# PUSHING FORWARD™

Over a century ago, Von Duprin invented the first self-releasing fire exit device. Today we continue to push the envelope by delivering innovative solutions to challenging applications. Our durable panic and exit door hardware products are proven to perform and are backed by a team of experts. We provide flexible solutions and modular options to protect your investment well into the future.

## Quality

Von Duprin leads the industry with durable solutions that are proven in the field to perform under heavy use and abuse and backed by a team of experts experienced in door hardware application and code compliance.

## Flexibility

Von Duprin empowers you to embrace change by providing flexible solutions that can be modified over time as new trim, functions or other options are required, protecting your investment well into the future.

## Trust

Von Duprin designed the first self-releasing fire exit device more than a century ago and continues to advance fire and life safety, with innovation and best-in-class support to address your most challenging applications with code compliant solutions.

## How to Order

# Built to Protect

Von Duprin® products symbolize a commitment to safety and security. It's evident in the meticulous engineering behind every exit device. After all, keeping our customers—and the people they strive to protect—safe is our priority. It's why Von Duprin goes the extra mile to provide durable and dependable products for every application.

The 22 Series is a cost-effective solution for medium to low traffic areas where proven reliability is needed. The non-handed design of the 22 Series makes it more adaptable in the field. And unique features set the series apart, including the AX option that is UL certified to meet ADA and California Building Code requirements for 5 lb. operating force.

## Passion Driving Performance

With superior products comes exceptional customer care. Von Duprin customers are supported by industry-leading expertise. Allegion's representatives have decades of experience, so you're assured to receive knowledgeable advice on fire and life safety codes, installation resources and more. For those looking to take their skills to the next level, Allegion offers instructor-led workshops, videos and online courses. It's another way Von Duprin stands by our customers—today, tomorrow, and for years to come.

## Device Types

# Device Types

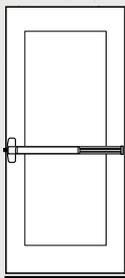

As the pioneer in the industry, Von Duprin continues to advance the industry through customer-centric innovation, which delivers solutions to the most challenging applications.

Backed by high quality standards, Von Duprin exit devices were among the first in the industry certified to ANSI/BHMA A156.3 (2014) Grade 1. Our exit devices are tested to the highest standards and proven in the field to perform under heavy use and abuse, giving you peace of mind both now and in the future.

The versatile design can be easily upgraded to connect to a larger electronic ecosystem, empowering you to adapt with flexible solutions. You can configure numerous variations in the field without replacing your device and protecting your investment. This makes upgrades easy and cost effective.

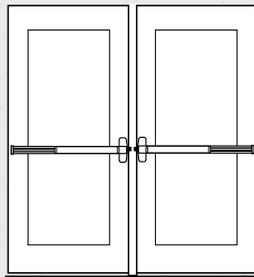

## POPULAR APPLICATIONS

### Single Door Applications

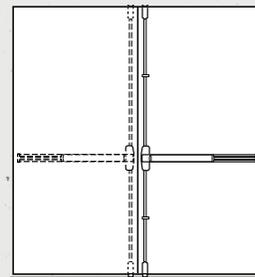

Single rim device

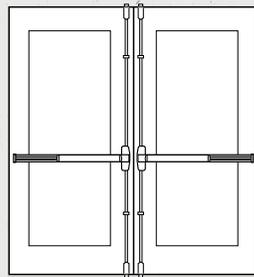

### Double Door Applications

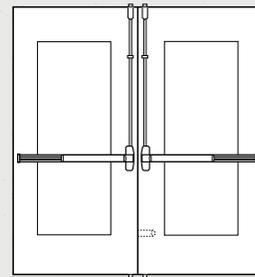

Two rim devices with mullion—same direction

Two vertical rods - double egress

Two surface mounted vertical rod devices—same direction\*

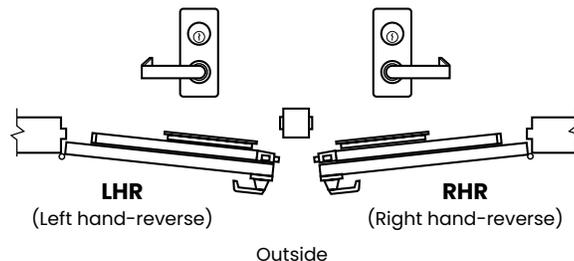

Two surface mounted vertical rod devices, less bottom rod (LBR). For LBR fire device, auxiliary fire pin is required.\*

\* Do not use with overlapping astragal

### Double Handing

Left hand-reverse orientation    Right hand-reverse orientation

## Device Types

# 22 Rim Exit Device

22 Rim exit device for all types of single and double doors with mullion, UL listed for panic exit hardware. Devices are Grade 1 rated to ANSI A156.3, 2014. Devices cover stock hollow metal doors with 161 door prep cutouts. Fits door stiles as narrow as 3-13/16" (97 mm). The device is non-handed.

\*Not applicable with all strike and mullion combinations, consult factory.

Specifications	
Device functions	Ships ready for all functions, EO, DT, NL, TP, K, L
Device lengths	3' (914 mm) 4' (1219 mm) Note: See minimum door opening chart at bottom of page.
Device centerline from finished floor	39 13/16" (1011 mm) 39 11/16" (1008 mm) with mullion
Center case	4 5/32" (105 mm) x 3 3/16" (81 mm) x 2 3/8" (60 mm)
Mechanism case	2" (51 mm) x 2-3/8" (60 mm)
Projection	Push bar neutral - 3-11/16" (94 mm) push bar depressed - 2-7/8" (73 mm)
Latch bolt	Deadlocking, 3/4" (19 mm) throw
Finishes	526, 622, 689, 695
Fasteners and through bolts (SNB)	Includes screw pack for 1-3/4" (44 mm) and 2-1/4" (57 mm) wood and metal doors; optional SNB available for device (see page 27 for quantities)

#### Notes:

- Black end caps are standard for all finishes, with the exception of 526.
- Optional black metal end caps are available; order #900397 as a separate line item. Additional charges apply.
- All devices configured in 526 finish will be supplied with a metal endcap in finish as standard.
- Order 900397-622 for the 622, 689, and 695 devices, and 900397-526 for the 526 device (service).

## Features & Options

### Electrified Options

ALK	Alarm exit kit
CON	Allegion Connect
LX	Latch bolt monitor switch
LX-LC	Latch bolt monitoring, low current
LX-RX	Latch bolt monitoring, request to exit
LX-RX-LC	Latch bolt monitoring, request to exit low current
QEL	Quiet electric latch retraction
RX	Request to exit
RX2	Double request to exit
WP-RX	Waterproof request to exit

### Mechanical Options

AX	Accessible device, LBR only
GBK	Glass bead kit
HW	Hurricane device — Wind-Only

### Dogging Feature

Hex key dogging standard

### Dogging Options

LD	Less dogging
QEL option available	

### Strikes

Top: 299 – Dull black

### Accessories

**299 Strike**  
Ships standard; optional strikes available

**Hex key dogging**  
Comes standard on 22 rim exit devices

## Device Types

# 22-F Rim Exit Device

22-F Rim fire exit devices for all types of single doors up to 4' x 8' (1219 mm x 2438 mm) or 8' x 8' (2438 mm x 2438 mm) double doors with 9954 or 9854 mullion, UL listed for fire exit hardware. Devices are ANSI A156.3 – 2014 Grade 1. Fits door stiles as narrow as 4-3/8" (111 mm). The device is non-handed.

Specifications	
Device functions	Ships ready for all functions, EO, DT, NL, TP, K, L
Device lengths	3' (914 mm) 4' (1219 mm) Note: See minimum door opening chart at bottom of page.
Device centerline from finished floor	39 13/16" (1011 mm) 39 11/16" (1008 mm) with mullion
Center case	4 5/32" (105 mm) x 3 3/16" (81 mm) x 2 3/8" (60 mm)
Mechanism case	2" (51 mm) x 2 3/8" (60 mm)
Projection	Push bar neutral - 3 11/16" (94 mm) push bar depressed - 2 7/8" (73 mm)
Latch bolt	Deadlocking, 3/4" (19 mm) throw
Finishes	526, 622, 689, 695
Fasteners and through bolts (SNB)	Includes screw pack for 1 3/4" (44 mm) and 2 1/4" (57 mm) wood and metal doors; optional SNB available for device (see page 27 for quantities)

### Notes:

- Black end caps are standard for all finishes, with the exception of 526.
- Optional black metal end caps are available; order #900397 as a separate line item. Additional charges apply.
- All devices configured in 526 finish will be supplied with a metal endcap in 526 finish as standard.
- Order 900397-622 for the 622, 689, and 695 devices, and 900397-526 for the 526 device (service).

## Device Types

# 2227 Surface Mounted Vertical Rod Device

2227 Surface mounted vertical rod exit device for all types of single and double doors, UL listed for panic exit hardware. Devices are ANSI A156.3 – 2014 Grade 1. Covers stock hollow metal doors with 86 or 161 cutouts. Fits door stiles as narrow as 3-5/8" (92 mm). The device is non-handed.

### Specifications

Device functions	Ships ready for all functions, EO, DT, NL, TP, K, L
Device lengths	3' (914 mm) 4' (1219 mm) Note: See minimum door opening chart at bottom of page.
Door height	7' (2134 mm) standard door height Note: 3' extension rods available for door heights up to 10' (3048 mm).
Device centerline from finished floor	39-13/16" (1011 mm)
Center case	4-5/32" (105 mm) x 3-3/16" (81 mm) x 2-3/8" (60 mm)
Mechanism case	2" (51 mm) x 2-3/8" (60 mm)
Projection	Push bar neutral - 3-11/16" (94 mm) push bar depressed - 2-7/8" (73 mm)
Door undercut	1/4" (7 mm) from finished floor recommended 3/4" (19 mm) maximum or 1/8" (3 mm) from threshold
Latch bolt	Deadlocking antifriction top and bottom bolt, 5/8" (16 mm) throw
Finishes	526, 622, 689, 695
Fasteners and through bolts (SNB)	Includes screw pack for 1-3/4" (44 mm) and 2-1/4" (57 mm) wood and metal doors; optional SNB available for device (See page 27 for quantities.)

#### Notes:

- Black end caps are standard for all finishes, with the exception of 526.
- Optional black metal end caps are available; order #900397 as a separate line item. Additional charges apply.
- All devices configured in 526 finish will be supplied with a metal endcap in 526 finish as standard.
- Order 900397-622 for the 622, 689, and 695 devices, and 900397-526 for the 526 device (service).

### Minimum Door Opening Chart

## Device Types

# 2227-F Surface Mounted Vertical Rod Fire Exit Device

2227-F Surface mounted vertical rod fire exit device for pairs of doors up to 8' x 10' (2438 mm x 3048 mm), UL listed for Fire Exit Hardware. Devices are ANSI A156.3 – 2014 Grade 1. Fits door stiles as narrow as 3 5/8" (92 mm). The device is non-handed.

Specifications	
Device functions	Ships ready for all functions, EO, DT, NL, TP, K, L
Device lengths	3' (914 mm) 4' (1219 mm) Note: See minimum door opening chart at bottom of page.
Door height	7' (2134 mm) standard door height 12" (205 mm), door height 36" (914 mm), door height Note: Extension rods available for door heights up to 10' (3048 mm).
Device centerline from finished floor	39 13/16" (1011 mm)
Center case	4 5/32" (105 mm) x 3 3/16" (81 mm) x 2 3/8" (60 mm)
Mechanism case	2" (51 mm) x 2 3/8" (60 mm)
Projection	Push bar neutral - 3 11/16" (94 mm) push bar depressed - 2 7/8" (73 mm)
Door undercut	1/4" (7 mm) from finished floor recommended
Latch bolt	Deadlocking anti-friction top and bottom bolt, 5/8" (16 mm) throw
Finishes	526, 622, 689, 695
Fasteners and through bolts (SNB)	Includes screw pack for 1 3/4" (44 mm) and 2 1/4" (57 mm) wood and metal doors; optional SNB available for device (see page 27 for quantities)

### Notes:

- Black end caps are standard for all finishes, with the exception of 526.
- Optional black metal end caps are available; order #900397 as a separate line item. Additional charges apply.
- All devices configured in 526 finish will be supplied with a metal endcap in 526 finish as standard.
- Order 900397-622 for the 622, 689, and 695 devices, and 900397-526 for the 526 device (service).

## Trim Options

# Trim Functions

Von Duprin protects your investment by empowering you to adapt with flexible solutions and modular options. The 22 Series features numerous trim options to serve your different needs. Designed with flexibility in mind, our solutions offer ease of adding new options as they are developed.

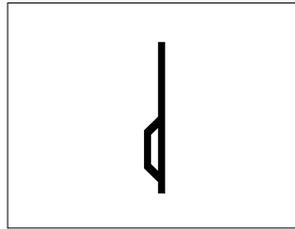

With Von Duprin, you can be confident that as the needs of your facility change, our products can be upgraded easily to meet your needs, especially as the mechanical and electronic technology converge. Von Duprin's versatile design enables you to add functionality to existing devices in a cost-effective way, protecting your investment well into the future.

A variety of device trim lock type functions such as key lock and unlock, latch bolt retraction with key and no cylinder designs for an "always operable" function are available in levers, knobs, thumbpiece and thumbturn designs.

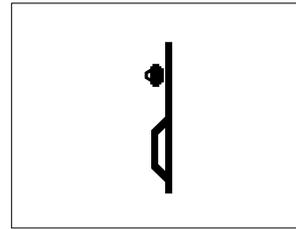

EO  
No outside trim

- Exit only

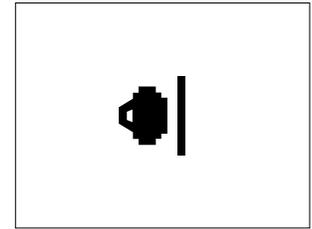

DT  
Dummy trim

- Pull when dogged (not recommended for fire device)

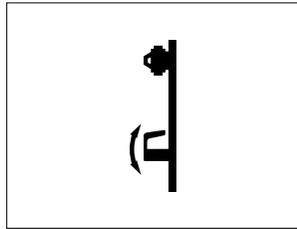

NL  
Night latch

- Key retracts latchbolt
- Rim and 1-1/4" mortise cylinder

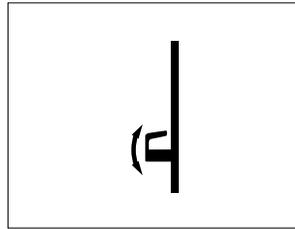

NLOP  
Night latch

- Key retracts latchbolt, pull required

L  
Lever

- Key locks and unlocks
- Rim and 1-1/4" mortise cylinder
- Handed, reversible lever
- Electrified lever operation available

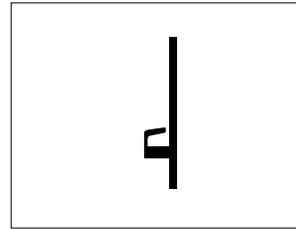

K  
Knob

LBE  
Lever, blank escutcheon

- Always operable (no cylinder)

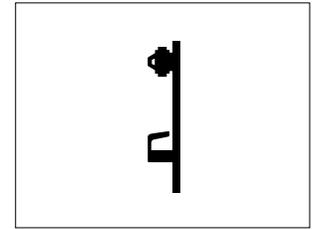

KBE  
Knob, blank escutcheon

LDT  
Lever, dummy trim

- Pull when dogged

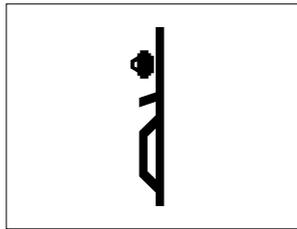

KDT  
Knob, dummy trim

LNL  
Lever, night latch

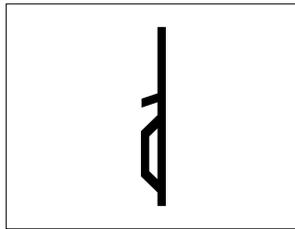

- Key retracts latchbolt
- Rim and 1-1/4" mortise cylinder
- Handed, reversible lever

KNL  
Knob, night latch

TP  
Thumbpiece

- Key locks and unlocks
- Rim and 1-1/4" mortise cylinder

TPBE  
Thumbpiece, blank escutcheon

- Blank escutcheon always operable (no cylinder, use with DT trim)

### 230 Series Trim

The 230EO, 230DT, 230NL and 230TP have a heavy 10 gauge (2.4 mm) steel escutcheon. The 230L has a cast zinc 3/4" (19 mm) depth escutcheon. Number 06 lever style furnished standard, number 03 and number 17 optional style levers are available. 230L furnished RHR if handing is not specified. Cylinder must be ordered separately for the 230NL, 230TP and 230L trims.

## Trim Options

# Electronic Locks from Schlage

### XE360™ Series

The XE360 Series is the next generation of wireless locks from Schlage. The sleek design offers customers a solution that looks as good as it performs—at an affordable price point.

#### Features and Benefits

- Next level design inside and out
- Credential support includes Schlage MIFARE®, Bluetooth® and NFC mobile<sup>1</sup>
- Available with LED indicator, interior push button, or deadbolt with thumbturn
- Advanced encryption keeps data and communications safe
- Wireless configuration using connected smartphones or tablets
- No-Tour or offline system capability
- Ready for the future with the innovative Flex Module™ that allows for communication type, memory and encryption upgrades
- Utilizes a heavy-duty Grade 1 mortise chassis for exceptional quality and reliability<sup>2</sup>
- Open architecture – interoperable and simple for software alliances to integrate
- Works seamlessly with other Schlage wireless locks, including Schlage Control<sup>3</sup>
- Uniquely concealed key override standard on all locks

#### Chassis

- Mortise
- Mortise deadbolt
- Tubular
- Exit trim

#### Locking Functions

Functionality

- With Indicator (I)
  - Storeroom
- With Button (B)
  - Office
  - Privacy
  - Apartment

**Note:** Door Position Sensor is recommended for privacy and apartment functions.

#### Certifications

- ANSI/BHMA A156.13-2020
- ANSI/BHMA A156.25-2023 Locked Outdoor Type
- ANSI/BHMA A156.5-2020
- UL 294
- ULC 60839
- UL 10C 3-hour
- CAN/ULC S104 3-hour
- FCC Part 15
- Industry Canada (IC)

- Industry Canada (IC)-RSS210
- ADA Compliant<sup>3</sup>
- RoHS
- REACH
- TAA

#### Compatibility

The XE360 exit trim is currently compatible with rim and surface vertical rod styles of the following exit devices:

#### Exit Device Compatibility<sup>1</sup>

25R	Falcon 25 rim
25S	Falcon 25 surface vertical rod
99R	Von Duprin 98/99 or XP98/99 Rim
99S	Von Duprin 98/99 surface vertical rod
22R	Von Duprin 22 rim
22S	Von Duprin 22 surface vertical rod

1. Dependent on access control software provider support of specific mobile credentials.

2. XE360 Mortise and Exit Trim Grade 1; Tubular Grade 2

3. Check with your PropTech or PACS provider for specific support.

### CO Series

In the world of standalone electronic locks, CO Series offers simple solutions for access control. These easy-to-use, versatile locks can be applied anywhere there is a need to control access without distributing keys. The popular CO-100 is a simple lock that momentarily unlocks with a valid PIN code entry. It can be used indoors or out and allows administrators a variety of command options. This series also includes the CO-200 lock. This computer programable lock can provide audit trails and features dual credential options (card+PIN) that provide an even greater level of security.

## Trim Options

# Electronic Locks from Schlage

## AD Series

The AD Series was designed to be the right choice for today, and is ready to adapt to whatever the future holds.

There are a variety of options that allow you to select the AD Series electronic lock that's right for you, and a wide selection of features that can be configured in the field to further customize each opening. When your needs change in the future, the innovative modular design of the AD Series allows you to easily upgrade the credential reader or networking option, and adapt to emerging technologies using your existing chassis – all without taking the lock off the door. This means that you can be confident that your choice of the AD Series is right for today, and that your investment will be protected into the future.

## Credential Reader Options

AD Series electronic locks are compatible with many different credential types.

- Multi-technology (reads 125 kHz prox, 13.56 MHz smart, NFC mobile)
- Smart - iClass compatible  
+ KEYPAD
- Magnetic stripe (swipe)  
+ KEYPAD
- Keypad

## Communication Options

### Networked

In facilities where increased monitoring and control are needed, a networked solution is essential. The AD Series networked options feature:

- Open architecture platform
- Reliable 900 MHz communication on wireless locks
- Real-time monitoring

The AD Series networked lock is available in either a wireless or hardwired configuration to fit your application needs.

- AD-300 Networked hardwired locks
- AD-302 Networked hardwired FIPS 201-2 APL listed locks
- AD-400 Networked wireless locks
- AD-402 Networked wireless FIPS 201-2 integration-ready locks

## Standalone

Standalone locks are a cost-effective solution for doors that do not require real-time monitoring. The AD Series standalone solution provides:

- Option for future upgrade to networked wireless
- Improved credential management
- Audit trail reports

Schlage offers one AD Series standalone solution to fit your environment:

- AD-200 Access rights are stored on the lock

## Chassis

- Cylindrical
- Mortise
- Mortise deadbolt
- Exit trim<sup>1</sup>

## Locking Functions<sup>2</sup>

- Classroom/storeroom
- Office
- Privacy
- Apartment

**Note:** Lock function capability varies depending on Physical Access Control Software (PACS) OEM integration design.

**Note:** See AD Series exit trim compatibility data sheet for complete list of compatibility by manufacturer.

## Certifications

- ANSI/BMHA A156.25
- ANSI/BHMA Grade 1
- UL 294 listed
- UL 10C
- ADA
- FCC part 15
- RoHS

## Complete Your System

Complete your AD Series system with readers, credentials, system components, and other wireless accessories.

## Trim Options

# Electronic Locks from Schlage

### Compatibility

The CO Series offers a wide range of applications and can be used alongside other Schlage electronic locks. They feature expanded cylinder, exit device, and credential compatibility.

#### Exit Device Compatibility<sup>1</sup>

	Rim	SVR2	CVR/CVC	Mortise
Von Duprin 22/22F	AD/CO	AD/CO	AD	AD

CO-220 is not compatible with surface vertical rod (SVR) devices.

#### Notes:

- See AD Series and CO Series exit trim compatibility data sheets for complete list of compatibility by manufacturer.
- Exit device must be ordered as Exit Only (EO).

### Class

#### CO-100

- Manually programmable
- Keypad only
- User rights stored on the lock
- Remote release, outdoor use and occupancy indication options

#### CO-200

- Computer or manually programmable
- Keypad, magnetic stripe (+PIN), proximity (+PIN)
- User rights stored on the lock
- Ability to provide schedules and audits

### Chassis

- Cylindrical
- Mortise
- Mortise deadbolt
- Exit trim

### Functions

- Classroom/storeroom
- Office
- Privacy

### Power

- 4 standard (AA) batteries

### Reliability

When it comes to securing your facility, you can't afford to take chances. CO Series locks are tested to the highest quality and reliability standards in the industry, including:

- ANSI/BHMA A156.25 and ANSI/BHMA Grade 1
- UL 294
- UL 10C
- ADA

## Mechanical Options

# Dogging Options

## Less Dogging (LD)

Less dogging is available on all 22 Series panic exit devices to remove the dogging option.

**To order, specify:** Use prefix LD, example LD22EO.

### Dog Keys

#### 227 Dog key (standard)

← 2-3/4" (70 mm) →

5/32" (4 mm) hex

#### 222 Dog key (old style)

← 2-3/16" (56 mm) →

7/32" (6 mm) hex

# Accessibility Options

## Accessible Device (AX)

The AX device is a UL certified exit device designed to meet the progressive requirements of the California Building Code for accessible openings. This device meets the 5 lbs of operating force requirement called for in chapter 11B-309.4. The AX device also exceeds ANSI/BHMA requirements. Available devices include: AX22, AX22-F, AX2227LBR, AX2227-F LBR. Additionally, all AX devices will be shipped with a UL label clearly stating "Meets California building Code (2013) Sec. 11B-309.4" and an "AX" identifier label on device center case. See image for reference.

# Latches

## Less Bottom Rod (LBR)

LBR option is available for panic and fire rated devices. For each pair of LBR fire rated devices, a spring loaded auxiliary fire bolt is furnished and must be installed in the lower door edge. When exposed to heat the auxiliary fire bolt releases, keeping the doors in alignment and closed during a fire.

LBR fire rated devices must be ordered in pairs or must be used in conjunction with an approved automatic or constant latching flush bolt. See UL fire chart for listing details.

## Pullman Latch (PL)

When PL is specified the standard latches are replaced at additional cost with pullman style latches. Pullman latches are most commonly used in conjunction with electric strikes and LBR applications. Not available with fire rated devices.

Not recommended where security is of the utmost importance since latches do not deadlock.

## Mechanical Options

# Hurricane Rated Devices

Hurricane resistant openings are designed to withstand storm conditions for long periods of time while maintaining functionality.

**Wind-Only (HW)** hurricane devices are ideal for applications with lower hurricane requirements such as inland regions with only high wind pressure posing a threat. Wind-Only hurricane devices are tested for structural integrity in accordance with ASTM E330 for Wind-Only applications.

**Wind and Impact (HH)** rated hurricane device requirements are more stringent than Wind-Only applications. Wind and Impact devices are subject to tests for both wind speed and flying debris in accordance with Florida Building Code (HVHZ), TAS 201, 202, 203 and ASTM E1886, E1996, E330 protocols. If the hurricane application is unknown, specify HH (Wind and Impact) product, which also satisfies Wind-Only applications. Not all device series are available with HH option.

**Hurricane rated** exit devices must be paired with Allegion approved doors and hurricane rated mullions, if applicable. Specify mullions with HW or HH prefix.

## Other Resources

[Von Duprin hurricane reference sheet](#)

[Allegion windstorm solutions brochure](#)

**Von Duprin 22 Series devices are only available with Wind-Only (HW) option**

Many hurricane rated devices use standard device components. Devices will be furnished with the proper strikes and components if HW is specified. Pricing will be adjusted accordingly.

### To order, specify:

- Prefix HW for Wind-Only.
- Model number and description.
- Door mode: SGL (single) or PR (pair).

**Example:** HW22NL-F 3' 628 PR

22 Series Hurricane Device/Strike Application Chart

Application	Model	Single Door	Double Door	
		Standard Strike	Mullion	Standard Strike
HW (Wind-Only)	22	299	4954 or KR4954	299
			1654 or KR1654	1606
			5654	299
			5754	1408
	22-F	299F	9954 or KR9954	499F
	2227	Top: 299 Bottom: 304L	-	Top: 299 Bottom 304L
	2227-F	-	-	Top: 299F Bottom 304L

**Note:** Hurricane rated exit devices for use when paired with Allegion approved doors.

## Electrified Options

# Latch Retraction

## Quiet Electric Latch Retraction (QEL)

Quiet electric latch retraction provides electronic control of an exit device for environments where limited operational noise is desired. These devices always provide mechanical egress. Often the QEL is used with a credential reader and access control system to unlock the door momentarily for authorized users.

The QEL can also be configured to electronically retract the latch for an extended period of time to allow free entry. This is a convenient alternative to mechanical dogging. If manual dogging is required, the hex dogging option is available, to order specify HD-QEL.

In some applications, an audible indication of push pad retraction is desired. The QEL-B (B-buzzer) option is a feature that can be added to QEL devices that will send an audible notification of initial latch bolt retraction.

The QEL option is available on panic devices and fire rated devices. UL approved for Class II circuit applications. Because fire exit hardware must be self latching, an automatic fire alarm system must be incorporated to drop power to fire rated QEL devices in case of fire.

### Accessories

The QEL has a low inrush current = 1.0 amp, so it can be used with standard Schlage power supplies. When powering multiple components, verify that the amperage requirement of all components combined does not exceed the power supply output rating. See table below for output ratings.

Schlage PS902	Schlage PS904	Schlage PS906
Up to 2 amps	Up to 4 amps	Up to 6 amps

The QEL device is compatible with the following equipment: PS900 Series power supplies - PS902, 904, 906, 914; 900 Series Option Boards - 900-2RS, 900-4R and 900-4RL. The power transfer (EPT, electrified hinge, or door loop) is also sold separately. Please refer to product catalogs for more information on EPT-2/EPT-10 power transfers, electrified hinges, and PS900 series power supplies.

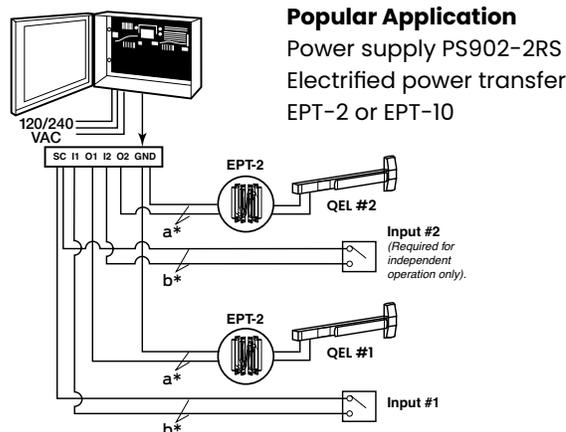

### To order, specify:

- Standard – use prefix QEL, example QEL22L.

**Note:** Baseplate and modular QEL Conversion kits are available for field retrofit. Please see parts/service manual for part numbers.

### QEL Electrical Load

Voltage	24VDC

## Electrified Options

# Switches

## Request to Exit (RX)

The RX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the push pad. The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply. The RX switch option should not be used to control a load, but as a signalling switch (2 amps resistive maximum). The RX switch is available in a low current (LC) 50ma max. Most commonly used to signal low-current access control inputs.

### To order, specify:

- Standard – use prefix RX, example RX22EO
- Low Current – use prefix RX-LC, example RX-LC22EO

## Double Request to Exit (RX2)

The RX2 feature uses two RX switches.

### To order, specify:

- Standard – Use prefix RX2, example RX2 22EO

## Waterproof Request to Exit (WP-RX)

Switch rated to IP67 – protected from contact with harmful dust and from immersion in water with a depth of up to 1 meter (3.3 feet) for up to 30 minutes.

**Note:** All in-field electrical connections should be in compliance with IP67 to ensure trouble free operation.

## Latch Bolt Monitoring (LX)

The LX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the latch bolt.

The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply.

The LX switch option should not be used to control a load, but as a signalling switch (2 amps resistive maximum).

The LX switch is available in a low current (LC) switch. Most commonly used in computer operated monitoring systems.

### To order, specify:

- Standard – Use prefix LX, example LX22EO
- Low Current – Use prefix LX-LC, example LX-LC22EO

## Electrical Rating for All Switches

- Standard – 2 amp maximum @ 24VDC
- Low Current (LC) – below 50 Milliamps @ 24VDC

**Note:** All switches can be either factory or field installed.

## Electrified Options

# Alarm Kit

Alarm kit (ALK) is a simple yet effective way to deter unauthorized use of an opening. While the exit device is still a means of egress, the ALK kit contains an internal horn. When the touch bar is depressed, the horn sounds to provide an audible means of signaling that the opening has been violated. The alarm kit can be armed or disarmed by key thus allowing the exit device to be set in an armed or disarmed mode. The horn is rated at 85 decibels.

## For Hardware Applications

The assembly includes both a 24VDC Input and External Inhibit standard. The External Inhibit provides remote arming and dis-arming.

The key switch uses a standard 1 1/4" (32 mm) mortise cylinder with a straight cam (Schlage 20-001, L583-477 cam). The unit operates on one standard 9-volt alkaline battery, or can be hardwired to PS902 power supply. When the battery is weak, the horn will emit an intermittent low battery alert signal.

Auto reset (AR) option is standard with this kit. This allows the device to resume the alarm option after a preset time. Preset times can be field selected at 1.5, 3, or 4.5 minutes.

Alarm kits are available with a choice of two switch kits, RX or LX. RX monitors the touchpad and is furnished standard. LX optional latch bolt monitoring is recommended for use with surface vertical rod exit devices or when alarm needs to sound from both the exit device and trim side of the door. Specify ALK-LX.

The ALK includes a 6"x 20" decal for application on door "EMERGENCY EXIT ONLY. ALARM WILL SOUND."

### To order, specify:

Standard, 22 ALK

Minimum Door Opening Chart				
Stop Height	Strike	Single Door	Double Door w/Mullion	Minimum Door Opening w/ ALK

## Electrified Options

# Power Supplies

## PS900 Series Power Supplies

The PS900 Series is a consolidated line of power supplies and accessories that offer enhanced flexibility and functionality specific to the changing needs of the access control market. The PS900 Series can be used in a variety of applications to convert high voltage AC power into the regulated low voltage DC outputs required by most access control devices. The PS900 Series protects devices downstream by providing Class 2<sup>1</sup>, filtered and regulated power. The full line is UL294 certified.

### Features

- Constant output rating at both 12VDC or 24VDC provides superior performance; includes field selectable jumper
- Flat mounting of option boards provides easier access to terminal blocks for connection of electrified devices
- High voltage protective cover
- Battery back-up board auto-selects voltage
- Fire alarm relay can be configured to provide either switched or un-switched outputs from a power supply
- Universal 120–240 VAC input
- Low voltage DC, regulated and filtered
- Electronic power limiting foldback circuit for AC current overload protection
- Fused primary input
- AC status monitor– isolated SPDT contacts
- AC input and DC output LED status indicators
- Cover mounted AC input indication
- Hinged cover with lock down screws
- Optional keylock

### Certifications

- UL 294 certified—the standard for access control
- Class 2 rated<sup>2</sup>

The PS900 Series offers a variety of distribution options, including basic fuse protection, simple relay, and advanced logic providing complex sequencing and timing functions.

### Connectors on the Power Supply

Product	Schlage PS902	Schlage PS904	Schlage PS906	Von Duprin PS914
Amperage	2 amps	4 amps	6 amps	4 amps with 16 amp in rush
Distribution Boards	1	2	3	2
Battery Back-up Board	1	1	1	1
EL Compatible	No	No	No	Yes

### Applications

The PS900 Series of power supplies works with many electrified devices including Schlage electromagnetic locks, Schlage AD Series hardwired locks, Schlage electrified mechanical locks, Von Duprin electrified strikes, Von Duprin exit devices and many other brands.

### Accessories

The PS900 Series features seven option boards for use in a variety of applications. All PS900 Series power supplies option boards are UL 294 certified.

### Option Boards

- **900-4R:** 4 relay controlled output board to power multiple devices
- **900-4RL:** 4 relay distribution board with logic is field configurable for time delay function, auto operator, security interlock
- **900-8F:** Provides 8 individually fuse-protected outputs, giving the flexibility to power multiple devices and provide another layer of protection
- **900-8P:** Provides 8 individually fuse-protected outputs, giving the flexibility to power multiple devices and provide another layer of protection
- **900-FA:** Emergency interface relay integrates with fire alarm and is used to cut power in case of emergency<sup>2</sup>
- **900-BB:** Battery backup
- **900-2RS:** 2 relay control board for electric latch panic devices (EL or QEL), electric strikes or electrified trim
- **900-BBK:** Battery backup kit includes two 7A/hr batteries and provides up to four hours of backup power when cycled every 5 minutes at full load

1. PS906 can provide Class 2 rated outputs when used with 900-8P distribution board.
2. Except PS906, output rating exceeds Class 2 power limits.
3. PS906, output rating exceeds Class 2 power limits, but can provide Class 2 rated outputs when used with 900-8P distribution board.

## Accessories

# Electrical Power Transfers

Electrical power transfer (EPT) Electric power transfer provides a means of transferring electrical power from a door frame to the edge of a swinging door. The units are completely concealed when the door is in the closed position, and are ideal for installations involving abuse or heavy traffic.

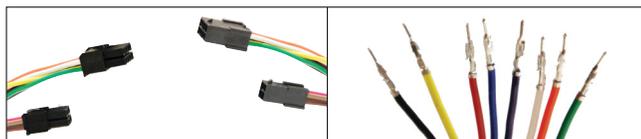

Two models are available; EPT-2, two 18 gauge wires and EPT-10, ten 24 gauge wires. The EPT-2 and EPT-10 are UL listed as "miscellaneous door accessory". UL Listed for use on fire doors.

## Finishes

- 622 - Powder coated matte black
- 689 - Powder coated aluminum
- 695 - Powder coated dark bronze

# Allegion Connect

Allegion Connect features common interconnect components for many cross-category electrified options. Allegion Connect is a quick and easy way to connect power sources. There is no wire cutting; reducing installation and maintenance time ultimately cutting cost. After installation, Allegion Connect continues to provide benefits throughout the lifetime of the opening by offering a service kit for repairs or modifications in the future.

## Features & Benefits

- Quick: common connections reducing installation time
- Perfect connections: these factory installed connectors ensure the right wires match up every time
- Protective: the connectors protect the connection points throughout the installation process and lifetime of the opening
- Interchangeable: all Allegion Connect products utilize the same connectors
- Maintenance: you no longer need to cut away wire to disconnect Allegion products, also available is a service kit specifically for Allegion Connect products.

Door Applications		
Degree of Opening	Hinge Type	Door Thickness
0-180	Up to 5" butt hinges	1-3/4"
0-180	Up to 3/4" offset pivots	1-3/4"
0-130	5-1/2" butt hinges	1-3/4"
0-110	6" butt hinges	1-3/4"
0-90	Swing clear hinges	1-3/4"

Dimensions	
<b>Housing</b>	9" x 1 1/4" x 1-5/8" (229 mm x 32 mm x 38 mm)
<b>EPT-2</b>	Two 18 gauge wires, Up to 2 amps @ 24VDC, with a 16 amps maximum surge
<b>EPT-10</b>	Ten 24 gauge wires, Up to 1 amps @ 24VDC, with a 16 amps maximum surge

## To order, specify:

EPT-2 ,EPT-10

Finish: 622, 689 or 695

Harness Length	Connectors on Both Ends	Connectors on One End, Crimped Pins on the Other End

44 Inches	CON-44	CON-44P
50 Inches	CON-50	CON-50P
192 Inches	CON-192	CON-192P

Power supply wire harness = connectors on one end, stripped leads on the other end.

6 Inches	CON-6W - wire extension to field wiring
----------	---

Consult door manufacturer for harness length requirements.

**Note:** You will need to purchase a separate wiring harness to go from exit device to hinge/EPT and an additional harness to go from hinge/EPT to field wiring. Harness part numbers with ordering information can be located in the Schlage, Von Duprin and Falcon price books. A service kit is available for order in the Schlage, Von Duprin and Falcon price books. Included in this kit are male end plugs, female end plugs and pins to customize harnesses to your application.

**Note:** Must be ordered with exit devices and locks.

## To order, specify:

Specify CON for Connect electronic options

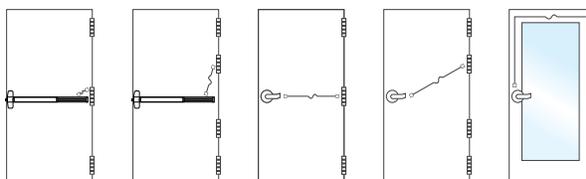

Example: RX-22-EO-CON

(22 Series with RX switch and Connect connectors)

Specify harness length; Consult door manufacturer for harness length

Specify Von Duprin EPT10-CON or Ives electrical thru-wire CON hinge or pivot

# Door Kits

## Vertical Rod & Latch Guard (RG-27)

Rod Guard

Series RG-27 Vertical rod and latch guards protect the bottom rods of exit devices from the damaging impacts of carts or gurneys passing through doors. (If bottom rods become damaged, the exit device will not function as intended and can jeopardize the ability to exit safely during an emergency.)

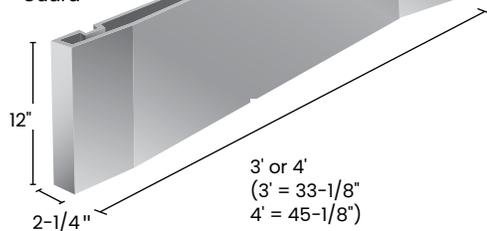

In addition to protecting the vertical rod, the guard provides a smooth, unobstructed surface so the door can be pushed open easily with the bumpers of a wheelchair. The latch guard portion is 10" high. The standard latch guard features a 45° ramp. The extended latch guard offers a continuous ramp for 3' or 4' doors.

All stainless steel construction in 630 finish. Latch guards can cover latches as large as 1-1/4" W x 10"H x 1-7/8" projection.

Latch Guard

Extended Latch Guard

## Models

RGO	Rod guard only (projection 1-3/16")
RG-27	Rod and latch guard
RG-27-3	3' (914 mm) Rod guard and extended latch guard
RG-27-4	4' (1219 mm) Rod guard and extended latch guard
LGO	Latch guard only
LGO-3	3' (914 mm) Extended latch guard only
LGO-4	4' (1219 mm) Extended latch guard only

When using on wood fire doors, high density block is required.

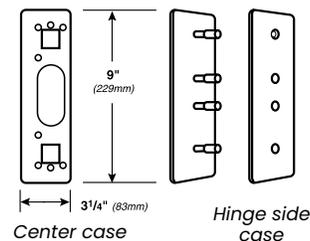

## To order, specify:

- Model number\*
- Handing (except on RGO)
- Door material if other than hollow metal
- Optional through bolt mounting available

\* RGO/RG-27 includes one rod guard only, which accommodates bottom or top rod up to 7' door. For longer top rods, specify rod guard quantity required.

## 229 Cover Plate Kit

Cover plate kit contains inside and outside plates for hinge stile cutouts, an inside plate for the lock stile, and necessary screws. Plates are designed to cover cutouts required by most existing exit device installations.

## Glass Bead Kit (GBK)

Glass bead conversion kits are available for all 22 Series devices for use on doors with raised glass beads. Each kit consists of 1/4" (6 mm) shim sets. GBK for surface vertical rod ships with 1/8" shims for rod guides.

- 2 stacked kits maximum for panic hardware
- 1 kit maximum for fire hardware
- Shim thickness + door thickness not to exceed 2-1/4"

## To order, specify:

- Device model
- GBK
- Device type (rim or surface rod)
- To order separately, specify model 22GBK-R (rim), 22GBK-499F (rim), 22GBK-SV (vertical rod)
- Finish

**Example:** 22 GBK Rim 689

## Accessories

# Through Bolts

Through bolts provide secure mounting by mating with machine screws furnished with devices. Through bolts are either optional or required, as shown in the quantity chart below. Through bolts ordered separately are not furnished with screws. If screws are required, order device mounting packages.

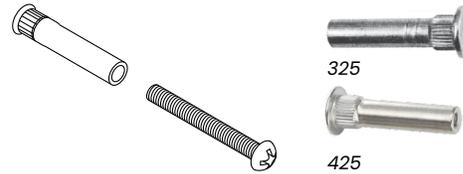

or WH approved high density blocking material for wood fire rated doors. Specify device with SLM (special laminate material) mounting package.

### To order, specify:

If ordering devices with through bolts, specify SNB (through nuts and bolts) in device description.

If ordering through bolts separately, specify:

- Through bolt model number
- Package quantity (sold as package of 2)
- Finish

An alternative to through bolt mounting is the use of UL

## Accessories

# Mullions

Removable steel mullions provide single door performance in double door openings with rim devices. Mullions are easily removed by loosening bottom set screw and removing top fitting cover. The top mullion fitting is attached to the frame and is concealed by the fitting cover.

