SLIDING DOOR HARDWARE

PACKAGED SETS

OPEN STOCK

LAWRENCE BROTHERS, INC. • Sterling • Illinois

series "500" sliding door hardware

Typical of the quality builders' hardware that Lawrence has manufactured since 1876, is the series "500" interior sliding door hardware. Whether your requirement is hardware for wardrobe, closet, communicating, or other type sliding doors, in residential or commercial construction, series "500" fills the need.

Hardware is available to accommodate open or closed pocket, single or bi-parting, and by-passing 2, 3, or 4 door installations, using doors $\frac{3}{4}$ " to $1\frac{3}{4}$ " in thickness. Four aluminum tracks plus a heavy duty steel track, ten types of hangers, and a complete line of accessory items, provide a complete selection to meet every condition.

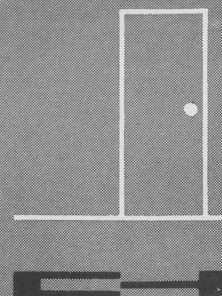

For closed pocket installations, single or bi-parting, Lawrence pocket frame sets end all door sticking, warping and jamming. These sets with their steel header assembly, and steel split-jamb units, provide the greater strength essential in this type of installation. Wall materials are applied directly to the steel members, which are equipped with kiln-dried wood nailing strips. All parts are factory pre-assembled for maximum convenience and rapid installation.

Detailed instruction sheets, for each type of installation, are regularly packed with all hardware, and are available separately on request.

Specify Lawrence series "500" sliding door hardware for simplicity of installation, ease of operation, and customer satisfaction.

USE AND APPLICATION

tracks

Single — Used primarily in pocket door installations. Bi-parting doors operate on single track. Use for by-passing doors when spacing is desired other than can be obtained with standard double tracks.

Double — Used for by-passing doors. In three or four-door installations the center door(s) operate on one tread and the end doors on the other.

hangers

Top Mounting — Ordinarily used on communicating type single or bi-parting pocket applications. Top mounted hangers can be used on any door thickness from $\frac{3}{4}$ " to $1\frac{3}{4}$ ". May be used on by-passing installations, with provision for the increased headroom, if doors are hollow-core flush panel, solid core, or panel type. Vertical and horizontal adjustments are provided to offset for carpeting, misalignments, etc.

Side Mounting — Ordinarily used on by-passing wardrobe type installations. Designed for specific thickness of doors. Side mounting hangers are available for pocket type installations using plywood or novoply. Vertical adjustment provided to plumb doors with jambs.

structural convenience

By-passing door sets require no special framing or millwork. No floor tracks necessary. Only $1\frac{1}{8}$ " headroom.

fast installation

Series "500" hardware is designed for ease of installation. Complete simple instructions are included with all hardware.

packaged sets

Packaged sets are offered that contain every item of hardware necessary for a complete installation. The key to ordering sets is given on Page 6.

open stock

Individual parts are also available, as well as a line of heavy and special duty hardware.

demonstration models

Attractive demonstration models for counter display are available, to show the outstanding quality of this hardware to your customers.

DeLuxe HARDWARE

1 — Aluminum Track — Anodized, satin finish for permanent beauty. Exposed face serves as finish trim or may be painted. Non-derail design. Adequate spacing between doors provided by tread spacing, eliminates rubbing if doors warp.

2 — Hangers — Mount on doors before hanging. Serrated plate provides fine adjustment to plumb door with jamb. Evener bar distributes door weight equally on each wheel.

