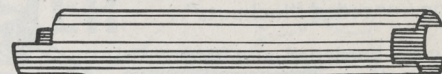

These four plug followers will fit 99% of the rim or mortise cylinders and cylinder units currently in use. Made of centerless ground bar stock.

**No. SUT-47** is a set of one of each of the above followers.

## HOLLOW BRASS FOLLOWER SET

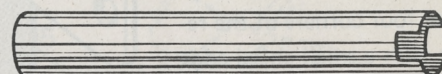

**SMALL** — .395" diameter

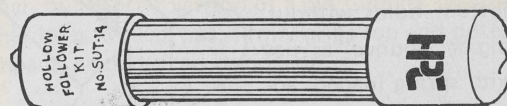

**MEDIUM** — .495" diameter

End view of nested followers, within case.

**LARGE** — .550" diameter

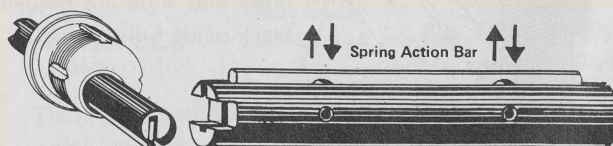

Case with orange caps on each end

**No. SUT-14** — This set contains three popular sizes of medium-hard, zinc plated, hollow brass followers. Each fits into the other and into their case, for convenient compactness and protection.

This follower kit will also work on the new style Corbin and Russwin heavy duty knob lock cylinder unit. The small diameter follower is useful for cabinet locks, peanut size cylinders and the new type pin tumbler letterbox locks.

Complete set fits into a tube with an orange cap on each end. Handy, compact, efficient and lightweight.

## No. SUT-22 ADJUSTABLE FOLLOWER

Fits all standard locks .495" to .600" in diameter. It will handle 90% of all locks. Spring loaded.

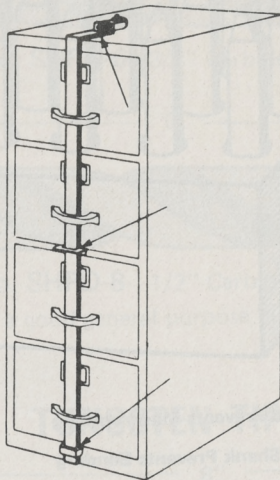

## SECURITY LOCKING BARS

HEAVY DUTY 1/2"x 1 1/2"  
CHANNEL STEEL

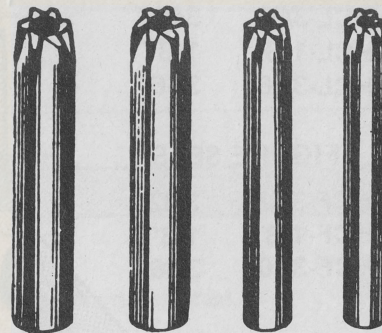

Stock No.	Drawers	Length
No. SLB-42	2	27"
No. SLB-43	3	39-1/2"
No. SLB-44	4	51-1/2"
No. SLB-45	5	59-7/8"

Secure Locking Bars are quickly installed on steel or wood file, blue-print or tool cabinets.

Packed with all necessary hasps, staples and screws for easy, on-the-job installation.

## HOLLOW MILL DRILLS SET

No. HMD-5

For drilling off luggage lock rivet heads, when servicing suitcase locks. Can also be used to shear base plate rivets on Master Padlocks. Fits into either a hand drill or an electric drill.

## GM TUMBLER DECODER GAUGES

No. GMTD-5  
Shown  
Actual Size

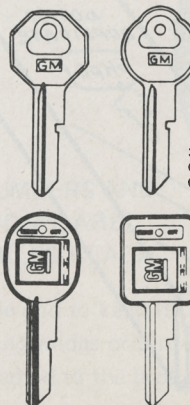

This inexpensive set of gauges eliminates the guess work, when reading the G M tumblers. No need to take apart or waste key blanks, by "eye-balling" the depths.

Simply press inward on the side-bar and rake the tumblers until the side bar moves inward to the unlocked position. Then, place gauge pin over each wafer until the shoulder stop, butts against top of plug.