- Steel mullions are 2" (51 mm) wide and 3" (76 mm) deep, with a wall thickness of 1/8" (3 mm)
- Mullions are shipped with mounting screws and prepared for strikes (strikes are not included except where indicated)
- Steel mullions are available in SP28 and SP313 finishes (Consult factory for other powder coat finish options)

## Keyed Removable Steel Mullions (KR)

KR mullions make removal faster and easier by a single operation of the mortise cylinder. Once mullion is removed, large equipment or furniture can freely pass through the opening. The unit will self lock when re-installed, without the use of the cylinder key. Uses a 1-1/4" mortise cylinder with a straight cam (Schlage cam reference L583-477). Cylinders are sold separately. Prefix mullion model with "KR".

Removable aluminum mullions are 1-1/16" (27 mm) wide on face closest to the door and 2-3/8" (60 mm) at the widest point. The depth is 3-1/8" (79 mm) with a wall thickness of 1/8" (3 mm).

Aluminum mullions are available in 606, 612, 628, 710 and 622/711 finishes. Consult factory for other powder coat finish options. Aluminum mullions are not available keyed removable.

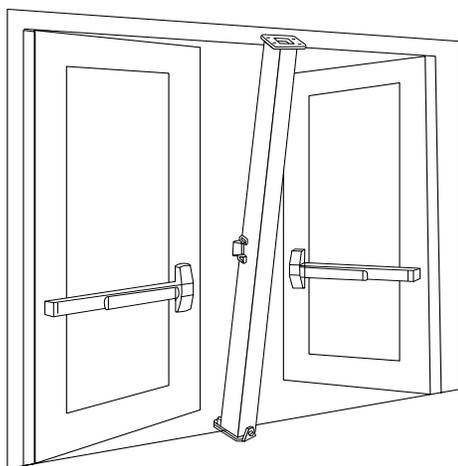

Stock hollow metal applications for devices mounted to cover ANSI 161 cutouts are higher than the standard mullion strike location. Consult the factory for special strike preparation or order a blank mullion. See below.

## Blank Mullions

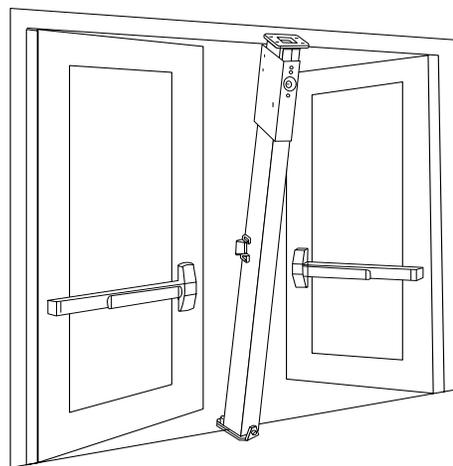

Blank mullions are furnished without strike preparation. They're used to mount devices at a strike height different from the standard mullion preparation.

### To order, specify:

- For keyed removable option on steel mullions, prefix model number with "KR"
- Model number
- Height of opening
- Finish
- Handing, if required
- Centerline deviation (refer to device template for standard centerline)
- Strikes, when required, should be ordered with device

Removable mullions

Keyed removable steel mullions

**Accessories**

# Steel & Aluminum Mullions

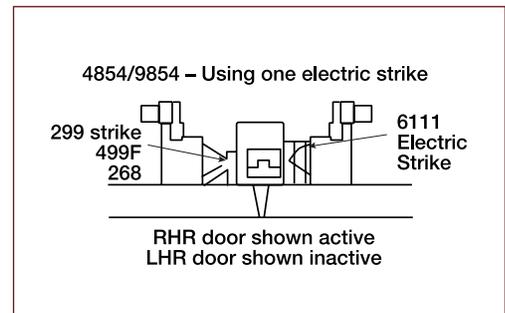

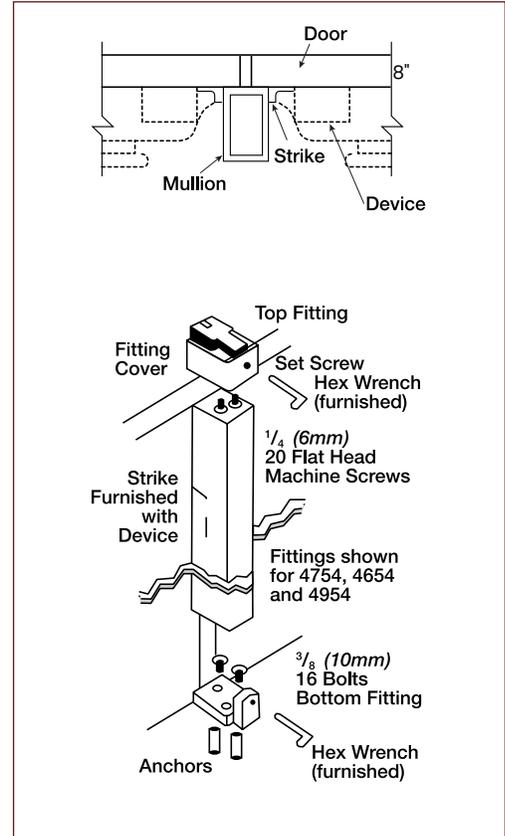

**Steel Mullions**

- 1654** Prepared for two 1606 strikes. If 1606 strikes are not specified on the order, two per mullion will be added. Additional charges apply.
  - 4954** Prepared for 264 or 299 strikes. For use with all Von Duprin Panic rim devices.
  - 9954** Prepared for and must be used with two 268 strikes (88-F device), or two 499F (22-F, 98-F, 99-F devices). UL fire labeled mullion for up to 3 hour opening using Von Duprin fire exit rim devices. This mullion is not easily removed due to special fittings. 98-F and 99-F devices are rated up to 10'0" (3048 mm).
- Note:** If 268 or 499F strikes are not specified on the order, two per mullion will be added. Additional charges apply.

- 4754** Prepared for two 4263 monitor strikes.
- 4854** Prepared for one 299 and one 6111 electric strike. Indicate handing for electric strike.
- 9854** Prepared for one 268 or 499F strike and one 6111 electric strike. Indicate handing for electric strike. UL fire labelled mullion for up to 3 hour openings up to 8' x 8' (2438 mm x 2438 mm) using Von Duprin fire exit rim devices.

**Aluminum Mullions**

- 5654** Prepared for two 299 strikes.
- 5754** Prepared for 1408 double strike.

## Additional Information

# UL Listing for Fire Exit Hardware and Label & Opening Size

Check with door manufacturers to confirm listing compatibility.

Exit Device	Door Material	Single Door	Double Door						
			With mullion	With 9854 mullion <sup>4</sup>	With KR9954 mullion	With KR9854 mullion <sup>4</sup>	V x V same direction <sup>1</sup>	V x Mortise same direction <sup>3</sup>	V x V double egress
22-F	Metal, wood core, composite (wood or plastic covered)	3 Hour 4' x 8'	3 Hour 8' x 10'	90 Min 8' x 8'	3 Hour 8' x 8'	90 Min 8' x 8'			
2227-F	Metal, wood core, composite (wood or plastic covered)	—	—	—	—	—	3 Hour 8' x 10'	—	3 Hour 8' x 10'
2227-F-LBR	Metal, wood core, composite (wood or plastic covered)	—	—	—	—	—	3 Hour 8' x 8'	—	3 Hour 8' x 8'

1. Fire-rated metal door flush bolts may be substituted on one leaf of a pair in these columns. Substitute two-point flush bolt for vertical devices; or substitute top flush bolt with auxiliary fire bolt for vertical rod LBR/LBL-AFL devices. The opening will carry the fire listing (# hours and opening size) of the least rated component.
2. Not listed for Canada.
3. For Vertical x Mortise opening sizes, see applicable vertical rod/cable device rows.
4. Hourly limitation due to 6111 electric strike listing.

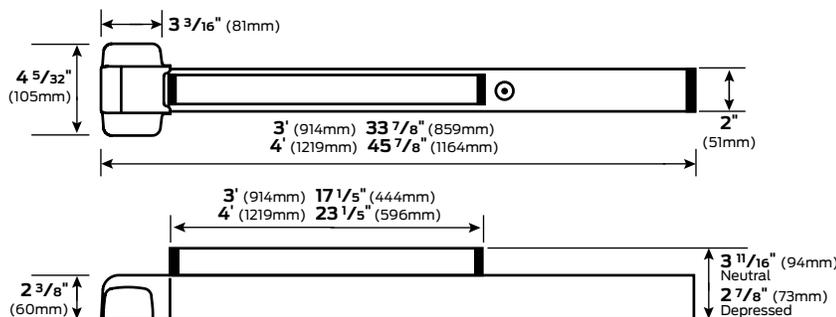

### Notes:

- Check with door manufacturers to confirm listing compatibility.
- Overlapping astragal may not be used on pairs swinging same direction with vertical rods or cables on both leaves.

## About Allegion

At Allegion (NYSE: ALLE), we design and manufacture innovative security and access solutions that help keep people safe where they live, learn, work and connect. We're pioneering safety with our strong legacy of brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Our comprehensive portfolio of hardware, software and electronic solutions is sold around the world and spans residential and commercial locks, door closer and exit devices, steel doors and frames, access control and workforce productivity systems.

## Invest in longevity

Von Duprin® empowers its customers to embrace change by providing flexible solutions that can be modified over time, protecting your investment well into the future.

The 33A/35A Series is a narrow stile push pad device popular for its vast application coverage. With many field configurable and upgradeable solutions available, it's easy to enhance the functionality of an existing device. Mechanical and electronic options include quiet electric latch retraction, delayed and controlled egress, concealed vertical cables and security indicators. It's one way Von Duprin protects its customers' investments long into the future.

Von Duprin's exit devices offer durable solutions that are proven in the field to perform under heavy use and abuse and backed by a team of experts experienced in door hardware application and code compliance. Allegion stands behind every Von Duprin product we make with unparalleled customer support thanks to our team of experts based in the U.S. that average more than 15 years of experience, so you are assured to receive expert advice.

33A Series features grooved mechanism case.

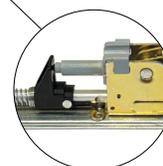

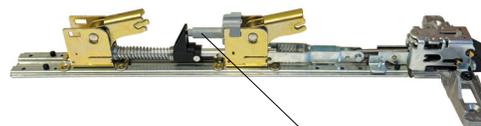

35A Series features smooth mechanism case.

Von Duprin pushpad exit devices are available in two external surface styles, designated 33A Series and 35A Series. The two styles are mechanically and dimensionally identical and provide a wide selection of appearance options.

### Deadlocking latch bolt

Deadlocking latch bolt provides security and improved performance at standard device cost.

### The Quiet One®

A fluid damper decelerates the push pad on its return stroke and eliminates most noise associated with exit device operations. Furnished on all 33A/35A Series exit devices.

## Device types

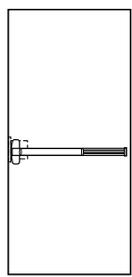

As the pioneer in the industry, Von Duprin continues to advance the industry through customer-centric innovation, which delivers solutions to the most challenging applications.

Backed by high quality standards, Von Duprin exit devices were among the first in the industry certified to ANSI/BHMA A156.3 Grade 1. Our exit devices are tested to the highest standards and proven in the field to perform under heavy use and abuse, giving you peace of mind both now and in the future.

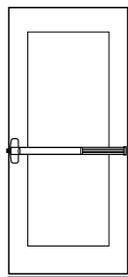

The versatile design can be easily upgraded to connect to a larger electronic ecosystem, empowering you to adapt with flexible solutions. You can configure numerous variations in the field without replacing your device and protecting your investment. This makes upgrades easy and cost effective.

## Popular applications

Right hand-reverse orientation

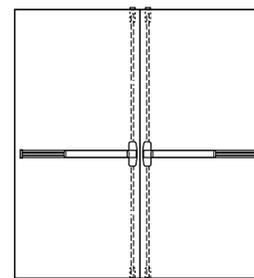

(Left hand-reverse) (Right hand-reverse)  
Outside

Two surface mounted vertical rod devices—same direction\*

Two fire exit hardware vertical cables/rods with auxiliary fire latch-LBR option\*

Two concealed vertical cables/rods\*

\* Do not use with overlapping astragals

# 33A/35A Rim exit device

**33A and 35A** for all types of single and double doors with mullion, UL listed for panic exit hardware. Devices are ANSI A156.3 Grade 1. The 35A has a smooth mechanism case and the 33A has grooved case. The rim device is non-handed except when the SS (signal switch) option is used.

33A/35A fits door stiles as narrow as 1 3/4" (44mm).

### Specifications

Device lengths	3' 2'4" to 3' (711mm to 914mm) Door size
	4' 2'10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 13/16" (1011mm)
	39 11/16" (1008mm) with mullion
Center case	8 3/16" x 1 9/16" x 2 13/32" (208mm x 40mm x 62mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm)
	Pushbar depressed – 3 1/16" (78mm)
Latch bolt	Deadlocking, 3/4" (19mm) throw
Finishes	605, 606, 612, 619 (35A only), 625, 626, 626AM, 628, 710, 711
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) and 2 1/4" (57mm) wood and metal doors
	#425 SNB furnished standard for end case
	#325 SNB furnished standard for EO (exit only device)

### Features and options

#### Electrified options

- ALK** Alarm exit kit
- CX** Chexit delayed exit
- ESL** Emergency secure lockdown
- LX** Latch bolt monitor switch
- LX-RX** Request to exit / latch bolt monitoring
- QEL** Quiet electric latch retraction
- RX** Request to exit, WP-RX waterproof option
- RX-LC, LX-LC, LX-RX-LC** Low current option for RX, LX, LX-RX
- SS** Signal switch
- CON** Allegion Connect

#### Mechanical options

- AX** Accessible device
- GBK** Glass bead kit
- PN** Pneumatic
- QM** Quiet mechanical
- SEC** Security screws
- SG** Safety glow
- SNB** Sex bolts
- WH** Weep holes

#### Dogging feature

Hex key dogging standard

#### Dogging options

- CD** Cylinder dogging
- CDSI** Cylinder dogging with security indicator
- HDSI** Hex dogging with security indicator
- LD** Less dogging

#### Strikes

- 1439** Dull black

#### Optional strikes

### Accessories

**1439 roller**  
Ships standard, optional strikes available

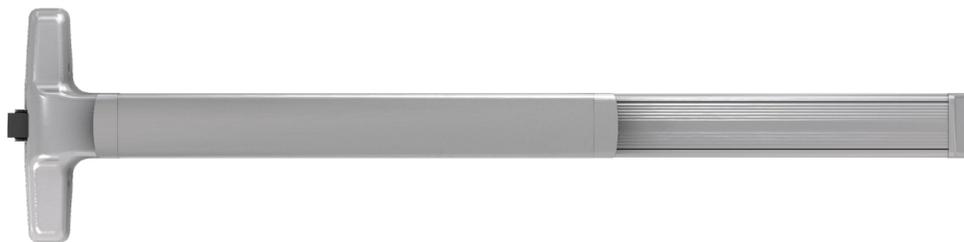

**299 strike**  
Needs to be specified for hollow metal frames

**Hex key dogging**  
Comes standard on 33A/35A rim exit devices

## Device types

### 33A-F/35A-F Rim fire exit device

**33A-F and 35A-F** for all types of single and double fire rated doors with mullion, UL listed for Fire Exit Hardware. See Additional information section of the catalog for detailed information on UL listed fire exit hardware label and door opening size information. Devices are ANSI A156.3 – 2014 Grade 1. The 35A has a smooth mechanism case and the 33A has grooved case. The rim device is non-handed except when the SS (signal switch) option is used.

33A/35A fits door stiles as narrow as 1 3/4" (44mm).

#### Specifications

Device lengths	3' 2'4" to 3' (711mm to 914mm) Door size
	4' 2'10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 13/16" (1011mm) 39 11/16" (1008mm) with mullion
Center case	8 3/16" x 1 9/16" x 2 13/32" (208mm x 40mm x 62mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm) Pushbar depressed – 3 1/16" (78mm)
Latch bolt	Deadlocking, 3/4" (19mm) throw
Finishes	605, 606, 612, 619 (35A only), 625, 626, 626AM, 628, 710, 711
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) and 2 1/4" (57mm) wood and metal doors #425 SNB furnished standard for end case #325 SNB furnished standard for EO (exit only device)

#### Accessories

**299F strike**  
Ships standard

**499F strike**  
With 9854/9954 mullion

# 3327A/3527A Surface mounted vertical rod device

**3327A and 3527A** for all types of single and double doors, UL listed for panic exit hardware. Devices are ANSI A156.3 – 2008 Grade 1. The 3527A has a smooth mechanism case and the 3327A has grooved case. The surface vertical rod device is non-handed except when the SS (signal switch) option is used.

3327A/3527A fits door stiles as narrow as 1 3/4" (44mm).

### Specifications

Device lengths	3' 4'	2'4' to 3' (711mm to 914mm) 2'10" to 4' (864mm to 1219mm)	Door size Door size
Device centerline from finished floor	39 13/16"	(1011mm)	
Center case	8 3/16" x 1 9/16" x 2 13/32"	(208mm x 40mm x 62mm)

### Accessories

**Hex key dogging**  
Comes standard on 3349A/3549A rim exit devices

\* For 33/3549A devices, LX switch monitors trim input or electric dogging of QEL devices. LX switch does not monitor latch bolt condition.

## Device types

# 3349A-F/3549A-F Concealed vertical cable fire exit device

**3349A-F and 3549A-F** for hollow metal single and double doors up to 8' x 10' (2438mm x 2540mm), UL listed for fire exit hardware. See Additional information section of the catalog for detailed information on UL listed fire exit hardware label and door opening size information. Devices are ANSI A156.3 Grade 1. The 3549A-F has a smooth mechanism case and the 3349A-F has grooved case. The concealed vertical cable device is non-handed except when the SS (signal switch) option is used.

3349A-F/3529A-F fits door stiles as narrow as 3 1/2" (90mm).

### Specifications

Device lengths	<b>2'</b> 2' (610 mm) door size
	<b>3'</b> 2'4" to 3' (660mm to 914mm) door size
	<b>4'</b> 2'8" to 4' (813mm to 1219mm) door size
Device centerline from finished floor	39 13/16" (1006mm) standard
Center case	8 13/16" x 2 13/32" x 1 9/16" (208mm x 62mm x 40mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm) Pushbar depressed – 3 1/16" (78mm)
Latch bolt	Deadlocking anti-friction top and bottom bolt 1/2" (13mm) throw
Door undercut	3/4" (19mm) maximum – 24231516 spacer block kit needed for 3/4" (19mm) undercut
Top and bottom latch case	5 13/16" x 1 1/4" x 1 7/16" (147mm x 32mm x 37mm)
Vertical cables	7/32" (6mm) diameter stainless steel cables
Finishes	605, 606, 612, 619 (35A only), 625, 626, 626AM, 628, 710, 711
Fasteners and sex bolts (SNB)	Includes 1 3/4" (44mm) – 2 1/4" (57mm) metal doors #425 SNB furnished standard for end case #325 SNB furnished standard for EO (exit only device)

\* For 33/3549A devices, LX switch monitors trim input or electric dogging of QEL devices. LX switch does not monitor latch bolt condition.

# 3350AWDC/3550AWDC Wood door concealed vertical cable device

**3350AWDC and 3550AWDC** for use on single and double wood doors, UL listed for panic exit hardware. Devices are ANSI A156.3 Grade 1. The 3549A has a smooth mechanism case and the 3350AWDC has grooved case. The concealed vertical cable device is non-handed except when the SS (signal switch) option is used.

3350AWDC/3550AWDC fits minimum 4" door stile width (101.6 mm).

**Scalp Plate** – Device is furnished standard with an 15" (381 mm) long scalp plate for easy access to cables.

### Specifications

Device lengths	<b>2'</b> 2' (610 mm) door size
	<b>3'</b> 2'4" to 3' (660mm to 914mm) door size

## Trim functions

Von Duprin protects your investment by empowering you to adapt with flexible solutions and modular options. The 33A/35A Series features numerous trim options to serve your different needs. Designed with flexibility in mind, our solutions offer ease of adding new options as they are developed.

With Von Duprin, you can be confident that as the needs of your facility change, our products can be upgraded easily to meet your needs, especially as the mechanical and electronic technology converge. Von Duprin's versatile design enables you to add functionality to existing devices in a cost-effective way, protecting your investment well into the future.

A variety of device trim lock type functions such as key lock and unlock, latch bolt retraction with key and no cylinder designs for an "always operable" function are available in levers, knobs, latches, thumbpiece and thumbturn designs.

	<p><b>EO No outside trim</b></p> <ul style="list-style-type: none"> <li>Exit only</li> </ul>		<p><b>DT Dummy trim</b></p> <ul style="list-style-type: none"> <li>Pull when dogged (not recommended for fire device)</li> </ul>		<p><b>NL Night latch</b></p> <ul style="list-style-type: none"> <li>Key retracts latchbolt</li> <li>Rim cylinder</li> </ul>

## Mechanical options

### Dogging options

#### Cylinder dogging (CD)

Cylinder dogging is available on all 33A/35A panic exit devices to replace the standard hex key dogging. Unit requires a standard 1 $\frac{1}{4}$ " (32mm) mortise cylinder with an inverted straight cam. When ordering, reference Schlage cylinder 20-001, 1 $\frac{1}{4}$ ", XQ11-949. This provides the L583-477 cam inverted at the factory.

**To order, specify:** Use prefix, CD, example CD33A-L

#### Less dogging (LD)

Less dogging is available in all 33A/35A panic exit devices to remove the dogging option.

**To order, specify:** Use prefix LD, example LD33AL

#### Cylinder dogging kit (CDK)

For field conversion, a cylinder dogging conversion kit is available. Cannot be added to fire exit hardware.

**To order, specify:** 33ACDK or 35ACDK, specify finish

#### Hex key dogging kit\* (HDK)

For field conversion, from cylinder dogging, conversion kit is available.

**To order, specify:** 33AHDK or 35AHDK, specify finish

\*Cannot be added to fire exit hardware.

#### Dog keys

##### Dog key (old style)

##### Dog key (standard)

### Classroom security/security indicators

Designed for high use and abuse institution environments, such as schools and hospitals, these Von Duprin products are recommended for the following applications.

#### Visual verification

Reduce the time it takes to tour your facility and ensure each door is secure by installing the Von Duprin security indicator to provide at-a-glance visual verification.

#### Lockdown

Lock down high occupancy areas such as auditoriums, cafeterias and gymnasiums, from inside the room with the Von Duprin security indicator that provides positive visual confirmation.

#### Features and benefits

- Lockdown solution that meets fire and life safety codes for free egress
- Modular conversion kits allow you to quickly and easily upgrade your existing devices

#### CDSI/HDSI dogging indicator

- Hex or cylinder dogging options
- Visual indication of whether the exit device is dogged or undogged
- Available for 98/99 and 33A/35A Series panic devices

#### Dogging security indicators (CDSI/HDSI)

The CDSI/HDSI dogging indicator provides an at-a-glance verification of the status of the door from inside of the room. Visible "LOCKED" and "UNLOCKED" indicators show whether the device is undogged or dogged. This feature can be used with hex key (HDSI) or cylinder dogging (CDSI) options on various device types—rim, mortise and vertical systems.

#### To order, specify:

1. Cylinder dogging security indicator: Prefix CDSI
2. Hex dogging security indicator: Prefix HDSI
3. Above options cannot be used with fire-rated devices and are recommended for use in combination with the following trim functions: DT, K-DT, L-DT, EO, NL, K-NL, L-NL, NL-OP

## Environmental options

### Quiet Mechanical (QM)

The QM option controls motion to reduce operational noise. It is available for the 996 trim, as well as 98/99 and 33A/35A rim and surface vertical rod devices. The QM trim solution provides a damper-controlled lever return. Likewise, the QM rim device option provides damper-controlled re-latching.

#### Features and benefits

- Controlled motion to reduce operational noise
- 996 damper-controlled lever return
- 98/99 and 33/35A damper controlled re-latching
- Available pre-installed from factory or as a retrofit kit
- Compatible with QEL, AX, RX, CD and HD

### Pneumatic (PN) controlled exit devices

The PN feature provides remote latch bolt retraction in hazardous areas where electrically operated devices would not be permitted. The pneumatic solenoid will retract the latch bolt for momentary or prolonged periods. PN exit devices are particularly suited for use with automatic door operators. The PN feature is available on both Panic and fire exit hardware devices.

The PN feature includes a special actuating linkage that gives building owners the option of mechanically or pneumatically dogging the exit device. If manual hex-key dogging is required, specify HD-PN (Dogging the device, whether mechanically or pneumatically, makes the device function as a push/pull unit and reduces the wear on its moving parts.) If cylinder dogging is required, the standard cylinder dogging is not available.

When activated pneumatically, the latch bolt(s) of the exit device retract in 1/2 to 1 1/2 seconds. This pneumatic operation uses air pressure ranging from 50 to 100 pounds per square inch.

This product will function only when it is part of a pneumatic system (air compressor, air lines, pneumatic system, etc.).

Contact LCN for correct control boxes.

#### To order, specify:

- Standard – Use prefix PN, example PN33ANL
- Hex Key Dogging – Use prefix HD-PN, example HD-PN33ANL
- Special Center Case Dogging (handing is required, specify RHR or LHR) – Use prefix SD-PN, example SD-PN33ANL

### Pneumatic transfer (PNT)

#### Pneumatic controls

PNT-1 is available for pneumatic latch retraction exit devices. Appearance and dimensions are identical to EPT models.

### Weep holes (WH)

WH is available for all 33A/35A Series exit devices. Weep holes are ideal for devices that are mounted to exterior doors that can be exposed to rain and other elements. Hole spacing on 3' and 4' devices are every 6" on center. A 3 foot device will have 5 holes, a 4 foot device will have 7 holes.

**To order, specify:** Suffix WH, 33AEO-WH.

### Fortified exit rim devices (FER)

The Von Duprin® 33A/35A series offers Fortified exit rim (FER) devices for use in applications desiring additional security and in systems undergoing ASTM F3561-22 testing. The FER device has design enhancements to add extra reinforcement, including a cast steel center case (33A/35A) chassis. Armored trim plates will also be used with the EO (Exit Only) devices. Von Duprin® launched the FER 33/35A devices on November 4, 2024.

Functions	EO (with 388-FER trim plate) NLOP (388 trim)

#### FER Options

Door width	3'- 3 foot device 4'- 4 foot device
Handing	LHR - Left hand reverse RHR - Right hand reverse
Touchbar options	PUSH - Touchbar trim embossed 'PUSH' RSS - Red silk-screened lettered touchbar trim SG - Safety glow

For double door applications:

- For ASTM F3561-22 requirements, must use 48/4954 mullion and TruLite Doors
- For other security and safety applications, 98/9954 mullion can be used.

## Storm options

### Hurricane rated exit devices and mullions

Hurricane resistant openings are designed to withstand storm conditions for long periods of time while maintaining the structural and functional integrity of the opening. The primary purpose is to not only prevent debris and wind from penetrating the assembly but also to maintain functionality after the storm.

### Hurricane codes and applications

Florida was the first state to develop hurricane codes. As a result, the requirements set by the Florida Building Code (FBC) may be adopted by jurisdictions in other states where hurricane protection is a necessity. The appropriate hurricane solution depends on the specific requirements for the application. Contact your local Allegion consultant for the specific requirements in your state.

### Hurricane rated devices

#### Wind and Impact

FBC TAS 201, 202, 203

[Wind and Impact zone (HVHZ) ASTM E1886, ASTM E1996, ASTM E330]

Exterior door assemblies certified for installation within the Florida High Velocity Hurricane Zone (coastal region of the state) are subject to specific tests for both wind speed and flying debris called out in the TAS protocols of the Florida Building Code. Impact, structural, and cyclic tests must be conducted on full assemblies (e.g., exit device and door) as part of the standard.

### Wind-Only

ANSI-ASTM E330 [Wind-Only (non-impact zone)]

Exterior door assemblies certified for installation in non-impact regions (typically inland regions) are tested for structural integrity in accordance with ASTM E330 for wind-only applications. These doors are subject to a structural test load equal to 1.5 times their actual design pressure rating, and they must remain operable with no breakage of glazing panels.

To order, specify:

1. Use prefix "HH" for wind and impact or "HW" for wind-only. If application is unknown, specify HH device, which will satisfy both applications.
2. Model number and description
3. Door mode: SGL (single) or PR (pair)

**Example:** HH3347A 3' 626 PR

Note: Many hurricane rated devices use standard device components. Devices will be furnished with the proper strikes and components if HH or HW is specified. All HH devices will include through bolts. Pricing will be adjusted accordingly. See Von Duprin price book for details.

## Storm options

### Hurricane rated mullions

#### Wind and Impact

- Designed for use with these HH (Wind and Impact) rated devices:
  - HH98/99 (specify devices with 499F strikes)
  - HH98/9957 (specify devices with 499F strikes)
  - HH-XP98/99 (specify devices with 909 or 954 strikes)
  - HH88-F (specify devices with 468 strikes)
- Steel mullion
- Furnished for 8' doors; cut in field as needed
- No KR or electrified options available
- Furnished blank (no strike prep)
- Mullion tube and fittings are unique from are not interchangeable with 9954

#### Panic and fire-rated applications

- HH9954

#### To order, specify:

1. HH9954 x Finish (689 or 695)

### Wind-Only

- Designed for use with HW (Wind-Only) rated devices
- Identical to standard mullions, except for hurricane rated bottom fitting mounting hardware

#### Panic applications

- Steel - 1654, 4954, 4954-XP
- Aluminum - 5654, 5654-XP, 5754

#### Fire-rated applications

- 9954, 9954-XP

#### To order, specify:

1. Use KR if keyed removable option is desired (steel mullions)
2. HW
3. Model number
4. Height of opening
5. Finish
6. Strikes, when required, should be ordered with device

Example: KR-HW9954 7' 689

Application	Model	Single door	Double door	
		Standard strike	Mullion	Standard strike
HH (Wind and Impact Rated) All impact rated devices require mounting with through bolts. Through bolts are furnished standard with all 33/35 series devices.	HH3347A/3547A*	Top: 338 Bottom: 304L	—	Top: 338 Bottom: 304L
	3347A-F/3547A-F	—	—	Top: 338 Bottom: 304L
	3349A/3549A	Top: 249 Bottom: 349	—	Top: 249 Bottom: 349

			1654 or KR1654	1606
			5654	299
			5754	1408
	33A-F/35A-F	299F	9954 or KR9954	499F
	3327A/3527A	Top: 299 Bottom: 304L	—	Top: 299 Bottom: 304L
	3327A-F/3527A-F	—	—	Top: 299F Bottom: 304L
	3347A/3547A	Top: 338 Bottom: 304L	—	Top: 338 Bottom: 304L
	3347A-F/3547A-F	—	—	Top: 338 Bottom: 304L
	3349A/3549A	Top: 249 Bottom: 349	—	Top: 249 Bottom: 349
3349A-F/3549A-F	—	—	Top: 249 Bottom: 349	

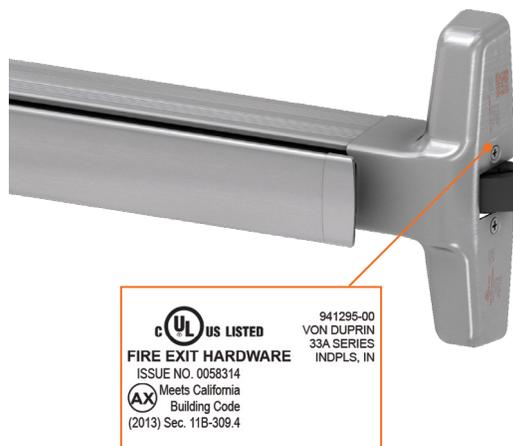

\* HH33/3547A is furnished with double latch brackets and requires template #10057.

Disclaimer: Hurricane rated exit devices for use when paired with Allegion approved doors.

## Accessibility options

### Accessible device (AX)

The AX device is a UL certified exit device designed to meet the progressive requirements of the California Building Code for accessible openings. This device meets the 5 lbs of operating force requirement called for in chapter 11B-309.4. The AX device also exceeds ANSI/BHMA requirements. Available devices include: AX33/35A, AX33/35A-F, AX33/3549A LBL, AX33/3549A-F LBL, AX33/3549A-F LBLAFL. Additionally, all AX devices will be shipped with a new UL label clearly stating “Meets California building Code (2013) Sec. 11B-309.4” and an “AX” identifier label on device center case. See images for reference.

## Latches

### Less bottom rod, panic and fire rated (LBR)

LBR option is available, using a spring loaded auxiliary latch bolt installed in the lower door edge. When exposed to heat the auxiliary latch bolt releases, keeping the doors in alignment and closed during a fire. UL listed 3 hours on hollow metal doors double egress, 90 minute swinging same direction, and 20 minutes wood doors (consult wood door manufacturer). Fits door stiles as narrow as 3<sup>5</sup>/<sub>8</sub>".

LBR devices must be ordered in pairs or must be used in conjunction with an approved automatic or constant latching flush bolt.

### Pullman latch (PL)

When PL is specified the standard latches are replaced with pullman style latches. Pullman latches are always extended and are most commonly used in conjunction with electric strikes and LBR-less bottom rod application. Not available with Fire rated devices.

Note: Not recommended where security is of the utmost importance since latches do not deadlock.

## Mechanical options

### Push pads

#### Dummy push pad

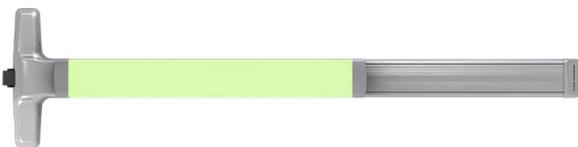

The 330 dummy pushpad is designed as a companion unit for all 33A devices. The 350 dummy pushpad is a companion unit for all 35A devices. The pushpad is rigid or nonfunctioning. A push/pull operation can be accomplished by using 386DT, 360L-DT, 550DT, 392-6 trim or any lves pull.

The 330/350 can be equipped with a functional pushpad and will accommodate an RX switch. Specify RX-330. May also be equipped with the RX2, double RX switch. Specify RX2-330.

#### To order, specify:

1. 330 or 350
2. Size 3' or 4' (914mm or 1219mm)
3. Finish – 605, 606, 612, 625, 626, 628, 710 and 622/711 (630–350 only)

#### Safety glow (SG)

Self-illuminating touchpad defines the location of the exit door in dark or smoke-filled area. The Safety Glow coating is a special powder coat finish that glows brightly during low or no light conditions. This coating was developed to meet MEA standards where luminescent exit door markings are required in commercial facilities. There are no batteries or electronics, the coating is charged when exposed to light.

**To order, specify:** Suffix SG, EL 33A27A-SG

#### Red silk screen (RSS)

Red silkscreen lettering on touchpad trim. "Emergency Exit Only, Push To Open And Sound Alarm." This comes standard on SS devices.

**To order, specify:** Suffix RSS, 33A27L-RSS RHR

#### Braille, embossed and knurled touchpads

\* Image shown is a special order.

Braille touchpad embossed with the standard message "CAUTION STAIRWELL" in braille and raised letters provides assistance to persons with impaired vision. Letters are 1/2" (13mm) high and braille is #2, raised height is 3/32" (2mm). Other messages are available on special order, limited to 20 characters per line.\*

**To order, specify:** Suffix BR, EL33A27L-BR

Embossed touchpad is embossed with the word "PUSH".

**To order, specify:** Suffix EMB, EL33A27L-EMB

Knurled touchpad is to provide warning to persons with impaired vision.

**To order, specify:** Suffix PBKN, EL33A27L-PBKN

\* Consult factory for availability.

# Latch retraction

## Quiet electric latch retraction (QEL)

Quiet electric latch retraction (QEL) provides electronic control of an exit device for environments where limited operational noise is desired. These devices always provide mechanical egress. The electrified latch retraction can also be activated by an access system or building automation system to unlatch the exit device momentarily. Often the QEL is used with a credential reader and access control system to unlock the door momentarily for authorized users.

The QEL can also be configured to electronically retract the latch for an extended period of time to allow free entry. This is a convenient alternative to mechanical dogging. If manual dogging is required, the hex dogging option is available, to order specify HD-QEL.

The QEL option is available on panic devices and fire rated devices. UL approved for Class II circuit applications.

The QEL option does not include the power transfer from door to frame, the power supply, or the control operator. Refer to EPT-2 power transfer and the PS902 or 914 power supply.

The PS902/914 with the 2RS, 4RL or 4R board is the minimum required. Other option boards available for other functions, see PS902/914 power supply for additional information.

The QEL has a low in rush current, so it can be used with standard Schlage power supplies. Calculate the peak current draw of all devices in the system to determine the required amperage of the supply.

The -2RS option board is designed to control two electric latch retraction devices and provide time delay between the firing of outputs is required. The power transfer is also sold separately.

**To order, specify:**

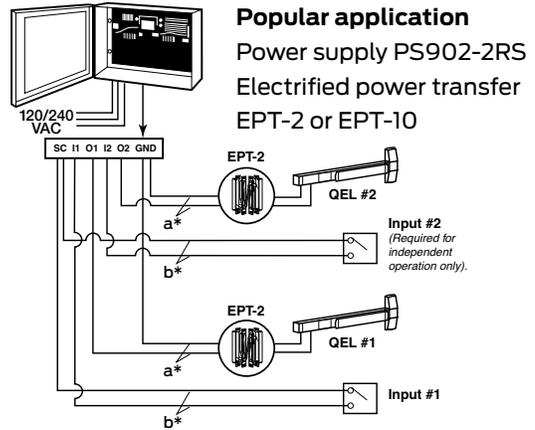

1. Standard — use prefix QEL, example QEL33A-L

**QEL Electrical load**

Voltage	24VDC
Current	1.0 A Inrush (0.5 sec.) / 0.14 A Holding / 2.0 A Calibrate (3 sec. one time)

**Minimum door opening widths**

Application	Surface vertical	Concealed vertical	Rim
Min. door opening	28 1/4"	28 1/4"	29 1/4"

a*	Distance (one-way)	Wire gauge
	200'	18 AWG
	320'	16 AWG
	500'	14 AWG
	800'	12 AWG

  

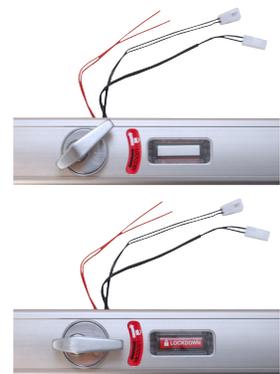

b*	Wire selection	Switch wire size
	1200 ft. Max.	18 gauge standard

**Emergency secure lockdown (ESL)**

The emergency secure lockdown (ESL) option is ideal for high-occupancy spaces, such as auditorium-style classrooms with access control

Occupants can turn the thumb turn (or cylinder key) of the ESL option installed, interrupting the power to the QEL motor, and electronically undogging to secure pull side of the door as well as sends a signal to the access control system. The visual indication assures the occupant the exit device has been put into secure lockdown mode.

**To order, specify:**

1. Suffix: ESL Emergency secure lockdown.
2. Specify device type and length with the ESL option.
3. Specify handing and finish.

This page intentionally left blank.

## Electrified options

# Delayed egress

### The Chexit® (CX) (with motor driven blocking actuator)\*

The Von Duprin Chexit device is designed for controlled egress applications. It meets both life safety and security needs, as well as the requirements of NFPA 101 for "Special Locking Arrangement" and IBC "Special Egress-Control Devices." All control inputs, auxiliary locking, local alarm and remote signaling outputs are self-contained in the Chexit assembly. Numerous configurable options allow the device to be customized for the specific code or application requirements. The standard Chexit device sounds an alarm and keeps the door secured for 15 seconds following an exit attempt with immediate release upon fire.

The Chexit device includes a 6" x 20" decal for application on door. "PUSH UNTIL ALARM SOUNDS. DOOR CAN BE OPENED IN 15 SECONDS"

#### Chexit typical applications

Chexit single door with options – The Chexit is used as an access control device. The card reader allows access. Also shown in this application is an external horn and door position switch. The auxiliary horn is used for increased volume in remote locations. Using a door position switch gives added security to the opening in case the door is not reclosed.

With the Chexit disarmed, the opening functions as a normal exit device. If card readers are required on both sides of the door, the normally closed contacts of the readers should be wired in series.

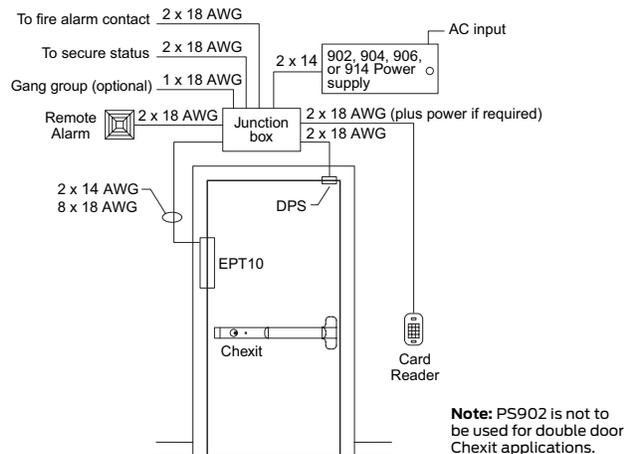

Figure 1. Riser diagram, single door

### Minimum door opening sizes for CX devices

(Consult factory for other size requirements)

Device	3' (914mm) Length	4' (1219mm) Length
CX33A/35A	2'10 3/4" (883mm)	3'4 3/4" (1035mm)
CX3327A/3327A-F/3527A/3527A-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX3347A/3347A-F/3547A/3547A-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX3348A/3348A-F/3548A/3548A-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX3349A/3349A-F/3549A/3549A-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX3350/3350WDC-F/ 3550/3550WDC-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)

### Specifications / Power supply requirements<sup>1</sup>

Input voltage – 24VDC

Input current inrush – 1.25A

Input current holding – 390mA

Alarm relay and Secure relay contact ratings – 24VDC, 1A

Fire alarm, Inhibit and Door position switch inputs require normally closed dry contacts.

### Power supply information for CX devices with motor driven blocking actuator<sup>1</sup>

Power supply	Maximum number of devices
PS902 (up to 2 amps)	1 Chexit device
PS904 (up to 4 amps)	3 Chexit devices
PS906 (up to 6 amps)	4 Chexit devices
PS914 (up to 4 amps)	4 Chexit devices

Note: When powering multiple components, verify that the amperage requirements of all components combined does not exceed the power supply output rating, see table above for output ratings. Consult Installation Instructions for proper wire gauge and wire run requirements. Exceeding the recommended devices and/or not following Installation Instructions may void your warranty. Call Customer Care at 877-671-7011 or visit the Allegion website for more information - [www.us.allegion.com](http://www.us.allegion.com).

### To order, specify:

1. Prefix product description number "CX"  
Example: CX33A-L
2. Specify option (see options on page 4);  
example: CX-RCM
3. Door size other than 3' (914mm)
4. Door thickness other than 1 3/4" (45mm)
5. Finish

1. Chexit devices built after August 24, 2015 are built using motor driven blocking actuators that have decreased power supply and operating requirements. The information listed in this catalog references the power supply and operating requirements that are needed for the new products with motor driven blocking actuators. For information on devices built previous to August 24, 2015, please contact Customer Care at 877-671-7011.