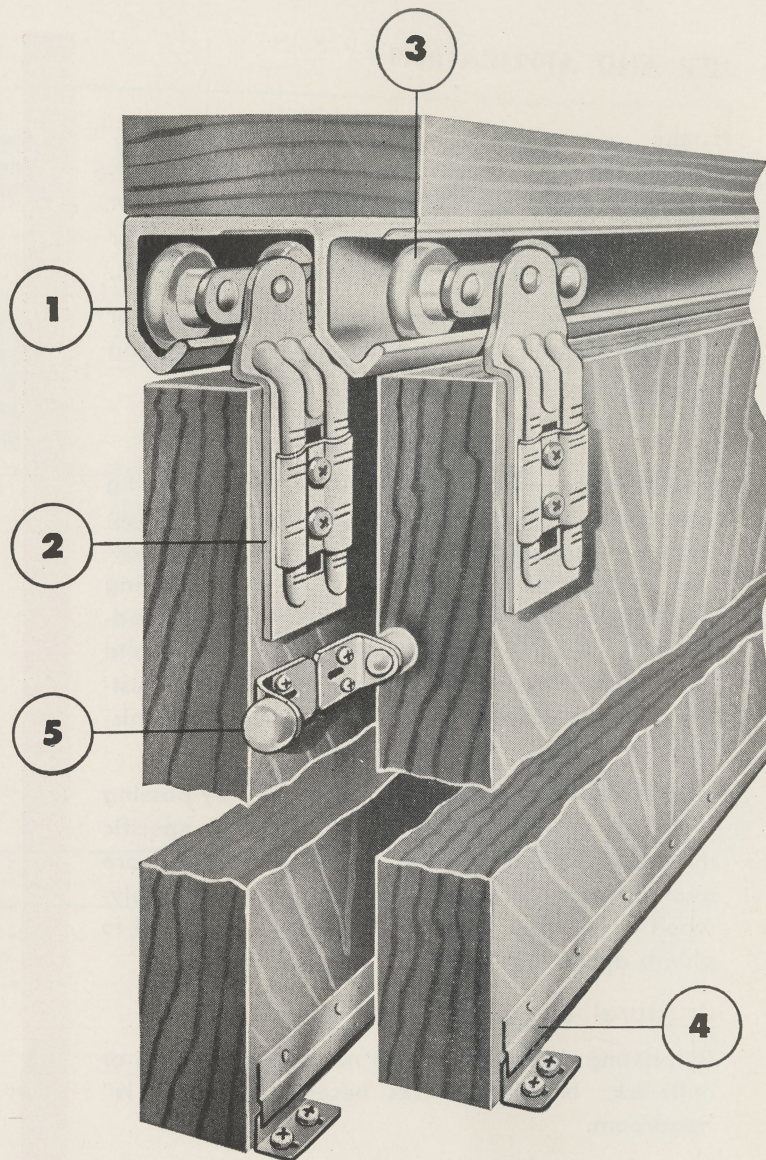

3 — Nylon Rollers — Self-lubricating. Can't stick or wear out. Quiet, smooth-running action. Heavy screw-machined axle provides maximum load capacity.

4 — Guide Strips and Door Guides — Guide strips are aluminum for permanence. Attach to back of door at bottom edge. Not visible from room side. Full guiding action without groove in bottom of door. No interference with traffic.

5 — Multi-Purpose Door Stops — Heavy, zinc plated steel, with attractive white rubber bumpers. Used as double-ended stops, limit travel of inside by-passing door to keep flush pulls accessible, as well as acting as a jamb stop and silencer for outside door. Creased in center for break-off when used as two single stops.

Screws — All series "500" items are packed with Phillips head sheet metal screws. The deep, full-length threads provide maximum holding power in wood. There are no sharp corners on the Phillips head to catch clothing, and the self-centering recess avoids damage from driver slippage. A No. 2 size driver will handle all sizes of screws that are used.

Latch — An attractive, functional sliding door latch is available as an accessory item for pocket doors. Latch may also be used on 2-door by-passing installations using doors 1 $\frac{3}{8}$ " to 1 $\frac{3}{4}$ " thick. The retracting bolt leaves the opening clear on both door and jamb sides.