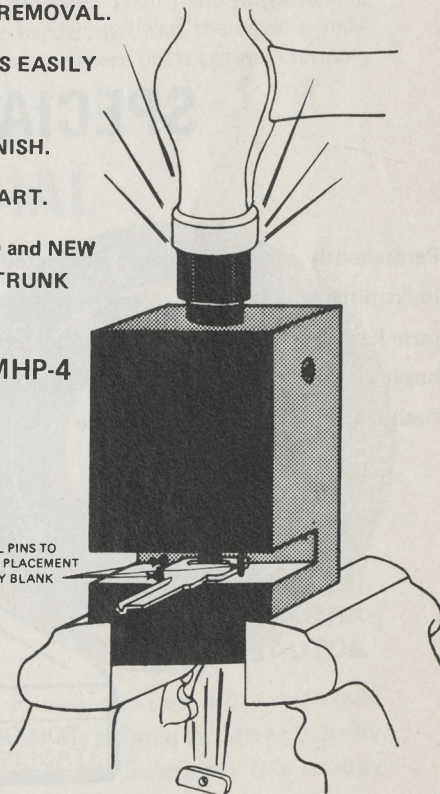

## KEY HOLE PUNCH for GM CAR KEY BLANKS

- BLANK ALIGNMENT ASSURED, FOR CORRECT SLUG REMOVAL.
- "KNOCK-OUT" SLUG IS EASILY PUNCHED OUT.
- BLACK ANODIZED FINISH.
- ONLY ONE MOVING PART.
- WORKS ON BOTH OLD and NEW STYLE IGNITION and TRUNK KEY HEADS.

No. GMHP-4

## SAFE DRILLS CARBIDE TIP

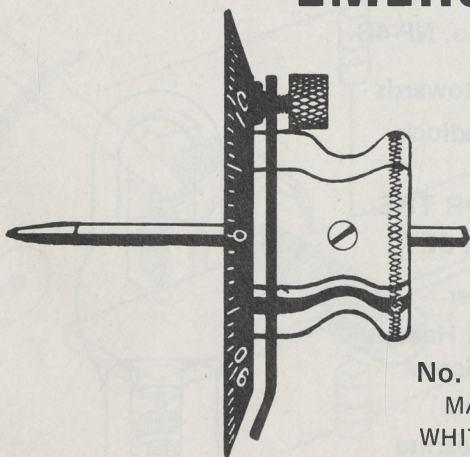

The Carbide tipped drill bit is a good general purpose bit designed to drill hardened steel.

## TUNGSTEN TIP

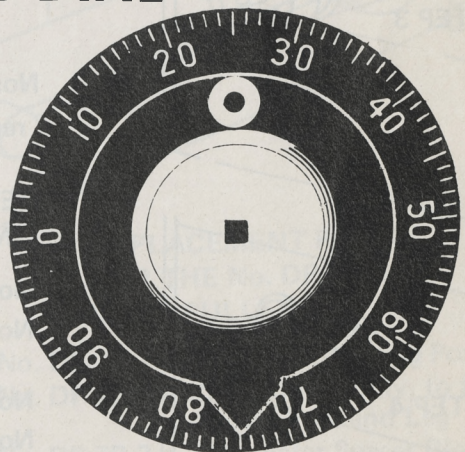

These genuine Carbon Tungsten tipped drills are designed for use on hardened die steel. Their main purpose is to make possible, the drilling of steel that has been hardened to Rockwell C-40 or harder; without the usual annealing process or reverting to the slow and costly grinding method. We do not guarantee these drills against chipping or breakage caused by unintentional misuse to which they might be subjected.