## Electrified options

# Delayed egress

### Chexit, RCM and DE5300 features

The Chexit, remote chexit module (RCM) or DE5300 devices have several features and options available to fit your applications. See below for more information.

### Inputs and outputs

#### Fire alarm input

This input releases the door immediately upon a fire alarm allowing immediate egress. The internal alarm can be silenced during a fire input via an onboard switch setting.

#### Inhibit input (access control)

This optional input is provided to allow authorized egress or entry when the device is armed using an external card reader, key switch, etc. It also allows remote reset of the Chexit, RCM or DE5300 in an alarmed condition. The ability to reset alarms with the inhibit input can be disabled via an onboard switch setting.

#### Door position switch input

An optional door position switch (DPS) can provide door position status to Chexit, RCM or DE5300 for additional security, ensuring that the door is closed, and can cause alarm when the door is left or forced open.

#### Gang bus

The gang bus allows a Chexit, RCM or DE5300 device to signal other Chexit, RCM or DE5300 devices when it enters the release delay, allowing multiple doors to release at the same time in an emergency. Up to 8 devices may be connected to the gang bus.

#### Alarm relay contacts

The alarm relay contacts are provided as a means to control a remote alarm, such as a horn or lamp, or signal an external monitor. The contacts can be configured with a jumper as normally open or normally closed, and become active upon entering an alarmed condition.

### Secure relay contacts

The secure relay contacts are provided as a means to signal an external monitor. The contacts can be configured as normally open or normally closed with a jumper, and become active when the dps indicates the door is closed and the push pad is locked.

### Delays

#### Release delay

When the push pad is pushed and the nuisance delay expires, the Chexit, RCM or DE5300 enters the release delay with alarm. During the release delay, the internal alarm sounds, the alarm relay activates, and the Chexit/RCM keeps the push pad or DE5300 magnetic lock, locked for 15 seconds (less any time already elapsed during the nuisance delay). Once started, the release delay sequence will not stop and the devices will unlock.

#### Nuisance delay

When a Chexit, RCM or DE5300 is located in a public area, it can be desirable to limit false releases when the push pad is accidentally pushed. The nuisance delay is the brief time a push pad can be accidentally pushed before the release delay sequence starts. If the nuisance time is set to 0 seconds the Chexit, RCM or DE5300 will enter release delay as soon as the push pad is pushed (when armed). Setting the nuisance time to 1, 2, or 3 seconds allows the push pad to be pressed for 1 to 3 seconds before the Chexit, RCM or DE5300 goes into release delay. If the nuisance audio and nuisance delay are both on, the internal alarm will pulse during the nuisance delay. The alarm relay does not activate during the nuisance delay. If the push pad is released before the nuisance delay expires, the Chexit, RCM or DE5300 will remain armed.

## Delayed egress

### Chexit, RCM and DE5300 features (continued)

#### Rearm delay

The rearm delay is the amount of time after the key switch or inhibit input is deactivated to when the device rearms. It is designed to give someone time to pass through the door before rearming occurs. The rearm time can be changed via the onboard switch settings from 0 and 28 seconds in 2 second increments. If the rearm time is set to 30 seconds and a DPS is used, if the door is opened and the rearm time expires, there will be no alarm. The Chexit, RCM or DE5300 will rearm after the door is closed. If the door never opens, the Chexit, RCM or DE5300 will rearm after 30 seconds. If not using a DPS, the Chexit, RCM or DE5300 will always rearm in 30 seconds.

#### DPS delay

If the DPS detects that the door closed during the rearm delay, the Chexit, RCM or DE5300 ends the rearm delay and allows 2 seconds for the latch to clear the strike before rearming.

### Interface

#### Key switch

The Key Switch provides the means to Arm or Disarm/Reset the Chexit, RCM or DE5300. Turning the Key Switch clockwise initiates the Rearm Delay, and turning the Key Switch counter-clockwise Disarms/Resets the Chexit, RCM or DE5300. The Key Switch allows the key to be removed in either the Arm or the Disarm/Reset position.

#### Status indicator

The red Status Indicator displays the status of the Chexit, RCM or DE5300. The Status Indicator flashes slow if the Chexit, RCM or DE5300 is armed, flashes fast in an alarmed mode, is off when inhibited and on solid during Rearm Delay.

#### Internal alarm

The Internal Alarm sounds the status of the Chexit, RCM or DE5300. The Internal Alarm sounds continuously during and after a fire alarm or a Release Delay, pulses fast during the Nuisance Delay or a tamper and pulses slow during Disarmed Powerup mode.

### Settings

#### Armed powerup

When set to OFF, a power disruption and power return will put the Chexit, RCM or DE5300 in a disarmed, unlocked alarm mode.

#### Trim fail safe / fail secure (FS/FSE)

The trim input power can be set to FS (Fail Safe; locked when energized, unlocked when deenergized or during power failure) or FSE (Fail Secure; unlocked when energized, locked when deenergized or during power failure).

The trim must be bought or modified to physically function as FS or FSE. This on board setting only selects the trim input power.

#### Trim operation overview

Rim and vertical application: Trim will not function when Chexit is armed.

Mortise application: Trim will function when Chexit is armed.

#### Chexit requiring pull side operation

	Mechanical trim	Electric Trim
Rim and vertical	Access control disarms Chexit. Rotate lever to enter.	Access control disarms Chexit and unlocks electric trim. Rotate lever to enter. <sup>1</sup>

1. Fail Secure Trim recommended. For Fail Safe applications, contact technical support to review application.

## Electrified options

### Delayed egress

#### Remote Chexit Module (RCM)

Designed to provide the concept of the Chexit delayed exit system for door sizes smaller than the standard Chexit device can accommodate. The Chexit module is installed in a control box and mounted in a remote location.

RCM Module

Features and functions of the standard Chexit exit device are available on the Remote Chexit Module.

#### Minimum door opening sizes for RCM devices

(Consult factory for other size requirements)

Device	3' (914mm) Length	4' (1219mm) Length
CX-RCM33A/35A	2'5" (737mm)	2'11" (889mm)
CX-RCM3327A/3327A-F /3527A/3527A-F	2'4 1/2" (724mm)	2'10 1/2" (876mm)
CX-RCM3347A/3347A-F /3547A/3547A-F	2'4 1/2" (724mm)	2'10 1/2" (876mm)
CX-RCM3348A/3348A-F /3548A/3548A-F	2'4 1/2" (724mm)	2'10 1/2" (876mm)
CX-RCM3349A/3349A-F /3549A/3549A-F	2'4 1/2" (724mm)	2'10 1/2" (876mm)
CX3350/3350WDC-F/ 3550/3550WDC-F	2'4 1/2" (724mm)	2'10 1/2" (876mm)

#### Specifications / Power supply requirements\*

Size – 3.75" x 5.57" x 2.50"

Input voltage – 24VDC

Input current inrush – 1.25A

Input current holding – 390mA

Alarm relay and Secure relay contact ratings – 24VDC, 1A

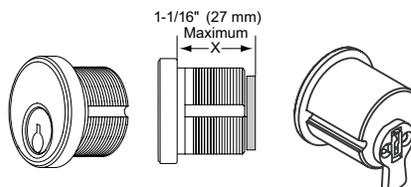

Fire alarm, Inhibit and Door position switch inputs require normally closed dry contacts.

\* RCM modules built after August 24, 2015 are built using motor driven blocking actuators that have decreased power supply and operating requirements.

Note: The information listed in this catalog references the power supply and operating requirements that are needed for the new products with motor driven blocking actuators. For information on devices built previous to August 24, 2015, please contact Customer Care at 877-671-7011.

#### Cylinders

Cylinders are not furnished with the Chexit device and must be specified when ordering. Use 1 1/4" mortise cylinder with compression ring 36-083 with straight cam and orient cam as shown. Schlage cylinder 20-001-114 is recommended.

Note: RCM modules built after August 24, 2015 are built using motor driven blocking actuators that have decreased power supply and operating requirements. The information listed in this catalog references the power supply and operating requirements that are needed for the new products with motor driven blocking actuators. For information on devices built previous to August 24, 2015, please contact Customer Care at 877-671-7011.

## Delayed egress system

### DE5300 system

Designed for controlled egress applications when used in conjunction with a magnetic lock. It meets both life safety and security needs, as well as the requirements of NFPA for "Special Locking Arrangement" and IBC "Special Egress-Control Devices". All control units,

DE5300 Module

auxiliary locking, local alarm and remote signaling outputs are self-contained in the DE5300 assembly.

The DE5300 is commonly used on narrow stile doors where a standard or narrow stile Chexit is not practical. DE5300 Delayed Exit System uses a Chexit logic board and a Von Duprin RX-LC (low current request to exit) panic device to control a Schlage Electronics Direct Hold Magnetic Lock.

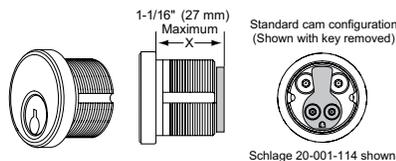

The Chexit module for the DE5300 is installed in a control box and mounted in the wall adjacent to the door. Features and functions of the standard Chexit exit device are available on the DE5300.

The DE5300 device includes a 6" x 20" decal for application on door.

**"PUSH UNTIL ALARM SOUNDS.  
DOOR CAN BE OPENED IN 15 SECONDS"**

### Cylinders

Cylinders are not furnished with the DE5300 and must be specified when ordering. Use 1 1/4" mortise cylinder with compression ring 36-083 with straight cam and orient cam as shown. Schlage cylinder 20-001-114 is recommended.

### Specifications / Power supply requirements

Size - 3.75" x 5.57" x 2.50"
Input voltage – 24VDC
Input current – 1A
Alarm relay and Secure relay contact ratings – 24VDC, 1A
Fire alarm, Inhibit and Door position switch inputs require normally closed dry contacts.

### To order, specify:

1. DE5300
2. M420/P, M450/P, or M490/P magnetic lock (order direct from Schlage Electronics)
3. RX-LC 22/33A/35A/98/99 device.
4. PS900 Series
5. EPT-2/10

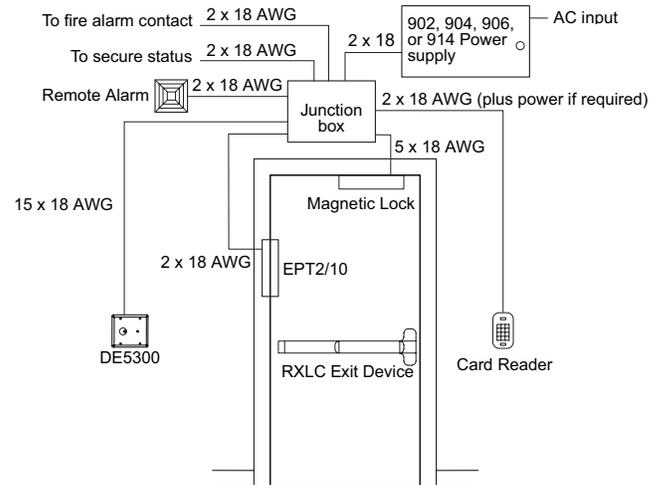

Figure 1. Riser diagram, single door

## Electrified options

### Switches

#### Request to exit (RX)

The RX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the pushpad.

The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply. A continuous current electric transfer must be used for transferring power from the frame to the door.

The RX switch option should not be used to control a load, but as a signalling switch (0.5 amps. resistive maximum). The RX switch is available in a low current (LC) switch. Most commonly used in computer operated monitoring systems.

#### To order, specify:

1. Standard – use prefix RX, example RX33AEO
2. Low Current – use prefix RX-LC, example RX-LC35AEO

#### Double request to exit (RX2)

The RX2 feature uses two RX switches.

#### To order, specify:

1. Standard – Use prefix RX2, example RX233AEO

#### Waterproof request to exit (WP-RX)

- Switch rated to IP67 – protected from contact with harmful dust and from immersion in water with a depth of up to 1 meter (3.3 feet) for up to 30 minutes

Note: All in-field electrical connections should be in compliance with IP67 to ensure trouble free operation.

#### Latch bolt monitoring (LX)

The LX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the latch bolt. The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply. A continuous current electric transfer must be used for transferring power from the frame to the door.

The LX switch option should not be used to control a load, but as a signalling switch (0.5 amps. resistive maximum).

The LX switch is available in a low current (LC) switch. Most commonly used in computer operated monitoring systems.

#### To order, specify:

1. Standard – Use prefix LX, example LX33AEO
2. Low Current – Use prefix LX-LC, example LX-LC35AEO

#### Electrical rating for all switches

1. Standard – 2 amp maximum @ 24VDC
2. Low Current (LC) - below 50 Milliamps @ 24VDC

Note: All switches can be either factory or field installed

#### Signal switch (SS)

The SS feature is used to signal the unauthorized use of an opening. This device is equipped with two internal SPDT switches. One switch monitors both the pushpad and the latch bolt assembly, making the latch bolt tamper resistant, for positive security. An additional SPDT switch is connected to the 1 ¼" (32mm) mortise with straight cam for alarm "bypass." (Schlage cam reference B502-191). The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply. A continuous current electric transfer must be used for transferring power from the frame to the door.

#### To order, specify:

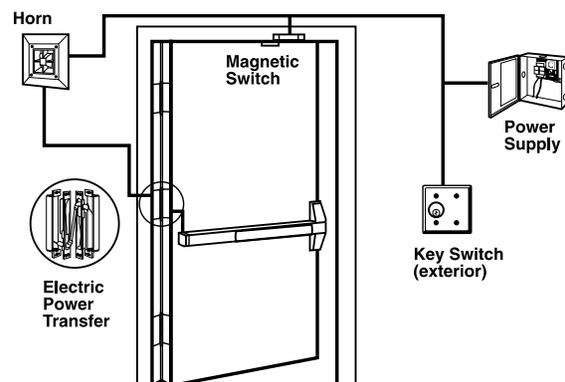

1. Prefix SS, example SS33AL
2. Handing required, LHR or RHR

#### Electrical ratings

- Up to 2.0 amps @ 24VDC

#### Popular SS application

Unauthorized use of this opening will activate the local horn. The key switch permits inhibiting this system for authorized entry.

## Electrified options

### Remote monitoring and remote undocking

#### Remote monitoring

Remote monitoring, RM, provides visibility to request to exit (RX), latch bolt monitor (LX) and door position switch (DPS). RM is available as a modular kit that can be added to any existing Von Duprin 98/99 or 33A/35A series device. RM provides power source flexibility and can be battery powered or has the ability to be hard-wired.

For customers desiring real time monitoring, RM is designed to connect to Allegion's Software Alliance Members via IP. The RM can also be used with RSI connection to the ENGAGE™ gateway for daily schedule reporting. For more information about RM system capabilities and compatibilities, contact your local electronic sales engineer.

#### Remote undocking

Remote undocking, RU, option is a battery powered wireless solution that enables remote undocking and door status monitoring. The door status monitoring provides visibility to request to exit (RX), latch bolt monitor (LX) and door position switch (DPS). It enhances perimeter security by providing electronic override of mechanical dogging for emergency facility lockdown. RU provides power source flexibility and can be battery powered or has the ability to be hard-wired.

RU is available as a modular kit that can be added to any existing Von Duprin 98/99 or 33A/35A Series device. For customers desiring real time lockdown and monitoring, RU is designed to connect to Allegion's Software Alliance Members via IP. The RU can also be used with RSI connection to the ENGAGE™ gateway for daily schedule reporting. For more information about RU system capabilities and compatibilities, contact your local electronic sales engineer.

### Alarm kit

ALK Alarm Kit is a simple yet effective way to deter unauthorized use of an opening. While the exit device is still a means of egress, the ALK kit contains an internal horn. When the touch bar is depressed, the horn sounds to provide an audible means of signaling that the opening has been violated. The alarm kit can be armed or disarmed by key thus allowing the exit device to be set in an armed or disarmed mode. The horn is rated at 85 decibels.

#### For Hardware Applications

The assembly includes both a 24VDC Input and External Inhibit standard. The External Inhibit provides remote arming and disarming.

The key switch uses a standard 1 1/4" (32mm) mortise cylinder with a straight cam (Schlage 20-001, L583-477 cam). The unit operates on one standard 9-volt alkaline battery. When the battery is weak, the horn will emit an intermittent low battery alert signal.

Auto reset (AR) option is available with this kit. This kit allows the device to resume the alarm option after a preset time. Preset times can be field selected at 1.5, 3, or 4.5 minutes. Alarm kits are available with a choice of two switch kits, RX or LX. RX monitors the touchpad and is furnished standard. LX optional latch bolt monitoring is recommended for use with surface vertical rod exit devices or when alarm needs to sound from both the exit device and trim side of the door. Specify ALK-LX.

The ALK is available in two styles, 33ALK, grooved cover and 35ALK, smooth cover.

The ALK includes a 6" x 20" decal for application on door "EMERGENCY EXIT ONLY. ALARM WILL SOUND." RSS push bar trim can be used instead of the door decal, specify RSS push bar trim when ordering the device.

When the ALK is used, standard dogging is removed. If cylinder dogging is required for 3' or 4' doors, the ALK can be moved to the hinge side of the device and standard cylinder dogging can be added.

#### To order, specify:

1. Standard, 33A ALK
2. Cylinder dogging, CD35A ALK

#### Minimum door opening sizes on ALK applications

Device	3' (914mm) Length	4' (1219mm) Length
33A/35A	2'9" (838mm)	3'3" (991mm)
3327A/3527A	2'8" (813mm)	3'2" (966mm)
3347A/3347A-F   3547A/3547A-F	2'8" (813mm)	3'2" (966mm)
3348A/3348A-F   3548A/3548A-F	2'8" (813mm)	3'2" (966mm)

## Electrified trim

### E360 electric lever trim

Specify Fail Safe (FS) or Fail Secure (FSE).  
24VDC furnished standard, 12VDC available  
through special order.

#### To order, specify:

1. Prefix lever or thumbturn control with "E"  
Example: E360L-BE, E360T-BE
2. E360LBE, E360TBE functions
3. 01, 02, 03, 05, 07, 12, 16, 17, Latitude (LAT)
4. Special order 6: 03-SS1, 06-SS 1, 17-SS 1, 18,  
Accent (ACC), Asti (AST), LAT-SS 1, Longitude (LON),  
LON-SS 1, Merano (MER)

# Power supplies

## PS900 Series power supplies

The PS900 Series is a consolidated line of power supplies and accessories that offer enhanced flexibility and functionality specific to the changing needs of the access control market. The PS900 Series can be used in a variety of applications to convert high voltage AC power into the regulated low voltage DC outputs required by most access control devices. The PS900 Series protects devices downstream by providing Class 2<sup>1</sup>, filtered and regulated power. The full line is UL294 certified.

### Features

- Constant output rating at both 12VDC or 24VDC provides superior performance; includes field selectable jumper
- Flat mounting of option boards provides easier access to terminal blocks for connection of electrified devices
- High voltage protective cover
- Battery back-up board auto-selects voltage
- Fire alarm relay can be configured to provide either switched or un-switched outputs from a power supply
- PS914 designed with high inrush current for powering electrified panic devices
- Universal 120–240 VAC input
- Low voltage DC, regulated and filtered
- Electronic power limiting foldback circuit for AC current overload protection
- Fused primary input
- AC status monitor- isolated SPDT contacts
- AC input and DC output LED status indicators
- Cover mounted AC input indication
- Hinged cover with lock down screws
- Optional keylock

### Certifications

- UL 294 certified—the standard for access control
- Class 2 rated<sup>2</sup>

## PS900 Series power supplies

The PS900 Series offers a variety of distribution options, including basic fuse protection, simple relay, and advanced logic providing complex sequencing and timing functions.

### Connectors on the power supply

Product	Schlage PS902	Schlage PS904	Schlage PS906	Von Duprin PS914
Amperage	2 amps	4 amps	6 amps	4 amps with 16 amp inrush
Distribution boards	1	2	3	2
Battery back-up board	1	1	1	1
EL Compatible	No	No	No	Yes

### Applications

The PS900 Series of power supplies works with many electrified devices including Schlage electromagnetic locks, Schlage AD Series hardwired locks, Schlage electrified mechanical locks, Von Duprin electrified strikes, Von Duprin exit devices and many other brands.

### Accessories

The PS900 Series features seven option boards for use in a variety of applications. All PS900 Series power supplies option boards are UL 294 certified.

### Option boards

- **900-4R:** 4 relay controlled output board to power multiple devices
- **900-4RL:** 4 relay distribution board with logic is field configurable for time delay function, auto operator, security interlock
- **900-8F:** Provides 8 individually fuse-protected outputs, giving the flexibility to power multiple devices and provide another layer of protection
- **900-8P:** Provides 8 individually fuse-protected outputs, giving the flexibility to power multiple devices and provide another layer of protection
- **900-FA:** Emergency interface relay integrates with fire alarm and is used to cut power in case of emergency<sup>2</sup>
- **900-BB:** Battery backup
- **900-2RS:** 2 relay control board for electric latch panic devices (EL or QEL), electric strikes or electrified trim
- **900-BBK:** Battery backup kit includes two 7A/hr batteries and provides up to four hours of backup power when cycled every 5 minutes at full load

1. PS906 can provide Class 2 rated outputs when used with 900-8P distribution board.

2. Except PS906, output rating exceeds Class 2 power limits.

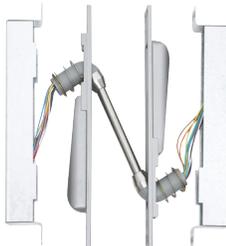

3. PS906, output rating exceeds Class 2 power limits, but can provide Class 2 rated outputs when used with 900-8P distribution board.

## Electrified options

### Electrical and pneumatic power transfers

#### Electrical power transfer (EPT) Pneumatic transfer (PNT)

Electrical Power Transfer provides a means of transferring electrical power from a door frame to the edge of a swinging door. The units are completely concealed when the door is in the closed position, and are ideal for installations involving abuse or heavy traffic.

Two models are available; EPT-2, two 18 gauge wires and EPT-10, ten 24 gauge wires. The EPT-2 and EPT-10 are U/L listed as “miscellaneous door accessory”. UL Listed for use on fire doors.

#### Door applications

Degree of opening	Hinge type	Door thickness
0-180	Up to 5" butt hinges	1 3/4"
0-180	Up to 3/4" offset pivots	1 3/4"
0-130	5 1/2" butt hinges	1 3/4"
0-110	6" butt hinges	1 3/4"
0-90	Swing clear hinges	1 3/4"

#### Finishes

- 622 Powder Coated Matte Black
- 689 Powder Coated Aluminum
- 695 Powder Coated Dark Bronze

#### Dimensions

Housing	9" x 1 1/4" x 1 5/8" (229mm x 32mm x 38mm)
EPT-2	Two 18 gauge wires, Up to 2 amps @ 24VDC, with a 16 amps Maximum Surge
EPT-10	Ten 24 gauge wires, Up to 1 amps @ 24VDC, with a 16 amps Maximum Surge
PNT-1	5/32" Tubing

#### To order, specify:

- EPT-2 ,EPT-10 or PNT-1
- Finish: 622, 689, 695

### Allegion Connect

Allegion Connect features common interconnect components for many cross-category electrified options. Allegion Connect is a quick and easy way to connect power sources. There is no wire cutting; reducing installation and maintenance time ultimately cutting cost. After installation, Allegion Connect continues to provide benefits throughout the lifetime of the opening by offering a service kit for repairs or modifications in the future.

#### Features and benefits

- Quick: common connections reducing installation time
- Perfect Connections: these factory installed connectors ensure the right wires match up every time
- Protective: the connectors protect the connection points throughout the installation process and lifetime of the opening
- Interchangeable: all Allegion Connect products utilize the same connectors
- Maintenance: you no longer need to cut away wire to disconnect Allegion products, also available is a service kit specifically for Allegion Connect products.

Harness length	Connectors on both ends	Connectors on one end, crimped pins on the other end
6 Inches	CON-6	CON-6P
12 Inches	CON-12	CON-12P
26 Inches	CON-26	CON-26P
32 Inches	CON-32	CON-32P
38 Inches	CON-38	CON-38P
44 Inches	CON-44	CON-44P
50 Inches	CON-50	CON-50P
192 Inches	CON-192	CON-192P

Power supply wire harness = connectors on one end, stripped leads on the other end.

6 Inches	CON-6W - wire extension to power supply
----------	---

Consult door manufacturer for harness length requirements.

**Note:** You will need to purchase a separate wiring harness to go from exit device to hinge/EPT and an additional harness to go from hinge/EPT to power supply or access control system. Harness part numbers with ordering information can be located in the Schlage, Von Duprin and Falcon pricebooks. A service kit is available for order in the Schlage, Von Duprin and Falcon price books. Included in this kit are male end plugs, female end plugs and pins to customize harnesses to your application.

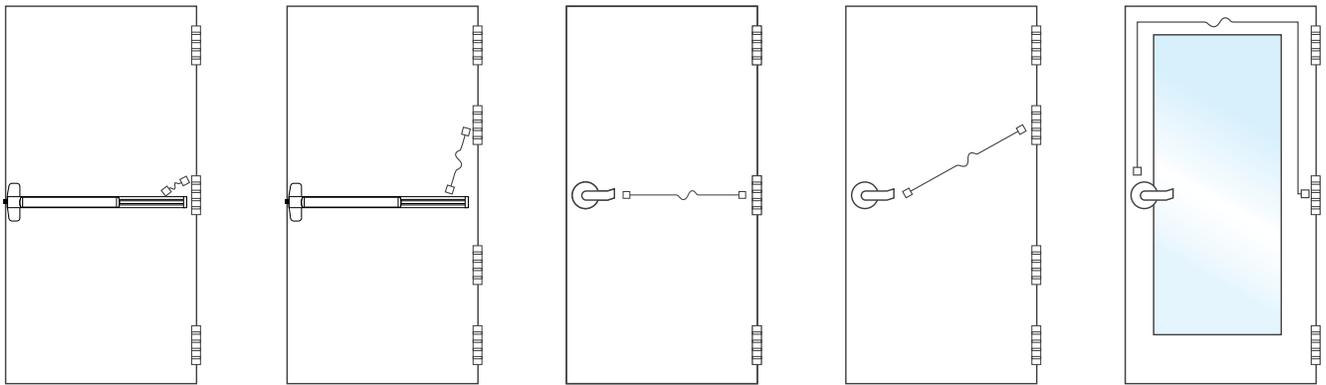

**Note:** Must be ordered with exit devices and locks.

# Allegion Connect

**To order, specify:**

- 1. Specify CON for Connect electronic options  
Example: QEL-99-EO-CON  
(99 Series quiet electric latch retraction exit only with Connect connectors)
- 2. Specify harness length; Consult door manufacturer for harness length
- 3. Specify Von Duprin EPT10-CON or Ives electrical thru-wire hinge

**Wire run options**

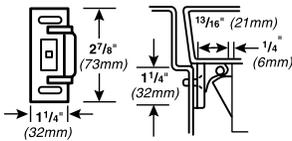

## Accessories

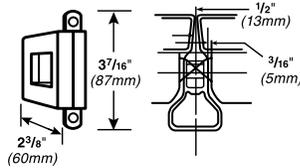

## Strikes

## Strikes for rim devices

299

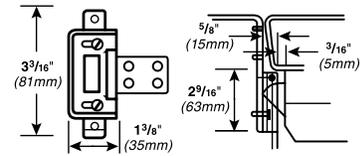

Projection  $\frac{13}{16}$ " (21mm)

1408

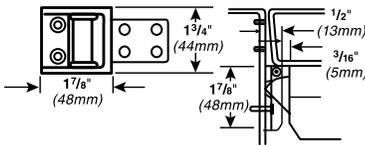

One per pair of doors

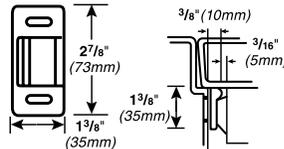

1410—Integral stop

Projection  $\frac{1}{2}$ " (13mm)

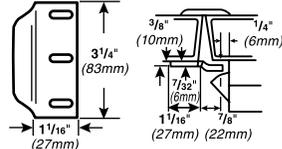

1439—Blade stop

Projection  $\frac{1}{2}$ " (13mm)

1606

Projection  $\frac{3}{8}$ " (10mm)  
(Panic devices only)

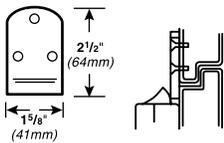

1609

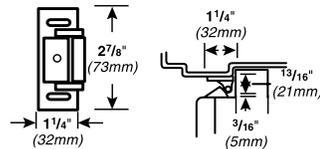

- Requires coordinator
- For panic exit application only, not fire rated

## Strikes for vertical rod devices

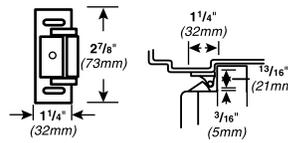

260U—Flush transom only

Projection  $\frac{3}{8}$ " (10mm)

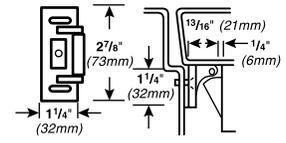

266

Projection  $\frac{1}{4}$ " (32mm)

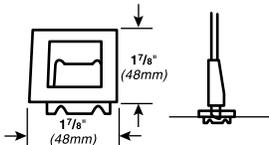

299

Projection  $\frac{13}{16}$ " (21mm)

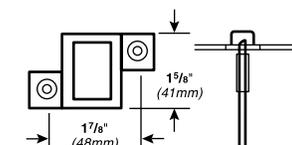

299F

Projection  $\frac{13}{16}$ " (21mm)

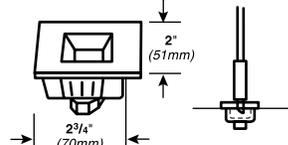

304L

Mortise  $\frac{13}{16}$ " (21mm)

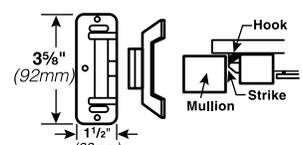

338

Mortise  $\frac{5}{8}$ " (16mm)

385A

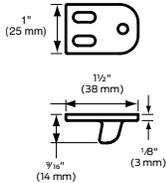

Mortise  $2\frac{1}{2}$ " (64mm)

499F

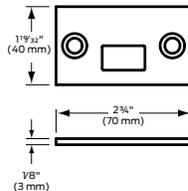

Projection  $\frac{13}{16}$ " (21mm)

## Strikes for vertical cable devices

249 - Top strike

Projection  $\frac{9}{16}$ " (14mm)

349 - Bottom strike

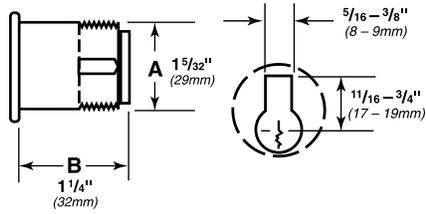

Projection  $\frac{1}{8}$ " (3mm)

# Cylinders

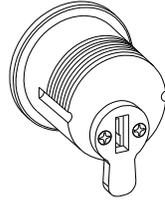

Cylinders are not furnished with device or trim and must be specified when ordering. Refer to trim pages for cylinder type.

**Mortise – 3215**  
(Schlage 20-001, B502-191 cam)

**Dogged (inverted) cam**

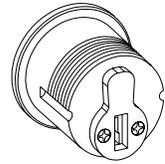

For cylinder dogging or 360L

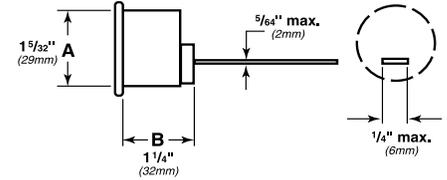

**Rim – 3216**  
(Schlage 20-022 cam)

**Undogged cam (standard operations)**

For standard trim functions or 360L-NL

## Accessories

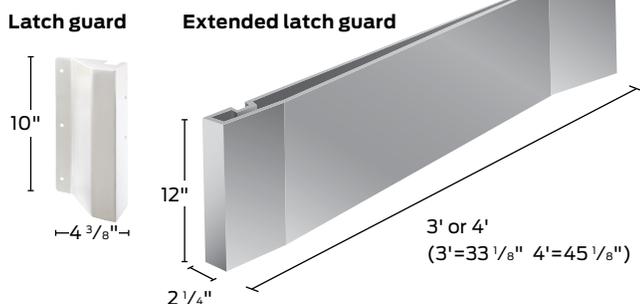

### Door kits

#### Vertical rod and latch guard (RG-27)

**Rod guard** Series RG-27 Vertical rod and latch guards protect the bottom rods of exit devices from the damaging impacts of carts or gurneys passing through doors. (If bottom rods become damaged, the exit device will not function as intended and can jeopardize the ability to exit safely during an emergency.)

In addition to protecting the vertical rod, the guard provides a smooth, unobstructed surface so the door can be pushed open easily with the bumpers of a wheelchair. The latch guard portion is 10" high. The standard latch guard features a 45° ramp. The extended latch guard offers a continuous ramp in 3' or 4' widths.

All stainless steel construction in US32D finish. Latch guards can cover latches as large as 1 1/4"W x 10"H x 1 7/8" projection.

#### Models

RGO	Rod guard only (projection 1 3/16")
RG-27	Rod and latch guard
RG-27-3	3' (914mm) Rod guard and extended latch guard
RG-27-4	4' (1219mm) Rod guard and extended latch guard
LGO	Latch guard only
LGO-3	3' (914mm) Extended latch guard only
LGO-4	4' (1219mm) Extended latch guard only

**Note:** When using on wood fire doors, high density block is required.

#### To order, specify:

1. Model number\*
2. Handing (except on RGO)
3. Door material if other than hollow metal
4. Optional sex bolt mounting available

\* RGO/RG-27 includes one rod guard only, which accommodates bottom or top rod up to 7' door. For longer top rods, specify rod guard quantity required.

#### Wood door applications cover plate kit (WDA)

For wood door applications, used to cover up door preparations for control, also prevents the control from boring into the wood door. Finished to match control.

#### Glass bead kit (GBK)

Glass bead conversion kits are available for all 33A/35A Series devices for use on doors with raised glass beads. Each kit consists of 1/4" (6mm) shim sets. GBK for Surface vertical rod ships with 1/8" shims for rod guides.

#### To order, specify:

1. Device model shim kit. Example: 33A- GBK
2. Device type (Rim, Surface Vertical, or Concealed Vertical, Rod/Cable)
3. Finish

## Mullions

Removable steel mullions provide single door performance in double door openings with rim devices. Mullions are easily removed by loosening bottom set screw and removing top fitting cover. The top mullion fitting is attached to the frame and is concealed by the fitting cover.

- Steel mullions are 2" (51mm) wide and 3" (76mm) deep, with a wall thickness of  $\frac{1}{8}$ " (3mm)
- Mullions are shipped with mounting screws and prepared for strikes (strikes are not included except where indicated)
- Steel mullions are available in SP28 and SP313 finishes (Consult factory for other powder coat finish options)

### Keyed removable steel mullions (KR)

KR mullions make removal faster and easier by a single operation of the mortise cylinder. Once mullion is removed, large equipment or furniture can freely pass through the opening. The unit will self lock when re-installed, without the use of the cylinder key. Uses a  $1\frac{1}{4}$ " mortise cylinder with a straight cam (Schlage cam reference L583-477). Cylinders are sold separately. Prefix mullion model with "KR".

Removable aluminum mullions are  $1\frac{1}{16}$ " (27mm) wide on face closest to the door and  $2\frac{3}{8}$ " (60mm) at the widest point. The depth is  $3\frac{1}{8}$ " (79mm) with a wall thickness of  $\frac{1}{8}$ " (3mm).

Aluminum mullions are available in 606, 612, 628, 710 and 622/711 finishes. Consult factory for other powder coat finish options. Aluminum mullions are not available keyed removable.

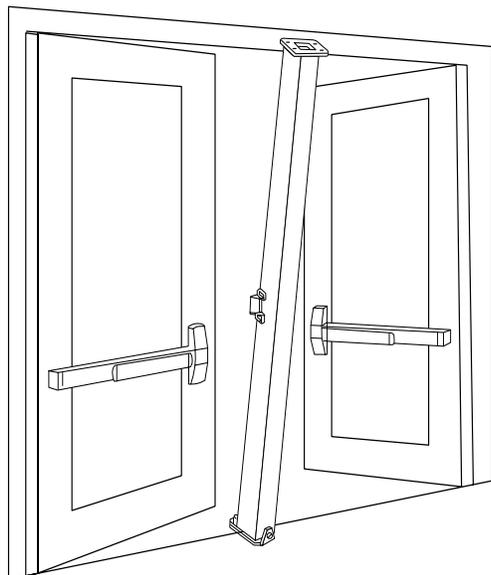

Stock hollow metal applications for devices mounted to cover ANSI 161 cutouts are higher than the standard mullion strike location. Consult the factory for special strike preparation or order a blank mullion. See below.

### Blank mullions

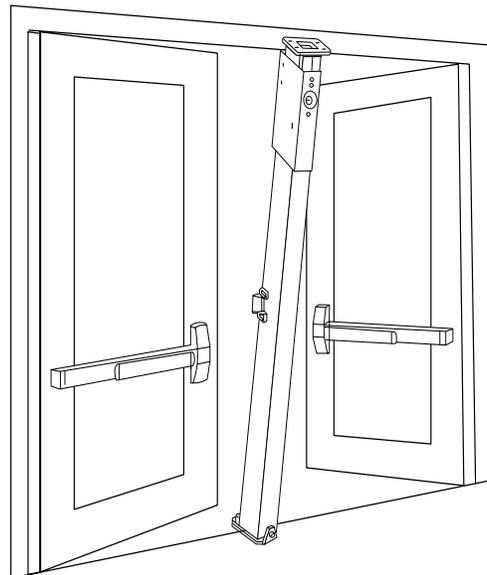

are furnished without strike preparation. They are used to mount devices at a strike height different from the standard mullion preparation.

### To order, specify:

1. For keyed removable option on steel mullions, prefix model number with "KR"
2. Model number
3. Height of opening
4. Finish
5. Handing if required
6. Centerline deviation (refer to device template for standard centerline)
7. Strikes, when required, should be ordered with device

Removable mullions

Keyed removable steel mullions

## Steel and aluminum mullions

### Steel mullions

**1654** Prepared for two 1606 strikes. If 1606 strikes are not specified on the order, two per mullion will be added. Additional charges apply.

**4954** Prepared for 264 or 299 strikes. For use with all Von Duprin panic rim devices.

**9954** Prepared for and must be used with two 268 strikes (88-F device), or two 499F (22-F, 98-F, 99-F devices). UL fire labeled mullion for up to 3 hour opening using Von Duprin fire exit rim devices. This mullion is not easily removed due to special fittings. 98-F and 99-F devices are rated up to 10'0" (3048 mm).

Note: If 268 or 499F strikes are not specified on the order, two per mullion will be added. Additional charges apply.

UL fire labeled up to 3 hour opening. These applications are hurricane approved to 8'0" x 8'0" with this mullion: HH88-F (468 strike), HH98/99-F (499F strike), HH-XP98/99-F (954 strike), and HH98/9957-F (499F middle strike).

**4754** Prepared for two 4263 monitor strikes.

**4854** Prepared for one 299 and one 6111 electric strike. Indicate handing for electric strike.

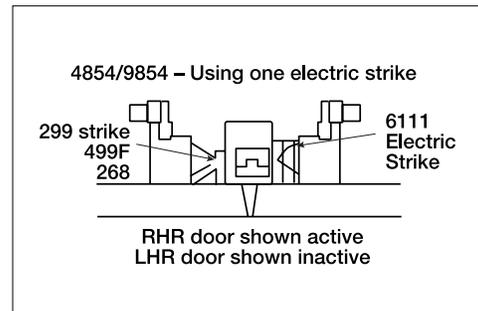

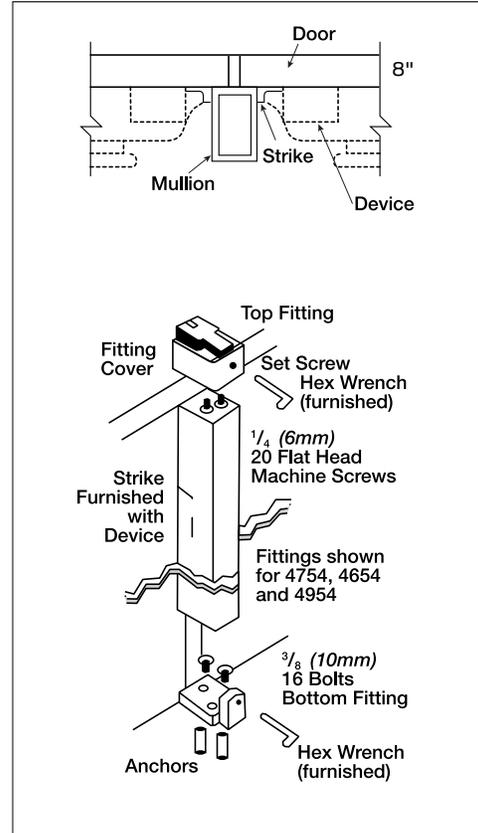

**9854** Prepared for one 268 or 499F strike and one 6111 electric strike. Indicate handing for electric strike. UL fire labeled mullion for up to 3 hour openings up to 8' x 8' (2438mm x 2438mm) using Von Duprin fire exit rim devices

### Aluminum mullions

**5654** Prepared for two 299 strikes.

**5754** Prepared for 1408 double strike.

**Additional information**

1 Fire-rated metal door flush bolts may be substituted on one leaf of a pair in these columns. Substitute two-point flush bolt for vertical devices; or substitute top flush bolt with auxiliary fire bolt for vertical rod LBR/LBL-AFL devices. The opening will carry the fire listing (# hours and opening size) of the least rated component.

2 Not listed for Canada.

3 For Vertical x Mortise opening sizes, see applicable vertical rod/cable device rows.

4 Hourly limitation due to 6111 electric strike listing.

**Notes:**

Check with door manufacturers to confirm listing compatibility.

Overlapping astragal may not be used on pairs swinging same direction with vertical rods or cables on both leaves.

**VON DUPRIN®**

# 55 Series

Exit device

# Introduction

## Function and style

Since creating the first exit device, Von Duprin® remains the trusted name in the industry by creating products that meet the highest standards for fire and life safety. It's evident in the meticulous engineering behind every exit device. Today, Von Duprin's product line is available in a wide range of styles and finishes to blend seamlessly into varying aesthetic environments.

The 55 Series is a narrow stile device with a classic look that's ideal for retro-inspired architecture and historical buildings. Several mechanical, electronic and finish options can be customized to meet the needs of your facility. Take advantage of field reversible handing and flexible field sizing for several surface-mounted vertical rod and rim applications.

## Passion driving performance

Von Duprin's exit devices offer durable solutions that are proven in the field to perform under heavy use and abuse and backed by a team of experts experienced in door hardware application and code compliance. Allegion stands behind every Von Duprin product we make with unparalleled customer support thanks to our team of experts based in the U.S. that average more than 15 years of experience, so you are assured to receive expert advice.