**Economy HARDWARE**

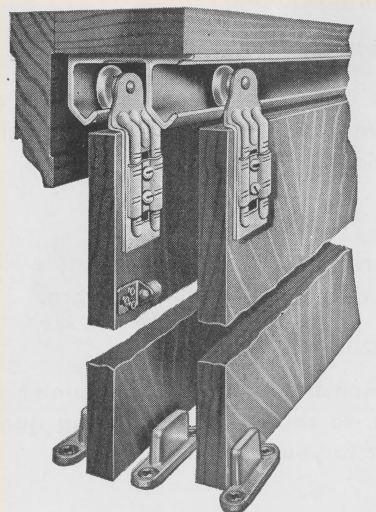

These sets use the same quality hardware as in our Deluxe sets, with economies effected by the elimination of extras.

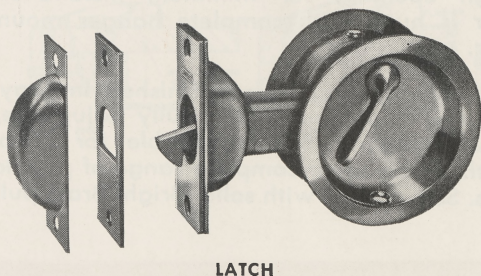

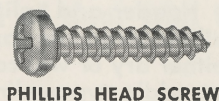

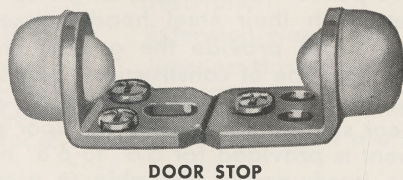

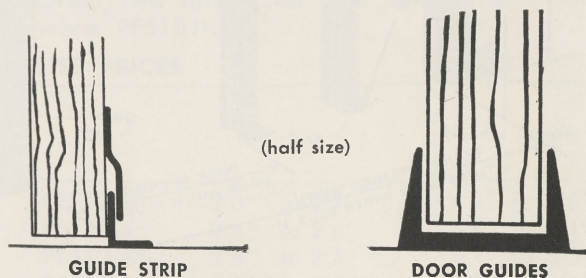

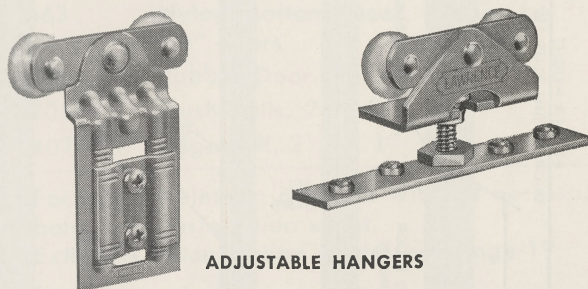

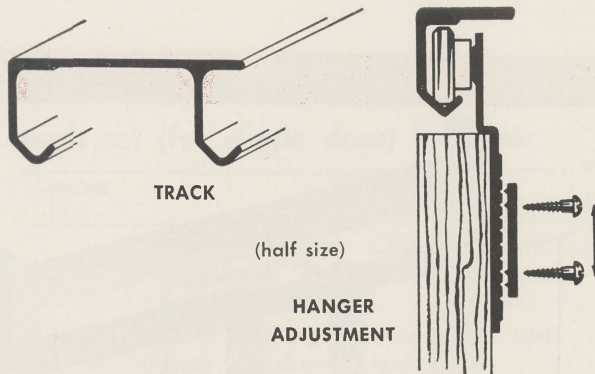

The same extruded aluminum track sections with non-derail design are used, with the surface clean and bright.

All hangers are single wheel with weight limit 60 pounds.

Tough, smooth nylon door guides are easily installed and adjusted.

Detailed listing of parts that are included in Economy sets is shown on pages 12 and 13.

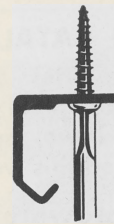

EASY TO INSTALL

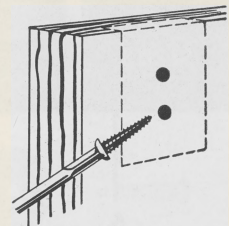

See Instructions With Each Set

Lawrence series "500" Sliding Door Hardware sets are simple to install. A complete set of instructions is included with each packaged set.