## EMERGENCY SAFE DIAL

No. MED-66 . NUMBERS AND  
MARKINGS ON DIAL ARE  
WHITE ON ENAMELED BLACK

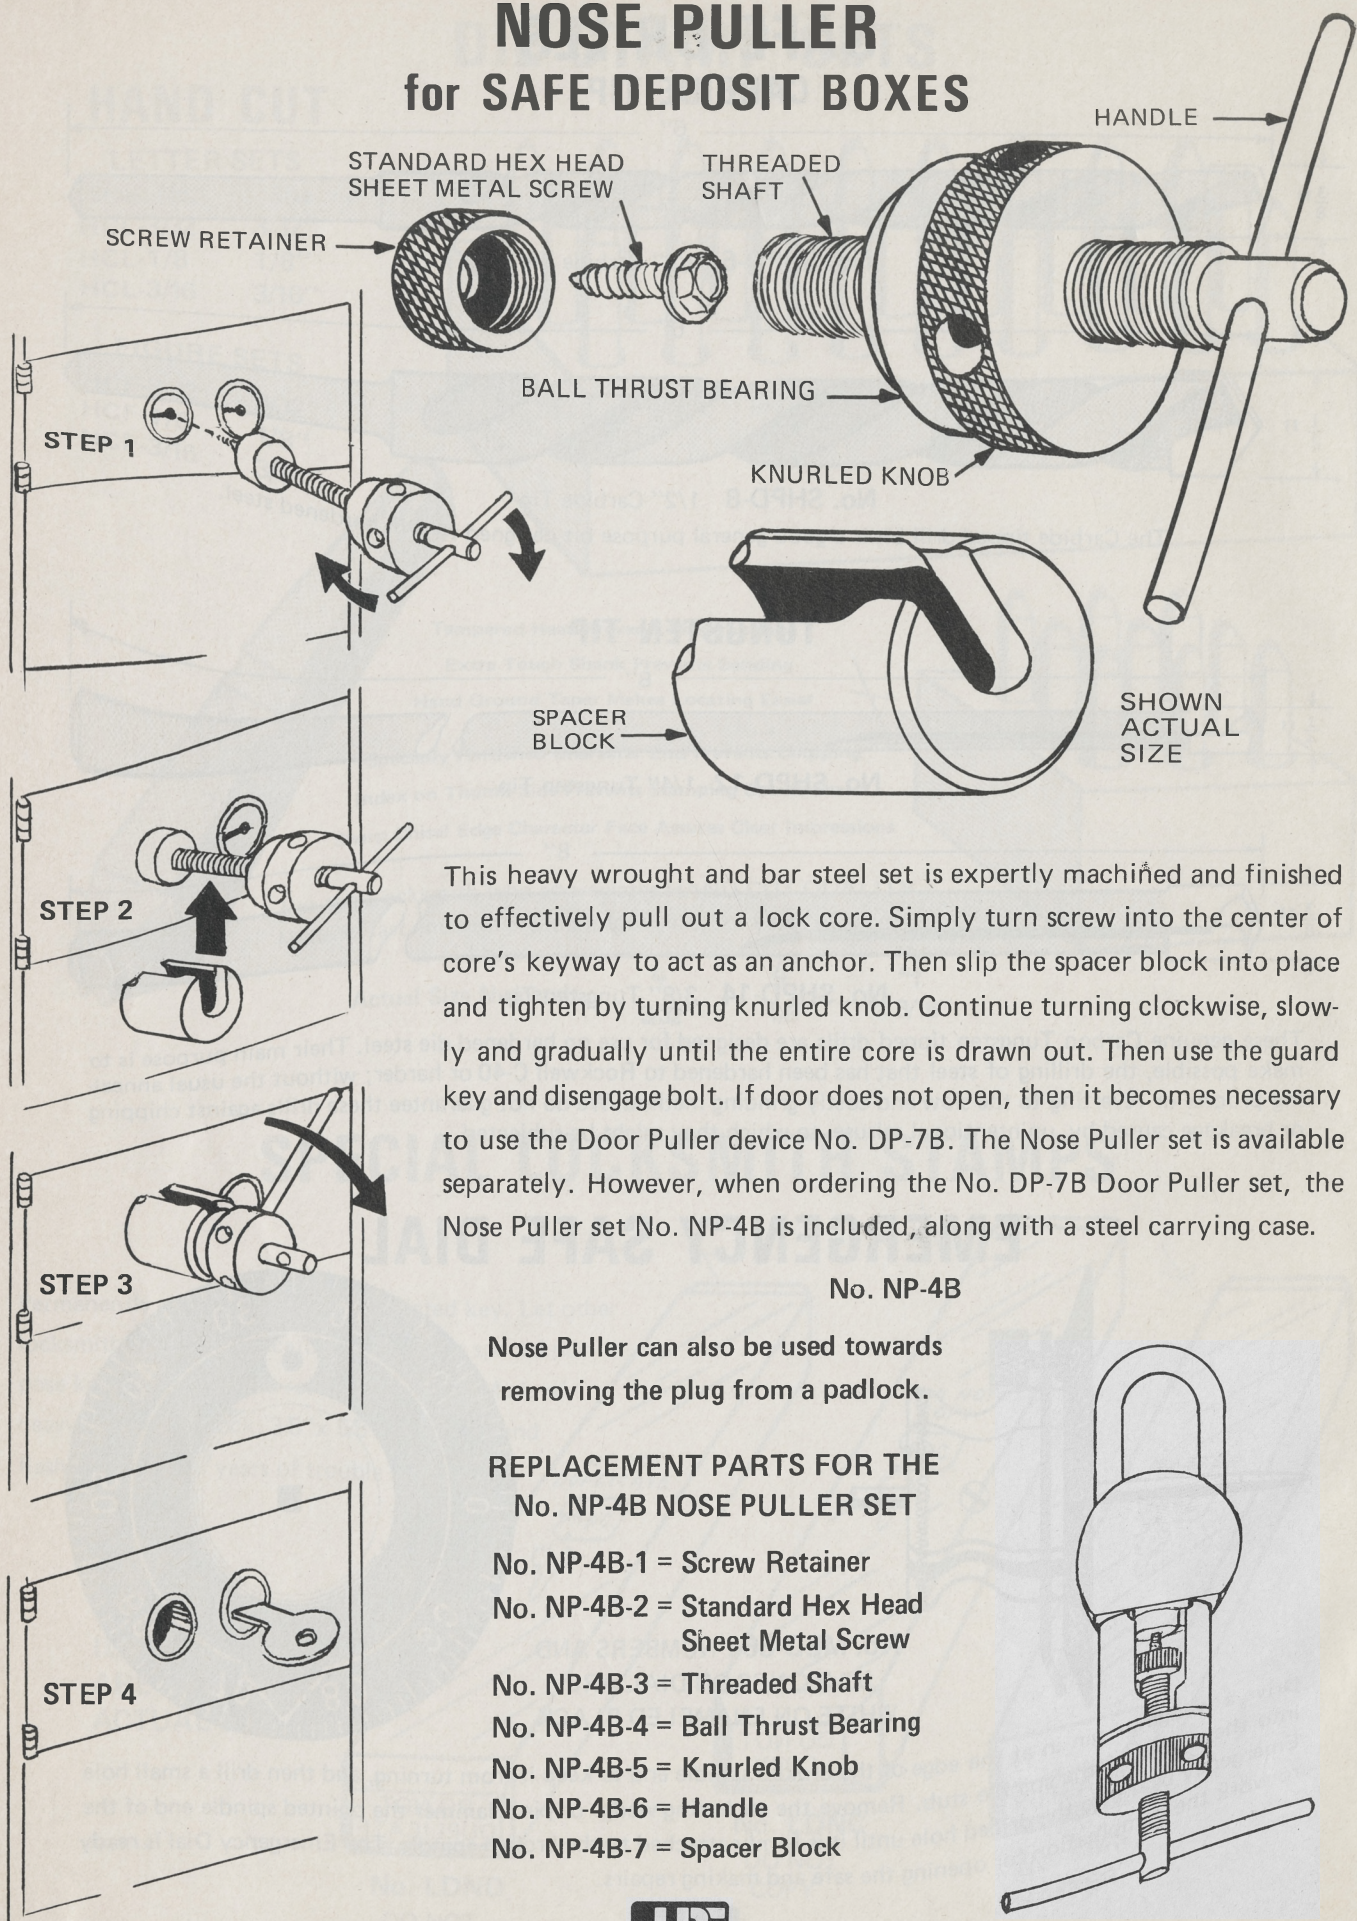

Drive a wedge or pin in at the edge of the broken spindle end to keep it from turning, and then drill a small hole into the center of the spindle stub. Remove the anchoring wedge or pin. Hammer the pointed spindle end of the Emergency Dial into the drilled hole until it is firmly attached to the broken spindle. The Emergency Dial is ready to work the combination for opening the safe and making repairs.