(Left hand reverse)

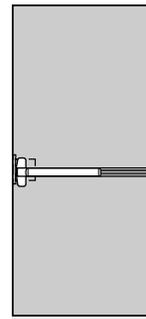

**RHR**  
(Right hand reverse)

Outside

Single rim device

Single mortise

## Outside trim operation

### Trim operation lever

#### Standard operation

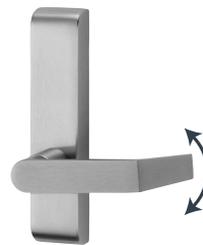

Key locks and unlocks lever.

#### NL Function

Lever is locked when key is removed. (ANSI O9 function)

#### Blank escutcheon

Lever always active. BE suffix, E.G., 371L-BE.

### Standard trim

#### Series 550

Heavy aluminum bracket 10" (25mm) with stainless steel or brass pull bar. 550DT with NL function is furnished with 110MD or WD rim device. On 555NL (Metal) and 556NL (Wood), the cylinder locates in pull return. Cylinder must be ordered separately.

550DT

555NL  
(5547 only)

556NL  
(5547WDC only)

376T

#### Series 376T

Thumbturn control has a forged brass 7/8" (25 mm) thick escutcheon. Often used with DT trim or pull. An NL cylinder plate is included with thumbturn control for night latch operation if required. BE blank escutcheon is available, specify 376T-BE.

#### Series 370L

Lever control has a forged brass 7/8" (25 mm) thick escutcheon. Optional lever designs are available. An NL cylinder plate is included with lever control for night latch. BE Blank escutcheon is available, specify 371L-BE.

# 55 rim exit device

**55 Rim devices** for all types of single and double doors with mullion, UL listed for accident hazard installations. Fits doors stiles as narrow as 1<sup>3</sup>/<sub>4</sub>" (44 mm). Specify for 2<sup>1</sup>/<sub>4</sub>" door. Device is field reversible.

**Finishes** – 605, 606, 612, 613, 622, 625, 626, 643E, 693

**The 1409 Strike** ships standard, optional strikes available.

**Hex key dogging** comes standard on 55 Rim exit device

**RX**

**Crossbar monitor switch**

- Signals use of an opening
- SPDT switch to monitor crossbar

Notes

- For NLOP function, order device as EO. Cylinder can be mounted into the mortise lock body
- \*L-BE blank escutcheon is available, L-DT is available but not recommended on fire rated devices

# 5547 concealed vertical rod exit device

**5547 Concealed vertical rod devices** for use on single or double metal doors. UL listed for accident hazard installations and fits door stiles as narrow as 1 3/4" (44 mm). Specify for 2 1/2" door. Standard device fits 6' 8" to 8'0" door height.

**Finishes** – 605, 606, 612, 613, 622, 625, 626, 643E, 693

**Hex key dogging** comes standard on 5547 Series concealed vertical rod exit devices

**RX**  
**Crossbar monitor switch**

- Signals use of an opening
- SPDT switch to monitor crossbar

## Specifications

Device functions	EO/DT/NL/L/TL
Crossbar length	30" for 3' door, 42" for 4' door, handed, field reversible
Crossbar height to finished floor	36 13/16" (935 mm) at center
Lock stile case	7 1/4" x 1 3/16" x 2 1/4" (184 mm x 30 mm x 57 mm)

Notes

- For 5547L, minimum control centerline of lever or thumbturn is 49 7/8" and the minimum stile width is 1 3/4"
- Electrified lever operation available, must be blank escutcheon (L-BE)
- NY5547L is available to meet ADA requirements of 45 13/16" lever height.
- \* Exit device handing is field reversible, but the 376L control cannot be rehanded in the field
- \*\* Exit device handing is field reversible, but the 376L control cannot be rehanded in the field
- \*\*\*T-BE available

## 🔥 5547-F concealed vertical rod fire exit device

**5547-F Fire exit concealed vertical rod devices** for use on 8' x 8' (2438 mm x 2438 mm) double metal doors swinging same direction or double egress. UL listed for up to 3 hour labeled installations and fits door stiles as narrow as 4<sup>3</sup>/<sub>4</sub>" (121 mm). Standard device fits 6'8" to 8'0" door height

Double doors swinging same direction using a pair of 5547-F devices must not have an overlapping astragal.

**Finishes** – 605, 606, 612, 613, 622, 625, 626, 643E, 693

301L

For use on  $1\frac{3}{4}$ " (44mm) or  $2\frac{1}{4}$ " (57mm) Single door and  $2\frac{1}{4}$ " (57mm) double door with coordinator.

575-2

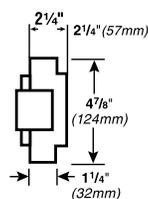

For use on  $1\frac{3}{4}$ " (44mm) thick double door with coordinator and astragal

576A

Open back strike for  $1\frac{3}{4}$ " (44mm) thick double doors without coordinator.

576B

Open back strike for  $2\frac{1}{4}$ " (57mm) thick double doors without coordinator.

– Not for use with astragals  
– For use on wood doors, contact door manufacturer

– Acceptable for 90 minute pair of hollow metal doors

## 55 electrical options

### E5575 Electric mortise lock device

The E5575 electric mortise lock device has all the versatility and advantages of the 5575 mortise lock device, plus the advantage of being electrically controllable by a remote switching device, an access control or automatic device, or an automatic fire alarm system. The E5575 feature controls the locking of the outside trim. When unlocked, the door remains latched, preserving the fire rating of the door and making it particularly useful where codes permit locking, but require unlocking during a fire emergency.

#### Standard features:

- Field reversible mortise lock
- 24 VDC continuous duty solenoid
- Tamper resistant (auxiliary dead latch)
- Silent operation
- Corrosion resistant
- Signaling functions
- Key mechanically retracts latch bolt

#### Optional features:

- Fail safe (locked when energized, unlocked when de-energized or during power failure, specify with suffix "FS")
- Fail secure (unlocked when energized — specify with suffix "FSE"). Outside trim automatically relocks, unless held unlocked electrically
- 24 VAC (by adding SO option)
- 12 VDC or 12 VAC with SO option

#### To order, specify:

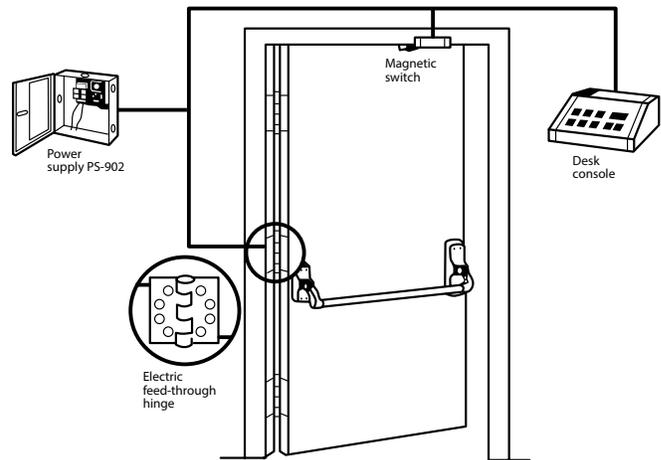

- 1a. E5575 or E5575F
- 1b. E7500 (if lock only is required)
2. FS or FSE
3. Voltage
4. Handing, LHR or RHR
5. Outside trim. "L-BE" function only. When using with "L" function, no cylinder operation is available. Outside control is furnished "BE"

### E - Electric unlocking of outside trim (BE only)

Available in Fail Secure (FSE) or Fail Safe (FS) options. 24VDC furnished as standard, 12 VDC available.

#### To order, specify:

1. E prefix:
  - E371L-BE / E376L-BE = for use with concealed vertical rods
  - E376WDC-L-BE = for use with wood door concealed devices
  - E379L-BE = for use with rim devices
2. FS or FSE
3. Voltage
4. Handing, LHR or RHR

Adaptable for openings where continuous latching is required while the trim may be electrically locked or unlocked from a remote location — stairwells, exterior doors, etc.

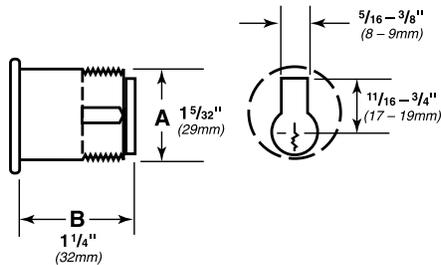

## Device options and accessories

### Cylinders

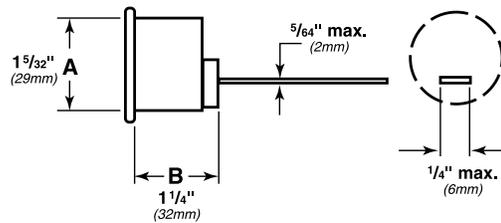

Cylinders are not furnished with device or trim and must be specified when ordering. Rim and concealed vertical rod exit devices use rim type cylinders. Mortise lock exit devices and series 370 controls use mortise type cylinders.

**Mortise — 3215** (Schlage 20-001, B502-191 cam)

**Rim — 3216** (Schlage 20-022 cam)

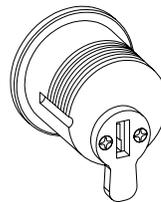

### Conversion kit — NL

NL Kit is used for converting 55DT or 55EO to 55NL for night latch function. Kit includes NL cam only.

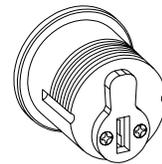

The 55DT trim, 3216 rim cylinder, and 110NL/MD/WDC cylinder assemblies must be ordered separately.

**Dogged (inverted) cam**

For cylinder dogging  
Special dogging

**Undogged cam (standard operations)**

Undogged cam  
(standard operations)

## About Allegion

At Allegion (NYSE: ALLE), we design and manufacture innovative security and access solutions that help keep people safe where they live, learn, work and connect. We're pioneering safety with our strong legacy of brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Our comprehensive portfolio of hardware, software and electronic solutions is sold around the world and spans residential and commercial locks, door closer and exit devices, steel doors and frames, access control and workforce productivity systems.

# PUSHING FORWARD™

Over a century ago, Von Duprin invented the first self-releasing fire exit device. Today we continue to push the envelope by delivering innovative solutions to challenging applications. Our durable panic and exit door hardware products are proven to perform and are backed by a team of experts. We provide flexible solutions and modular options to protect your investment well into the future.

## Quality

Von Duprin leads the industry with durable solutions that are proven in the field to perform under heavy use and abuse and backed by a team of experts experienced in door hardware application and code compliance.

## Flexibility

Von Duprin empowers you to embrace change by providing flexible solutions that can be modified over time as new trim, functions or other options are required, protecting your investment well into the future.

## Trust

Von Duprin designed the first self-releasing fire exit device more than a century ago and continues to advance fire and life safety, with innovation and best-in-class support to address your most challenging applications with code compliant solutions.

# Mid-Priced, But Beyond Expectations

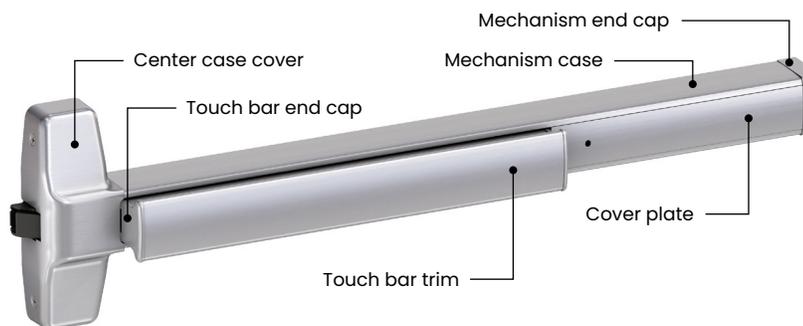

Enjoy the quality and trust you expect from Von Duprin at a mid-price option. Von Duprin 70 Series exit devices provide reliable performance and peace of mind for applications like warehouse, industrial, office, multifamily, retail, and commercial real estate spaces. It's available in a wide range of device types, lever designs, options, and finishes.

Von Duprin's 70 Series also can be configured with the Quiet Electric Latch Retraction (QEL) option, which provides electronic control of an exit device where limited operational noise is desired. Plus, quick shipping is an option for time-sensitive projects.

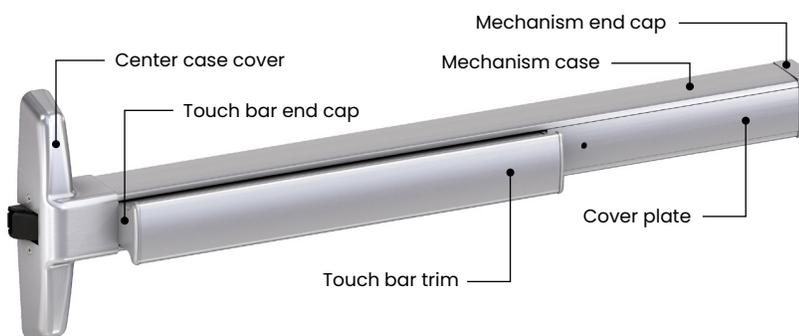

## 78 & 75 SERIES

Von Duprin exit devices are available as two device stiles, the 78 and the 75 Series.

### 78 Series is a Wide Stile Device

### 75 Series is a Narrow Stile Device

### Latch Bolt

Deadlocking latch bolt provides security and improved performance at standard device cost.

## How to order

## Device types

# Device Types

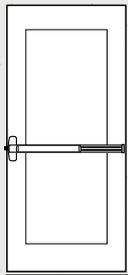

As the pioneer in the industry, Von Duprin continues to advance the industry through customer-centric innovation, which delivers solutions to the most challenging applications.

Backed by high quality standards, Von Duprin exit devices were among the first in the industry certified to ANSI/BHMA A156.3 Grade 1. Our exit devices are tested to the highest standards and proven in the field to perform under heavy use and abuse, giving you peace of mind both now and in the future.

The versatile design can be easily upgraded to connect to a larger electronic ecosystem, empowering you to adapt with flexible solutions. You can configure numerous variations in the field without replacing your device and protecting your investment. This makes upgrades easy and cost effective.

## Device types

# 78 Rim Exit Device

78 Rim exit devices for all types of single and double doors with mullion, UL listed for panic exit hardware. Devices are certified to ANSI/BHMA A156.3 2014, Grade 1. Covers stock hollow metal doors with 86 or 161 cutouts on single doors (may cover cutouts on pairs – consult template).

Specifications	Details
Device functions	Device ships EO/DT/NL; Field selectable
Device lengths	3' 2' 6" to 3' (762mm to 914mm) door size 4' 3' to 4' (914mm to 1219mm) door size
Device centerline from finished floor	39-13/16" (1011mm) 39-11/16" (1008mm) with mullion
Center case	7-7/8" x 2-3/4" x 2-3/8" (200mm x 70mm x 60mm)
Mechanism case	2-5/16" x 2-1/8" (59mm x 54mm)
Projection	Pushbar neutral - 3-13/16" (97 mm) Pushbar depressed - 3-1/16" (78mm)
Latch bolt	Deadlocking, 5/8" (15.875mm) throw
Finishes	US26D (626), US28 (628), 313 (710), US4 (606), US3 (605), US15 (619), US26 (625), 315 (711), 643E
Pushbar length	3' 18" (457mm) 4' 24" (610mm)
Fasteners and sex bolts (SNB)	Includes screw pack for 1-3/4" (4mm) and 2-1/4" (57mm) thick metal or wood doors (Optional 425 SNB available)

## Features & Options

### Electrified Options

LX	Latch bolt monitor switch
RX	Request to exit
E	Electric locking and unlocking trim
ALK	Alarm exit kit
CON	Allegion Connect
QEL	Quiet electric latch retraction

### Mechanical Options

AX	Accessible device
GBK	Glass bead kit
SNB	Sex bolts
SEC	Security screws

### Dogging Feature

Hex key dogging standard

### Dogging Options

CD	Cylinder dogging
LD	Less dogging
QEL	QEL options available

### Strike

299	Dull black
-----	------------

## Accessories

### 299 Strike

Ships standard, optional strikes available.

### Hex key dogging

Comes standard on 78 panic exit device

## Device Types

# 78-F Fire-Rated Rim Exit Device

78-F Rim fire exit devices are certified to ANSI/BHMA A156.3, Grade 1 and UL listed for fire exit hardware. [See UL fire exit hardware](#) label and door opening size information within this catalog.

Specifications	Details
Device functions	Device ships EO/DT/NL; Field selectable

Specifications	Details
Device functions	Device ships EO/DT/NL; Field selectable
Device lengths	3' 2' 6" to 3' (762mm to 914mm) door size 4' 3' to 4' (914mm to 1219mm) door size
Device centerline from finished floor	39-13/16" (1011mm) 39-11/16" (1008mm) with mullion
Center case	7-7/8" x 2-3/4" x 2-3/8" (200mm x 70mm x 60mm)
Mechanism case	2-5/16" x 2-1/8" (59mm x 54mm)
Projection	Pushbar neutral - 3-13/16" (97 mm) Pushbar depressed - 3-1/16" (78mm)
Latch bolt	Deadlocking, 5/8" (15.875mm) throw
Finishes	US26D (626), US28 (628), 313 (710), US4 (606), US3 (605), US15 (619), US26 (625), 315 (711), 643E
Pushbar length	3' 18" (457mm) 4' 24" (610mm)
Fasteners and sex bolts (SNB)	Includes screw pack for 1-3/4" (4mm) and 2-1/4" (57mm) thick metal or wood doors (Optional 425 SNB available)

## Features & Options

Electrified Options	
LX	Latch bolt monitor switch
RX	Request to exit
E	Electric locking and unlocking trim
ALK	Alarm exit kit
CON	Allegion Connect
QEL	Quiet electric latch retraction

Mechanical Options	
GBK	Glass bead kit
LBR	Less bottom rod
SNB	Sex bolts
SEC	Security screws

Dogging Options	
	No mechanical dogging

Strikes	
338	Top—Unfinished
385A	Bottom—Unfinished

## Device Types

# 7847WDC Wood Door Concealed Vertical Rod Device

7847WDC Concealed vertical rod device for use on single or double wood doors, UL listed for panic exit hardware. Devices are certified to ANSI/BHMA A156.3 Grade 1.

Specifications	Details
Device functions	Device ships EO/DT/NL; Field selectable
Device lengths	3' 2' 6" to 3' (762mm to 914mm) door size 4' 3' to 4' (914mm to 1219mm) door size
Device centerline from finished floor	39-13/16" (1011mm) 39-11/16" (1008mm) with mullion
Center case	7-7/8" x 2-3/4" x 2-3/8" (200mm x 70mm x 60mm)
Mechanism case	2-5/16" x 2-1/8" (59mm x 54mm)
Projection	Pushbar neutral - 3-13/16" (97mm) Pushbar depressed - 3-1/16" (78mm)
Latch bolt	Deadlocking top bolt, 5/8" (16mm) throw
Door undercut	1/4" (7mm) maximum
Top and bottom latch case	3 3/4" x 1 1/2" x 1" (95mm x 38mm x 25mm)
Vertical rods	Round 2-piece adjustable rods – Top rod adjustable from 6'8" (2027mm) to 8'4" (2533mm). Bottom rod adjustable 35-5/8" (905mm) to 49-5/8" (1260 mm). Extension rod kits available for doors over 8'4" (2533mm).
Scalp plate	Device is furnished standard with an 8" (203mm) long scalp plate for easy access to rods
Finishes	US26D (626), US28 (628), 313 (710), US4 (606), US3 (605), US15 (619), US26 (625), 315 (711), 643E
Fasteners and sex bolts (SNB)	Includes screw pack for 1-3/4" (4mm) and 2-1/4" (57mm) thick wood doors. (425 SNB required on wood doors without SLM blocking)

## Features & Options

### Electrified Options

LX	Latch bolt monitor switch
RX	Request to exit
E	Electric locking and unlocking trim; no cylinder override
ALK	Quiet electric latch retraction
CON	Allegion Connect
QEL	Quiet electric latch retraction

### Mechanical Options

GBK	Glass bead kit
LBR	Less bottom rod
SNB	Sex bolts
SEC	Security screws

### Dogging Feature

Hex key dogging standard

### Dogging Options

CD	Cylinder dogging
LD	Less dogging
DI	Dogging indicator
CI	Cylinder dogging indicator

### Strikes

338	Top—Unfinished
385A	Bottom—Unfinished

## Accessories

338 Top strike

385A Bottom strike

Top latch

Bottom latch

Hex key dogging

Comes standard on 78 panic exit device

## Device Types

# 7847WDC-F Wood Door Concealed Vertical Rod Fire Device

7847WDC-F Fire exit concealed vertical rod devices are certified to ANSI/ BHMA A156.3 Grade 1 and UL listed for fire exit hardware. [See UL fire exit hardware](#) label and door opening size information within this catalog.

Specifications	Details

## Device Types

## 75 Rim Exit Device

75 rim exit devices for all types of single and double doors with mullion, UL listed for panic exit hardware. Devices are certified to ANSI/BHMA A156.3 Grade 1.

Specifications	Details
Device functions	Device ships EO/DT/NL; Field selectable
Device lengths	3' 2' 6" to 3' (762mm to 914mm) door size 4' 3' to 4' (914mm to 1219mm) door size
Device centerline from finished floor	39-13/16" (1011mm) 39-11/16" (1008mm) with mullion
Center case	9" x 1-5/8" x 2-3/8" (229mm x 41mm x 60mm)
Mechanism case	2-5/16" x 2-1/8" (59mm x 54mm)
Projection	Pushbar neutral - 3-13/16" (97mm) Pushbar depressed - 3-1/16" (78mm)
Latch bolt	Deadlocking, 5/8" (15.875mm) throw
Finishes	US26D (626), US28 (628), 313 (710), US4 (606), US3 (605), US15 (619), US26 (625), 315 (711), 643E, US10B (613)
Pushbar length	3' 18" (457mm) 4' 24" (610mm)
Fasteners and sex bolts (SNB)	Includes screw pack for 1-3/4" (4mm) and 2-1/4" (57mm) thick metal or wood doors (Optional 425 SNB available)

## Features &amp; Options

## Electrified Options

LX	Latch bolt monitor switch
RX	Request to exit
E	Electric locking and unlocking trim; no cylinder override
ALK	Alarm exit kit
CON	Allegion Connect
QEL	Quiet electric latch retraction

## Mechanical Options

AX	Accessible device
GBK	Glass bead kit
SNB	Sex bolts
SEC	Security screws

## Dogging Feature

Hex key dogging standard

## Dogging Options

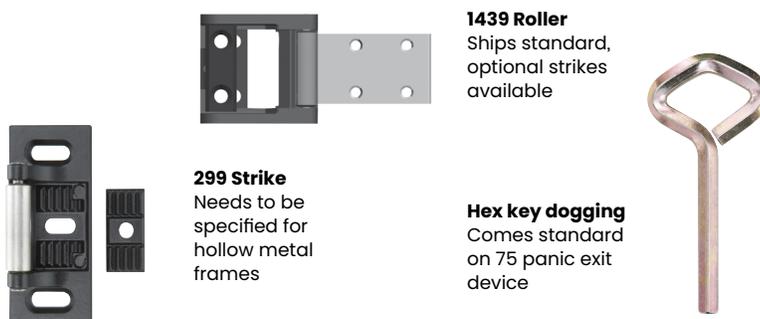

CD	Cylinder dogging
LD	Less dogging
QEL	QEL options available

## Strikes

1439	Dull black
------	------------

Optional strikes

## Accessories

**299 Strike**  
Needs to be specified for hollow metal frames

**1439 Roller**  
Ships standard, optional strikes available

**Hex key dogging**  
Comes standard on 75 panic exit device

## Device Types

# 75-F Fire-Rated Rim Exit Device

75-F Rim fire exit devices are certified to ANSI/BHMA A156.3 Grade 1 and UL listed for fire exit hardware. [See UL fire exit hardware](#) label and door opening size information within this catalog.

Specifications	Details
Device functions	Device ships EO/DT/NL; Field selectable
Device lengths	3' 2' 6" to 3' (762mm to 914mm) door size 4' 3' to 4' (914mm to 1219mm) door size
Device centerline from finished floor	39-13/16" (1011mm) 39-11/16" (1008mm) with mullion
Center case	9" x 1-5/8" x 2-3/8" (229mm x 41mm x 60mm)
Mechanism case	2-5/16" x 2-1/8" (59mm x 54mm)
Projection	Pushbar neutral - 3-13/16" (97mm) Pushbar depressed - 3-1/16" (78mm)
Latch bolt	Deadlocking, 5/8" (15.875mm) throw
Finishes	US26D (626), US28 (628), 313 (710), US4 (606), US3 (605), US15 (619), US26 (625), 315 (711), 643E, US10B (613)
Pushbar length	3' 18" (457mm) 4' 24" (610mm)
Fasteners and sex bolts (SNB)	Includes screw pack for 1-3/4" (4mm) and 2-1/4" (57mm) thick metal or wood doors (Optional 425 SNB available)

**499F Strike**  
With 9954 mullion

## Device Types

# 7527 Surface Mounted Vertical Rod Device

7527 Surface mounted vertical rod device for all types of single or double doors, UL listed for panic exit hardware. Devices are certified to ANSI/ BHMA A156.3 Grade 1. Vertical rod and latch guards are available to protect the bottom rod of the exit device from damage by impacts of carts or gurneys passing through doors.

Specifications	Details
Device functions	Device ships EO/DT/NL; Field selectable
Device lengths	3' 2' 6" to 3' (762mm to 914mm) door size 4' 3' to 4' (914mm to 1219mm) door size
Device centerline from finished floor	39-13/16" (1011mm) 39-11/16" (1008mm) with mullion
Center case	9" x 1-5/8" x 2-3/8" (229mm x 41mm x 60mm)
Mechanism case	2-5/16" x 2-1/8" (59mm x 54mm)
Projection	Pushbar neutral - 3-13/16" (97mm) Pushbar depressed - 3-1/16" (78mm)
Latch bolt	Deadlocking, 5/8" (15.875mm) throw
Finishes	US26D (626), US28 (628), 313 (710), US4 (606), US3 (605), US15 (619), US26 (625), 315 (711), 643E, US10B (613)
Pushbar length	3' 18" (457mm) 4' 24" (610mm)
Fasteners and sex bolts (SNB)	Includes screw pack for 1-3/4" (4mm) and 2-1/4" (57mm) thick metal or wood doors (Optional 425 SNB available)

## Accessories

**266**  
Top strike,  
ships standard

**Top latch**

**Hex key dogging**  
Comes standard on  
75 panic exit device

**248L4**  
Bottom strike  
For use with  
flat threshold

**Bottom latch**

**304L Bottom strike**

## Features & Options

### Electrified Options

LX	Latch bolt monitor switch
RX	Request to exit
E	Electric locking and unlocking trim; no cylinder override
ALK	Quiet electric latch retraction

## Trim options

# Trim Functions

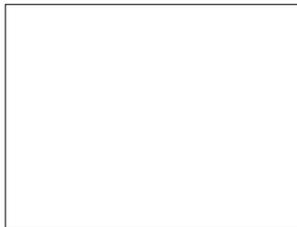

Von Duprin protects your investment by empowering you to adapt with flexible solutions and modular options. The 78 and 75 Series features numerous trim options to serve your different needs. Designed with flexibility in mind, our solutions offer ease of adding new options as they are developed.

With Von Duprin, you can be confident that as the needs of your facility change, our products can be upgraded easily to meet your needs, especially as the mechanical and electronic technology converge. Von Duprin's versatile design enables you to add functionality to existing devices in a cost-effective way, protecting your investment well into the future.

A variety of device trim lock type functions such as key lock and unlock, latch bolt retraction with key and no cylinder designs for an "always operable" function are available in levers, knobs, latches, thumbpiece and thumbturn designs.

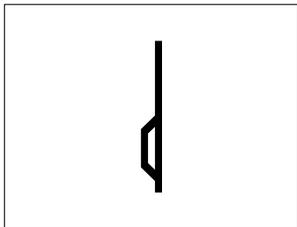

## Trim options

# 78 Series Trim Functions

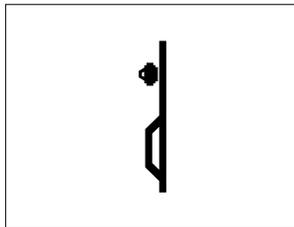

EO  
No outside

- Exit only

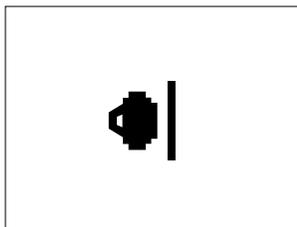

DT  
Dummy

- Pull when dogged (not recommended for fire device)

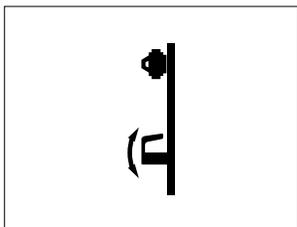

NL  
Night latch

- Key retracts latch bolt
- Rim cylinder

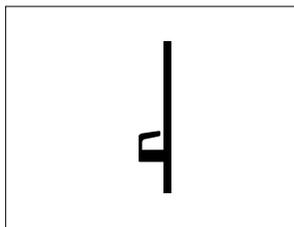

NLOP  
Night latch

- Key retracts latch bolt, pull required
- Rim cylinder

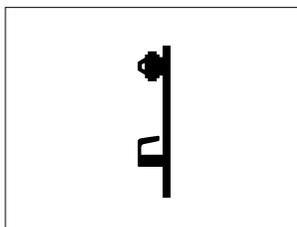

L  
Lever

- Key locks and unlocks
- 1-1/4" mortise cylinder
- Handed, reversible lever
- Electrified lever operation available

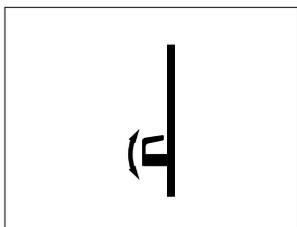

LDT  
Lever, dummy trim

- Pull when dogged (not recommended for fire device)

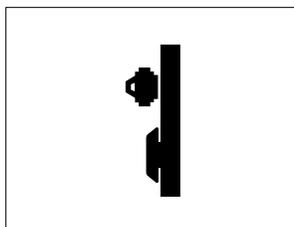

LNL  
Lever, night latch

- Key retracts latch bolt
- 1-1/4" mortise cylinder
- Handed, reversible lever

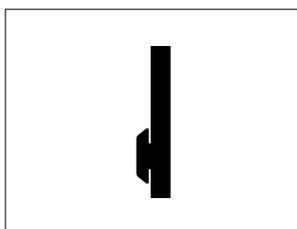

LBE  
Lever, blank escutcheon

- Always operable (no cylinder)

TL  
Turn lever

- Key locks and unlocks; or key unlocks, then relocks when key is removed (use with DT trim)
- 1-1/4" mortise cylinder

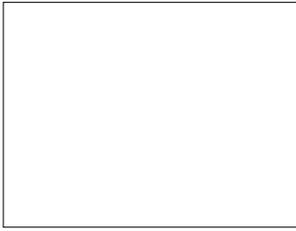

TLBE  
Turn lever, blank escutcheon

- Blank escutcheon always operable (no cylinder, use with DT trim)

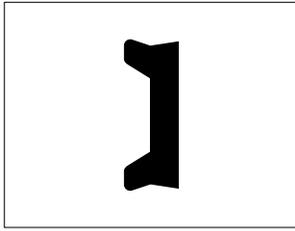

Trim options

# 75 Series Trim Functions

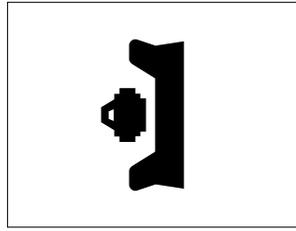

**EO**  
No outside

- Exit only

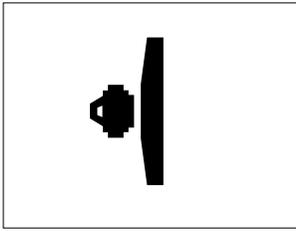

**DT**  
Dummy

- Pull when dogged (not recommended for fire device)

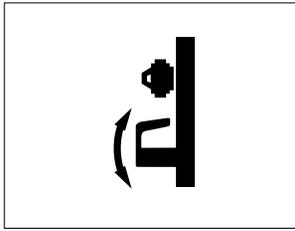

**NL**  
Night latch

- Key retracts
- Rim cylinder

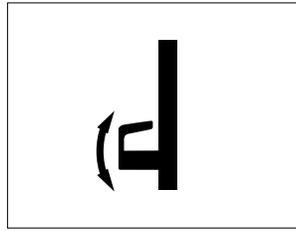

**NLOP**  
Night latch

- Key retracts latch bolt, optional pull required
- Rim cylinder

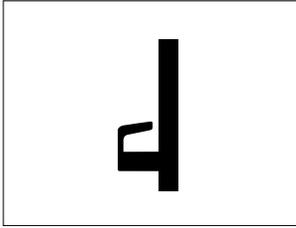

**L**  
Lever

- Key locks and unlocks; or key unlocks, then relocks when key is removed.
- 1-1/4" mortise cylinder
- Handed, reversible lever

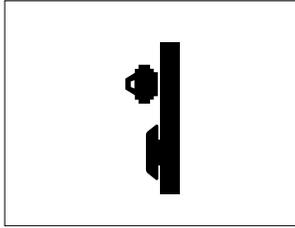

**LBE**  
Lever, blank escutcheon

- Always operable (no cylinder)
- Electrified lever operation available

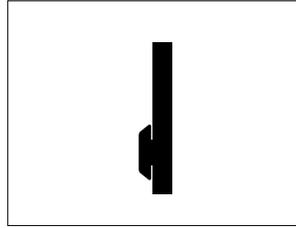

**LDT**  
Lever, dummy trim

- Pull when dogged (not recommended for fire device)

**TL**  
Turn lever

- Key locks and unlocks; or key unlocks, then relocks when key is removed (use with DT trim)
- 1-1/4" mortise cylinder

**TLBE**  
Turn lever, blank escutcheon

- Blank escutcheon always operable (no cylinder, use with DT trim)

Mechanical options

# Dogging Options

## Cylinder Dogging (CD)

Cylinder dogging is available on all 78 and 75 panic exit devices to replace the standard hex key dogging. Unit requires a standard 1-1/4" (32mm) mortise cylinder with an inverted straight cam. When ordering, reference Schlage cylinder 20-001, 1-1/4", XQ11-949. This provides the L583-477 cam inverted at the factory.

**To order, specify:**

- Use prefix, CD, example CD78L

## Less Dogging (LD)

Less dogging is available in all 78 and 75 Panic exit devices to remove the dogging option.

**To order, specify:** Use prefix LD, example LD78L

## Cylinder Dogging Kit\* (CDK)

For field conversion, from hex key dogging, conversion kit is available.

\*Cannot be added to fire exit hardware.

**To order, specify:**

- 78CDK or 75CDK, specify finish

## Hex Key Dogging Kit\* (HDK)

For field conversion, from cylinder dogging, conversion kit is available.

\*Cannot be added to fire exit hardware.

**To order, specify:**

- 78HDK or 75HDK, specify finish

## Dog Key

Dog key (standard)

5/32" (4mm) hex

# Accessibility Options

## Accessible Device (AX)

The AX device is a UL certified exit device designed to meet the progressive requirements of the California Building Code for accessible openings. This device meets the 5 lbs of operating force requirement called for in chapter 11B-309.4. The AX device also exceeds ANSI/BHMA requirements.

Available devices include: AX-78, AX-78-F, AX-7827-LBR, AX-7827-F-LBR, AX-75, AX-75-F. Additionally, all AX devices will be shipped with a UL label clearly stating “Meets California Building Code (2013) Sec. 11B-309.4” and an “AX” identifier label on device center case. See images for reference.

## Mechanical options

# Latches

### Less Bottom Rod, Panic and Fire Rated (LBR)

LBR option is available on panic rated devices by eliminating the bottom rod, latch, and strike. LBR option is available on fire rated devices, using a spring loaded auxiliary latch bolt installed in the lower door edge. When exposed to heat the auxiliary latch bolt releases, keeping the doors in alignment and closed during a fire. See UL fire exit hardware label and door opening size information within this catalog. Fits door stiles as narrow as 3-5/8".

Fire-rated LBR devices must be ordered in pairs or must be used in conjunction with an approved automatic or constant latching flush bolt.

This page intentionally left blank.

## Electrified options

# Latch Retraction

### Quiet Electric Latch Retraction (QEL)

Quiet electric latch retraction (QEL) provides electronic control of an exit device for environments where limited operational noise is desired. These devices always provide mechanical egress. The electrified latch retraction can also be activated by an access system or building automation system to unlatch the exit device momentarily. Often the QEL is used with a credential reader and access control system to unlock the door momentarily for authorized users.

The QEL can also be configured to electronically retract the latch for an extended period of time to allow free entry. This is a convenient alternative to mechanical dogging. If manual dogging required on a panic rated QEL device, the hex dogging option is available, to order specify HD-QEL.

The QEL option is available on panic devices and fire rated devices. UL approved for Class II circuit applications.

The QEL option does not include the power transfer from door to frame, the power supply, or the control operator. Refer to EPT-2 power transfer and the PS902 or 914 power supply.

The 900 Series power supply with the 2RS, 4RL or 4R board is the minimum required. Other option boards available for other functions, see 900 Series power supply for additional information.

The QEL has a low in rush current, so it can be used with standard Schlage power supplies. Calculate the peak current draw of all devices in the system to determine the required amperage of the supply.

The -2RS option board is designed to control two electric latch retraction devices and provide time delay between the firing of outputs is required. The power transfer is also sold separately.

**To order, specify:**

- Standard – Use prefix QEL, example QEL78L

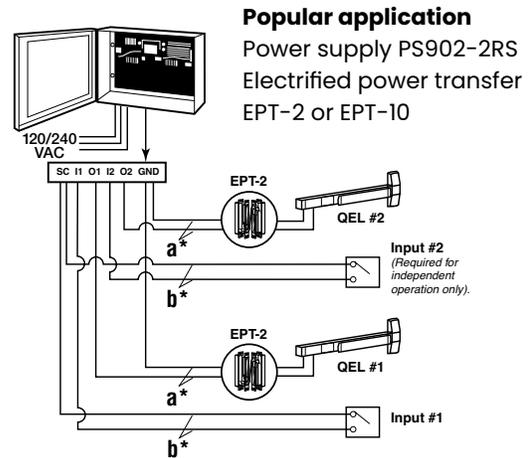

**Note:** Baseplate and modular QEL conversion kits are available for field retrofit. Please see parts/service manual for part numbers.

Schlage PS902	Schlage PS904	Schlage PS906
Up to 2 amps	Up to 4 amps	Up to 6 amps

	320'	16 AWG
	500'	14 AWG
	800'	12 AWG

b*	Wire Selection	Switch Wire Size
	1200 ft. max	18 gauge standard

## Electrified options

# Switches

### Request to Exit (RX)

The RX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the push pad.

The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply.

The RX switch option should not be used to control a load, but as a signaling switch (2 amps resistive maximum).

**To order, specify:**

- Standard – Use prefix RX, example RX78EO

### Latch Bolt Monitoring (LX)

The LX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the latch bolt.

The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply.

The LX switch option should not be used to control a load, but as a signaling switch (2 amps resistive maximum).

**To order, specify:**

- Standard – Use prefix LX, example LX78EO

**Note:** All switches can be either factory or field installed

# Alarm Kit

Alarm kit (ALK) is a simple yet effective way to deter unauthorized use of an opening. While the exit device is still a means of egress, the ALK kit contains an internal horn. When the touch bar is depressed, the horn sounds to provide an audible means of signaling that the opening has been violated. The alarm kit can be armed or disarmed by key thus allowing the exit device to be set in an armed or disarmed mode. The horn is rated at 85 decibels.

For hardwire applications, the assembly includes both a 24VDC Input and External Inhibit standard. The External Inhibit provides remote arming and dis-arming.

The key switch uses a standard 1-1/4" (32mm) mortise cylinder with a straight cam (Schlage 20-001, L583-477 cam). The unit operates on one standard 9-volt alkaline battery. When the battery is weak, the horn will emit an intermittent low battery alert signal.

Auto reset (AR) option comes standard with this kit. This feature allows the device to resume the alarm option after a preset time. Preset times can be field selected at 1.5, 3, or 4.5 minutes.

Alarm kits are available with a choice of two switch kits, RX or LX. RX monitors the touchpad and is furnished standard. LX optional latch bolt monitoring is recommended for use with surface vertical rod exit devices or when alarm needs to sound from both the exit device and trim side of the door. Specify ALK-LX.

The ALK includes a 6" x 20" decal for application on door "EMERGENCY EXIT ONLY. ALARM WILL SOUND." RSS push bar trim can be used instead of the door decal, specify RSS push bar trim when ordering the device.

When the ALK is used, standard dogging is removed. If cylinder dogging is required, the ALK can be moved to the hinge side of the device, and standard cylinder dogging (CD) can be added. Note size restrictions below.

### How to Order:

- Standard - when ordering full device with ALK, use ALK suffix with RX or LX prefix -  
Example: RX78EO ALK
- Available as a Kit for field installation specify series, size, finish, and switch desired-  
Example: 78 ALK 3' x finish x RX

### Minimum door opening sizes on ALK applications

Device	3' (914mm) Length	4' (1219mm) Length
78/78-F/75/75-F	2' 11-1/2" (902mm)	3' 5-1/2" (1054mm)
7827/7827-F/7527/7527-F	2' 11-1/2" (902mm)	3' 5-1/2" (1054mm)
7847/7847-F/7547/7547-F	2' 10-1/2" (876mm)	3' 4-1/2" (1029mm)

## Electrified options

# Electrified Trim

## Applies to 78 Exit Device Only

### E780L/L-BE Electrified Lever Trim

E780L/L-BE Electrified lever trim provides remote locking and unlocking. Available in either fail safe (FS) or fail secure (FSE) condition.

FS (Fail safe—unlocks when power is interrupted) can be used in areas requiring doors to be unlocked due to fire, power failure or emergency situations. (Examples: stairwells, fire exits, etc.)

FSE (Fail secure—locks when power is interrupted can be used in areas requiring doors to be locked for security reasons and only unlocked when energized by authorized personnel. (Examples: banks, inner-office, etc.)

With either feature, authorized personnel can gain access utilizing key by overriding or bypassing electric locking function.

### Specifications

- Solenoid rated for continuous duty at 24V DC 0.4 amps
- UL listed devices
- Device channel is used as conduit on 78 Series devices
- Power transfer (EPT-2) hinge 2-wire minimum rated 1/2 amp

### Minimum Power Supply—PS902

The series 902 power supply is the recommended power supply for use with an FSA or FSE trim. The series 902 power supply is also designed for electric locking or monitoring of single or double door applications.

### RX Option

RX option available for 780 trim to monitor lever trim operation (available as L or L-BE). To order, add RX prefix to trim description.

**Note:** The RX switch option should not be used to control a load, but as a signaling switch only.

#### To order, specify:

- Use "E" prefix, example E780L or E780L-LBE. When ordering with the exit device, specify trim series with prefix "E", example 7827L x 626 x E780
- RHR furnished standard if not specified
- Lever style (06 lever furnished standard)  
Other levers, no extra charge
- Other lever designs available, see pages 54 and 55

## Applies to 75 Exit Device Only

### E360 Electric Trim

Specify Fail Safe (FS) or Fail Secure (FSE). 24VDC furnished standard, 12VDC available through special order.