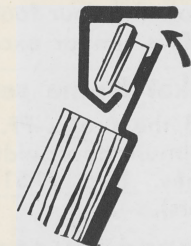

Track comes pre-cut to proper length for correct opening. Screw track to header through holes provided.

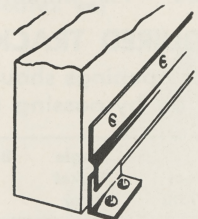

Attach hangers to the back side of door, using metal template furnished for hole location. Screw guide strip to back of door at bottom edge.

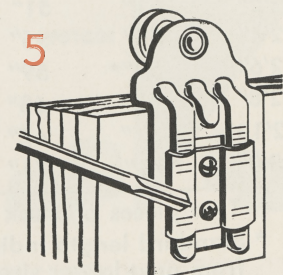

Perfected Lawrence design makes it possible to hang door after above hardware has been mounted. Simply tilt door in position shown and lift onto track. Allow to swing into natural, vertical position. Non-derail feature of track prevents rollers from leaving the groove.

Slip door guide into guide strip on door bottom and fasten guide to floor, using slotted openings in guide for final adjustment.

Plumb door with jamb, using the simplified, serrated, adjustment plate on required hanger, to complete the installation.

LAWRENCE

series "500" PACKAGED SETS

KEY TO CATALOG NUMBERS FOR SETS

Lawrence series "500" sets are individually packaged to contain complete hardware needed for single pocket doors and two, three or four by-passing doors. Sets are designated this way:

door hardware sets

1st Digit	2nd Digit	3rd Digit	4th Digit
SERIES	NUMBER OF DOORS	WIDTH OF OPENING	DOOR THICKNESS CODE
5	2	4	A— $\frac{3}{4}$ " D— $1\frac{3}{8}$ " E— $1\frac{3}{4}$ "

EXAMPLES:

524A means series "500" hardware for two-door application in a four foot opening with doors $\frac{3}{4}$ " thick.

524D is similar except that doors would be $1\frac{3}{8}$ " thick.

pocket frame sets

Add the prefix PF. The last two digits designate the minimum door width within each set range in feet and inches. (e.g. PF512-4 indicates set for 2'4" to 2'6" doors).

HEADROOM REQUIREMENTS

Minimum $1\frac{1}{8}$ " headroom is required on by-passing doors — $1\frac{3}{8}$ " minimum on pocket doors.