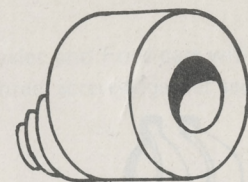

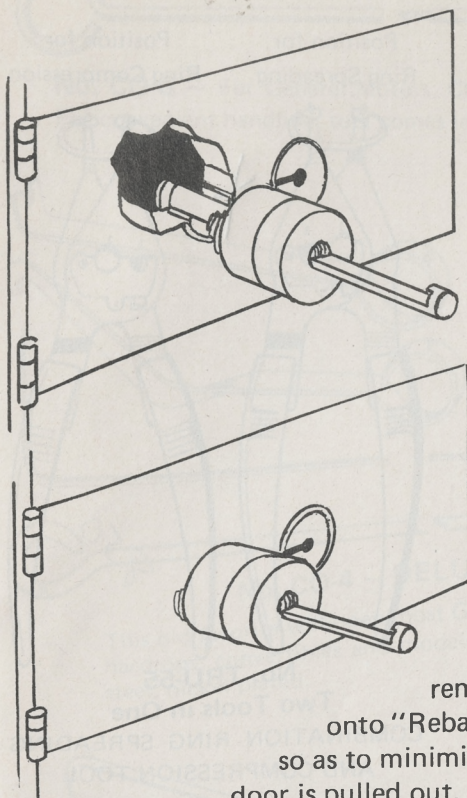

# NOSE PULLER for SAFE DEPOSIT BOXES

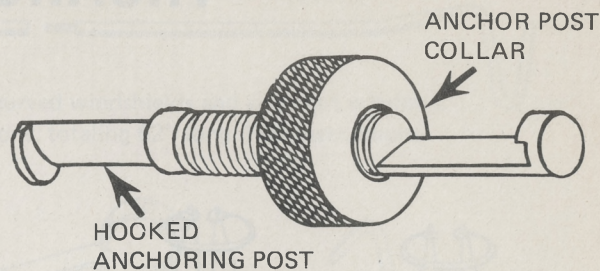

# DOOR PULLER for SAFE DEPOSIT BOXES

THREE DIAMETERED  
SPACER BLOCK

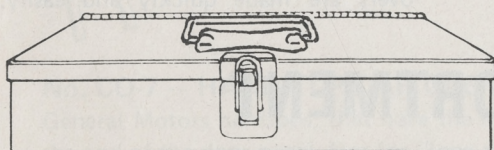

HOOKED  
ANCHORING POST

After the lock core has been pulled and use of the guard key has not opened the door, then it is time to apply the Door Puller set.