#### To order, specify:

- Prefix lever or thumbturn control with "E"  
Example: E360L-BE, E360T-BE
- E360LBE, E360TBE functions
- 01, 02, 03, 05, 07, 12, 16, 17, Latitude (LAT)

## Electrified options

# Power Supplies

## PS900 Series Power Supplies

The PS900 Series is a consolidated line of power supplies and accessories that offer enhanced flexibility and functionality specific to the changing needs of the access control market. The PS900 Series can be used in a variety of applications to convert high voltage AC power into the regulated low voltage DC outputs required by most access control devices. The PS900 Series protects devices downstream by providing Class 2, filtered and regulated power. The full line is UL294 certified.

### Features

- Constant output rating at both 12VDC or 24VDC provides superior performance; includes field selectable jumper
- Flat mounting of option boards provides easier access to terminal blocks for connection of electrified devices
- High voltage protective cover
- Battery back-up board auto-selects voltage
- Fire alarm relay can be configured to provide either switched or un-switched outputs from a power supply
- PS914 designed with high inrush current for powering electrified panic devices
- Universal 120–240 VAC input
- Low voltage DC, regulated and filtered
- Electronic power limiting foldback circuit for AC current overload protection
- Fused primary input
- AC status monitor—isolated SPDT contacts
- AC input and DC output LED status indicators
- Cover mounted AC input indication
- Hinged cover with lock down screws
- Optional keylock

### Certifications

- UL 294 certified—the standard for access control
- Class 2 rated

## Electrified options

# Power Supplies

## PS900 Series Power Supplies

The PS900 Series offers a variety of distribution options, including basic fuse protection, simple relay, and advanced logic providing complex sequencing and timing functions.

Connectors on the Power Supply				
Product	Schlage PS902	Schlage PS904	Schlage PS904	Von Duprin PS914
Amperage	2 amps	4 amps	6 amps	4 amps with 16 amp inrush
Distribution boards	1	2	3	2
Battery back-up board	1	1	1	1
EL Compatible	No	No	No	Yes

## Applications

The PS900 Series of power supplies works with many electrified devices including Schlage electromagnetic locks, Schlage AD Series hardwired locks, Schlage electrified mechanical locks, Von Duprin electrified strikes, Von Duprin exit devices and many other brands.

## Accessories

The PS900 Series features seven option boards for use in a variety of applications. All PS900 Series power supplies option boards are UL 294 certified.

## Option Boards

- **900-4R:** 4 relay controlled output board to power multiple devices
  - **900-4RL:** 4 relay distribution board with logic is field configurable for time delay function, auto operator, security interlock
  - **900-8F:** Provides 8 individually fuse-protected outputs, giving the flexibility to power multiple devices and provide another layer of protection
  - **900-8P:** Provides 8 individually fuse-protected outputs, giving the flexibility to power multiple devices and provide another layer of protection
  - **900-FA:** Emergency interface relay integrates with fire alarm and is used to cut power in case of emergency<sup>2</sup>
  - **900-BB:** Battery backup
  - **900-2RS:** 2 relay control board for electric latch panic devices (EL or QEL), electric strikes or electrified trim
  - **900-BBK:** Battery backup kit includes two 7A/hr batteries and provides up to four hours of backup power when cycled every 5 minutes at full load
1. PS906 can provide Class 2 rated outputs when used with 900-8P distribution board.
  2. Except PS906, output rating exceeds Class 2 power limits.
  3. PS906, output rating exceeds Class 2 power limits, but can provide Class 2 rated outputs when used with 900-8P distribution board.

## Electrified options

# Electrical Power Transfers

## Electrical Power Transfer (EPT)

Electrical Power Transfer provides a means of transferring electrical power from a door frame to the edge of a swinging door. The units are completely concealed when the door is in the closed position, and are ideal for installations involving abuse or heavy traffic.

Two models are available; EPT-2, two 18 gauge wires and EPT-10, ten 24 gauge wires. The EPT-2 and EPT-10 are U/L listed as “miscellaneous door accessory”. UL Listed for use on fire doors.

Door Applications		
Degree of Opening	Hinge Type	Door Thickness
0-180	Up to 5" butt hinges	1-3/4"
0-180	Up to 3/4" offset pivots	1-3/4"
0-130	5-1/2" butt hinges	1-3/4"
0-110	6" butt hinges	1-3/4"
0-90	Swing clear hinges	1-3/4"

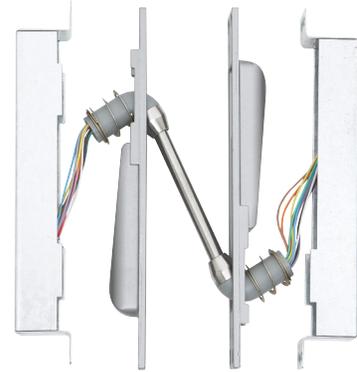

## Finishes

- 622 (powder coated matte black)
- 689 (powder coated aluminum)
- 695 (powder coated bronze)

Dimensions	
Housing	9" x 1-1/4" x 1-5/8" (229mm x 32mm x 38mm)
EPT-2	Two 18 gauge wires, up to 2 amps @ 24VDC, with a 16 amps Maximum Surge
EPT-10	Ten 24 gauge wires, up to 1 amp @ 24VDC, with a 16 amps Maximum Surge

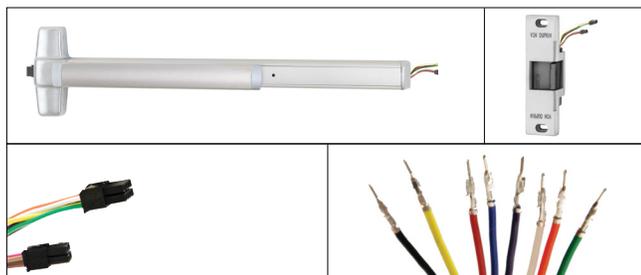

### To order, specify:

- EPT-2 or EPT-10
- Finish: 622, 689, 695

## Electrified options

# Allegion Connect

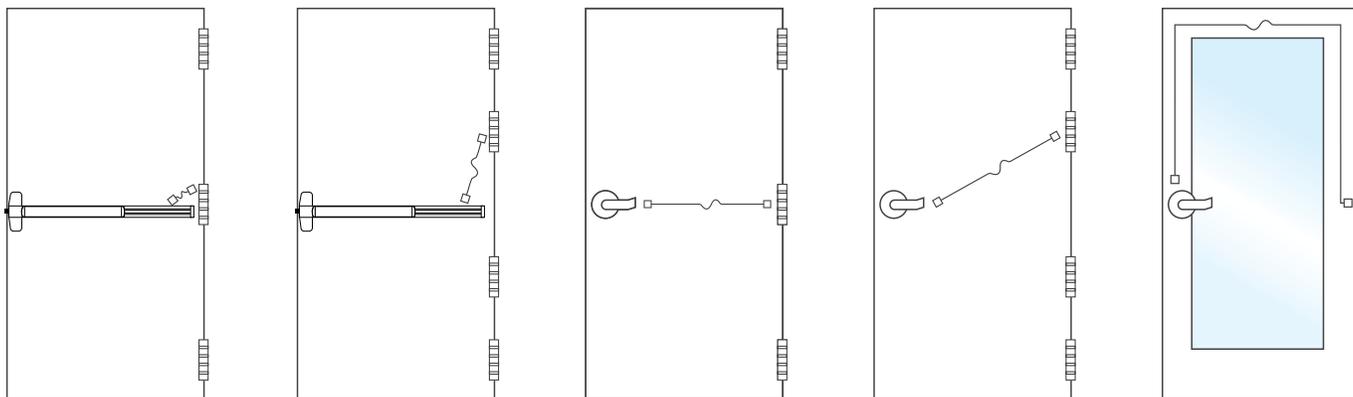

Allegion Connect features common interconnect components for many cross-category electrified options. Allegion Connect is a quick and easy way to connect power sources. There is no wire cutting; reducing installation and maintenance time ultimately cutting cost. After installation, Allegion Connect continues to provide benefits throughout the lifetime of the opening by offering a service kit for repairs or modifications in the future.

### Features & Benefits

- **Quick:** Common connections reducing installation time
- **Perfect Connections:** These factory installed connectors ensure the right wires match up every time
- **Protective:** The connectors protect the connection points throughout the installation process and lifetime of the opening
- **Interchangeable:** All Allegion Connect products utilize the same connectors
- **Maintenance:** You no longer need to cut away wire to disconnect Allegion products, also available is a service kit specifically for Allegion Connect products.

### Wire Run Options

Harness Length	Connectors on Both Ends	Connectors on One End, Crimped Pins on the Other End
6 inches	CON-6	CON-6P
12 inches	CON-12	CON-12P
26 inches	CON-26	CON-26P
32 inches	CON-32	CON-32P
38 inches	CON-38	CON-38P
44 inches	CON-44	CON-44P
50 inches	CON-50	CON-50P
192 inches	CON-192	CON-192P
Power supply wire harness = connectors on one end, stripped leads on the other end.		
6 inches	CON-6W—wire extension to power supply	

Consult door manufacturer for harness length requirements.

**Note:** You will need to purchase a separate wiring harness to go from exit device to hinge/EPT, and a CON-6W harness to connect the hinge/EPT to field wiring in the walls. Harness part numbers with ordering information can be located in the Schlage, Von Duprin and Falcon price books. A service kit is available for order in the Schlage, Von Duprin and Falcon price books. Included in this kit are male end plugs, female end plugs and pins to customize harnesses to your application.

**Note:** Must be ordered with exit devices and locks

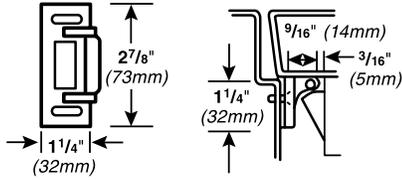

#### To order, specify:

- Specify CON for Connect electronic options  
Example: QEL-78-EO-CON  
(78 Series quiet electric latch retraction exit only with Connect connectors)
- Specify harness length; Consult door manufacturer for harness length
- Specify Von Duprin EPT10-CON or Ives electrical thru-wire hinge

**Accessories**

# Door Kits

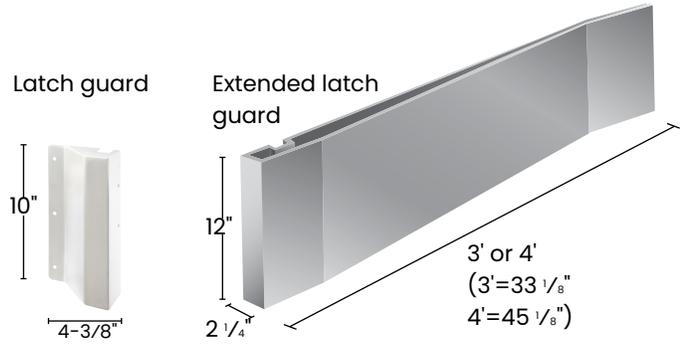

## Vertical Rod and Latch Guard (RG-27)

Series RG-27 Vertical rod and latch guards protect the bottom rods of exit devices from the damaging impacts of carts or gurneys passing through doors. (If bottom rods become damaged, the exit device will not function as intended and can jeopardize the ability to exit safely during an emergency.)

In addition to protecting the vertical rod, the guard provides a smooth, unobstructed surface so the door can be pushed open easily with the bumpers of a wheelchair. The latch guard portion is 10" high. The standard latch guard features a 45° ramp. The extended latch guard offers a continuous ramp for 3' or 4' doors.

All stainless steel construction in 630 finish. Latch guards can cover latches as large as 1-1/4" W x 10" H x 1-7/8" projection.

- To order, specify:**
- Model number\*
  - Handing (except on RGO)
  - Door material if other than hollow metal
  - Optional sex bolt mounting available

## Glass Bead Kit (GBK)

Glass bead conversion kits are available for all 78 and 75 Series devices for use on doors with raised glass beads. Each kit consists of 1/4" (6mm) shim sets. GBK for surface vertical rod ships with 1/8" shims for rod guides.

- To order, specify:**
- Device model
  - GBK
  - Device type (rim, surface rod, concealed rod)
  - Specify if using with 499F
  - Finish
- Example:** 78 GBK Rim SP28

Models	
RGO	Rod guard only (projection 1-3/16")
RG-27	Rod and latch guard
RG-27-3	3' (914mm) Rod guard and extended latch guard
RG-27-4	4' (1219mm) Rod guard and extended latch guard
LGO	Latch guard only
LGO-3	3' (914mm) Extended latch guard only
LGO-4	4' (1219mm) Extended latch guard only

When using on wood fire doors, high density block is required.

\* RGO/RG-27 includes one rod guard only, which accommodates bottom or top rod up to 7' door. For longer top rods, specify rod guard quantity required.

# Sex Bolts

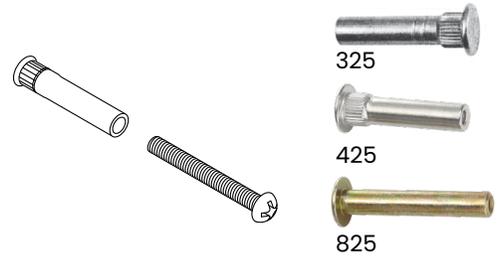

Sex bolts provide secure mounting by mating with machine screws furnished with devices. Sex bolts are either optional or required, as shown in quantity chart below. Sex bolts ordered separately are not furnished with screws. If screws are required, order device mounting packages.

**To order sex bolts:**

If ordering devices with sex bolts, specify SNB (sex nuts and bolts) in device description.

If ordering sex bolts separately, specify:

- Sex bolt model number
- Package quantity (sold as package of 2)
- Finish

## Accessories

### Removable Steel Mullions

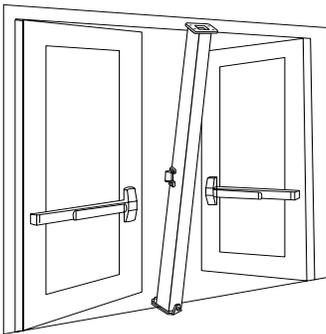

Removable steel mullions provide single door performance in double door openings with rim devices.

Mullions are easily removed by loosening bottom set screw and removing top fitting cover. The top mullion fitting is attached to the frame and is concealed by the fitting cover.

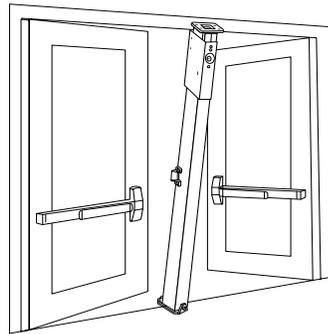

- Steel mullions are 2" (51mm) wide and 3" (76mm) deep, with a wall thickness of 1/8" (3mm)
- Mullions are shipped with mounting screws and prepared for strikes (strikes are not included except where indicated)
- Steel mullions are available in SP28 and SP313 finishes (Consult factory for other powder coat finish options)

### Keyed Removable Steel Mullions (KR)

KR mullions make removal faster and easier by a single operation of the mortise cylinder. Once mullion is removed, large equipment or furniture can freely pass through the opening. The unit will self lock when re-installed, without the use of the cylinder key. Uses a 1-1/4" mortise cylinder with a straight cam (Schlage cam reference L583-477). Cylinders are sold separately. Prefix mullion model with "KR".

Removable mullions

Keyed removable steel mullions

### Aluminum Mullions

Removable aluminum mullions are 1 1/16" (27mm) wide on face closest to the door and 2-3/8" (60mm) at the widest point. The depth is 3-1/8" (79mm) with a wall thickness of 1/8" (3mm).

Aluminum mullions are available in 606, 612, 628, 710 and 622/711 finishes. Consult factory for other powder coat finish options. Aluminum mullions are not available keyed removable.

Stock hollow metal applications for devices mounted to cover ANSI 161 cutouts are higher than the standard mullion strike location. Consult the factory for special strike preparation or order a blank mullion. See below.

### Blank Mullions

are furnished without strike preparation. They are used to mount devices at a strike height different from the standard mullion preparation.

#### To order, specify:

- For keyed removable option on steel mullions, prefix model number with "KR"
- Model number
- Height of opening
- Finish
- Handing, if required
- Centerline deviation (refer to device template for standard centerline)
- Strikes, when required, should be ordered with device

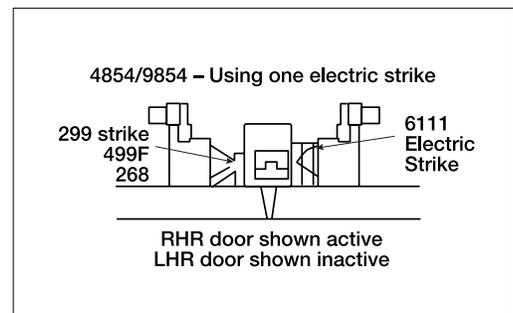

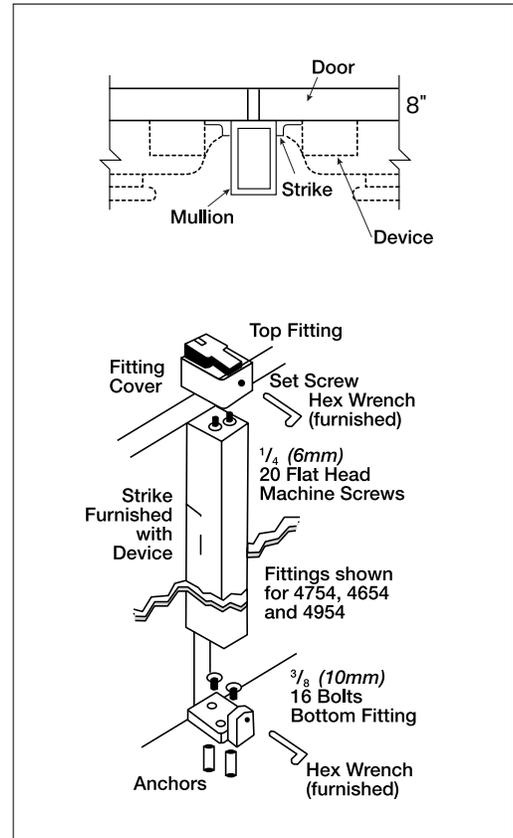

# Steel and Aluminum Mullions

## Steel Mullions

4954	Prepared for two 299 strikes (standard). With KR option.
9954	Prepared for and must be used with two 499F strikes. UL fire labeled mullion for up to 3 hour opening using Von Duprin fire exit rim devices. With KR option.
4854	Prepared for one 299 and one 6111 electric strike. Indicate handing for electric strike. With KR54-F kit option.
9854	Prepared for one 268 or 499F strike and one 6111 electric strike. Indicate handing for electric strike. UL fire labeled mullion for up to 3 hour openings up to 8' x 8' (2438mm x 2438mm) using Von Duprin fire exit rim devices. With KR option.

## Aluminum Mullions

5654	Prepared for two 299 strikes (standard only), no KR option.
5754	Prepared for 1408 double strike

1. Fire-rated metal door flush bolts may be substituted on one leaf of a pair in these columns. Substitute two-point flush bolt for vertical devices; or substitute top flush bolt with auxiliary fire bolt for vertical rod LBR/LBL-AFL devices. The opening will carry the fire listing (# hours and opening size) of the least rated component.
2. Not listed for Canada.
3. Hourly limitation due to 6111 electric strike listing.

### Notes:

Check with door manufacturers to confirm listing compatibility.  
Overlapping astragal may not be used on pairs swinging same direction with vertical rods or cables on both leaves.

## About Allegion

At Allegion (NYSE: ALLE), we design and manufacture innovative security and access solutions that help keep people safe where they live, learn, work and connect. We're pioneering safety with our strong legacy of brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Our comprehensive portfolio of hardware, software and electronic solutions is sold around the world and spans residential and commercial locks, door closer and exit devices, steel doors and frames, access control and workforce productivity systems.

**VON DUPRIN®**

88 Series

Exit device

# Introduction

## Your trusted solution

Our brand's reputation, respect and legacy stem from that first exit device in 1908—and they continue because of the quality of Von Duprin® products we've produced since. Today, Von Duprin remains the trusted name in the industry by engineering products that meet the highest industry standards for fire and life safety. It's this dedication to providing customers with dependable products that ensures you can put your trust in the Von Duprin brand.

The 88 Series is a wide style cross bar device. Rim, surface mounted vertical rod, concealed vertical rod and mortise configurations are available for panic and fire rated applications. The 88 Series features a non-handed design and flexible field sizing.

## Passion driving performance

With superior products comes exceptional customer care. Von Duprin customers are supported by industry-leading expertise. Allegion's representatives average more than 15 years of experience, so you're assured to receive knowledgeable advice on fire and life safety codes, installation resources and more. And for those looking to take their skills to the next level, Allegion offers instructor-led workshops, videos and online courses. It's another way Von Duprin stands by our customers—today, tomorrow and for years to come.

### Device types

## Popular applications

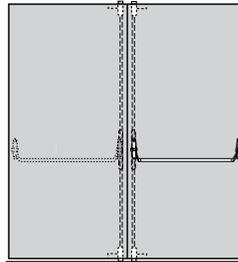

### Double door applications

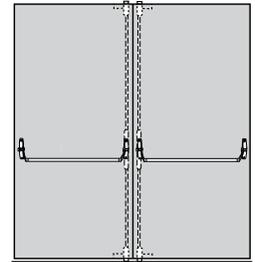

Mortise lock and vertical rod device combination — same direction

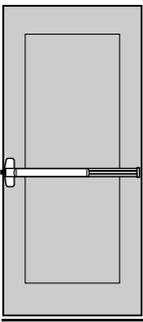

Two rim devices with mullion — same direction

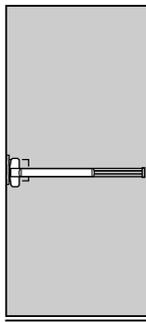

Two vertical rods — double egress

Two vertical rod devices — same direction (do not use with overlapping astragal)

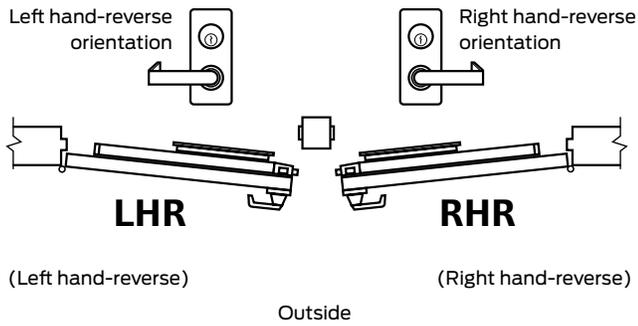

Single rim device

Single mortise

### Door handing

# 88 Rim exit device

**88 rim devices** for all types of single and double doors with mullion, UL listed for accident hazard installations. Covers stock hollow metal doors with 86 or 161\* cutouts. This device is field reversible.

### Specifications

Device functions	Device ships EO, DT, NL, TP, L, K
Handing	Field reversible
Crossbar length	30" for 3' door, 42" for 4' door
Device centerline	39-13/16"
Crossbar centerline to finished floor	36-13/16" (935 mm) at center
Lock stile case	8-1/4" x 2-3/4" x 15/16" (210 mm x 70 mm x 24 mm)
Hinge stile case	6" x 1-3/4" x 15/16" (152 mm x 44 mm x 24 mm)
Crossbar tubing	1" (25 mm) outside diameter
Projection	Neutral – 4-3/4" (121 mm) Depressed – 4" (102 mm)
Latch bolt	3/4" (19 mm), throw
Fasteners	All necessary mounting fasteners are included.
Finishes	605, 606, 612, 613, 619, 622, 625, 626, 643E, SPBLK

\* Not applicable with all strike and mullion combinations, consult factory.

### Features and options

#### Electrified options

- E** Electric unlocking (BE trim only)
- RX** Crossbar monitor switch in end case

#### Mechanical options

- KN** Knurled crossbar
- RCB** Reinforced crossbar

#### Dogging feature

Hex key dogging standard

#### Strikes

- 299** Dull black
- Optional** Available

### Accessories

**299 strike**

**Hex key dogging**  
Comes standard on 88 rim exit devices

## Device types

# 88-F Rim fire exit device

**88-F fire exit rim devices** for all types of 4' X 8' (1219 mm X 2438 mm) single and 8' X 8' (2438 mm x 2438 mm) double doors with 9954 mullion, UL listed, 3 hours. This device is handed.

### Specifications

Device functions	Device ships EO, NL, TP, L, K
Handing	Handed
Crossbar length	30" for 3' door, 42" for 4' door
Device centerline	39-13/16"
Crossbar centerline to finished floor	36-13/16" (935 mm) at center
Lock stile case	8-1/4" x 2-3/4" x 15/16" (210 mm x 70 mm x 24 mm)
Hinge stile case	6" x 1-3/4" x 15/16" (152 mm x 44 mm x 24 mm)
Crossbar tubing	1" (25 mm) outside diameter
Projection	Neutral – 4-3/4" (121 mm) Depressed – 4" (102 mm)
Latch bolt	Deadlocking – 3/4" (19 mm), throw
Fasteners	All necessary mounting fasteners are included
Finishes	605, 606, 612, 613, 619, 622, 625, 626, 643E, SPBLK

### Features and options

#### Electrified options

<b>E</b>	Electric unlocking (BE trim only)
<b>RX</b>	Crossbar monitor switch in end case

#### Mechanical options

<b>KN</b>	Knurled crossbar
<b>RCB</b>	Reinforced crossbar

Ships standard

# 8875 Mortise lock exit device

**8875 mortise lock devices** for all types of single or double doors, UL listed for accident hazard installations. Fits stock hollow metal doors with 86 cutouts and door stiles as narrow as 4-3/4" (121 mm). The 7500 mortise lock is equipped with a 3/4" (19 mm) anti-friction latch bolt which is field reversible without removing the lock from the door. It has a non-handed auxiliary bolt for deadlocking and a faceplate with an adjustable bevel. Field selection of functions are furnished standard. TP and K function may be field selected by turning down a set screw in mortise lock body. Electric locking or unlocking options are available.

### Specifications

Device functions	Device ships EO, DT, NL, TP, K, L
Handing	Handed
Crossbar length	30" for 3' door, 42" for 4' door
Device centerline	39-13/16"
Crossbar centerline to finished floor	36-13/16" (935 mm) at center
Latch bolt height to finished floor	40-3/32" (1018 mm) at center
Lock stile case	8-1/4" x 2 x 15/16" (210 mm x 51 mm x 24 mm)
Hinge stile case	6" x 1-3/4" x 15/16" (152 mm x 44 mm x 24 mm)
Crossbar tubing	1" (25 mm) outside diameter
Projection	Neutral – 4-7/8" (124 mm) Depressed – 4" (102 mm)
Latch bolt	Deadlocking – 3/4" (19 mm) throw
Fasteners and sex bolts (SBN)	Includes screw pack for 1-3/4" (44 mm) and 2-1/4" (57 mm) thick metal or wood doors
Finishes	605, 606, 612, 613, 619, 622, 625, 626, 643E, SPBLK

## Trim functions

Von Duprin protects your investment by empowering you to adapt with flexible solutions and modular options. The 88 Series features numerous trim options to serve your different needs. Designed with flexibility in mind, our solutions offer ease of adding new options as they are developed.

With Von Duprin, you can be confident that as the needs of your facility change, our products can be upgraded easily to meet your needs, especially as the mechanical and electronic technology converge. Von Duprin's versatile design enables you to add functionality to existing devices in a cost-effective way, protecting your investment well into the future.

A variety of device trim lock type functions such as key lock and unlock, latch bolt retraction with key and no cylinder designs for an "always operable" function are available in levers, knobs, latches, thumbpiece and thumbturn designs.

	<p><b>EO No outside trim</b></p> <ul style="list-style-type: none"> <li>Exit only</li> </ul>		<p><b>DT Dummy trim</b></p> <ul style="list-style-type: none"> <li>Pull when dogged (not recommended for fire device)</li> </ul>		<p><b>L Lever</b></p> <p><b>K Knob</b></p> <ul style="list-style-type: none"> <li>Key locks and unlocks</li> <li>Rim or 1 1/4" mortise cylinder</li> <li>Handed, reversible lever</li> <li>Electrified lever operation available</li> </ul>

<sup>1</sup> If no cylinder operation is required, specify "BE" blank escutcheon, trim always operable; example 88TP-BE.

<sup>2</sup> Matching dummy trim available, use suffix "DT"; 88L-DT - not recommended on fire rated devices.

<sup>3</sup> When using sex bolts, an 889 cover plate is required. See page 22.

<sup>4</sup> When using on wood doors without sex bolts, "WDA" cover plate is required. See page 22.

<sup>5</sup> E370 Series controls and mechanical 373L used with E7500 must be Blank Escutcheon (BE).

<sup>6</sup> NL cylinder plate is also furnished standard (for operation only when key is used).

<sup>7</sup> NL function on 8827/8827-F only available by using either a 370 series Trim (set for NL function during installation, see previous page) or a TP-NL or K-NL designation.

## Electrified options

### E8875 Electric mortise lock device

The E8875 electric mortise lock device has all the versatility and advantages of the 8875 mortise lock device, plus the advantage of being electrically controllable by a remote switching device, an access control or automatic device, or an automatic fire alarm system. The E8875 feature controls the locking of the outside trim. When unlocked, the door remains latched, preserving the fire rating of the door and making it particularly useful where codes permit locking, but require unlocking during a fire emergency. Key override is an NL type function.

#### Standard features

- Field reversible mortise lock
- 24 VDC continuous duty solenoid
- Tamper resistant (auxiliary dead latch)
- Silent operation
- Corrosion resistant
- Signaling functions
- Key mechanically retracts latch bolt

#### Optional features

- Fail safe (locked when energized, unlocked when de-energized or during power failure, specify with suffix “FS”)
- Fail secure (unlocked when energized—specify with suffix “FSE”). Outside trim automatically relocks, unless held unlocked electrically
- 24 VAC (by adding SO option)
- 12 VDC or 12 VAC with SO option

#### To order, specify

- 1a. E8875 or E8875F
- 1b. E7500 (if lock only is required)
2. FS or FSE
3. Voltage
4. Handing, LHR or RHR
5. Outside trim. “TP”, “TP-BE”, “K”, “K-BE” or “L-BE” function only. When using with “L” function, no cylinder operation is available. Outside control is furnished “BE”.

#### E373L-BE/E371L-BE

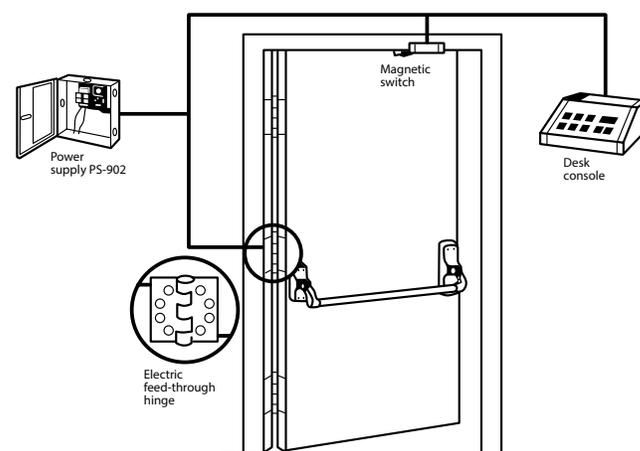

FS or FSE lever control for electric unlocking of lever.

#### E373L-BE

For use with rim and surface vertical rod.

#### E371L-BE

For use with concealed vertical rod.

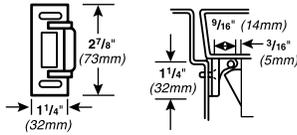

Adaptable for openings where continuous latching is required while the trim may be electrically locked or unlocked from a remote location — stairwells, exterior doors, etc.

# Strikes

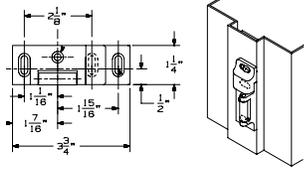

## Strikes for rim devices

575-2

576A

576B

– Not for use with astragals  
– For use on wood doors, contact door manufacturer

– Acceptable for 90 minute pair of hollow metal doors

## Door kits

### Vertical rod and latch guard (RG-27)

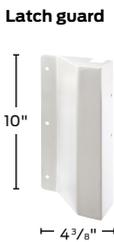

Series RG-27 Vertical rod and latch guards protect the bottom rods of exit devices from the damaging impacts of carts or gurneys passing through doors. (If bottom rods become damaged, the exit device will not function as intended and can jeopardize the ability to exit safely during an emergency.)

In addition to protecting the vertical rod, the guard provides a smooth, unobstructed surface so the door can be pushed open easily with the bumpers of a wheelchair. The latch guard portion is 10" high. The standard latch guard features a 45° ramp. The extended latch guard offers a continuous ramp in 3' or 4' widths.

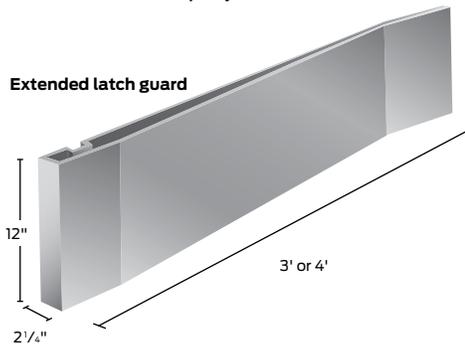

All stainless steel construction in US32D finish. Latch guards can cover latches as large as 1-1/4"W x 10"H x 1-7/8" projection.

Rod guard

Latch guard

Extended latch guard

### Models

RGO	Rod guard only (projection 1 3/16")
RG-27	Rod and latch guard
RG-27-3	3' (914 mm) Rod guard and extended latch guard
RG-27-4	4' (1219 mm) Rod guard and extended latch guard
LGO	Latch guard only
LGO-3	3' (914 mm) Extended latch guard only
LGO-4	4' (1219 mm) Extended latch guard only

When using on wood fire doors, high density block is required.

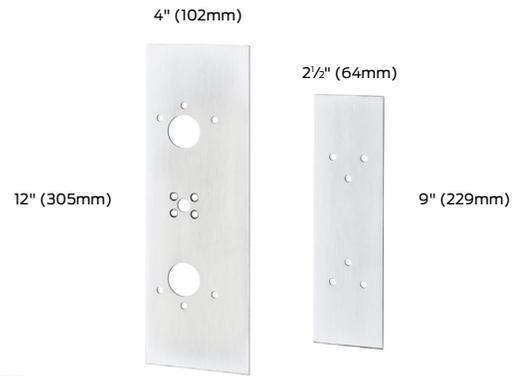

### To order, specify

1. Model number
2. Handing (except on RGO)
3. Door material if other than hollow metal
4. Optional sex bolt mounting available

### Cover plate kits

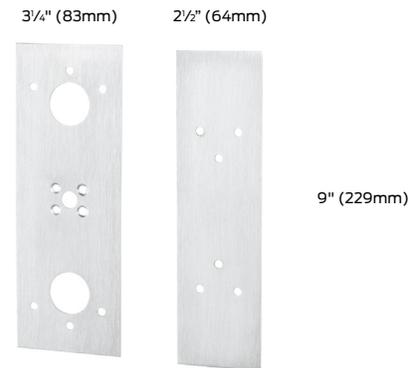

#### 882 kit

For use to cover mortise lock or discontinued device cut-outs. Specify finish.

#### 887 kit

Required for 88 rim/8827 vertical rod device combinations on pairs of doors with ANSI 161 cutout. (The 88 rim device backset is increased and exposes the 161 cutout when used with 8827).

#### 888 kit

Required for 8875 mortise or 8827 vertical rod devices on doors with ANSI 161 cutouts (device center case will not cover stock cutout).

### Axle security pin

Non-removable security pin can be inserted into lever arm axle to prevent tampering or removal of lever arm.

### To order, specify

3. Device type (889 kit only)

# Door kits

## Controls

### #10 WDA kit

Required when 373L or 377T controls are used on wood doors with the following devices: 88L, 8827L, 8827TL, 8827TL-F, or 8875L (kit covers cutout and prevents control from damaging door).

### 899 kit

Required when 373L controls are used with sex bolts (sex bolts must be used on wood or composite fire doors). Four studs on cover plate allow through-bolting to the device center case.

**VON DUPRIN®**

INPACT™  
94 and 95

Exit Device

# Introduction

## Flexible Solutions for Real-World Applications

There's a reason why customers have trusted Von Duprin® to keep them safe for more than 100 years. From robust materials to flexible design, Von Duprin products are engineered with you in mind. Quiet electric latch retraction (QEL) and field reversible handing provide versatility and allow 94/95 Series devices to be easily customized for your needs.

Commonly used in facilities where building openings must accommodate high volumes of people and equipment, the INPACT 94/95 Series provides a recessed push pad design that can reduce impact and protect it from abuse. A variety of finishes, trim functions and mechanical and electronic options allow you to accommodate for a variety of applications.

## Passion Driving Performance

Von Duprin's exit devices offer durable solutions that are proven in the field to perform under heavy use and abuse and backed by a team of experts experienced in door hardware application and code compliance. Allegion stands behind every Von Duprin product we make with unparalleled customer support thanks to our team of experts based in the U.S. that average more than 15 years of experience, so you are assured to receive expert advice.

# Popular applications and handling

## Single Door Applications

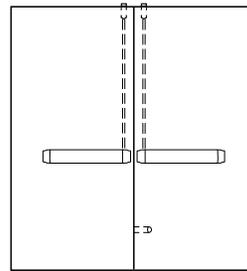

Single mortise lock device

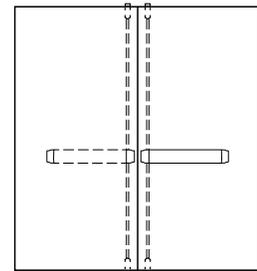

## Double Door Applications

Two concealed vertical rods same swing

Two fire exit hardware concealed vertical rods with auxiliary fire latch-LBR option

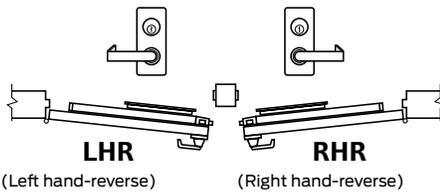

Two concealed vertical rods double egress

## Door handing

Left hand-reverse orientation

Right hand-reverse orientation

Outside

## INPACT™ trim operation

### Standard Trim

Lever 940L\*

Forged brass 1 3/8" (35mm) depth escutcheon. #06 lever is standard. Optional lever designs are available.

\* Blank escutcheon "BE" available. Example: 940L-BE.

### Optional Trim

Dummy Pull 550DT

Heavy aluminum forged brackets with 10" (254mm) stainless steel pullbar.

Thumbturn 376T

Forged brass 7/8" (22mm) escutcheon. It's often used with a 550DT pull trim.

Only available with concealed rod devices.

## 9475/9575 mortise lock device

**94/95 INPACT mortise lock device** for use on factory prepped steel doors, not available for wood doors. The INPACT device is UL listed for panic, ANSI/BHMA 156.3 Grade 1. The INPACT device is non-handed.

**Finishes** – 605, 606, 612, 625, 626, 628, 710

575 Strike

**Hex key dogging** comes standard on 94/95 Mortise lock device

### Specifications

Device functions	Device ships EO, DT, TL, L, NL Blank escutcheon (BE) available

# INPACT™ device options and accessories

## QEL – Quiet Electric Latch Retraction

The QEL feature allows for the remote unlatching of exit devices. A control station operator can flip a switch to retract the latch bolt and immediately change an exit door to push-pull operation. Different than the popular EL, the QEL quiet operation is achieved using an electric drive motor which retracts the latch bolt either momentary unlatching or for extended periods of time. This feature is an alternative to manual dogging.

QEL devices are also useful with automatic door operators, and may be applied to fire-rated applications when under the control of an automatic fire alarm system.

UL approved for Class II circuit applications.

The QEL option does not include the power transfer from door to frame, the power supply, or the control operator. Refer to EPT-2 power transfer and the PS902 or 914 power supply.

The PS902/914 with the 2RS, 4RL or 4R board is the minimum required. Other option boards available for other functions, see PS902/914 power supply for additional information.

The QEL has a low inrush current, so it can be used with standard Schlage power supplies. Calculate the peak current draw of all devices in the system to determine the required amperage of the supply.

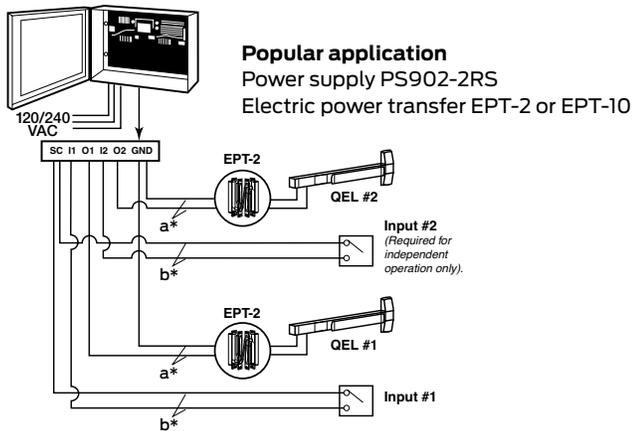

QEL electrical load	
Voltage	24VDC
Current	1.0 A Inrush (0.5 sec.) / 0.14 A Holding

The 900-2RS option board designed to control two electric latch retraction devices and provide time delay between the firing of outputs is required. The power transfer is also sold separately.

Schlage PS902	Schlage PS904	Schlage PS906
up to 2 amps	up to 4 amps	up to 6 amps

### To order, specify:

Standard — use prefix QEL, example QEL94L.  
 Special center case dogging — use prefix SD-QEL, example SD-QEL94L

a*	Distance (one-way)	Wire gauge
	200´	18 AWG
	320´	16 AWG
	500´	14 AWG
	800´	12 AWG

b*	Wire selection	Switch wire size
	1200 ft. Max.	18 gauge standard

## Latch Bolt Monitoring

The latch bolt monitor or (LX) feature gives an electronic signal when someone enters an opening from the trim side of the door. The device can then be connected to a security console or may be used as a single door alarm when used with a horn and power supply. The (LX) switch is located inside the device's pushpad on a concealed vertical rod device. For a mortise device, the switch is located inside the SS7500-IN mortise lock. Electrical Ratings: 0.5 Amp., 24 VDC.

**To Order:** Specify prefix LX.

## INPACT Accessories

Cylinders are not furnished with device or trim and must be specified when ordering. Mortise lock exit devices and the 940L use mortise-type cylinders.

## Less Bottom Rod

The less bottom rod (LBR) option is available for concealed vertical rod devices. In lieu of a bottom rod and latch, a spring-loaded auxiliary bolt is installed in the lower door edge.

When exposed to heat, during a fire, the auxiliary latch releases, keeping the doors in alignment and closed. UL listed for 3 hours on double egress doors and for 90 minutes on doors swinging in the same direction. The LBR option is not recommended for exterior door openings or where security is critical.