REQUIRED TRACK LENGTHS

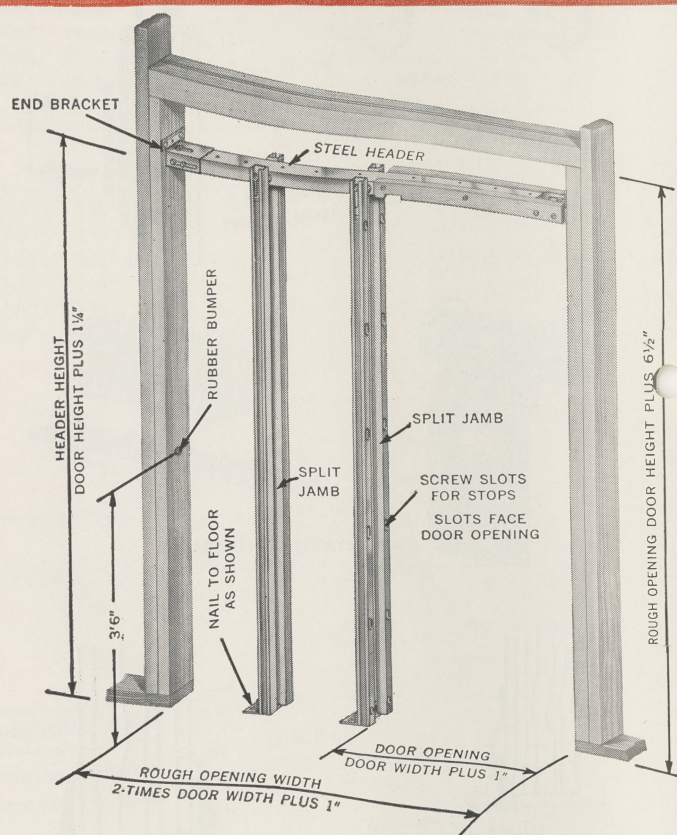

Door openings should be constructed to permit 1" overlap on by-passing installation for each pair of doors.

Door Width	Single Pocket Door	Bi-Parting Pocket Door†	By-Passing		
			2 Doors	3 Doors	4 Doors
2'0"	47"*	47"	47"*	70"	94"*
2'2"	51"	51"	51"	76"	102"
2'4"	55"	55"	55"	82"	110"
2'6"	59"*	59"	59"*	88"	118"*
2'8"	63"	63"	63"	94"*	
2'10"	67"	67"	67"	100"	
3'0"	71"*	71"	71"*	106"	

† Two pieces of track required.

* Standard length indicated; cut other lengths shown from next larger size.

DeLuxe POCKET FRAME SETS

For closed pocket installations, single or bi-parting, these sets with their steel header assembly and steel split-jambs provide the greater strength essential in this type of construction. Sets install in a standard 2" x 4" stud wall. Split-jamb units have adjustment slots to plumb uneven floor conditions. Adjustment is provided for 6'6" to 6'8" high doors. Extension hardware is available to accommodate doors 6'10" to 7'0" high. Sets take all wall and trim conditions. Header and split-jambs have kiln-dried wood nailing strips for application of any wall covering, either dry or wet construction. Nylon door guide is straddle type; eliminates grooving. All parts are factory assembled, ready to set in rough opening, for minimum installation time. Door is hung with complete hanger mounted on door.

All steel and wood parts finished in gray paint. Extruded aluminum track. Fully adjustable, nylon wheel hangers. Sets adjustable for 2" of door width; 4 sets cover complete range of popular door sizes. Sets packed with solid, Bright Brass pulls only.

..... for 1 $\frac{3}{8}$ " doors weighing up to 80 lbs. — 6'6" to 6'8" high†

each set (for single door) includes:

Catalog No.	Item	Quantity
	Steel Header Channel with aluminum track installed, end brackets attached.	1
	Steel Split-Jamb Assemblies with floor brackets attached.	2
556	2-Wheel Hangers	2
563	Nylon Bottom Door Guide, for 1 $\frac{3}{8}$ " doors	1
566	Rubber Door Bumper	1
405-A	Flush Pulls, 2 $\frac{1}{2}$ " O.D.	2
407-A	Edge Pull, 2 $\frac{1}{2}$ " x 1"	1

Packed complete in one box with all necessary screws, bolts, and installation sheet.
Extra — Demonstration Model, see page 19.

for bi-parting doors:

Order two single sets plus one set of Junction Hardware, PF510JH.

- 1 pair hangers for top mounting No. 556
for side mounting or plywood doors No. 557
- 1 only guide for 1½" thick doors No. 562
for 1¾" thick doors No. 563
for 1¾" thick doors No. 564
- 2 flush pulls No. 402-A or No. 405-A
- 1 rubber bumper No. 566

Optional

- 1 latch for doors 1¾" to 1¾" thick No. 408-A

For Bi-Parting Doors, use

- Twice the quantities needed for single doors,
plus one center stop No. 567

BY-PASSING DOORS

For 2, 3, or 4 by-passing doors weighing 80 lbs. or less, and with 1½" minimum headroom, select as indicated below:

1 PIECE TRACK, WIDTH OF OPENING*, ANY NUMBER OF DOORS.

For Door Thickness of	¾"	1"	1½"	1¾"	1¾"
Use Track No.	500	500	505	505	508

1 PAIR HANGERS FOR EACH DOOR.

For Door Thickness of	¾"	1"	1½"	1¾"	1¾"
60lb.doors Use No.	550	552		455	
80lb.doors Use No.	551		554	555	555

1 aluminum guide strip, No. 560 for each door or 1 set of 3 nylon guides, No. 462, for each 2 doors and/or 1 set of 2 nylon guides, No. 461, for a third door.