Place the stepped Spacer Block onto the hook unit. The three different diametered steps make it adaptable to three different sizes of plug bores. Place the correct diameter step into the corresponding bore. Have the hook end set against the inside back wall of the door, then tighten the knurled nut to hold hook in place. The flat surface on the outside of the hook unit should be in a level position.

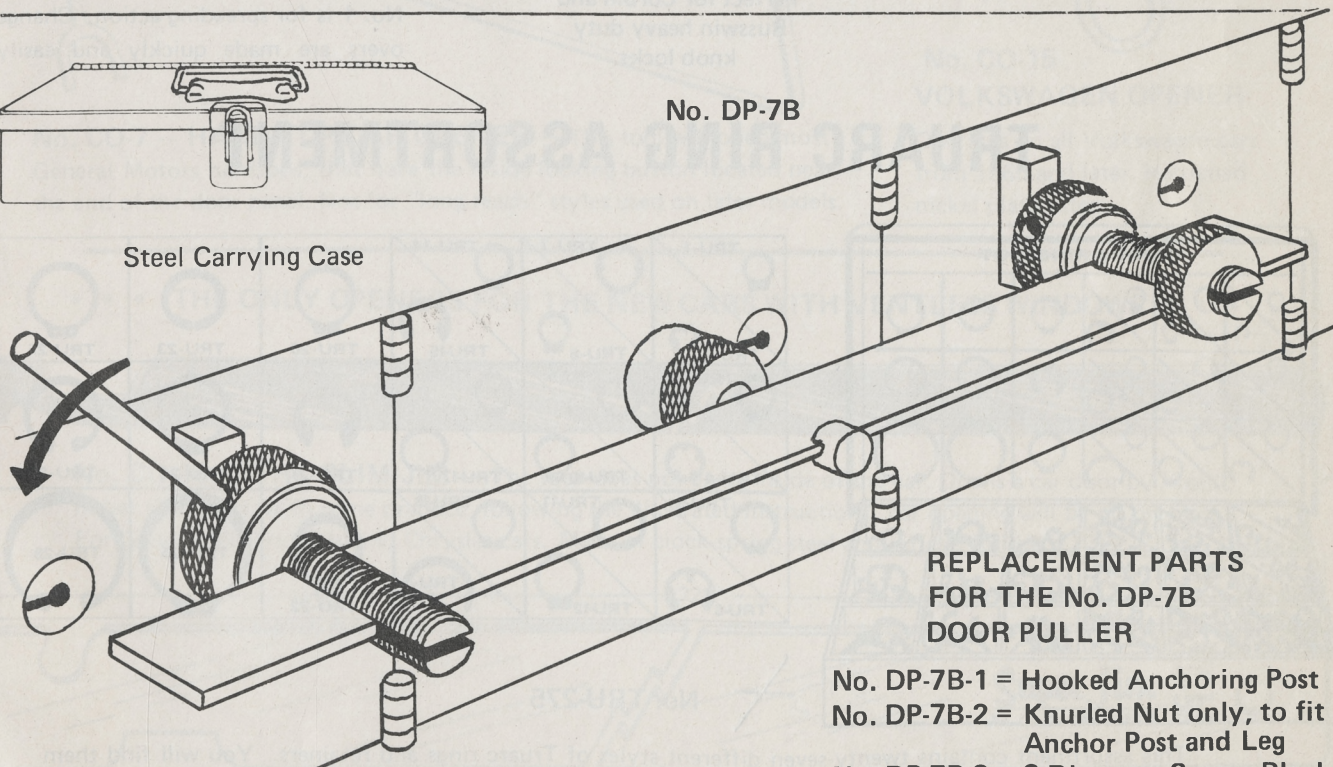

The long flat blade is then fitted onto the holding slot, along with the remainder of the Puller unit, as shown below. Position feet of Puller unit onto "Rebates" (partitions between boxes) or away from centers of adjacent doors, so as to minimize the possibility of distortion. The knurled nut is then turned until the door is pulled out.

**DOOR PULLER set No. DP-7B INCLUDES NOSE PULLER set No. NP-4B — All Within A Carrying Case**

Steel Carrying Case

No. DP-7B

Complete Door Puller set  
in position and ready to pull  
out the safe deposit box door.