# INPACT™ integrated door system

## INPACT Recessed Exit Devices (94 and 95 Series)

INPACT door systems are designed to meet life safety and clear opening width requirements in cross corridor applications with factory installed Von Duprin 94 and 95 Series INPACT recessed exit devices. This Allegion all-in-one door solution uses L and T Series doors ordered from Steelcraft through pre-configured hardware system sets or choose the a-la-carte product option for a reliable assembly of industry-leading Allegion hardware options to meet the aesthetic and functional requirements of the opening.

## Pre-Configured Application System Sets

All hardware shown below is ordered from Steelcraft and ships with the INPACT door from Steelcraft. If required hardware is not provided in system sets, they may be ordered from Steelcraft as L or T Series doors prep only, with hardware ordered separately from Allegion brands for field installation.

	System set available												A la carte

**Notes:**

1. For system sets All hardware is installed or shipped with the door. Frame is ordered separately since frames are typically required earlier.
2. If ordering a la carte, changes to frames, hinges or closers may change your wall configuration, opening size and clear opening width.

## About Allegion

At Allegion (NYSE: ALLE), we design and manufacture innovative security and access solutions that help keep people safe where they live, learn, work and connect. We're pioneering safety with our strong legacy of brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Our comprehensive portfolio of hardware, software and electronic solutions is sold around the world and spans residential and commercial locks, door closer and exit devices, steel doors and frames, access control and workforce productivity systems.

## Engineered for value and performance

Von Duprin® empowers its customers to embrace change by providing flexible solutions that can be modified over time, protecting your investment well into the future. Von Duprin 98/99 Series push pad devices have a universal center case design that is unique to the industry and provides superior flexibility—from adding trim, switching handing or adding new retrofit options, you can configure numerous variations in the field without replacing your device.

Von Duprin's exit devices offer durable solutions that are proven in the field to perform under heavy use and abuse and backed by a team of experts experienced in door hardware application and code compliance. Allegion stands behind every Von Duprin product we make with unparalleled customer support thanks to our team of experts based in the U.S. that average more than 15 years of experience, so you are assured to receive expert advice.

Von Duprin exit devices are available in two external surface styles, designated 98 and 99 Series.

**Latch bolt**  
Deadlocking latch bolt provides security and improved performance at standard device cost.

**The Quiet One®**  
A fluid damper decelerates the push pad on its return stroke and eliminates most noise associated with exit device operations. Furnished on all 98/99 Series exit devices.

<b>KN</b>	Knurled touchbar
<b>SG</b>	Safety glow

#### Miscellaneous

<b>CE</b>	CE labeled
<b>LCP</b>	Less cover plate
<b>IOWDA</b>	#IOWDA cover plate

#### Door material

<b>AL</b>	Aluminum door
<b>HM</b>	Hollow metal
<b>WD</b>	Wood door
<b>CP</b>	Composite door
<b>INS2</b>	Insulclad - 1/2"
<b>INS4</b>	Insulclad - 1/4"

#### Door application

<b>D</b>	Double egress
<b>P</b>	Pair of doors
<b>S</b>	Single door

Note: Not all options are listed. See the specific device type pages for complete options available.

## Device types

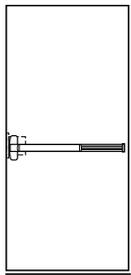

As the pioneer in the industry, Von Duprin continues to advance the industry through customer-centric innovation, which delivers solutions to the most challenging applications.

Backed by high quality standards, Von Duprin exit devices were among the first in the industry certified to ANSI/BHMA A156.3 Grade 1. Our exit devices are tested to the highest standards and proven in the field to perform under heavy use and abuse, giving you peace of mind both now and in the future.

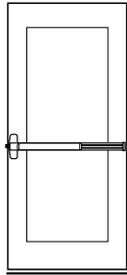

The versatile design can be easily upgraded to connect to a larger electronic ecosystem, empowering you to adapt with flexible solutions. You can configure numerous variations in the field without replacing your device and protecting your investment. This makes upgrades easy and cost-effective.

## Popular applications

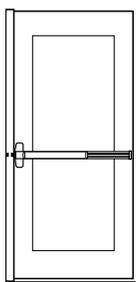

### Single door applications

Single mortise lock device

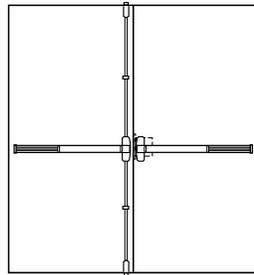

Single rim device

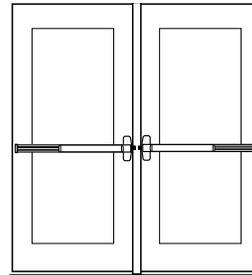

Single three-point latch device

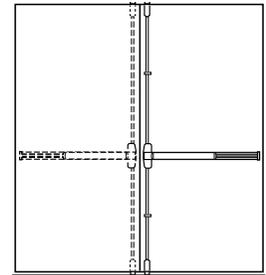

### Double door applications

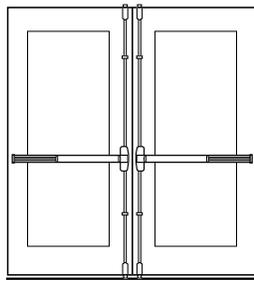

Mortise lock and surface mounted or concealed vertical cable/rod device combination—same direction

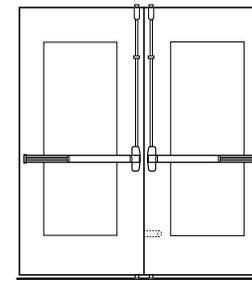

Two rim devices with mullion—same direction

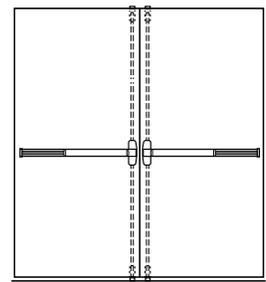

Two vertical rods—double egress  
Two surface/concealed rods or cables

Two surface mounted vertical rod devices—same direction\*

Two fire exit hardware vertical cables/rods with auxiliary fire latch-LBR option\*

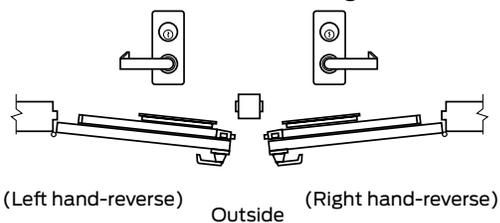

Two concealed vertical cables/rods\*

\* Do not use with overlapping astragals

### Door handing

Left hand-reverse orientation

Right hand-reverse orientation

# 98/99 Rim exit device

98 and 99 rim exit devices for all types of single and double doors with mullion, UL listed for panic exit hardware. Devices are certified to ANSI/BHMA A156.3 Grade 1. The 98 device has a smooth mechanism case and the 99 device has a grooved case. The rim device is non-handed except when the following device options are used: SD (special dogging), -2 (double cylinder) or SS (signal switch). Covers stock hollow metal doors with 86 or 161 -2SI (double cylinder with security indicator) cutouts on single doors (may cover cutouts on pairs – consult template).

### Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device	
Device lengths	3' 2'4" to 3' (711mm to 914mm)	Door size
	4' 2'10" to 4' (864mm to 1219mm)	Door size
Device centerline from finished floor	39 <sup>13</sup> / <sub>16</sub> " (1011mm)	
	39 <sup>11</sup> / <sub>16</sub> " (1008mm) with mullion	
Center case	8" x 2 <sup>3</sup> / <sub>4</sub> " x 2 <sup>3</sup> / <sub>8</sub> " (203mm x 70mm x 60mm)	
Mechanism case	2 <sup>1</sup> / <sub>4</sub> " x 2 <sup>1</sup> / <sub>4</sub> " (57mm x 57mm)	
Projection	Pushbar neutral – 3 <sup>13</sup> / <sub>16</sub> " (97mm) Pushbar depressed – 3 <sup>1</sup> / <sub>16</sub> " (78mm)	
Latch bolt	Deadlocking, <sup>3</sup> / <sub>4</sub> " (19mm) throw	
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)	
Fasteners and sex bolts (SNB)	Includes screw pack for 1 <sup>3</sup> / <sub>4</sub> " (44mm) and 2 <sup>1</sup> / <sub>4</sub> " (57mm) thick metal or wood doors (Optional 425 SNB available, see page 66 for quantities)	

### Features and options

#### Electrified options

- LX** Latch bolt monitor switch
- RX** Request to exit
- RX2** Double request to exit
- ESL** Emergency secure lockdown
- QEL** Quiet electric latch retraction
- SS** Signal switch
- CX** Chexit delayed exit
- ALK** Alarm exit kit
- WP-RX** Waterproof request to exit (option available to order with Outdoor Defense)
- CON** Allegion Connect

#### Mechanical options

- 2** Double cylinder
- 2SI** Double cylinder with security indicator
- AX** Accessible device
- FER** Fortified exit rim
- GBK** Glass bead kit
- OUT** Outdoor defense
- PN** Pneumatic latch retraction
- QM** Quiet mechanical
- SNB** Sex bolts
- SEC** Security screws
- WH** Weep holes (option available to order with Outdoor Defense)

#### Dogging feature

Hex key dogging standard

#### Dogging options

- CD** Cylinder dogging
- CD-CX** Chexit cylinder dogging
- CDSI** Cylinder dogging with security indicator
- HDSI** Hex dogging with security indicator
- SD** Special center case dogging
- LD** Less dogging
- DI** Dogging indicator
- CI** Cylinder dogging indicator

#### Strikes

**299** – Dull black

### Accessories

**299 Strike**  
Ships standard, optional strikes available.

**Hex key dogging**  
Comes standard on 98/99 rim exit devices.

## Device types

### 98-F/99-F Rim exit device

98-F and 99-F Rim fire exit devices are certified to ANSI/BHMA A156.3 Grade 1 and UL listed for fire exit hardware. See page 69 for detailed information on UL fire exit hardware label and door opening size information. The 98-F device has a smooth mechanism case and the 99-F device has a grooved case. The rim device is non-handed except when the following device options are used: -2 (double cylinder), -2SI (Double cylinder with security indicator) or SS (signal switch).

#### Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device
Device lengths	3' 2'4" to 3' (711mm to 914mm) Door size 4' 2'10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 <sup>13</sup> / <sub>16</sub> " (1011mm) 39 <sup>11</sup> / <sub>16</sub> " (1008mm) with mullion
Center case	8" x 2 <sup>3</sup> / <sub>4</sub> " x 2 <sup>3</sup> / <sub>8</sub> " (203mm x 70mm x 60mm)
Mechanism case	2 <sup>1</sup> / <sub>4</sub> " x 2 <sup>1</sup> / <sub>4</sub> " (57mm x 57mm)
Projection	Pushbar neutral – 3 <sup>13</sup> / <sub>16</sub> " (97mm) Pushbar depressed – 3 <sup>1</sup> / <sub>16</sub> " (78mm)
Latch bolt	Deadlocking, <sup>3</sup> / <sub>4</sub> " (19mm) throw
Finishes	605, 606, 612, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 <sup>3</sup> / <sub>4</sub> " (44mm) and 2 <sup>1</sup> / <sub>4</sub> " (57mm) thick metal or wood doors; Optional 425 SNB available for metal doors; 425 and 825 SNB required on wood doors without SLM blocking (See page 66 for quantities)

#### Accessories

##### 299F Strike

Ships standard, optional strikes available

##### 499F Strike

With 9854/9954 mullion

#### Features and options

##### Electrified options

<b>LX</b>	Latch bolt monitor switch
<b>RX</b>	Request to exit
<b>RX2</b>	Double request to exit
<b>ESL</b>	Emergency secure lockdown
<b>QEL</b>	Quiet electric latch retraction
<b>SS</b>	Signal switch
<b>CX</b>	Chexit delayed exit
<b>ALK</b>	Alarm exit kit
<b>WP-RX</b>	Waterproof request to exit (option available to order with Outdoor Defense)
<b>CON</b>	Alliegion Connect

##### Mechanical options

<b>-2</b>	Double cylinder
<b>-2SI</b>	Double cylinder with security indicator
<b>AX</b>	Accessible device
<b>GBK</b>	Glass bead kit
<b>OUT</b>	Outdoor defense
<b>PN</b>	Pneumatic latch retraction
<b>QM</b>	Quiet mechanical
<b>SNB</b>	Sex bolts
<b>SEC</b>	Security screws
<b>SLM</b>	Special laminate material blocking
<b>WH</b>	Weep holes (option available to order with Outdoor Defense)

##### Dogging option

No mechanical dogging;  
QEL options available

##### Strikes

299F – Dull black, 499F with mullions

## XP98/99 Rim exit device

XP98/99 Rim exit devices are designed for single and double doors with mullion that require increased security. The “smart” latch changes shape when subjected to external forces. This design enables the exit door to withstand an external attack and remain secure. Additionally, the patented latch bolt design provides greater, longer-lasting latch bolt to strike contact which is not easily affected by the twisting motion of a weakened frame, resulting in an opening that will remain strong. Devices are certified to ANSI/BHMA A156.3 Grade 1 and UL listed for panic exit hardware. The rim device is non-handed except when the following device options are used: SD (special dogging) or -2 (double cylinder). Covers stock hollow metal doors with 86 or 161 cutouts on single doors (may cover cutouts on pairs – consult template).

### Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device
Device lengths	3' 2'4" to 3' (711mm to 914mm) door size 4' 2'10" to 4' (864mm to 1219mm) door size
Device centerline from finished floor	39 13/16" (1011mm) 39 11/16" (1008mm) with mullion
Center case	8" x 2 3/4" x 2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm) Pushbar depressed – 3 1/16" (78mm)
Latch bolt	Deadlocking, 3/4" (19mm) throw
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) and 2 1/4" (57mm) thick metal or wood doors (Optional 425 SNB available, see page 66 for quantities)

### Features and options

#### Electrified options

<b>LX-LC</b>	Latch bolt monitor switch, low current
<b>RX</b>	Request to exit
<b>RX2</b>	Double request to exit

#### Strikes

909 – Dull black

### Accessories

#### 909 Strike

Ships standard for single or double doors.

#### XP latch

Provides increased security with its two piece design.

#### Hex key dogging

Comes standard on 98/99 rim exit devices.

## Device types

### XP98-F/99-F Rim exit device

XP98/99 Rim fire exit devices are certified to ANSI/BHMA A156.3 Grade 1 and UL listed for fire exit hardware. See page 69 for detailed information on UL fire exit hardware label and door opening size information. These are designed for single and double doors with 9954-XP mullion that require increased security. The “smart” latch changes shape when subjected to external forces. This design enables the exit door to withstand an external attack and remain secure. Additionally, the patented latch bolt design provides greater, longer-lasting latch bolt to strike contact which is not easily affected by the twisting motion of a weakened frame, resulting in an opening that will remain strong. The rim device is non-handed except when the following device option is used: -2 (double cylinder). Covers stock hollow metal doors with 86 or 161 cutouts on single doors (may cover cutouts on pairs – consult template).

#### Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device
Device lengths	3' 2 1/4" to 3' (711mm to 914mm) Door size 4' 2 10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 13/16" (1011mm) 39 11/16" (1008mm) with mullion
Center case	8" x 2 3/4" x 2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97 mm) Pushbar depressed – 3 1/16" (78 mm)
Latch bolt	Deadlocking, 3/4" (19mm) throw
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) and 2 1/4" (57mm) thick metal or wood doors. Optional 425 SNB available for metal doors. 425 and 825 SNB required on wood doors without SLM blocking (See page 66 for quantities)

#### Accessories

**909 Strike**  
Ships standard for single doors.

**XP latch**  
Provides increased security with its two piece design.

**954 Strike**  
For fire rated double doors and 9954XP mullion.

#### Features and options

##### Electrified options

**954** – Dull black, fire rated double doors

# 9875/9975 Mortise lock device

9875/9975 Mortise lock device for all types of single or double doors, UL listed for panic exit hardware. Devices are certified to ANSI/BHMA A156.3 Grade 1. Fits stock hollow metal doors with 86 cutout and door stiles as narrow as 4 3/4" (121mm). The 9875 device has a smooth mechanism case and the 9975 device has a grooved case. The mortise lock device is non-handed except when the following device options are used: -2 (double cylinder), -2SI (double cylinder with security indicator) or SS (signal switch).

The 7500 Mortise lock is equipped with a 3/4" (19mm) anti-friction latch bolt which is field reversible without removing the lock from the door. It has a non-handed auxiliary bolt for deadlocking and a faceplate with an adjustable bevel.

### Specifications

Device functions	Device ships setup for EO/DT/NL functions. Instructions show how to set up the device in the field for use with TP, K, and L classroom function trims.
Device lengths	3' 2'4" to 3' (711mm to 914mm) Door size 4' 2'10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 5/8" (1006mm)
Center case	8" x 2 3/4" x 2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm) Pushbar depressed – 3 1/16" (78mm)
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) and 2 1/4" (57mm) thick metal or wood doors. (Optional 425 SNB available, see page 66 for quantities)

#### Strikes

- 575** – Dull black

### Accessories

**7500 Mortise lock**

**575 Strike**

**Hex key dogging**  
Comes standard on 9875/9975 mortise lock exit devices.

## Device types

# 9875-F/9975-F Mortise lock fire exit device

9875-F/9975-F Fire exit mortise lock devices are certified to ANSI/BHMA A156.3 Grade 1 and UL listed for fire exit hardware. See page 69 for detailed information on UL listed fire exit hardware label and door opening size information. Fits door stiles as narrow as 4 3/4" (121mm). The 9875-F device has a smooth mechanism case and the 9975-F device has a grooved case. The mortise lock device is non-handed except when the following device options are used: -2 (double cylinder), -2SI (double cylinder with security indicator) or SS (signal switch) devices.

The 7500 Mortise lock is equipped with 3/4" (19mm) anti-friction latch bolt which is field reversible without removing the lock from the door. It has a non-handed auxiliary bolt for deadlocking and a faceplate with an adjustable bevel.

# 9827/9927 Surface mounted vertical rod device

9827/9927 Surface mounted vertical rod device for all types of single or double doors, UL listed for panic exit hardware. Devices are certified to ANSI/BHMA A156.3 Grade 1. Covers stock hollow metal doors with 86 or 161 cutouts. The 9827 device has a smooth mechanism case and the 9927 device has a grooved case. The surface vertical rod device is non-handed except when the following device options are used: -2 (double cylinder), -2SI (double cylinder with security indicator), SD (special dogging), SS (signal switch) or WS (tornado/hurricane). Vertical rod and latch guards are available to protect the bottom rod of the exit device from damage by impacts of carts or gurneys passing through doors.

### Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device
Device lengths	2' 2' (610 mm) Door size 3' 2'4" to 3' (711mm to 914mm) Door size 4' 2'10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 5/8" (1006 mm)
Center case	8" x 2 3/4" x 2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm) Pushbar depressed – 3 1/16" (78mm)
Latch bolt	Deadlocking anti-friction top and bottom bolt, 5/8" (16mm) throw
Door undercut	1/4" (7mm) recommended
Top and bottom latch case	4 1/2" x 2 1/8" x 1 1/2" (114mm x 54mm x 38mm)
Vertical rods	1/2" square tubing, standard rods accommodate 7' (2134mm) doors. Top rod length: 34 15/16" (887mm); Bottom rod length: 31 1/2" (794mm). Extension rods available in 3' (914mm) for doors over 7'; One piece top rod is available for 8' (2438mm) and 10' (3048mm) doors
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) to 2 1/4" (57mm) thick metal or wood doors, and 325 SNB for top and bottom latch. (Optional 425 SNB available)

### Features and options

#### Electrified options

- LX** Latch bolt monitor switch
- RX** Request to exit
- RX2** Double request to exit
- ESL** Emergency secure lockdown
- QEL** Quiet electric latch retraction
- SS** Signal switch
- CX** Chexit delayed exit
- ALK** Alarm exit kit
- WP-RX** Waterproof request to exit (option available to order with Outdoor Defense)
- CON** Allegion Connect

#### Mechanical options

- 2** Double cylinder
- 2SI** Double cylinder with security indicator
- AX** Accessible device
- GBK** Glass bead kit
- LBR** Less bottom rod
- OUT** Outdoor defense
- PL** Pullman latch
- PN** Pneumatic latch retraction
- QM** Quiet mechanical
- SNB** Sex bolts
- SEC** Security screws
- WH** Weep holes (option available to order with Outdoor Defense)
- WS** Tornado and hurricane tested

#### Dogging feature

Hex key dogging standard

#### Dogging options

- CD** Cylinder dogging
- CDSI** Cylinder dogging with security indicator
- HDSI** Hex dogging with security indicator
- SD** Special center case dogging
- LD** Less dogging
- DI** Dogging indicator
- CI** Cylinder dogging indicator

#### Strikes

- Top – 299 – Dull black**
- Bottom – 248L4 and 304L – Unfinished**

### Accessories

**299 Top strike**

**Top latch**

**304L Bottom strike**

**248L4 Bottom strike**  
For use with flat threshold

**Bottom latch**

**Hex key dogging**  
Comes standard on 9827/9927 devices.

## Device types

# 9827-F/9927-F Surface mounted vertical rod fire device

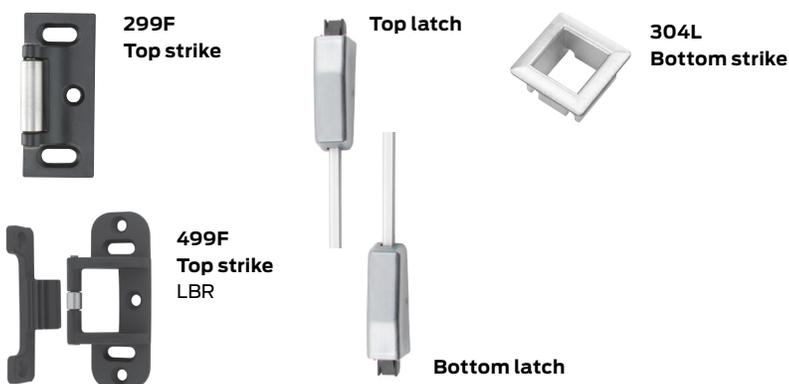

9827-F/9927-F Fire exit surface mounted vertical rod device are certified to ANSI/BHMA A156.3 Grade 1 and UL listed for fire exit hardware. See page 69 for detailed information on UL fire exit hardware label and door opening size information. The 9827-F device has a smooth mechanism case and the 9927-F device has a grooved case. The surface vertical rod device is non-handed except when the following device options are used: -2 (double cylinder), -2SI (double cylinder with security indicator), SS (signal switch), and WS (tornado/hurricane). Vertical rod and latch guards are available to protect the bottom rod of the exit device from damage by impacts of carts or gurneys passing through doors. Rod and latch guards can be used on hollow metal or tin clad composite fire doors.

### Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device
Device lengths	2' 2' (610 mm) Door size 3' 2'4" to 3' (711mm to 914 mm) Door size 4' 2'10" to 4' (864 mm to 1219 mm) Door size
Device centerline from finished floor	39 5/8" (1006 mm)
Center case	8" x 2 3/4" x 2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97 mm) Pushbar depressed – 3 1/16" (78 mm)
Latch bolt	Deadlocking anti-friction top and bottom bolt, 5/8" (16mm) throw

Top and bottom latch case	4 1/2" x 2 1/8" x 1 1/2" (114mm x 54mm x 38mm)
Vertical rods	1/2" square tubing, standard rods accommodate 7' (2134mm) doors. Top rod length: 34 15/16" (887mm); Bottom rod length: 31 1/2" (794mm). Extension rods available in 3' (914mm) for doors over 7' One piece top rod is available for 8' (2438mm) and 10' (3048mm) doors
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) to 2 1/4" (57mm) thick metal or wood doors, and 325 SNB for top and bottom latch (Optional 425 SNB available)

### Accessories

### Features and options

#### Electrified options

<b>LX</b>	Latch bolt monitor switch
<b>RX</b>	Request to exit
<b>RX2</b>	Double request to exit
<b>ESL</b>	Emergency secure lockdown
<b>QEL</b>	Quiet electric latch retraction
<b>SS</b>	Signal switch
<b>CX</b>	Chexit delayed exit
<b>ALK</b>	Alarm exit kit
<b>WP-RX</b>	Waterproof request to exit (option available to order with Outdoor Defense)
<b>CON</b>	Alliegion Connect

#### Mechanical options

<b>-2</b>	Double cylinder
<b>-2SI</b>	Double cylinder with security indicator
<b>AX</b>	Accessible device (LBR only)
<b>GBK</b>	Glass bead kit
<b>LBR</b>	Less bottom rod
<b>OUT</b>	Outdoor defense
<b>PL</b>	Pullman latch
<b>PN</b>	Pneumatic latch retraction
<b>QM</b>	Quiet mechanical
<b>SNB</b>	Sex bolts
<b>SEC</b>	Security screws
<b>SLM</b>	Special laminate material blocking
<b>WH</b>	Weep holes (option available to order with Outdoor Defense)
<b>WS</b>	Tornado and hurricane tested

#### Dogging option

No mechanical dogging;  
QEL options available

#### Strikes

**Bottom** – 304L – Unfinished

# 9857/9957 Three-point latching device

9857/9957 Three-point latching device for all types of single or double doors, UL listed for panic exit hardware. Devices are ANSI A156.3 Grade 1. Covers stock hollow metal doors with 86 or 161 cutouts. The 9857 device has a smooth mechanism case and the 9957 device has a grooved case. The three-point latching device is non-handed except when the following device options are used: -2 (double cylinder), -2SI (double cylinder with security indicator), SD (special dogging), SS (signal switch), or WS (windstorm). Vertical rod and latch guards are available to protect the bottom rod of the exit device from damage by impacts of carts or gurneys passing through doors.

### Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device.
Device lengths	3' 2 1/4" to 3' (711mm to 914mm) Door size 4' 2 10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 13/16" (1011mm)
Center case	8" x 2 3/4" x 2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm) Pushbar depressed – 3 1/16" (78mm)
Latch bolt	Deadlocking anti-friction top and bottom bolt, 5/8" (16mm) throw; Deadlocking rim bolt, 3/4" (19mm) throw
Door undercut	1/4" (7mm) recommended
Top and bottom latch case	4 1/2" x 2 1/8" x 1 1/2" (114mm x 54mm x 38mm)
Vertical rods	1/2" square tubing, standard rods accommodate 7' (2134mm) doors. Top rod length: 34 15/16" (887mm); Bottom rod length: 31 1/2" (794mm). Extension rods available in 3' (914mm) for doors over 7'. One piece top rod is available for 8' (2438mm) and 10' (3048mm) doors.
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) to 2 1/4" (57mm) thick metal or wood doors, and 325 SNB for top and bottom latch (Optional 425 SNB available)

### Features and options

#### Electrified options

- LX** Latch bolt monitor switch
- RX** Request to exit
- RX2** Double request to exit
- ESL** Emergency secure lockdown
- QEL** Quiet electric latch retraction
- SS** Signal switch
- CX** Chexit delayed exit
- ALK** Alarm exit kit
- WP-RX** Waterproof request to exit
- CON** Allegion Connect

#### Mechanical options

- 2** Double cylinder
- 2SI** Double cylinder with security indicator
- GBK** Glass bead kit
- PL** Pullman latch
- PN** Pneumatic latch retraction
- SNB** Sex bolts
- SEC** Security screws
- WH** Weep holes
- WS** Tornado and hurricane tested

#### Dogging feature

Hex key dogging standard

#### Dogging options

- CD** Cylinder dogging
- CD-CX** Chexit cylinder dogging
- CDSI** Cylinder dogging with security indicator
- HDSI** Hex dogging with security indicator
- SD** Special center case dogging
- LD** Less dogging
- DI** Dogging indicator
- CI** Cylinder dogging indicator

#### Strikes

**Top and middle – 299 – Dull black**  
**Bottom – 248L4 and 304L – Unfinished**

### Accessories

**299**  
**Top and middle strike**

**Top latch**

**Bottom latch**

**304L**  
**Bottom strike**

**248L4**  
**Bottom strike**  
For use with flat threshold

**Hex key dogging**  
Comes standard on 9857/9957 three point latching devices.

## Device types

# 9857-F/9957-F Three-point latching fire exit device

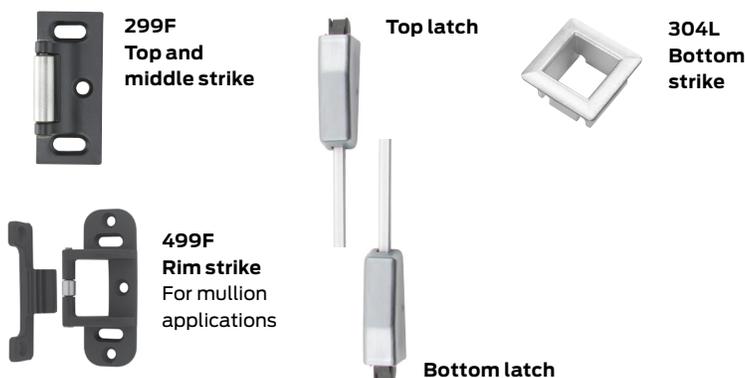

9857-F/9957-F Fire exit three-point latching device are UL listed for fire exit hardware. See page 69 for detailed information on UL listed fire exit hardware label and door opening size information. Devices are ANSI A156.3 Grade 1. The 9857-F device has a smooth mechanism case and the 9957-F device has a grooved case. The three-point latch device is non-handed except when the following device option is used: -2 (double cylinder), -2SI (double cylinder with security indicator), SS (signal switch) or WS (windstorm). Vertical rod and latch guards are available to protect the bottom rod of the exit device from damage by impacts of carts or gurneys passing through doors.

# 9847/9947 Concealed vertical rod device

9847/9947 Concealed vertical rod device for use on single or double metal doors, UL listed for panic exit hardware. These are certified to ANSI/BHMA A156.3 Grade 1. The 9847 device has a smooth mechanism case and the 9947 device has a grooved case. The concealed vertical rod device is non-handed except when the following device options are used: -2 (double cylinder), -2SI (double cylinder with security indicator), SD (special dogging), or SS (signal switch).

### Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device.
Device lengths	2' 2' (610mm) Door size 3' 2'4" to 3' (711mm to 914mm) Door size 4' 2'10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 5/8" (1006 mm) Standard Adjustable from 35 5/8" (905mm) to 49 5/8" (1260mm)
Center case	8" x 2 3/4" x 2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm) Pushbar depressed – 3 1/16" (78mm)
Latch bolt	Deadlocking top and bottom bolt, 5/8" (16mm) throw
Door undercut	1/4" (7mm) recommended
Top and bottom latch case	4 1/2" x 2 1/8" x 1 1/2" (114mm x 54mm x 38mm)
Vertical rods	Round 2-piece adjustable rods – Top rod adjustable from 6'8" (2027mm) to 8'4" (2533mm). Bottom rod adjustable 35 5/8" (905mm) to 49 5/8" (1260mm). Extension rod kits available for doors over 8'4" (2533mm).
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) to 2 1/4" (57mm) thick metal doors (Optional 425 SNB available)

Comes standard on 9849/9949 concealed vertical cable devices

Nominal door opening height		Top cable part number	Bottom cable part number
72" - 82"	6'0" - 6'10"	47250398	47250403
<b>*82" - 96"</b>	<b>*6'10" - 8'</b>	<b>47250175</b>	<b>47250178</b>
>96" - 110"	>8'0" - 9' 2"	47250176	47250179
>110" - 120"	>9'2" - 10'	47250177	47250180

\*Default door opening height. Specify door opening height if other than the default. For door heights less than 6'0" and greater than 10', contact our Customer Care department to discuss your specific application needs.

**Door opening height** is distance from bottom of frame header to finished floor.

See table on left for standard offering.

# 9849-F/9949-F Concealed vertical cable fire exit device

98/9949-F Concealed vertical cable devices are certified to ANSI/BHMA A156.3 Grade 1 and UL listed for fire exit hardware. See page 69 for detailed information on UL listed fire exit hardware label and door opening size information. The 9849 device has a smooth mechanism case and the 9949 device has a grooved case. The concealed vertical cable device is non-handed except when the following device options are used: -2 (double cylinder), -2SI (double cylinder with security indicator), SD (special dogging), or SS (signal switch).

### Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device
Device lengths	2' 2' (610 mm) Door size 3' 2'4" to 3' (711mm to 914mm) Door size 4' 2'10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 5/8" (1006 mm) Standard
Center case	8" x 2 3/4" x 2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm) Pushbar depressed – 3 1/16" (78mm)
Latch bolt	Deadlocking anti-friction top and bottom bolt, 5/8" (16mm) throw
Door undercut	3/4" (19mm) maximum (24231516 spacer block kit needed for 3/4" undercut)
Top and bottom Latch case	5 13/16" x 1 1/4" x 1 1/16" (147mm x 32mm x 37mm)
Vertical cable	7/32" (6mm) Diameter stainless steel cables
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) to 2 1/4" (57mm) thick metal doors (Optional 425 SNB available)

### Features and options

#### Electrified options

- LX\*** Latch bolt monitor switch
- RX** Request to exit
- RX2** Double request to exit
- ESL** Emergency secure lockdown
- QEL** Quiet electric latch retraction
- SS** Signal switch
- CX** Chexit delayed exit
- ALK** Alarm exit kit
- WP-RX** Waterproof request to exit
- CON** Allegion Connect

#### Mechanical options

- 2** Double cylinder
- 2SI** Double cylinder with security indicator
- AX** Accessible device
- GBK** Glass bead kit
- LBL** Less bottom latch
- PN** Pneumatic latch retraction
- SG** Safety glow
- SNB** Sex bolts
- SEC** Security screws
- WH** Weep holes

#### Dogging feature

Hex key dogging standard

#### Dogging options

- CD** Cylinder dogging
- CD-CX** Chexit cylinder dogging
- CDSI** Cylinder dogging with security indicator
- HDSI** Hex dogging with security indicator
- SD** Special center case dogging
- LD** Less dogging
- DI** Dogging indicator
- CI** Cylinder dogging indicator

#### Strikes

- Top – 249** – Unfinished
- Bottom – 349** – Unfinished

\*For 98/9949 devices, LX switch monitors trim input or electrified dogging of EL/QEL devices. LX switch does not monitor latch bolt condition.

## Trim functions

Von Duprin protects your investment by empowering you to adapt with flexible solutions and modular options. The 98/99 Series features numerous trim options to serve your different needs. Designed with flexibility in mind, our solutions offer ease of adding new options as they are developed.

With Von Duprin, you can be confident that as the needs of your facility change, our products can be upgraded easily to meet your needs, especially as the mechanical and electronic technology converge. Von Duprin's versatile design enables you to add functionality to existing devices in a cost-effective way, protecting your investment well into the future.

A variety of device trim lock type functions such as key lock and unlock, latch bolt retraction with key and no cylinder designs for an "always operable" function are available in levers, knobs, latches, thumbpiece and thumbturn designs.

	<p><b>EO No outside trim</b></p> <ul style="list-style-type: none"> <li>Exit only</li> </ul>		<p><b>DT Dummy trim</b></p> <ul style="list-style-type: none"> <li>Pull when dogged (not recommended for fire device)</li> </ul>		<p><b>NL Night latch</b></p> <ul style="list-style-type: none"> <li>Key retracts latchbolt</li> <li>Rim and 1 1/4" mortise cylinder</li> </ul>

## Optional trim

### Schlage® HL6 quiet hospital push/pull latch

Von Duprin and Schlage® have collaborated on an exit device trim that provides both accessibility and performance. In combination, the 98/9975 mortise lock device along with the newly designed Schlage HL6 quiet hospital push/pull latch delivers an exit device with mortise lock durability that utilizes an easy to use, ADA compliant push/pull trim. The HL6 is now 50% quieter through dampened paddle action, reducing the noise associated with lock operation providing healthcare organizations a reliable solution for noise reduction initiatives. The 98/9975HL device is available in most standard architectural finishes, including antimicrobial options. Consult the HL Series [catalog](#) or [data sheet](#) for complete product information.

### 392-7 Offset pull

The 392-7 Offset pull is 3/4" round stainless steel, with a 7" center to center which matches the 98/99 center case. Often used with a night latch operation. 3 1/2" (89mm) offset with 1 1/2" (38mm) clearance.

Order Exit device as Exit Only (EO) or Night Latch - Omit Pull (NLOP) and order pull as a separate line item.

### Vandal resistant trim: Ives VR910 and VR914 Series

VR910 black grip for softer touch and resilience to temperature extremes. VR914 grip in all stainless steel. Grip designed for comfortable operation.

#### Features

- Stainless steel construction, 11 gauge (0.120" thick); 630 finish only
- Thru-bolts and rugged mounting screws for maximum fastening strength
- Built-in lock protector prevents vandalism to mortise latch bolt (available on certain models)
- Extra-tough stainless steel cylinder collar prevents pipe wrench or similar tool from damaging cylinder; tapered design prevents side impacts from transferring directly to cylinder; collar spins freely.
- Furnished with mounting screws for door thicknesses of 1 3/4" to 2 1/4"
- 1 1/2" (38mm) clearance from grip to door, total projection 1 7/8" (48mm)
- Consult the Ives catalog for more information

Order the exit device Exit Only (EO) and the VR trim separately from Ives.

Model	For use with	Size
VR910DT and VR914DT	98/99 Rim or vertical rod device	5 1/2" x 11" (133mm x 279mm)

# Electronic locks from Schlage

## AD Series

The AD Series was designed to be the right choice for today, and is ready to adapt to whatever the future holds.

There are a variety of options that allow you to select the AD Series electronic lock that's right for you, and a wide selection of features that can be configured in the field to further customize each opening. When your needs change in the future, the innovative modular design of the AD Series allows you to easily upgrade the credential reader or networking option, and adapt to emerging technologies using your existing chassis – all without taking the lock off the door. This means that you can be confident that your choice of the AD Series is right for today, and that your investment will be protected into the future.

## Credential reader options

AD Series electronic locks are compatible with many different credential types.

- Multi-technology (reads 125 kHz prox and 13.56 MHz smart)
- Smart - iClass compatible  
+ KEYPAD
- Magnetic stripe (swipe)  
+ KEYPAD
- Keypad

## Communication options

### Networked

In facilities where increased monitoring and control are needed, a networked solution is essential.

The AD Series networked options feature:

- Open architecture platform
- Reliable 900 MHz communication on wireless locks
- Real-time monitoring

The AD Series networked lock is available in either a wireless or hardwired configuration to fit your application needs.

- **AD-300** Networked hardwired locks
- **AD-302** Networked hardwired FIPS 201-2 integration-ready locks
- **AD-400** Networked wireless locks
- **AD-402** Networked wireless FIPS 201-2 integration-ready locks

## Standalone

Standalone locks are a cost-effective solution for doors that do not require real-time monitoring.

The AD Series standalone solution provides:

- Option for future upgrade to networked wireless
- Improved credential management
- Audit trail reports

Schlage offers one AD Series standalone solution to fit your environment:

- **AD-200** Access rights are stored on the lock

## Chassis

- Cylindrical
- Mortise
- Mortise deadbolt
- Exit trim<sup>1</sup>

## Locking functions<sup>2</sup>

- Classroom/storeroom
- Office
- Privacy
- Apartment

## Certifications

- ANSI/BMHA A156.25
- ANSI/BHMA Grade 1
- UL 294 listed
- UL 10C
- ADA
- FCC part 15
- RoHS

## Complete your system

Complete your AD Series system with readers, credentials, system components, and other wireless accessories.

1. See AD Series exit trim compatibility data sheet for complete list of compatibility by manufacturer.
2. Lock function capability varies depending on Physical Access Control Software (PACS) OEM integration design.

## CO Series

In the world of standalone electronic locks, CO Series offers simple solutions for access control. These easy-to-use, versatile locks can be applied anywhere there is a need to control access without distributing keys. The popular CO-100 is a simple lock that momentarily unlocks with a valid PIN code entry. It can be used indoors or out and allows administrators a variety of command options. The Series also includes CO-200. These computer programmable locks can provide audit trails and feature dual credential options (card+PIN) that provide an even greater level of security.

## Compatibility

The CO Series offers a wide range of applications and can be used alongside other Schlage electronic locks. They feature expanded cylinder, exit device, and credential compatibility.

# Electronic locks from Schlage

## Exit device compatibility<sup>1</sup>

	Rim	SVR <sup>2</sup>	CVR/CVC	Mortise
Von Duprin 98/99 and 98/99 XP	✓	✓	✓	✓
Von Duprin 22/22F	✓	✓		
Falcon 25	✓			

1. See CO Series exit trim compatibility datasheet for complete list of compatibility by manufacturer.  
 2. CO-220 is not compatible with surface vertical rod (SVR) devices.  
 Note: Exit device must be ordered as Exit Only (EO).

## Credential compatibility

### CO-100

- Manually programmable
- Keypad only
- User rights stored on the lock
- Remote release, outdoor use and occupancy indication options

### CO-200

- Computer or manually programmable
- Keypad, magnetic stripe (+PIN), proximity (+PIN)
- User rights stored on the lock
- Ability to provide schedules and audits

## Chassis

- Cylindrical
- Mortise
- Mortise deadbolt
- Exit trim

## Functions

- Classroom/storeroom
- Office
- Privacy

## Power

- 4 standard (AA) batteries

## Reliability

When it comes to securing your facility, you can't afford to take chances. CO Series locks are tested to the highest quality and reliability standards in the industry, including:

- ANSI/BHMA A156.25 and ANSI/BHMA Grade 1
- UL 294
- UL 10C
- ADA

## XE360™ Series

The XE360 Series is the next generation of wireless locks from Schlage. The sleek design offers customers a solution that looks as good as it performs – at an affordable price point.

### Features and Benefits

- Next level design inside and out
- Credential support includes Schlage MIFARE®, Bluetooth® and NFC mobile<sup>1</sup>
- Available with LED indicator, interior push button, or deadbolt with thumbturn
- Advanced encryption keeps data and communications safe
- Wireless configuration using connected smartphones or tablets
- No-Tour or offline system capability
- Ready for the future with the innovative Flex Module™ that allows for communication type, memory and encryption upgrades
- Utilizes a heavy-duty Grade 1 mortise chassis for exceptional quality and reliability
- Open architecture – interoperable and simple for software alliances to integrate
- Works seamlessly with other Schlage wireless locks, including Schlage Control<sup>2</sup>
- Uniquely concealed key override standard on all locks

1. Dependent on access control software provider support of specific mobile credentials.

2. Check with your Proptech or PACS provider for specific support.

### Chassis

- Mortise
- Mortise deadbolt
- Tubular
- Exit trim

- FL3905<sup>4</sup>

### Compatibility

The XE360 exit trim is currently compatible with rim and surface vertical rod styles of the following exit devices:

- Falcon 25
- Von Duprin 98/99; XP98/99 rim
- Von Duprin 22

### Exit device compatibility<sup>1</sup>

	Rim	SVR <sup>2</sup>	CVR/CVC	Mortise
Von Duprin 98/99 and 98/99 XP	✓	✓	✓	✓
Von Duprin 22/22F	✓	✓		
Falcon 25	✓			

## Dogging options

### Cylinder dogging (CD)

Cylinder dogging is available on all 98/99

Panic exit devices to replace the standard hex key dogging. Unit requires a standard 1 1/4" (32mm) mortise cylinder with an inverted straight cam. When ordering, reference Schlage cylinder 20-001, 1 1/4", XQ11-949. This provides the L583-477 cam inverted at the factory.