1 flush pull for each door.

Choose No. 402-A, 403-A, 404-A or 405-A.

1 door stop, No. 565, for each 2 doors, and, if desired, add 2 additional No. 565 stops for jamb silencers for any number of doors. In addition, 3 door installations require 1 No. 568 universal stop, and 4 door installations 1 No. 567 center stop.

Optional — 1 piece fascia plate, No. 570, width of opening.

* Consideration must be given to overlap of doors in determining track length. See Table, page 6. Door openings should be constructed to permit 1" overlap for each pair of doors.

HEAVY DUTY APPLICATIONS

POCKET OR BY-PASSING DOORS

For doors exceeding 80 and up to 150 lbs., select as indicated below:

- 1 piece Track No. 590, twice door width for single doors.
- 2 pieces Track No. 590, width of opening, for by-passing doors. See Table Page 6.
- 1 pair hangers for each top mounting 1 to 1¾" thick door No. 596
- 1 pair hangers for each side mounting ¾" or more thick door No. 597

For guide strip (or guides), flush pulls, stops, and silencers, see Standard Duty requirements.

Headroom — 3¾" headroom is required for heavy duty series hardware.

SPECIAL DUTY APPLICATIONS

For special pocket door applications using doors less than 1½" thickness, nylon door guide set No. 461 may be used.

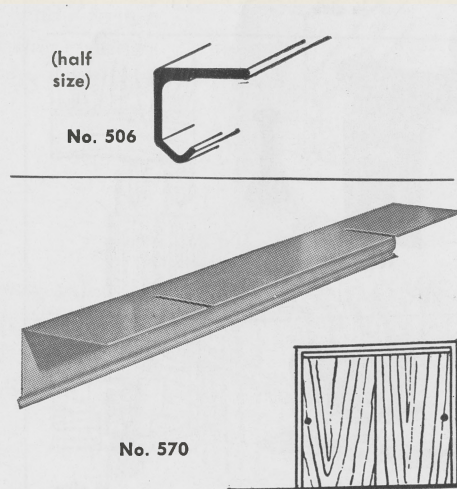

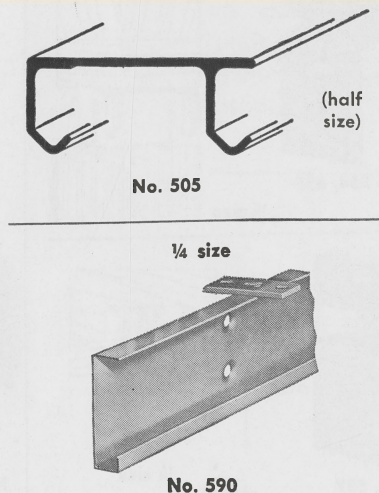

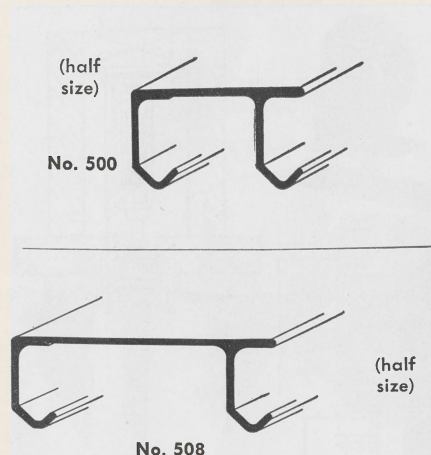

Lawrence sliding door hardware may be used in other combinations to suit special conditions. Where assistance is needed, contact nearest representative.