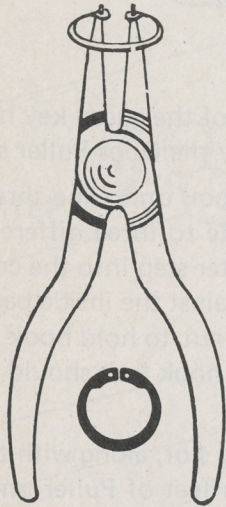

## REPLACEMENT PARTS FOR THE No. DP-7B DOOR PULLER

- No. DP-7B-1 = Hooked Anchoring Post
- No. DP-7B-2 = Knurled Nut only, to fit  
Anchor Post and Leg
- No. DP-7B-3 = 3 Diameter Spacer Block
- No. DP-7B-4 = Flat Blade
- No. DP-7B-5 = Slotted Leg with Foot
- No. DP-7B-6 = Handle
- No. NP-4B-4 = Ball Thrust Bearing
- No. NP-4B-5 = Knurled Knob for  
Thrust Bearing

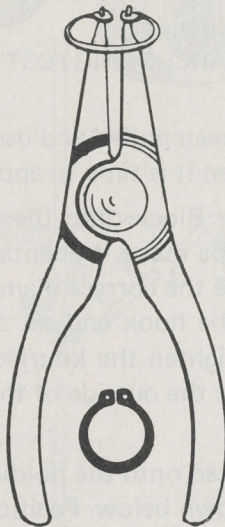

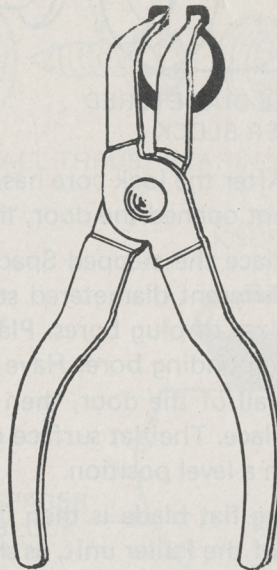

# TRUARC RING PLIERS

No. TRU-121  
RING COMPRESSOR

TRU-5	TRU-11	TRU-18			
TRU-6	TRU-12	TRU-19			

No. TRU-275

This assortment contains twenty-seven different styles of Truarc rings and retainers. You will find them very helpful for servicing Arrow, Best, Corbin, Dexter, Ilco, Lockwood, National, Schlage and many more. All are made of carbon spring steel and offer long-lasting tension or compression for retaining purposes.

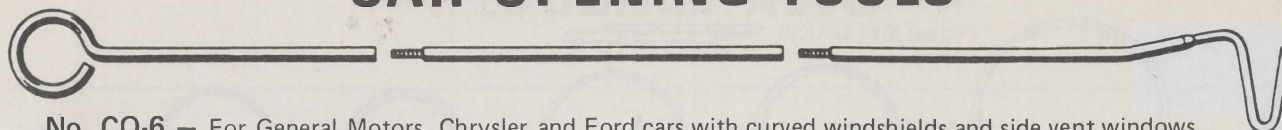

CONTAINS 265 RINGS - ALL REFILLABLE

Shipping Weight: 2 lbs.

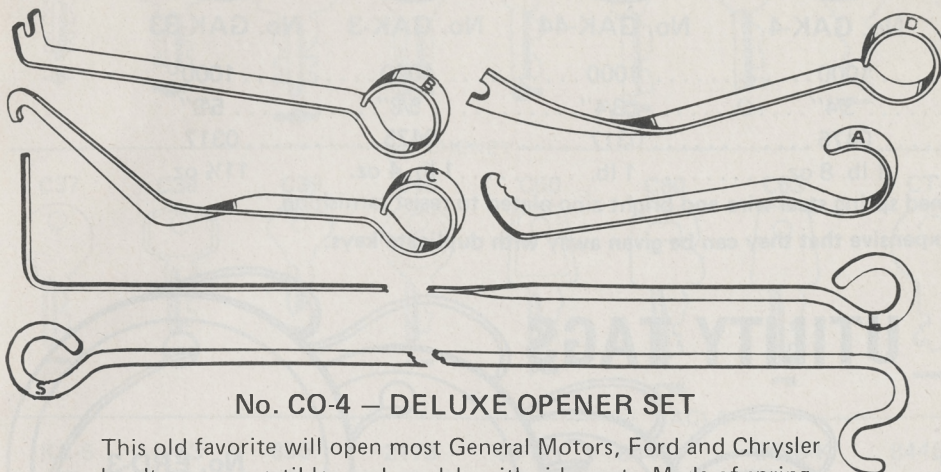

# CAR OPENING TOOLS

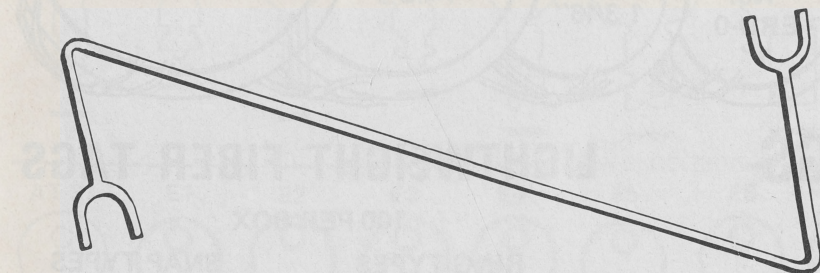

**No. CO-6** — For General Motors, Chrysler and Ford cars with curved windshields and side vent windows. For convenient handling, tool comes in three, screw-together sections, totaling 62" long. Full instructions.