**To order, specify:** Use prefix, CD, example CD99L

### Less dogging (LD)

Less dogging is available in all 98/99 Panic exit devices to remove the dogging option.

**To order, specify:** Use prefix LD, example LD99L

### Special center case dogging (SD)

Special cylinder dogging in the center case is available for Chexit, QEL, ALK panic devices to allow for mechanical push/pull operation. With this option, the latch bolt is held retracted and pushbar is still operable. Specify handing—RHR or LHR.

SD requires 1 1/4" (32mm) mortise cylinder with an inverted straight cam. When ordering, reference Schlage cylinder 20-001, 1 1/4", XQ11-949. This provides the L583-477 cam inverted at the factory.

Note: Available on rim and vertical panic exit devices only.

**To order, specify:**

1. Prefix SD, example SD99L and Handing.
2. Not for 98/9975 Devices.

### Cylinder dogging kit\* (CDK)

For field conversion, from hex key dogging, conversion kit is available.

**To order, specify:** 99CDK or 98CDK, specify finish.

\*Cannot be added to fire exit hardware.

### Hex key dogging kit\* (HDK)

For field conversion, from cylinder dogging, conversion kit is available.

**To order, specify:** 99HDK or 98HDK, specify finish.

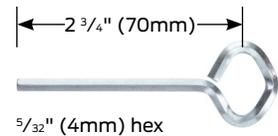

\*Cannot be added to fire exit hardware.

### Dog keys

#### Dog key (old style)

#### Dog key (standard)

### Dogging indicator (CI/DI)

- Red indicator light blinks every 5 seconds when not dogged, visible from over 75 feet away
- Available in a hex or cylinder dogging format
- Designed for battery life over one year
- Available as a factory option or field retrofit kit
- Designed for device with mechanical dogging built after 1997

**To order, specify:**

As device option:

1. DI99EO 3' 630 (hex dogging)
2. CI98EO 4' 628 (cylinder dogging)

As retrofit kit:

1. DI Retrofit Kit 3' 662 (hex dogging)
2. CI Retrofit Kit 4' 613 (cylinder dogging)

## Mechanical options

### Classroom security/security indicators

Designed for high use and abuse institution environments, such as schools and hospitals, these Von Duprin products are recommended for the following applications.

#### Visual verification

Reduce the time it takes to tour your facility and ensure each door is secure by installing the Von Duprin security indicator to provide at-a-glance visual verification.

#### Lockdown

Lock down high occupancy areas such as auditoriums, cafeterias and gymnasiums, from inside the room with the Von Duprin security indicator that provides positive visual confirmation.

#### Features and benefits

- Lockdown solution that meets fire and life safety codes for free egress
- Modular conversion kits allow you to quickly and easily upgrade your existing devices

-2SI security indicator with double cylinder

- Lock/unlock directional indicators provide a clear direction of rotation to secure opening
- Available for 98/99 Series devices

CDSI/HDSI dogging indicator

- Hex or cylinder dogging options
- Visual indication of whether the exit device is dogged or undogged
- Available for 98/99 & 33A/35A Series panic devices

#### Dogging security indicators (CDSI/HDSI)

The CDSI/HDSI dogging indicator provides an at-a-glance verification of the status of the door from inside of the room. Visible "LOCKED" and "UNLOCKED" indicators show whether the device is undogged or dogged. This feature can be used with hex key (HDSI) or cylinder dogging (CDSI) options on various device types—rim, mortise and vertical systems. (See minimum door charts for CDSI and HDSI to the right).

#### To order, specify:

1. Cylinder dogging security indicator: Prefix CDSI.
2. Hex dogging security indicator: Prefix HDSI.
3. Above options cannot be used with fire-rated devices and are recommended for use in combination with the following trim functions: DT, K-DT, L-DT, EO, NL, K-NL, L-KC, L-NL, NL-OP.

#### Double cylinder with security indicator (-2SI)

The -2SI has an interior key cylinder which locks or unlocks the lever trim from interior side of the door. The accompanying directional indication aids in operation. In addition, the status indicator provides at-a-glance verification of the LOCKED/UNLOCKED status of the door from inside of the room. This option can be ordered as a new product or as a retrofit conversion kit to an existing 98/99 device.

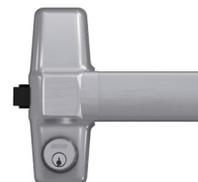

#### To order, specify:

1. Suffix: -2SI double cylinder with security indicator.
2. Specify device type, available with L and L-BE functions.
3. Specify handing and finish.

Cylinders are sold separately. Schlage rim cylinders 20-021 (keyed), XB11-979 and XB13-379 (thumbturns) are recommended.

#### Double cylinder

Double cylinder features an inside key cylinder which locks or unlocks the outside trim from inside a room. Clear lock/unlock icons provide directional indication to secure opening. This option can be ordered as a new product or as a retrofit conversion kit to an existing 98/99 device.

#### To order, specify:

1. Suffix -2 double cylinder.
2. Specify device type, available with L and L-BE functions.
3. Specify handing and finish.

Note: Cylinders are sold separately. Schlage rim cylinders 20-021 (keyed), XB11-979 and XB13-379 (thumbturns) are recommended.

**WARNING:** Double cylinder options (2/2SI) are ideal for fire exit hardware and panic hardware that is not equipped with the dogging feature. **Combining a double cylinder option with the dogging feature is not recommended**, as the hardware could be in the dogged (unlatched) position when the indicator states a locked position.

#### CDSI

Device	3'	4'
98/99	32	38

## Environmental options

### Quiet Mechanical (QM)

The QM option controls motion to reduce operational noise. It is available for the 996 trim, as well as 98/99 and 33A/35A rim and surface vertical rod devices. The QM trim solution provides a damper-controlled lever return. Likewise, the QM device option provides damper-controlled re-latching.

#### Features and benefits

- Controlled motion to reduce operational noise
- 996 damper-controlled lever return
- 98/99 and 33/35A damper controlled re-latching
- Available pre-installed from factory or as a retrofit kit
- Compatible with QEL, AX, RX, CD and HD
- To order, specify QM prefix of device and/or QM prefix of trim. example QM99L x QM996L to receive both

### Pneumatic (PN) controlled exit devices

The PN feature provides remote latch bolt retraction in hazardous areas where electrically operated devices would not be permitted. The pneumatic solenoid will retract the latch bolt for momentary or prolonged periods. PN exit devices are particularly suited for use with automatic door operators. The PN feature is available on both Panic and fire exit hardware devices.

The PN feature includes a special actuating linkage that gives building owners the option of mechanically or pneumatically dogging the exit device. If manual hex-key dogging is required, specify HD-PN (Dogging the device, whether mechanically or pneumatically, makes the device function as a push/pull unit and reduces the wear on its moving parts.) If cylinder dogging is required, the standard cylinder dogging is not available, but special center case dogging is available, specify SD-PN. SD-PN is not available on the 9875 or 9975 devices.

When activated pneumatically, the latch bolt(s) of the exit device retract in 1/2 to 1 1/2 seconds. This pneumatic operation uses air pressure ranging from 50 to 100 pounds per square inch.

This product will function only when it is part of a pneumatic system (air compressor, air lines, pneumatic system, etc.) Contact LCN for correct control boxes.

#### To order, specify:

- Standard — Use prefix PN, example PN99NL
- Hex key dogging — Use prefix HD-PN, example HD-PN99NL
- Special center case dogging (handing is required, specify RHR or LHR) — Use prefix SD-PN, example SD-PN99NL

### Pneumatic transfer (PNT)

#### Pneumatic controls

PNT-1 is available for pneumatic latch retraction exit devices. Appearance and dimensions are identical to EPT models.

## Fortified exit rim devices (FER)

The Von Duprin® 33A/35A and 98/99 series offers Fortified exit rim (FER) devices for use in applications desiring additional security and in systems undergoing ASTM F3561-22 testing. The FER device has design enhancements to add extra reinforcement, including a cast steel center case (33A/35A) and formed steel (98/99) chassis. Armored trim plates will also be used with the EO (Exit Only) devices.

Von Duprin® launched the FER 33/35A devices on November 4, 2024, with the FER 98/99 to follow in early 2025.

<b>FER (Fortified Exit Rim) Devices</b>		
Series	33A/35A narrow stile	98/99 wide stile
Device type	Rim	Rim
Functions	EO (with 388-FER trim plate) NLOP (388 trim)	EO (with 996-FER trim plate) L-NL (996-L-NL trim)
<b>FER Options</b>		
Prefix	FER - Fortified exit ALK - Alarm kit CD - Cylinder dogging CDSI - Cylinder dogging security indicator RX - Request to exit RX-LC - Request to exit low current RX2 - Double request to exit	ESL - Emergency secure lockdown HD - Hex dogging HDSI - Hex dogging security indicator LD - Less dogging QEL - Quiet electric latch retraction HD-QEL - Quiet electric latch retraction with hex dogging
Suffix	CON - Connectors WH - Weep holes	
Finishes	605 - Bright brass 606 - Satin brass 612 - Satin bronze 619 - Satin nickel 622/711 - Matte black/matte black, anodized 625 - Bright chrome 626 - Satin chrome	626AM - Satin chrome, antimicrobial 628 - Aluminum, anodized 630 - Satin stainless (98/99 only) 630AM - Satin stainless, antimicrobial (98/99 only) 643e - Aged bronze 693 - Black paint 710 - Dark brown, anodized
Door width	3'- 3 foot device 4'- 4 foot device	
Handing	LHR - Left hand reverse RHR - Right hand reverse	
Touchbar options	PUSH - Touchbar trim embossed 'PUSH' RSS - Red silk-screened lettered touchbar trim SG - Safety glow	

For double door applications:

- For ASTM F3561-22 requirements, must use 48/4954 mullion and TruLite Doors
- For other security and safety applications, 98/9954 mullion can be used.

## Outdoor defense (OUT) exit devices

Outdoor defense (OUT) option for Von Duprin exit devices are designed to safeguard against moisture, temperature variations, and corrosion in exterior applications. Testing conditions simulated driving rain, high (151 F) and low (-31 F) temperatures, dust, and debris (for list of testing and outdoor defense conditions see Outdoor Defense data sheet). Available for the popular 98/99 Series rim and surface vertical rod exit devices, this option is engineered to protect internal components and assemblies that are critical to exit device function and long life from moisture, temperature, and the elements as well as protect electronic features such as switches, latch retraction, delayed/controlled egress, and alarm kits.

**To order, specify**

1. Prefix: OUT, Outdoor Defense
2. Specify Device type and functions requested
3. Specify finish

## 98/9952 Rim with remote trim input (pool exit hardware)

Openings beyond the interior often have additional functional requirements that go beyond the limits of standard door hardware. Von Duprin offers the safety of panic hardware for pool enclosures, tested to withstand corrosive cleaners typically used in outdoor pool environments. Both the device and trim are built with components engineered to protect against high pressure bleach concentration used in some pool applications. Understanding that hardware solutions need to be flexible and configurable, the Von Duprin 98/9952 with 252L trim is designed to meet the very specific needs of these applications.

Engineered to be installed easily, the 98/9952 device can be mounted within the required range by the model codes and accessibility standards, while the 252L trim is mounted at least 54" from finished floor or concrete. Gate poles must have at least 3" stile width by 2" depth for ideal installation.

**Compliance**

- Listed with UL for panic exit hardware (UL 305)
- Certified to ANSI/BHMA A156.3 Grade 1
- Meets International Building Code for pool enclosures
- Compliant with the 2010 ADA Standards for Accessible Design

**Features and benefits**

- Patent-pending design built to meet code requirements for pool enclosures
- Ideal for pool gate applications where high pressure bleach concentration is used
- Easy installation and maintenance
- Simple to operate
- UL listed for panic exit hardware (UL305)

**Specifications**

Device functions	EO, L, L-BE
Dogging	LD – Less dogging
Device lengths	3' , 4'
Center case	8" x 2 3/4" x 2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Latch bolt	Deadlocking 3/4" (19mm) throw
Trims	252-L, 252-LBE
Strike	699 roller strike
Finishes	626, 710
Options	WH – Weep holes

**Accessories**  
699 Roller strike

## Storm options

### WS-T-9827/9927 and WS-T-9857/9957

### Multi-point exit devices: certified to ICC-500 (2020)

#### Overview

The Von Duprin® 98/99 Series exit device is designed to withstand the toughest of environments. In accordance with ICC 500 (2020) standard for wind and storm shelters required by the 2021 International Building Code (IBC 2021), Von Duprin offers a Windstorm Tornado (WS-T) option on multi-point exit devices for single doors or door pairs. The two-point WS-T 98/9927 exit device for door pairs and three-point WS-T 98/9957 exit devices for single doors incorporate reinforced components to help ensure the building and its occupants are kept safe from wind and projectile debris. These devices are third party tested to comply with ICC-500 (2020) standards and FEMA P-361 (2021) guidelines when installed on Steelcraft listed and labeled Tornado Resistant Assemblies.

The ICC500 (2020) standard requires outside levers to be locked and rigid during storm events and unlocked outside levers to have inside lock status indicators. While active L-trim is not available with the WS-T option, mixed-use shelters or safe rooms, such as classrooms, auditoriums, and cafeterias, can utilize Von Duprin security indication options to allow occupants to remain on the secure side of the door while maintaining free egress. Windstorm exit devices can be ordered with double cylinder with security indicator (-2SI), Emergency Secure Lockdown (ESL), and Cylinder Dogging Security Indicator (CDSI) to facilitate ease of the outside lever lockdown from the inside.

Since pioneering the first exit device in 1908, Von Duprin life safety products have provided unparalleled quality, performance and flexibility for schools, hospitals, stadiums and public buildings. These products come with the support and customer care only offered by Von Duprin, providing the confidence and peace of mind at critical moments of life safety.

#### Features and benefits

- Designed to endure tornado force winds and flying debris
- Uniquely designed center case
- Reinforced top and bottom latch housing with strengthening strap
- Stamped end cap mounting bracket
- Top soffit latch with reinforced ratchet release bracket
- Cast latch covers
- Stronger latch mounting screws
- Thru-bolted attachment points
- Lockdown security indicator options provide peace of mind and timely lockdown of the outside lever during a storm

## Mechanical options

### WS-T-9827/9927 Windstorm ratings

- Flush door pair applications:  
Minimum 6'0" x 6'8" and maximum 8'0" x 8'0" flush Steelcraft Tornado Resistant Pair Assemblies (swinging same direction)
- ICC500 (2020), FEMA P-361 (2021) and International Building Code (IBC 2021) Compliant:
  - Listed and labeled for ICC500 (2020) Standard for the Design and Construction of Storm Shelters.
    - Design pressure +/- 243 PSF
    - 15 pound 2 x 4 at 100 mph
  - Listed for Panic and Fire-Rated Exit Hardware
    - Fire exit hardware listed for 90-minute UL10C for door pairs (swinging same direction)
    - Panic Hardware UL305 listed
  - ANSI/BHMA A156.3 Grade 1
- WS-T-9827/9927 is suitable for use in Enhanced Hurricane Protection Areas. See Allegion-Schlage Lock Company, LLC. Florida product approval FL41734.
- Flush single door applications:  
Minimum 3'0" x 6'8" and maximum 4'0" x 8'0" flush Steelcraft Tornado Resistant Single Door Assemblies  
Flush single door applications:  
Minimum 3'0" x 6'8" and maximum 4'0" x 8'0" Flush Steelcraft Tornado Resistant Single Door Assemblies
- ICC500 (2020), FEMA P-361 (2021) and International Building Code (IBC 2021) Compliant:
  - Listed and labeled for ICC500 (2020) Standard for the Design and Construction of Storm Shelters.
    - Design pressure +/- 252 PSF
    - 15 pound 2 x 4 at 100 mph
  - Listed for panic and fire-rated exit hardware
    - Fire exit hardware listed for 3 hour UL10C (single doors)
    - Panic Hardware UL305 listed
  - ANSI/BHMA A156.3 Grade 1WS-T-9857/9957
- WS-T-9857/9957 is suitable for use in Enhanced Hurricane Protection Areas. See Allegion-Schlage Lock Company, LLC. Florida product approval FL41734.

**Note:** The Von Duprin WS-T exit device options must be installed on Steelcraft Tornado Resistant Assemblies that are tested to ICC500 and FEMA standards. Tornado assembly components are approved and certified as an assembly and cannot be mixed and matched. These components include the frame, door, hinges, anchors, and latching hardware. Proper installation of tornado doors is critical. It is recommended to have a pre-installation meeting with the contractor, specifier, door supplier, and installer to discuss the installation. Steelcraft Tornado Resistant Assemblies that include glass lights and continuous hinges tested for ICC500 (2020) with WS-T 98/9927 pairs are currently not available. View the Steelcraft Tech Data Manual for the most up-to-date testing and assembly information.

WS-T-9857/9957 Windstorm specifications

Specifications	
Device functions	Device ships EO (Exit only) DT, L-DT, L-BE-2, L-KC
Device lengths	3': 2' 4" to 3' (71mm to 914mm) door size 4': 2' 10" to 4' (864mm to 1219mm) door size
Strikes	Bottom – 304L unfinished
Mechanical options	-2SI - Double cylinder with security indicator CD - Cylinder dogging* CDSI - Cylinder dogging, security indicator LD - Less dogging  *WS-T devices with CD/CDSI option must utilize a thumbturn cylinder. A dogging key is not permitted.
Electrical options	LX - Latchbolt monitor switch RX - Push pad monitor switch RX-2 - Double push pad monitor switch SS - Signal switch QEL/ESL - Quiet electric latch/emergency secure lockdown
Fasteners and sex bolts (SNB)	Includes 1-3/4" (44mm) metal doors SNB furnished for top & bottom latches and device (required)
Device centerline from finished floor	39-1/2" (1003mm)
Door undercut	1/4" (7mm)
Center case dimensions	8" x 2-3/4" x 2-3/8"
Mechanism case dimensions	2-1/4" x 2-1/4" (57mm x 57mm)
Top and bottom latch case	4-1/2" x 2-1/2" x 1-7/8" (114mm x 64mm x 48mm)
Vertical rods	1/2" (13mm) round tubing, standard rods accommodate 7' (2134mm) doors Top rod length is 36-1/4" (921mm) Bottom rod length is 31-3/4" (806mm)
Projection	Pushbar neutral – 3-13/16" (97mm) Pushbar depressed – 3-1/16" (78mm)
Finishes	605, 606, 612, 625, 626, 628, 710, 711, 629

Compliant WS-T trim choices

ICC 500 - 2020 requires the exterior lever to be locked or rigid during a storm. The 996L-Trim option is not available with the WS-T option due to this requirement.

The following three Von Duprin trim options allow for day-to-day unlocked outside trim and enable a lockdown functionality with indication, providing ICC 500 - 2020 compliance.

**Option 1:** You require an exterior lever that remains unlocked/active until lockdown and always latches

Option	Inside cylinder	Trim	Function
Double Cylinder with Security Indicator (-2SI)	Keyed or thumbturn	996	L-BE
		and	
		377	T-KC

In a storm event, a user can see the lock's status via the indicator to quickly determine if the door needs to be locked, which is done via thumbturn or key. A key can be used to enter from the outside during lockdown. The door returns to a locked state as soon as the key is removed.

**Option 2:** You require access control to retract the latch when a credential is presented until lockdown

Option	Inside cylinder	Trim	Function
Quiet electronic latch retraction (QEL) with emergency secure lockdown (ESL)	Keyed or thumbturn	996	L-KC
		or	
		377	T-KC

In a storm event, the user engages the thumbturn which prompts ESL to interrupt power to QEL motor, disabling card access and electronic dogging. A key can be used to enter from the outside during lockdown. The door returns to a locked state as soon as the key is removed.

**Option 3:** You require an exterior lever that is always locked but want the ability to mechanically undog the door until lockdown. (Opening must be non-fire rated.)

Option	Inside cylinder	Trim	Function
Cylinder dogging security indication (CDSI)	Thumbturn only	996	L-KC

In a storm event, the user can quickly see the latch's status via the indicator to see if the push pad is undogged or dogged. If undogged, the user twists the thumbturn to dog the door. A key can be used to enter from the outside during lockdown. The door returns to a locked state as soon as the key is removed.

**Note:** 377T-KC is not ADA compliant

The following Von Duprin trim options allow for fixed outside trim, providing ICC 500 - 2020 compliance:

**Option 4:** You require an exterior that is exit only

Option	Inside cylinder	Trim	Function
Exit only	NA	NA	EO

There is no exterior lever, so no action is needed during storm event.

**Option 5:** You require trim that is always locked and requires key for entry

Option	Inside cylinder	Trim	Function
Always locked	NA	996	L-KC

Exterior is always locked and can only be operated with use of mechanical key. No action is needed during storm event.

To support ADA compliance, extended latch guards for rods are recommended (WS-LGO-3 and WS-LGO-4) but they are not required for ICC 500 compliance.

## Storm options

### Hurricane rated exit devices and mullions

Hurricane resistant openings are designed to withstand storm conditions for long periods of time while maintaining the structural and functional integrity of the opening. The primary purpose is to not only prevent debris and wind from penetrating the assembly but also to maintain functionality after the storm.

### Hurricane codes and applications

Florida was the first state to develop hurricane codes. As a result, the requirements set by the Florida Building Code (FBC) may be adopted by jurisdictions in other states where hurricane protection is a necessity. The appropriate hurricane solution depends on the specific requirements for the application. Contact your local Allegion representative for the specific requirements in your state.

### Hurricane rated devices

#### Wind and Impact

FBC TAS 201, 202, 203

[Wind and Impact zone (HVHZ) ASTM E1886, ASTM E1996, ASTM E330]

Exterior door assemblies certified for installation within the Florida High Velocity Hurricane Zone (coastal region of the state) are subject to specific tests for both wind speed and flying debris called out in the TAS protocols of the Florida Building Code. Impact, structural, and cyclic tests must be conducted on full assemblies (e.g., exit device and door) as part of the standard.

#### Wind-Only

ANSI-ASTM E330 [Wind-Only (non-impact zone)]

Exterior door assemblies certified for installation in non-impact regions (typically inland regions) are tested for structural integrity in accordance with ASTM E330 for wind-only applications. These doors are subject to a structural test load equal to 1.5 times their actual design pressure rating, and they must remain operable with no breakage of glazing panels.

To order, specify:

1. Use prefix "HH" for wind and impact or "HW" for wind-only. If application is unknown, specify HH device, which will satisfy both applications.
2. Model number and description
3. Door mode: SGL (single) or PR (pair)

Example: CD HH99NL 3' 626 PR

Note: Many hurricane rated devices use standard device components. Devices will be furnished with the proper strikes and components if HH or HW is specified. All HH devices will include through bolts. Pricing will be adjusted accordingly. See Von Duprin price book for details.

### Hurricane rated mullions

#### Wind and Impact

- Designed for use with these HH (Wind and Impact) rated devices:
  - HH98/99 (specify devices with 499F strikes)
  - HH98/9957 (specify devices with 499F strikes)
  - HH-XP98/99 (specify devices with 909 or 954 strikes)
- Steel mullion
- Furnished for 8' doors; cut in field as needed
- No KR or electrified options available
- Furnished blank (no strike prep)
- Mullion tube and fittings are unique from are not interchangeable with 9954

#### Panic and fire-rated applications

- HH9954

To order, specify:

1. HH9954 x Finish (689 or 695)

#### Wind-Only

- Designed for use with HW (Wind-Only) rated devices
- Identical to standard mullions, except for hurricane rated bottom fitting mounting hardware

#### Panic applications

- Steel - 1654, 4954, 4954-XP
- Aluminum - 5654, 5654-XP, 5754

#### Fire-rated applications

- 9954, 9954-XP

To order, specify:

1. Use KR if keyed removable option is desired (steel mullions)
2. HW
3. Model number
4. Height of opening
5. Finish
6. Strikes, when required, should be ordered with device

Example: KR-HW9954 7' 689

Disclaimer: Hurricane rated exit devices for use when paired with Allegion approved doors.

\* HH98/9947 is furnished with double latch brackets and requires template #10319.

## Accessibility options

### Accessible device (AX)

The AX device is a UL certified exit device designed to meet the progressive requirements of the California Building Code for accessible openings. This device meets the 5 lbs of operating force requirement called for in chapter 11B-309.4. The AX device also exceeds ANSI/BHMA requirements. Available devices include: AX98/99, AX98/99-F, AX98/9927LBR, AX98/9927-F LBR, AX98/9949LBL, AX98/9949-FLBL, AX98/9949-F LBLAFL, AX98/9950LBL, AX98/9950-FLBL. Additionally, all AX devices will be shipped with a new UL label clearly stating "Meets California building Code (2013) Sec. 11B-309.4" and an "AX" identifier label on device center case. See images for reference.

AX option is not available on 2' exit devices. (SVR/CVR/CVC only, R & M not available in 2' sizes.)

## Latches

### Less bottom rod, panic and fire rated (LBR)

LBR option is available on panic-rated devices by eliminating the bottom rod, latch, and strike.

LBR option is available on fire rated devices using a spring-loaded auxiliary latch bolt installed in the lower door edge. When exposed to heat the auxiliary latch bolt releases, keeping the doors in alignment and closed during a fire. UL listed 3 hours on hollow metal doors double egress, 90 minute swinging same direction, and 20 minutes wood doors (consult wood door manufacturer). Fits door stiles as narrow as 3<sup>5</sup>/<sub>8</sub>".

Fire rated LBR devices must be ordered in pairs or must be used in conjunction with an approved automatic or constant latching flush bolt.

### Pullman latch (PL)

When PL is specified the standard latches are replaced with pullman style latches. Pullman latches are always extended and are most commonly used in conjunction with electric strikes and LBR-less bottom rod application. Not available with Fire rated devices.

Not recommended where security is of the utmost importance since latches do not deadlock.

## Mechanical options

### Push pads

#### Dummy push pad

The 330 dummy push pad is designed as a companion unit for all 99 devices. The 350 dummy push pad is a companion unit for all 98 devices. The push pad is rigid or nonfunctioning. A push/pull operation can be accomplished by using 990DT, 996DT trim or any Ives Pull.

The 330/350 can be equipped with a functional push pad and will accommodate an RX or WP-RX switch. Specify RX-330.

May also be equipped with the RX2, double RX switch.

#### To order, specify:

1. 330 or 350.
2. Size 3' or 4' (914mm or 1219mm)
3. Finish – 605, 606, 612, 625, 626, 628, 710 and 622/711. (630 – 350 only)
4. Specify RX, WP-RX or RX-2 if desired.

#### Safety glow (SG)

Self-illuminating touchpad defines the location of the exit door in dark or smoke-filled area. The safety glow coating is a special powder coat finish that glows brightly during low or no light conditions. This coating was developed to meet MEA standards where luminescent exit door markings are required in commercial facilities. There are no batteries or electronics, the coating is charged when exposed to light.

**To order, specify:** Suffix SG, EL 9927L-SG

#### Red silk screen (RSS)

Red silkscreen lettering on touchpad trim - "Emergency Exit Only, Push To Open And Sound Alarm". This comes standard on SS devices.

**To order, specify:** Suffix RSS, 9927L-SS RHR

#### Braille, embossed and knurled touchpads

\* Image shown is a special order.

Braille touchpad embossed with the standard message "CAUTION STAIRWELL" in braille and raised letters provides assistance to persons with impaired vision. Letters are 1/2" (13mm) high and braille is #2, raised height is 3/32" (2mm). Other messages are available, limited to 20 characters per line.\* **Order** through specials process.

Embossed touchpad is embossed with the word "PUSH". **To order, specify:** Suffix EMB, EL9927L-EMB.

Knurled touchpad is to provide warning to persons with impaired vision. **To order, specify:** Suffix PBKN, EL9927L-PBKN.

\*Consult factory for availability.

## Latch retraction

### Quiet electric latch retraction (QEL)

Quiet electric latch retraction (QEL) provides electronic control of an exit device for environments where limited operational noise is desired. These devices always provide mechanical egress. The electrified latch retraction can also be activated by an access system or building automation system to unlatch the exit device momentarily. Often the QEL is used with a credential reader and access control system to unlock the door momentarily for authorized users.

The QEL can also be configured to electronically retract the latch for an extended period of time to allow free entry. This is a convenient alternative to mechanical dogging. If manual dogging is required, the hex dogging option is available, to order specify HD-QEL. Special center case dogging is also available for 98/99 rim and vertical systems, specify SD-QEL.

The standard default QEL feature will retract the latch bolt and pushpad. If an active pushpad is required utilize the QEL-L option. This option will retract the latch bolt and maintain an active pushpad.

In some applications an audible indication of pushpad retraction is desired. The QEL-B (B-buzzer) option is a feature that can be added as a retrofit to a QEL device in the field that will send an audible notification of initial latchbolt retraction.

The QEL option is available on panic devices and fire rated devices. UL approved for Class II circuit applications.

The QEL option does not include the power transfer from door to frame, the power supply, or the control operator. Refer to EPT-2 power transfer and the PS902 or 914 power supply.

The PS902/914 with the 2RS, 4RL or 4R board is the minimum required. Other option boards available for other functions, see PS902/914 power supply for additional information.

The QEL has a low inrush current, so it can be used with standard Schlage power supplies. Calculate the peak current draw of all devices in the system to determine the required amperage of the supply.

The -2RS option board is designed to control two electric latch retraction devices and provide time delay between the firing of outputs is required. The power transfer is also sold separately.

#### To order, specify:

1. Standard — use prefix QEL, example QEL99L.
2. Special center case dogging — use prefix SD-QEL, example SD-QEL99L

Note: Baseplate and modular QEL Conversion kits are available for field retrofit. Please see parts/service manual for part numbers.

Schlage PS902	Schlage PS904	Schlage PS906
Up to 2 amps	Up to 4 amps	Up to 6 amps

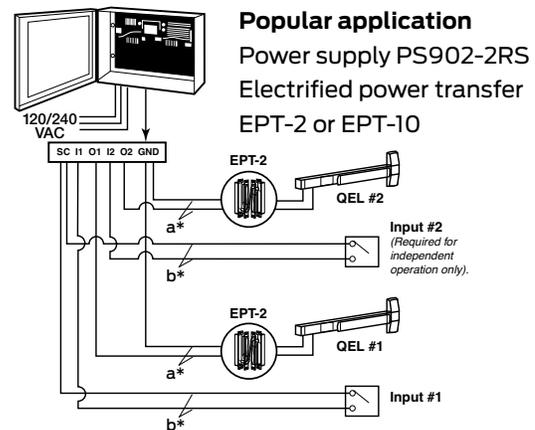

#### QEL electrical load

Voltage	24VDC
Current	1.0 A Inrush (0.5 sec.) / 0.14 A Holding

#### Minimum door opening widths\*

Application	Surface vertical	Concealed vertical	Mortise	Rim
Min. door opening	28 1/4"	28 1/4"	28 3/4"	29 1/4"

\* For 3' devices. For 4' devices, add 6".

#### Popular application

Power supply PS902-2RS

	200'	18 AWG
	320'	16 AWG
	500'	14 AWG
	800'	12 AWG

b*	Wire selection	Switch wire size
	1200 ft. Max.	18 gauge standard

## Latch retraction

### Emergency secure lockdown (ESL)

The emergency secure lockdown (ESL) option is ideal for high-occupancy spaces, such as auditorium-style classrooms with access control

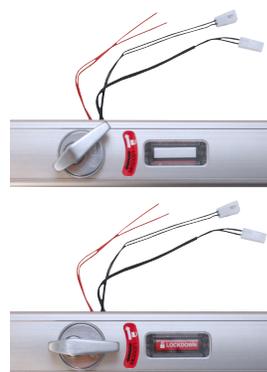

Occupants can turn the thumb turn (or cylinder key) of the ESL option installed, interrupting the power to the QEL motor, and electronically undogging to secure pull side of the door as well as sends a signal to the access control system. The visual indication assures the occupant the exit device has been put into secure lockdown mode.

#### To order, specify:

1. Suffix: ESL Emergency secure lockdown.
2. Specify device type and length with the ESL option.

Specify handing and finish

Note: ESL requires PS902-4R for single door (add -FA if fire rated), or PS904-4R-4R for double door (add FA to both -4R boards if fire rated).

#### QEL minimum door widths

	SVR	CVR/CVC	MOR	RIM
98/99 3'	28-1/4"	28-1/4"	28-3/4"	29-1/4"
98/99 4'	34-1/4"	34-1/4"	34-3/4"	35-1/4"
33A/35A 3'	28-1/4"	25-1/4"	x	29-1/4"
33A/35A 4'	34-1/4"	34-1/4"	x	35-1/4"

#### QEL and ESL minimum door widths

	SVR	CVR/CVC	MOR	RIM
98/99 3'	36"	36"	36"	36"
98/99 4'	42"	42"	42-1/2"	43"
33A/35A 3'	36"	36"	x	36"
33A/35A 4'	42"	42"	x	43"

## Delayed/controlled egress

### The Chexit® (CX) (with motor driven blocking actuator)\*

The Von Duprin Chexit device is designed for controlled egress applications. It meets both life safety and security needs, as well as the requirements of NFPA 101 for "Special Locking Arrangement" and IBC "Special Egress-Control Devices". All control inputs, auxiliary locking, local alarm and remote signaling outputs are self-contained in the Chexit assembly. Numerous configurable options allow the device to be customized for the specific code or application requirements. The standard Chexit device sounds an alarm and keeps the door secured for 15 seconds following an exit attempt with immediate release upon fire.

The Chexit device includes a 6" x 20" decal for application on door. "PUSH UNTIL ALARM SOUNDS. DOOR CAN BE OPENED IN 15 SECONDS"

#### Chexit typical applications

Chexit single door with options – The Chexit is used as an access control device. The card reader allows access. Also shown in this application is an external horn and door position switch. The auxiliary horn is used for increased volume in remote locations. Using a door position switch gives added security to the opening in case the door is not reclosed.

With the Chexit disarmed, the opening functions as a normal exit device. If card readers are required on both sides of the door, the normally closed contacts of the readers should be wired in series.

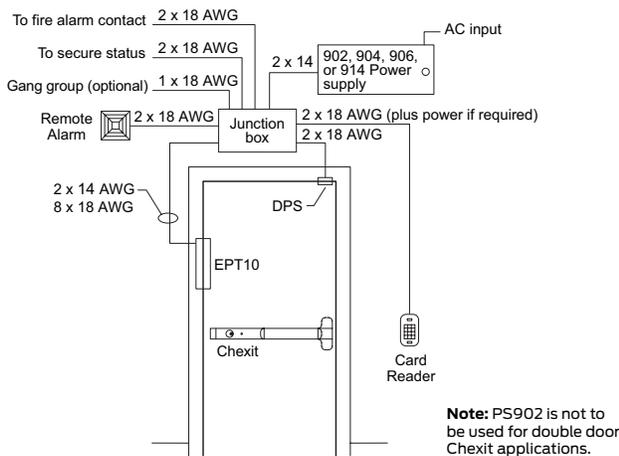

Figure 1. Riser diagram, single door

#### Minimum door opening sizes for CX devices

(Consult factory for other size requirements)

Device	3' (914mm) Length	4' (1219mm) Length
CX98/98-F/99/99-F	2'10 3/4" (883mm)	3'4 3/4" (1035mm)
CX-XP98/XP98-F/XP99/XP99-F	2'10 3/4" (883mm)	3'4 3/4" (1035mm)
CX9827/9827-F/9927/9927-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX9847/9847-F/9947/9947-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX9848/9848-F/9948/9948-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX9849/9849-F/9949/9949-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX9850/9850WDC-F/9950/9950WDC-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX9857/9857-F/9957/9957-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)
CX9875/9875-F/9975/9975-F	2'10 1/4" (870mm)	3'4 1/4" (1022mm)

#### Specifications / Power supply requirements<sup>1</sup>

Input voltage – 24VDC

Input current inrush – 1.25A

Input current holding – 390mA

Alarm relay and secure relay contact ratings – 24VDC, 1A

Fire alarm, inhibit and door position switch inputs require normally closed dry contacts.

#### Power supply information for CX devices with motor driven blocking actuator<sup>1</sup>

Power supply	Maximum number of devices
PS902 (up to 2 amps)	1 Chexit device
PS904 (up to 4 amps)	3 Chexit devices
PS906 (up to 6 amps)	4 Chexit devices
PS914 (up to 4 amps)	4 Chexit devices

Note: When powering multiple components, verify that the amperage requirements of all components combined does not exceed the power supply output rating, see table above for output ratings. Consult Installation Instructions for proper wire gauge and wire run requirements. Exceeding the recommended devices and/or not following Installation Instructions may void your warranty. Call Customer Care at 877-671-7011 or visit the Allegion website for more information - [www.us.allegion.com](http://www.us.allegion.com).

#### To order, specify:

1. Prefix product description number "CX".  
Example: CX99L
2. Specify option (see options on page 53).  
Example: CX-RCM or CD-CX
3. Door size other than 3' (914mm).
4. Door thickness other than 1 3/4" (45mm).
5. Finish.
6. Handing, LHR or RHR. Required with "CD" option.

1. Chexit devices built after August 24, 2015 are built using motor driven blocking actuators that have decreased power supply and operating requirements. The information listed in this catalog references the power supply and operating requirements that are needed for the new products with motor driven blocking actuators. For information on devices built previous to August 24, 2015, please contact Customer Care at 877-671-7011.

## Electrified options

# Delayed/controlled egress

## Chexit, RCM and DE5300 features

The Chexit, remote chexit module (RCM) or DE5300 devices have several features and options available to fit your applications. See below for more information.

### Inputs and outputs

#### Fire alarm input

This input releases the door immediately upon a fire alarm allowing immediate egress. The internal alarm can be silenced during a fire input via an onboard switch setting.

#### Inhibit input (access control)

This optional input is provided to allow authorized egress or entry when the device is armed using an external card reader, key switch, etc. It also allows remote reset of the Chexit, RCM or DE5300 in an alarmed condition. The ability to reset alarms with the inhibit input can be disabled via an onboard switch setting.

#### Door position switch input

An optional door position switch (DPS) can provide door position status to Chexit, RCM or DE5300 for additional security, ensuring that the door is closed, and can cause alarm when the door is left or forced open.

#### Gang bus

The gang bus allows a Chexit, RCM or DE5300 device to signal other Chexit, RCM or DE5300 devices when it enters the release delay, allowing multiple doors to release at the same time in an emergency. Up to 8 devices may be connected to the gang bus.

#### Alarm relay contacts

The alarm relay contacts are provided as a means to control a remote alarm, such as a horn or lamp, or signal an external monitor. The contacts can be configured with a jumper as normally open or normally closed, and become active upon entering an alarmed condition.

#### Secure relay contacts

The secure relay contacts are provided as a means to signal an external monitor. The contacts can be configured as normally open or normally closed with a jumper, and become active when the dps indicates the door is closed and the push pad is locked.

## Delays

### Release delay

When the push pad is pushed and the nuisance delay expires, the Chexit, RCM or DE5300 enters the release delay with alarm. During the release delay, the internal alarm sounds, the alarm relay activates, and the Chexit/RCM keeps the push pad or DE5300 magnetic lock, locked for 15 seconds (less any time already elapsed during the nuisance delay). Once started, the release delay sequence will not stop and the devices will unlock.

### Nuisance delay

When a Chexit, RCM or DE5300 is located in a public area, it can be desirable to limit false releases when the push pad is accidentally pushed. The nuisance delay is the brief time a push pad can be accidentally pushed before the release delay sequence starts. If the nuisance time is set to 0 seconds the Chexit, RCM or DE5300 will enter release delay as soon as the push pad is pushed (when armed). Setting the nuisance time to 1, 2, or 3 seconds allows the push pad to be pressed for 1 to 3 seconds before the Chexit, RCM or DE5300 goes into release delay. If the nuisance audio and nuisance delay are both on, the internal alarm will pulse during the nuisance delay. The alarm relay does not activate during the nuisance delay. If the push pad is released before the nuisance delay expires, the Chexit, RCM or DE5300 will remain armed.

### Rearm delay

The rearm delay is the amount of time after the key switch or inhibit input is deactivated to when the device rearms. It is designed to give someone time to pass through the door before rearming occurs. The rearm time can be changed via the onboard switch settings from 0 and 28 seconds in 2 second increments. If the rearm time is set to 30 seconds and a DPS is used, if the door is opened and the rearm time expires, there will be no alarm. The Chexit, RCM or DE5300 will rearm after the door is closed. If the door never opens, the Chexit, RCM or DE5300 will rearm after 30 seconds. If not using a DPS, the Chexit, RCM or DE5300 will always rearm in 30 seconds.

### DPS delay

If the DPS detects that the door closed during the rearm delay, the Chexit, RCM or DE5300 ends the rearm delay and allows 2 seconds for the latch to clear the strike before rearming.

## Delayed/controlled egress

### Interface

#### Key switch

The Key Switch provides the means to Arm or Disarm/Reset the Chexit, RCM or DE5300. Turning the Key Switch clockwise initiates the Rearm Delay, and turning the Key Switch counter-clockwise Disarms/Resets the Chexit, RCM or DE5300. The Key Switch allows the key to be removed in either the Arm or the Disarm/Reset position.

#### Status indicator

The red Status Indicator displays the status of the Chexit, RCM or DE5300. The Status Indicator flashes slow if the Chexit, RCM or DE5300 is armed, flashes fast in an alarmed mode, is off when inhibited and on solid during Rearm Delay.

#### Internal alarm

The Internal Alarm sounds the status of the Chexit, RCM or DE5300. The Internal Alarm sounds continuously during and after a fire alarm or a Release Delay, pulses fast during the Nuisance Delay or a tamper and pulses slow during Disarmed Powerup mode.

### Settings

#### Armed powerup

When set to OFF, a power disruption and power return will put the Chexit, RCM or DE5300 in a disarmed, unlocked alarm mode.

#### Trim fail safe / fail secure (FS/FSE)

The trim input power can be set to FS (Fail Safe; locked when energized, unlocked when deenergized or during power failure) or FSE (Fail Secure; unlocked when energized, locked when deenergized or during power failure).

The trim must be bought or modified to physically function as FS or FSE. This on board setting only selects the trim input power.

#### Trim operation overview

Rim and vertical application: Trim will not function when Chexit is armed.

Mortise application: Trim will function when Chexit is armed.

### Chexit requiring pull side operation

	Mechanical trim	Electric Trim
Rim and vertical	Access control disarms Chexit. Rotate lever to enter.	Access control disarms Chexit and unlocks electric trim. Rotate lever to enter. <sup>1</sup>
Mortise	a) Use key to unlock lever. Rotate lever to enter. <sup>2</sup> b) Use RX996L-M to disarm Chexit. Rotate lever to enter. <sup>3</sup>	Access control disarms Chexit and unlocks electric trim or electric mortise lock. Rotate lever to enter.

1. Fail Secure Trim recommended. For Fail Safe applications, contact technical support to review application.
2. Do not use Door Position Switch with Chexit in this application.
3. Allows free ingress at all times.