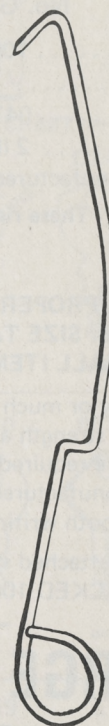

**No. CO-4 — DELUXE OPENER SET**

This old favorite will open most General Motors, Ford and Chrysler hardtops, convertibles and models with side vents. Made of spring steel, nickel plated.

**No. CO-7 — HARD TOP CAR OPENER** — This tool will open most General Motors hardtops, that have the inside locking button located near the end of the door panel. Not for "long-reach" styles used on later models.

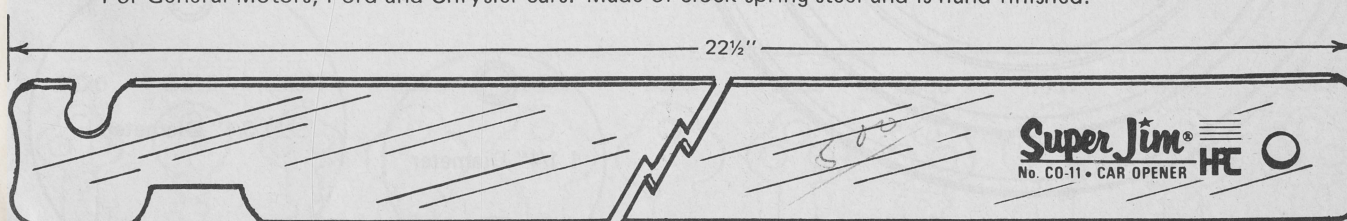

**No. CO-15  
VOLKSWAGEN OPENER**

Operates on all Volkswagen cars from 1965 and later. Hardened nickel plated steel.

\*\*\* THE ONLY OPENERS FOR THE NEW CARS WITH VENTLESS WINDOWS \*\*\*

**No. CO-10 — THE SLIM JIM** — The tool does not enter inside of the car. Opens a car door by "feel", rather than sight. With some practice, following the illustrated instructions, car opening will be no problem. For General Motors, Ford and Chrysler cars. Made of clock-spring steel and is hand finished.

**No. CO-11 — THE SUPER JIM** — This tool will open most General Motors, Ford and AMC car doors. Chrysler products, after 1974, have their locking mechanism protected by a sheet metal, box-shaped lock cylinder clip and cannot be opened with this tool. Opener does not enter vehicle. Made wider and thicker, and is bright nickel plated. Faster openings on most domestic automobiles. With illustrated instructions.

Gauge	0475	0475	0317	0475	0317
Shipping Wt.	2 lbs.	1 lb. 8 oz.	1 lb.	1 lb. 4 oz.	11 1/2 oz.

Manufactured from hardened spring steel wire and bright zinc plated to resist tarnishing.

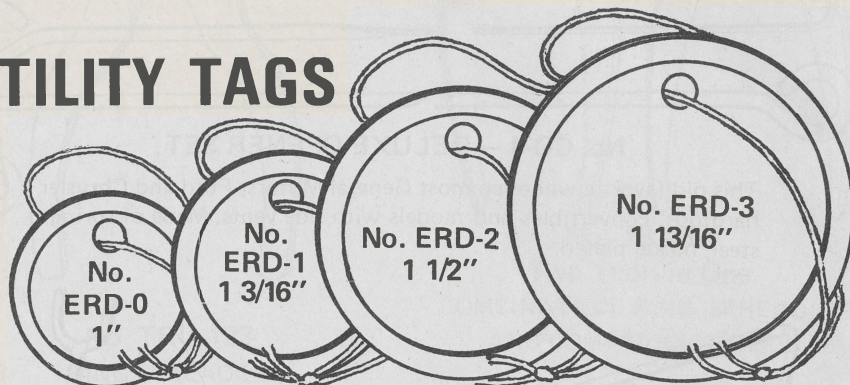

These rings are so inexpensive that they can be given away with duplicate keys.

## PERSONAL PROPERTY TAGS For PRICE or SIZE TAGS For WILL-CALL ITEMS

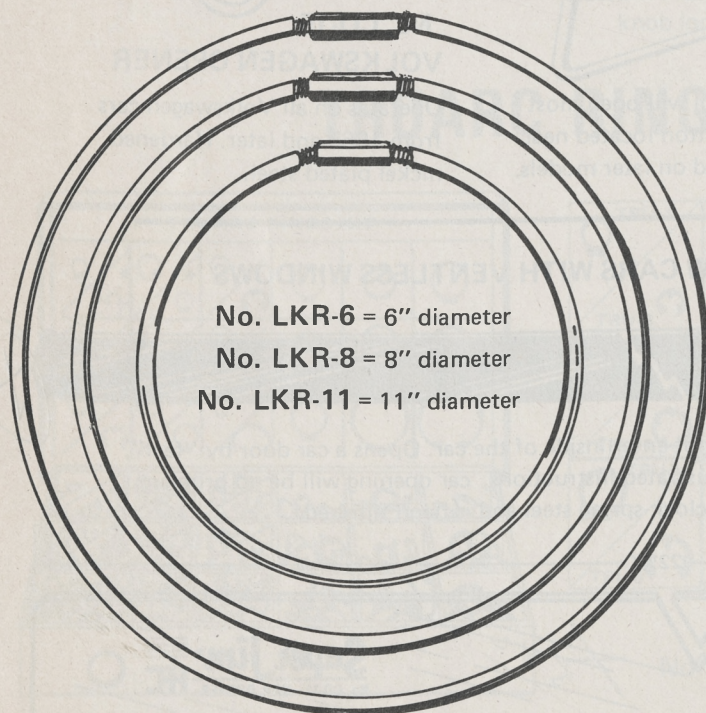

For use on heavy or much handled merchandise, where strength and non-mutilating qualities are required. These Metal Rim Tags are manufactured from heavy stock with a smooth writing surface.

Each tag has an attached string, looped and knotted. PACKED 100 PER BOX.

## UTILITY TAGS

## LARGE KEY RINGS

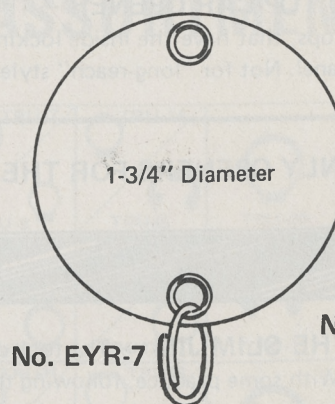

No. LKR-6 = 6" diameter  
No. LKR-8 = 8" diameter  
No. LKR-11 = 11" diameter

Made of half-hard steel, bright nickel plated. Brass fastener, screws either to left or right. Eleven inch ring slips over head easily, for carrying around the neck if so desired. Will hold about 260 cylinder keys.

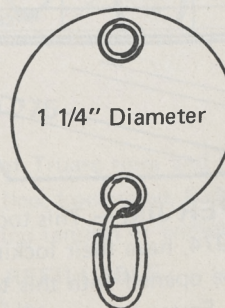

## LIGHTWEIGHT FIBER TAGS

## LUGGAGE KEY BOARD ASSORTMENTS

Flat, Formed, Milled Brass, Cast and Steel  
Keys — ALL CUT and READY TO USE.

Here are TWO Luggage Key Assortments to service the requests of customers. These contain a wide variety of the most popular keys, as a permanent fixture in your shop.

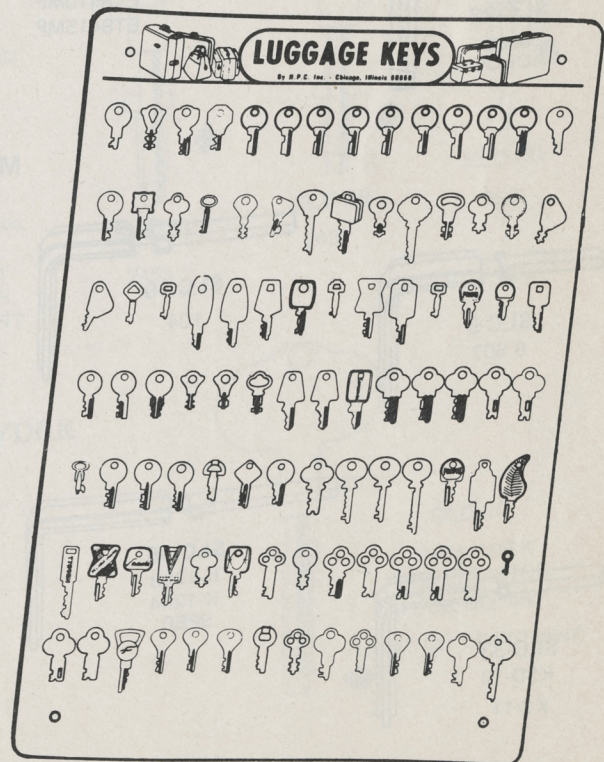

A heavy gauge metal mounting board and hooks are included with each assortment. Although we attempt to assemble these boards with all keys different from each other, we cannot guarantee that there will be no repeats between the two boards.