## Electrified options

### Delayed/controlled egress

#### Remote Chexit Module (RCM)

Designed to provide the concept of the Chexit delayed exit system for door sizes smaller than the standard Chexit device can accommodate. The Chexit module is

RCM Module

installed in a control box and mounted in a remote location. Features and functions of the standard Chexit exit device are available on the Remote Chexit Module.

#### Minimum door opening sizes for RCM devices

(Consult factory for other size requirements)

Device	3' (914mm) Length	4' (1219mm) Length
CX-RCM 98/98-F/99/99-F	2'6" (762 mm)	2' 11-15/16" (912 mm)
CX-RCM XP98/XP98-F/XP99/XP99-F	2'6" (762 mm)	2' 11-15/16" (912 mm)
CX-RCM 9827/9827-F/9927/9927-F	2'5-7/16" (747 mm)	2' 11-3/8" (898 mm)
CX-RCM 9847/9847-F/9947/9947-F	2'5-7/16" (747 mm)	2' 11-3/8" (898 mm)
CX-RCM 9848/9848-F/9948/9948-F	2'6" (762 mm)	2' 11-15/16" (912 mm)
CX-RCM 9849/9849-F/9949/9949-F	2'5-7/16" (747 mm)	2' 11-3/8" (898 mm)
CX-RCM 9850/9850WDC-F/9950/9950WDC-F	2'6" (762 mm)	2' 11-15/16" (912 mm)
CX-RCM 9857/9857-F/9957/9957-F	2' 5-7/8" (758 mm)	2' 11-7/8" (911 mm)
CX-RCM 9875/9875-F/9975/9975-F	2'6" (762 mm)	2' 11-15/16" (912 mm)

#### Specifications / Power supply requirements\*

Size – 3.75" x 5.57" x 2.50"

Input voltage – 24VDC

Input current inrush – 1.25A

Input current holding – 390mA

Alarm relay and Secure relay contact ratings – 24VDC, 1A

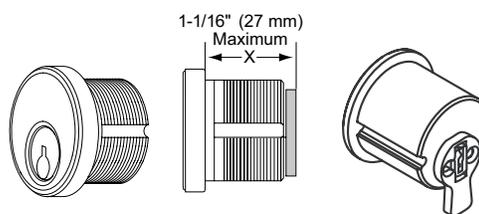

Fire alarm, Inhibit and Door position switch inputs require normally closed dry contacts.

\*RCM modules built after August 24, 2015 are built using motor driven blocking actuators that have decreased power supply and operating requirements.

Note: The information listed in this catalog references the power supply and operating requirements that are needed for the new products with motor driven blocking actuators. For information on devices built previous to August 24, 2015, please contact Customer Care at 877-671-7011.

#### Cylinder dogging (CD)

Special center case cylinder dogging option is available to allow push/pull operation of the Chexit, when disarmed and used in a heavy traffic area. Prefix device with "CD" and specify handing.

#### Cylinders

Cylinders are not furnished with the Chexit device and must be specified when ordering. Use 1 1/4" mortise cylinder with compression ring 36-083 with straight cam and orient cam as shown. Schlage cylinder 20-001-114 recommended for the device and the CD cylinder dogging option. See Schlage Price book for additional information.

#### To order, specify\*:

See Chexit "How to order" on page 52.

## Electrified options

# Delayed/controlled egress

### DE5300 system

Designed for controlled egress applications when used in conjunction with a magnetic lock. It meets both life safety and security needs, as well as the requirements of NFPA for "Special Locking Arrangement" and IBC "Special Egress-Control Devices". All control units,

DE5300 Module

auxiliary locking, local alarm and remote signaling outputs are self-contained in the DE5300 assembly.

The DE5300 is commonly used on narrow stile doors where a standard or narrow stile Chexit is not practical. DE5300 Delayed Exit System uses a Chexit logic board and a Von Duprin RX-LC (low current request to exit) panic device to control a Schlage Electronics Direct Hold Magnetic Lock.

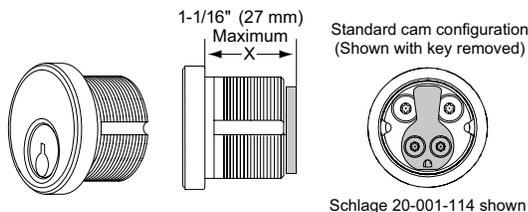

The Chexit module for the DE5300 is installed in a control box and mounted in the wall adjacent to the door. Features and functions of the standard Chexit exit device are available on the DE5300.

The DE5300 device includes a 6" x 20" decal for application on door.

"PUSH UNTIL ALARM SOUNDS.  
DOOR CAN BE OPENED IN 15 SECONDS"

### Cylinders

Cylinders are not furnished with the DE5300 and must be specified when ordering. Use 1 1/4" mortise cylinder with compression ring 36-083 with straight cam and orient cam as shown. Schlage cylinder 20-001-114 recommended for the device and the CD cylinder dogging option. See Schlage Price book for additional information.

### Specifications / Power supply requirements

Size - 3.75" x 5.57" x 2.50"
Input voltage – 24VDC
Input current – 1A
Alarm relay and Secure relay contact ratings – 24VDC, 1A
Fire alarm, Inhibit and Door position switch inputs require normally closed dry contacts.

### To order, specify:

1. DE5300
2. M420/P, M450/P, or M490/P magnetic lock (order direct from Schlage Electronics).
3. RX-LC 22/33A/35A/98/99 device.
4. PS900 Series
5. EPT-2/10

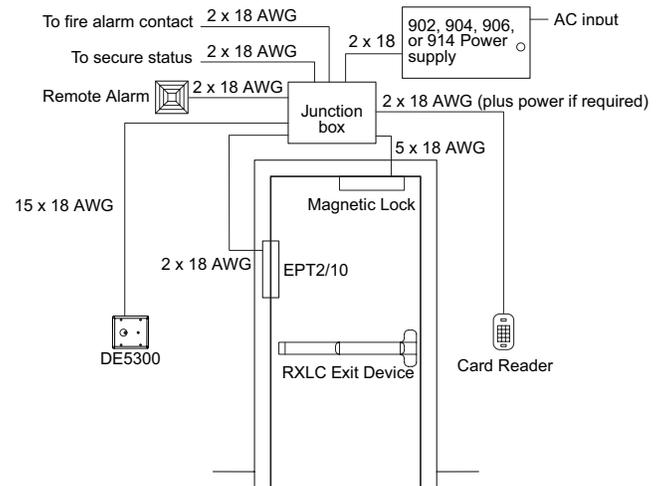

Figure 1. Riser diagram, single door

## Electrified options

### Switches

#### Request to exit (RX)

The RX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the push pad. The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply. The RX switch option should not be used to control a load, but as a signalling switch (2 amps resistive maximum). The RX switch is available in a low current (LC) 50ma max. Most commonly used to signal low-current access control inputs.

##### To order, specify:

- Standard – use prefix RX, example RX99EO
- Low Current – use prefix RX-LC, example RX-LC98EO

#### Double request to exit (RX2)

The RX2 feature uses two RX switches.

##### To order, specify:

- Standard – Use prefix RX2, example RX299EO

#### Waterproof request to exit (WP-RX)

- Switch rated to IP67 – protected from contact with harmful dust and from immersion in water with a depth of up to 1 meter (3.3 feet) for up to 30 minutes

Note: All in-field electrical connections should be in compliance with IP67 to ensure trouble free operation.

#### Latch bolt monitoring (LX)

The LX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the latch bolt.

The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply.

The LX switch option should not be used to control a load, but as a signalling switch (2 amps resistive maximum).

The LX switch is available in a low current (LC) switch. Most commonly used in computer operated monitoring systems.

##### To order, specify:

- Standard – Use prefix LX, example LX99EO
- Low Current – Use prefix LX-LC, example LX-LC98EO

#### Electrical rating for all switches

- Standard – 2 amp maximum @ 24VDC
- Low Current (LC) - below 50 Milliamps @ 24VDC

Note: All switches can be either factory or field installed

#### Signal switch (SS)

Monitors push pad and latch bolt. The SS feature is used to signal the unauthorized use of an opening. This device is equipped with two internal SPDT switches. One switch monitors both the push pad and the latch bolt assembly, making the latch bolt tamper resistant, for positive security. An additional SPDT switch is connected to the 1 $\frac{1}{4}$ " (32mm) mortise cylinder with straight cam for alarm "bypass." (Schlage cam reference L583-477). The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply.

Push pad reads: "Emergency Exit ONLY – Push To Open And Sound Alarm." Push pad is only available in US32D finish with red silk-screened lettering.

The SS mortise lock device is furnished with both the signal switch device and the SS7500 mortise lock. The SS7500 mortise lock has the versatility and advantages of the 7500 lock with the addition of signalling functions to monitor latch bolt operation and the trim locking function.

##### To order, specify:

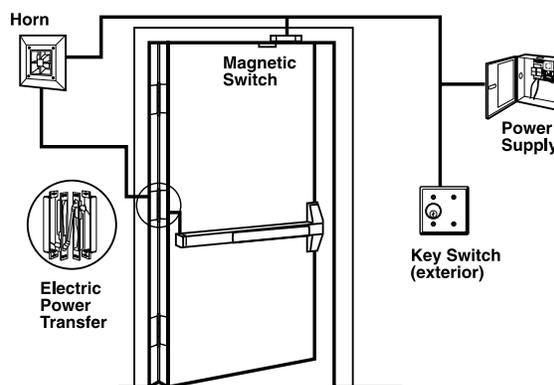

- Prefix SS, example SS99L.
- Handing required, LHR or RHR.

#### Electrical ratings

- Up to 2.0 amps @ 24VDC

#### Popular SS application

Unauthorized use of this opening will activate the local horn. The key switch permits inhibiting this system for authorized entry.

## Remote monitoring and remote undogging

### Remote monitoring

Remote monitoring, RM, provides visibility to request to exit (RX), latch bolt monitor (LX) and door position switch (DPS). RM is available as a modular kit that can be added to any existing Von Duprin 98/99 or 33A/35A series device. RM provides power source flexibility and can be battery powered or has the ability to be hard-wired.

For customers desiring real time monitoring, RM is designed to connect to Allegion's Software Alliance Members via IP. The RM can also be used with RSI connection to the ENGAGE™ gateway for daily schedule reporting. For more information about RM system capabilities and compatibilities, contact your local electronic sales engineer.

### Remote undogging

Remote undogging, RU, option is a battery powered wireless solution that enables remote undogging and door status monitoring. The door status monitoring provides visibility to request to exit (RX), latch bolt monitor (LX) and door position switch (DPS). It enhances perimeter security by providing electronic override of mechanical dogging for emergency facility lockdown. RU provides power source flexibility and can be battery powered or has the ability to be hard-wired.

RU is available as a modular kit that can be added to any existing Von Duprin 98/99 or 33A/35A Series device. For customers desiring real time lockdown and monitoring, RU is designed to connect to Allegion's Software Alliance Members via IP. The RU can also be used with RSI connection to the ENGAGE™ gateway for daily schedule reporting. For more information about RU system capabilities and compatibilities, contact your local electronic sales engineer.

## Alarm kit

Alarm kit (ALK) is a simple yet effective way to deter unauthorized use of an opening. While the exit device is still a means of egress, the ALK kit contains an internal horn. When the touch bar is depressed, the horn sounds to provide an audible means of signaling that the opening has been violated. The alarm kit can be armed or disarmed by key thus allowing the exit device to be set in an armed or disarmed mode. The horn is rated at 85 decibels.

The assembly includes both a 24VDC Input and External Inhibit standard. The External Inhibit provides remote arming and dis-arming.

The key switch uses a standard 1 1/4" (32mm) mortise cylinder with a straight cam (Schlage 20-001, L583-477 cam). The unit operates on one standard 9-volt alkaline battery. When the battery is weak, the horn will emit an intermittent low battery alert signal.

Auto reset (AR) is a standard feature for this option. This kit allows the device to resume the alarm option after a preset time. Preset times can be field selected at 1.5, 3, or 4.5 minutes.

Alarm kits are available with a choice of two switch kits, RX or LX. RX monitors the touchpad and is furnished standard. LX optional latch bolt monitoring is recommended for use with surface vertical rod exit devices or when alarm needs to sound from both the exit device and trim side of the door. Specify ALK-LX.

The ALK is available in two styles, 99ALK, grooved cover and 98ALK, smooth cover.

The ALK includes a 6" x 20" decal for application on door "EMERGENCY EXIT ONLY. ALARM WILL SOUND." RSS push bar trim can be used instead of the door decal, specify RSS push bar trim when ordering the device.

When the ALK is used, standard dogging is removed. If cylinder dogging is required, there are two choices. Special center case dogging (SD) is available. Or, as an engineered special, the ALK can be moved to the hinge side of the device, and standard cylinder dogging (CD) can be added. Note size restrictions on the following page.

### To order, specify:

1. Standard, 98 ALK
2. Special center case dogging, SD98 ALK
3. Cylinder dogging, CD98 ALK

Note: For latch bolt monitoring on a 98/9975 with ALK, specify a SS7500 lock. LX switch not available for 98/9975 devices.

## Electrified options

### Minimum door opening sizes on ALK applications

Device	3' (914mm) Length	4' (1219mm) Length
98/98-F/99/99-F	2'10" (864mm)	3'4" (1016mm)
9875/9875-F/9975/9975-F	2'10" (864mm)	3'4" (1016mm)
9827/9827-F/9927/9927-F	2'10" (864mm)	3'4" (1016mm)
9857/9857-F/9957/9957-F	2'10" (864mm)	3'4" (1016mm)
9847/9847-F/9947/9947-F	2'9" (838mm)	3'3" (991mm)
9848/9848-F/9948/9948-F	2'9" (838mm)	3'3" (991mm)

## Electrified mortise and electrified trim

The electric mortise lock device has all the versatility and advantages of the standard mortise lock device, plus the advantage of being electrically controlled by a remote switching device, an access control system or an automatic fire alarm system. The device features the E7500 mortise lock. The E7500 controls the locking of the outside trim. When unlocked, the door remains latched, preserving the fire rating of the door and making it particularly useful where codes permit locking but require unlocking during a fire emergency. The outside trim cylinder retracts the latch bolt for mechanical override, night latch function. Only available with TP, K or L functions.

The E7500 lock contains a SPDT signal to monitor the outside trim condition (locked or unlocked) and a second SPDT signal switch to monitor the latch bolt.

### Standard features

- Field reversible handing
- 24 VDC continuous duty solenoid

### Optional features

- Fail safe (locked when energized, unlocked when de-energized or during power failure). Specify with suffix "FS."
- Fail secure (unlocked when energized, locked when de-energized or during power failure). Specify with suffix "FSE"
- 24 VAC (with SO option)\*
- 12 VDC
- 12 VAC (with SO option)\*

Note: Some Fire codes will require "Fail Safe" (FS) operation for stairwell doors. Be sure to specify the correct operation for your application.

\* SO (silence operation) not recommended for continuously-powered devices.

### Electrical specifications

- Solenoid — .60 amps @ 12VDC  
.30 amps @ 24VDC
- Each switch — Up to 2.0 amps @ 24VDC Maximum

The E option does not include the power transfer from door to frame, the power supply or the control operator (Refer to EPT-10 and PS902 or PS914 power supply).

### To order, specify:

1. Use prefix "E," example E9975
2. FS or FSE (Product is not able to be changed in the field)
3. Voltage

### Electric mortise lock device

Adaptable for openings where continuous latching is required while the trim may be electrically locked or unlocked from a remote location—stairwells, exterior doors, etc.

### Minimum system requirements

- PS902
- EPT-10 or electric hinge

### M996L/L-BE Motor driven electrified trim

M996L/L-BE motor driven electrified breakaway lever trim provides remote locking and unlocking capabilities while incorporating the patented vandal-resistant trim design. The motor can be energized from a distant controller, thus allowing access control of the opening. The control of stairwells in high-rise buildings is a common application for this trim. M996 is furnished fail safe (FS) and convertible to fail secure (FSE) via dip switch. The M996 key bypass options are M996L (key functions as night latch mechanical override) or M996L-BE (no key override, blank escutcheon).

### Specification

Dual voltage – up to 1.12  
amps @ 12 VDC,  
Up to .59 amps @ 24 VDC.

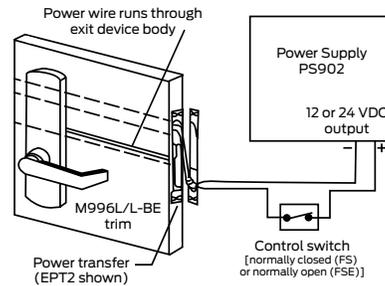

## Electrified options

### M996L/L-BE Motor driven electrified trim

#### To order, specify:

1. Use "M" prefix, example M996L.
2. Device type, R/V (rim/surface or concealed vertical rod/cable) or M (mortise)
3. FS or FSE
4. Lever style (06 lever is furnished standard)  
Other levers, no extra charge.
5. Handing and finish
6. Alllegion Connect specify CON

## Power supplies

### PS900 Series power supplies

The PS900 Series is a consolidated line of power supplies and accessories that offer enhanced flexibility and functionality specific to the changing needs of the access control market. The PS900 Series can be used in a variety of applications to convert high voltage AC power into the regulated low voltage DC outputs required by most access control devices. The PS900 Series protects devices downstream by providing Class 2<sup>1</sup>, filtered and regulated power. The full line is UL294 certified.

#### Features

- Constant output rating at both 12VDC or 24VDC provides superior performance; includes field selectable jumper
- Flat mounting of option boards provides easier access to terminal blocks for connection of electrified devices
- High voltage protective cover
- Battery back-up board auto-selects voltage
- Fire alarm relay can be configured to provide either switched or un-switched outputs from a power supply
- PS914 designed with high inrush current for powering electrified panic devices
- Universal 120-240 VAC input
- Low voltage DC, regulated and filtered
- Electronic power limiting foldback circuit for AC current overload protection
- Fused primary input
- AC status monitor- isolated SPDT contacts
- AC input and DC output LED status indicators
- Cover mounted AC input indication
- Hinged cover with lock down screws
- Optional keylock

#### Certifications

- UL 294 certified—the standard for access control
- Class 2 rated<sup>2</sup>

## Electrical and pneumatic power transfers

### PS900 Series power supplies

The PS900 Series offers a variety of distribution options, including basic fuse protection, simple relay, and advanced logic providing complex sequencing and timing functions.

#### Connectors on the power supply

Product	Schlage PS902	Schlage PS904	Schlage PS906	Von Duprin PS914
Amperage	2 amps	4 amps	6 amps	4 amps with 16 amp inrush
Distribution boards	1	2	3	2
Battery back-up board	1	1	1	1

#### Applications

The PS900 Series of power supplies works with many electrified devices including Schlage electromagnetic locks, Schlage AD Series hardwired locks, Schlage electrified mechanical locks, Von Duprin electrified strikes, Von Duprin exit devices and many other brands.

#### Accessories

The PS900 Series features seven option boards for use in a variety of applications. All PS900 Series power supplies option boards are UL 294 certified.

#### Option boards

- **900-4R:** 4 relay controlled output board to power multiple devices
- **900-4RL:** 4 relay distribution board with logic is field configurable for time delay function, auto operator, security interlock
- **900-8F:** Provides 8 individually fuse-protected outputs, giving the flexibility to power multiple devices and provide another layer of protection
- **900-8P:** Provides 8 individually fuse-protected outputs, giving the flexibility to power multiple devices and provide another layer of protection
- **900-FA:** Emergency interface relay integrates with fire alarm and is used to cut power in case of emergency<sup>2</sup>
- **900-BB:** Battery backup
- **900-2RS:** 2 relay control board for electric latch panic devices (EL or QEL), electric strikes or electrified trim
- **900-BBK:** Battery backup kit includes two 7A/hr batteries and provides up to four hours of backup power when cycled every 5 minutes at full load

1. PS906 can provide Class 2 rated outputs when used with 900-8P distribution board.  
 2. Except PS906, output rating exceeds Class 2 power limits.  
 3. PS906, output rating exceeds Class 2 power limits, but can provide Class 2 rated outputs when used with 900-8P distribution board.

### Electrical power transfer (EPT) Pneumatic transfer (PNT)

Electrical Power Transfer provides a means of transferring electrical power from a door frame to the edge of a swinging door. The units are completely concealed when the door is in the closed position, and are ideal for installations involving abuse or heavy traffic.

Two models are available; EPT-2, two 18 gauge wires and EPT-10, ten 24 gauge wires. The EPT-2 and EPT-10 are U/L listed as “miscellaneous door accessory”. UL Listed for use on fire doors.

#### Door applications

Degree of opening	Hinge type	Door thickness
0-180	Up to 5" butt hinges	1 3/4"
0-180	Up to 3/4" offset pivots	1 3/4"
0-130	5 1/2" butt hinges	1 3/4"
0-110	6" butt hinges	1 3/4"
0-90	Swing clear hinges	1 3/4"

#### Finishes

- 622 - Powder coated matte black
- 689 - Powder coated aluminum
- 695 - Powder coated bronze

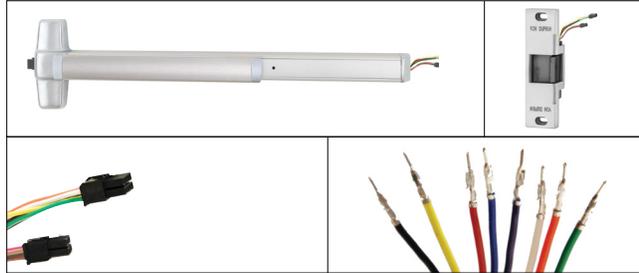

#### Dimensions

Housing	9" x 1 1/4" x 1 5/8" (229mm x 32mm x 38mm)
EPT-2	Two 18 gauge wires, up to 2 amps @ 24VDC, with a 16 amps maximum surge
EPT-10	Ten 24 gauge wires, up to 1 amps @ 24VDC, with a 16 amps maximum surge
PNT-1	5/32" Tubing

#### To order, specify:

1. EPT-2 ,EPT-10 or PNT-1
2. Finish, 622, 689, 695

# Allegion Connect

Allegion Connect features common interconnect components for many cross-category electrified options. Allegion Connect is a quick and easy way to connect power sources. There is no wire cutting; reducing installation and maintenance time ultimately cutting cost. After installation, Allegion Connect continues to provide benefits throughout the lifetime of the opening by offering a service kit for repairs or modifications in the future.

### Features and benefits

- Quick: common connections reducing installation time
- Perfect Connections: these factory installed connectors ensure the right wires match up every time
- Protective: the connectors protect the connection points throughout the installation process and lifetime of the opening
- Interchangeable: all Allegion Connect products utilize the same connectors
- Maintenance: you no longer need to cut away wire to disconnect Allegion products, also available is a service kit specifically for Allegion Connect products.

Harness length	Connectors on both ends	Connectors on one end, crimped pins on the other end
6 Inches	CON-6	CON-6P
12 Inches	CON-12	CON-12P
26 Inches	CON-26	CON-26P
32 Inches	CON-32	CON-32P
38 Inches	CON-38	CON-38P
44 Inches	CON-44	CON-44P
50 Inches	CON-50	CON-50P
192 Inches	CON-192	CON-192P

Power supply wire harness = connectors on one end, stripped leads on the other end.

6 Inches CON-6W - frame side of power transfer

Consult door manufacturer for harness length requirements.

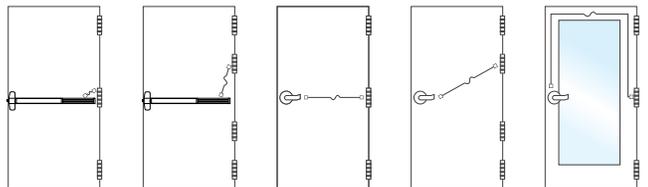

**Note:** You will need to purchase a separate wiring harness to go from exit device to hinge/EPT and an additional harness to go from hinge/EPT to power supply or access control system. Harness part numbers with ordering information can be located in the Schlage, Von Duprin and Falcon price books. A service kit is available for order in the Schlage, Von Duprin and Falcon price books. Included in this kit are male end plugs, female end plugs and pins to customize harnesses to your application.

**Note:** Must be ordered with exit devices and locks

### To order, specify:

1. Specify CON for Connect electronic options  
Example: QEL-99-EO-CON  
(99 Series quiet electric latch retraction exit only with Connect connectors)
2. Specify harness length; Consult door manufacturer for harness length
3. Specify Von Duprin EPT10-CON or Ives electrical thru-wire hinge

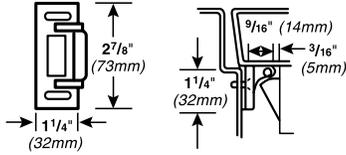

### Wire run options

# Strikes

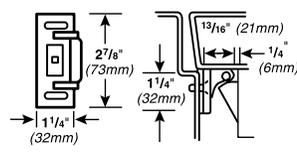

## Strikes for rim devices

264

# Cylinders

Cylinders are not furnished with device or trim and must be specified when ordering. Refer to trim pages for cylinder type.

**Mortise — 3215**  
(Schlage 20-001, L583-477 cam)

**Dogged (inverted) cam**

For CD, CDSI, CI and SD

**Rim — 3216**  
(Schlage 20-022)

**Undogged cam (standard operations)**

For ALK, CX, DE5300, RCM, SS and all 98/99 Series mortise cylinder trims and controls

## Door kits

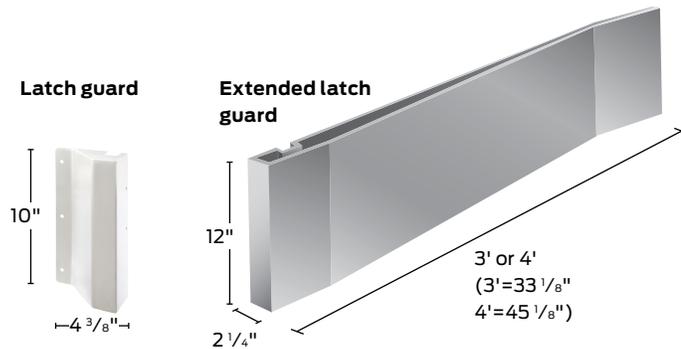

Rod guard

### Vertical rod and latch guard (RG-27)

Series RG-27 Vertical rod and latch guards protect the bottom rods of exit devices from the damaging impacts of carts or gurneys passing through doors. (If bottom rods become damaged, the exit device will not function as intended and can jeopardize the ability to exit safely during an emergency.)

In addition to protecting the vertical rod, the guard provides a smooth, unobstructed surface so the door can be pushed open easily with the bumpers of a wheelchair. The latch guard portion is 10" high. The standard latch guard features a 45° ramp. The extended latch guard offers a continuous ramp for 3' or 4' doors.

All stainless steel construction in 630 finish. Latch guards can cover latches as large as 1 1/4"W x 10"H x 1 7/8" projection.

### Models

RGO	Rod guard only (projection 1 3/16")
RG-27	Rod and latch guard
RG-27-3	3' (914mm) Rod guard and extended latch guard
RG-27-4	4' (1219mm) Rod guard and extended latch guard
LGO	Latch guard only
LGO-3	3' (914mm) Extended latch guard only
LGO-4	4' (1219mm) Extended latch guard only
WS-LGO-3	3' (914mm) Extended latch guard only for windstorm (WS) devices
WS-LGO-4	4' (1219 mm) Extended latch guard only for windstorm (WS) devices

When using on wood fire doors, high density block is required.

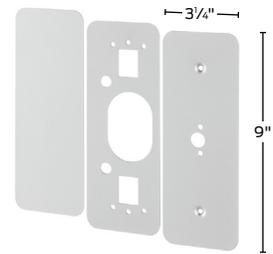

### To order, specify:

1. Model number\*
2. Handing (except on RGO).
3. Door material if other than hollow metal.
4. Optional sex bolt mounting available.

\* RGO/RG-27 includes one rod guard only, which accommodates bottom or top rod up to 7' door. For longer top rods, specify rod guard quantity required. Also available are the WS-LGO-3; and WS-LGO-4\* extended latch guards for use with WS98/9927/57 devices.

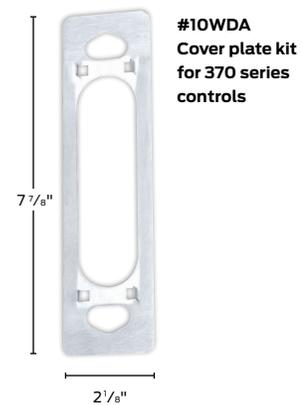

### 997 Cover plate kit

For 98/99 rim device, kit contains inside and outside plates for hinge stile cutouts, an inside plate for the lock stile, and necessary screws. Plates are designed to cover cutouts required by most existing exit device installations. Specify finish.

### Wood door applications cover plate kit (WDA)

For wood door applications, used to cover up door preparations for control, also prevents the control from boring into the wood door. Finished to match control.

### Glass bead kit (GBK)

Glass bead conversion kits are available for all 98/99 Series devices for use on doors with raised glass beads. Each kit consists of 1/4" (6mm) shim sets. GBK for surface vertical rod ships with 1/8" shims for rod guides.

### To order, specify:

1. Device model.
2. GBK.
3. Device type (rim, mortise, surface rod, concealed rod, concealed cable).
4. Wood door (when used with concealed rod or concealed cable device).
5. Specify if using with 499F or 954 strike.
6. Finish.

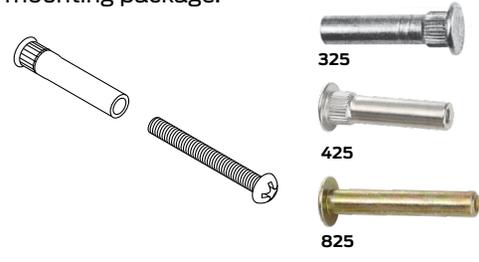

### Example: XP98 GBK Rim 954 SP28

Note: For 330/350 dummy pushbar, order hinge stile shim #971010, quantity 2.

# Sex bolts

Sex bolts provide secure mounting by mating with machine screws furnished with devices. Sex bolts are either optional or required, as shown in quantity chart below. Sex bolts ordered separately are not furnished with screws. If screws are required, order device mounting packages.

An alternative to sex bolt mounting is the use of UL or WH approved high density blocking material for wood fire-rated doors. Specify device with SLM (special laminate material) mounting package.

### To order sex bolts

1. If ordering devices with sex bolts, specify SNB (sex nuts and bolts) in device description.
2. If ordering sex bolts separately, specify:
  - Sex bolt model number
  - Package quantity (sold as package of 2)
  - Finish

98/99/XP98/XP99 Rim-F, single or double door, SLM blocking

98/9927/57-F, SLM blocking

98/9947WDC/50-F, standard or LBR/LBL, SLM blocking

98/9975-F, SLM blocking

No sex bolts, all applications; special laminate material (SLM) blocking mounting package added to price

\* 696/697 must be milled on the back to sit flush against required 425 sex bolts

† These 825 sex bolts are only required for 98/9957-F on fire-rated wood doors with outside trim.

## Accessories

### Mullions

Removable steel mullions provide single door performance in double door openings with rim devices. Mullions are easily removed by loosening bottom set screw and removing top fitting cover. The top mullion fitting is attached to the frame and is concealed by the fitting cover.

- Steel mullions are 2" (51mm) wide and 3" (76mm) deep, with a wall thickness of  $\frac{1}{8}$ " (3mm) (except the HH9954 which has thicker walls).
- Mullions are shipped with mounting screws and prepared for strikes. (Strikes are not included except where indicated.)
- Steel mullions are available in SP28 and SP313 finishes. (Consult factory for other powder coat finish options.)

#### Keyed removable steel mullions (KR)

KR mullions make removal faster and easier by a single operation of the mortise cylinder. Once mullion is removed, large equipment or furniture can freely pass through the opening. The unit will self lock when re-installed, without the use of the cylinder key. Uses a  $1\frac{1}{4}$ " mortise cylinder with a straight cam (Schlage cam reference L583-477). Cylinders are sold separately. Prefix mullion model with "KR". (KR is not available on HH9954 or aluminum mullions.)

Removable aluminum mullions are  $1\frac{1}{16}$ " (27mm) wide on face closest to the door and  $2\frac{3}{8}$ " (60mm) at the widest point. The depth is  $3\frac{1}{8}$ " (79mm) with a wall thickness of  $\frac{1}{8}$ " (3mm).

Aluminum mullions are available in 606, 612, 628, 710 and 622/711 finishes. Consult factory for other powder coat finish options. Aluminum mullions are not available keyed removable.

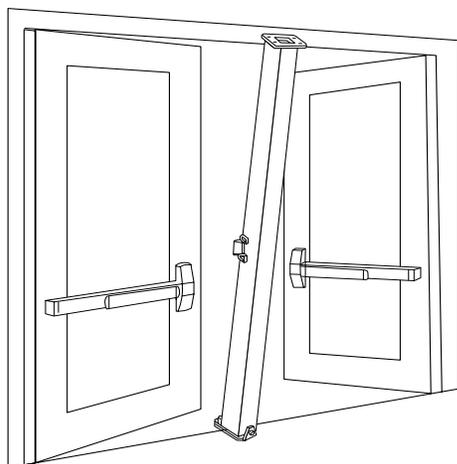

Stock hollow metal applications for devices mounted to cover ANSI 161 cutouts are higher than the standard mullion strike location. Consult the factory for special strike preparation or order a blank mullion. See below.

#### Blank mullions

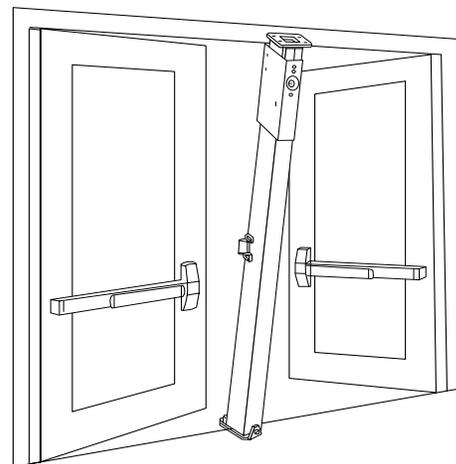

Blank mullions are furnished without strike preparation. They are used to mount devices at a strike height different from the standard mullion preparation.

#### To order, specify:

1. For keyed removable option on steel mullions, prefix model number with "KR"
2. Model number
3. Height of opening
4. Finish
5. Handing if required
6. Centerline deviation (refer to device template for standard centerline)
7. Strikes, when required, should be ordered with device

Removable mullions

Keyed removable steel mullions

## Steel and aluminum mullions

### Steel mullions

**1654** Prepared for two 1606 strikes. If 1606 strikes are not specified on the order, two per mullion will be added. Additional charges apply.

**4954** Prepared for 264 or 299 strikes. For use with all Von Duprin Panic rim devices.

**4954-XP** Prepared for two 909 strikes, for XP device.

**9954**  Prepared for and must be used with two 268 strikes (88-F device), or two 499F (22-F, 98-F, 99-F devices). UL fire labeled mullion for up to 3 hour opening using Von Duprin fire exit rim devices. This mullion is not easily removed due to special fittings. 98-F and 99-F devices are rated up to 10'0" (3048 mm).

Note: If 268 or 499F strikes are not specified on the order, two per mullion will be added. Additional charges apply.

**9954-XP** Prepared for two 954 strikes, for XP device.

**HH9954** Heavy-duty mullion for use in impact-rated hurricane assembly. See UL Listing for Fire Exit Hardware on page 73 and Hurricane rated applications on pages 50-51.

**4754** Prepared for two 4263 monitor strikes.

**4854** Prepared for one 299 and one 6111 electric strike. Indicate handing for electric strike.

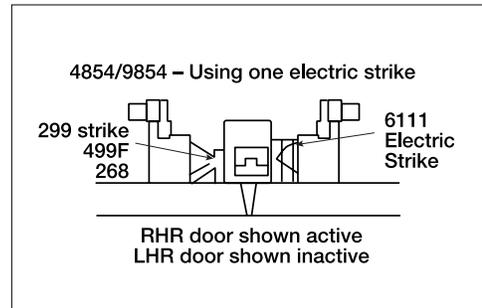

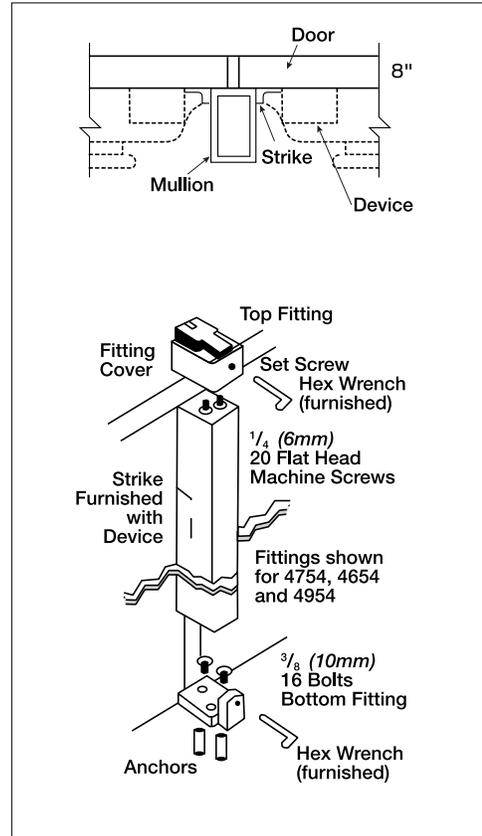

**9854**  Prepared for one 268 or 499F strike and one 6111 electric strike. Indicate handing for electric strike. UL fire labeled mullion for up to 90 minutes openings up to 8' x 8' (2438mm x 2438mm) using Von Duprin fire exit rim devices.

### Aluminum mullions

**5654** Prepared for two 299 strikes.

**5654-XP** Prepared for two 909 strikes, for XP device.

**5754** Prepared for 1408 double strike.

<sup>1</sup> Fire-rated flush bolts may be substituted on one leaf of a pair in these columns. Substitute two-point flush bolt for vertical devices; or substitute top flush bolt with auxiliary fire bolt for vertical rod LBR/LBL-AFL devices. The opening will carry the fire listing (# hours and opening size) of the least rated component.

<sup>2</sup> Not listed for Canada.

<sup>3</sup> For Vertical x Mortise opening sizes, see applicable vertical rod/cable device rows.

<sup>4</sup> Hourly limitation due to 6111 electric strike listing.

## Notes:

Check with door manufacturers to confirm listing compatibility.

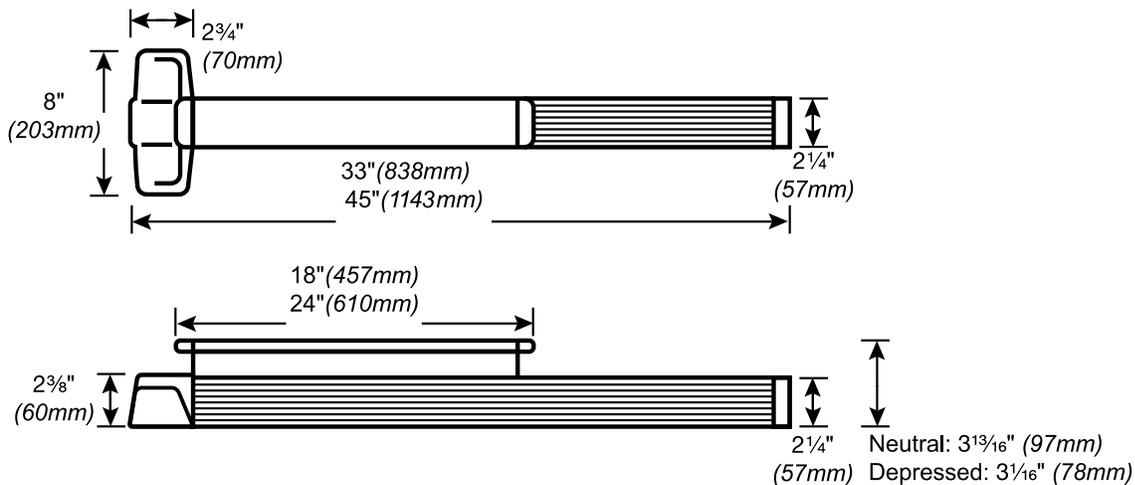

Overlapping astragal may not be used on pairs swinging same direction with vertical rods or cables on both leaves.

## About Allegion

At Allegion (NYSE: ALLE), we design and manufacture innovative security and access solutions that help keep people safe where they live, learn, work and connect. We're pioneering safety with our strong legacy of brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Our comprehensive portfolio of hardware, software and electronic solutions is sold around the world and spans residential and commercial locks, door closer and exit devices, steel doors and frames, access control and workforce productivity systems.

solutions

# Introduction

## Flexible solutions for real-world applications

Pioneering safety is in our DNA. Responding to a need more than a century ago, Von Duprin® invented the first self-releasing fire exit device. We continue to advance the industry through innovation that is fueled by a deep understanding of our customers' needs and safety standards, delivering solutions for even the most challenging applications.

We understand door hardware isn't a one-size-fits-all solution. Many electric strikes and accessories are available to fit varying security needs. Or customize an opening with electrified trim, a delayed egress option or alarm kit.

## 4200 Series electric strikes for cylindrical locks

### Overview

The 4200 Series electric strikes are easy to order, configure in the field and install. This makes it a great choice for commercial applications where traffic control is the primary function.

Compatible with a wide range of cylindrical devices, the 4200 series makes electrifying an opening simple. It is designed and tested to work with all Schlage and Falcon cylindrical locks as well as those of many other manufacturers.

With a variety of field configurable options, the 4200 series is able to address a broad range of needs. The power failure mode (fail safe or fail secure) can be changed in the field without disassembling the strike. The 4200 series also features a 12/24 dual-voltage solenoid for field wiring of either input voltage.

Additional factory orderable options provide even greater flexibility. The 4200 series can be ordered with or without latchbolt monitor. Square face plate is offered standard to accommodate hollow metal frames, and rounded corner faceplates are available as an option for aluminum frames. An entry buzzer and rectifier kits are also available options.

The 4200 was developed with Von Duprin's high standards and engineering expertise. Its heavy duty stainless steel construction is designed to withstand abuse.

### Features and benefits

- Field configurable 12/24 voltage utilizing dual-voltage internal solenoid
- Field configurable power failure mode (fail-safe/fail-secure)
- Non-handed, internal solenoid design
- Heavy duty stainless steel faceplate
- Latchbolt monitoring standard on 4212 only
- Optional entry buzzer and rectifier kits available for AC to DC operation
- 1 year electrical product warranty

### Lockset compatibility

The 4200 series is compatible with all Schlage and Falcon cylindrical locks as well as cylindrical and deadlatch locks of many other manufacturers.

- The 4211 is compatible with locksets with  $\frac{5}{8}$ " (15 mm) throw latchbolts, or up to  $\frac{3}{4}$ " (19mm) throw latchbolts with a  $\frac{1}{8}$ " door gap.
- The 4212 is compatible with locksets with  $\frac{1}{2}$ " (12.7mm) throw latchbolts, or up to  $\frac{5}{8}$ " (15 mm) throw latchbolts with a  $\frac{1}{8}$ " door gap.

### 4200 Series power requirements

Model	Voltage	Current	Duty	Amps
4211 or 4212	12V	DC	Continuous	0.20
4211 or 4212	24V	DC	Continuous	0.10

**4212 Latchbolt monitor switch rating:** 30VDC at 0.20 A

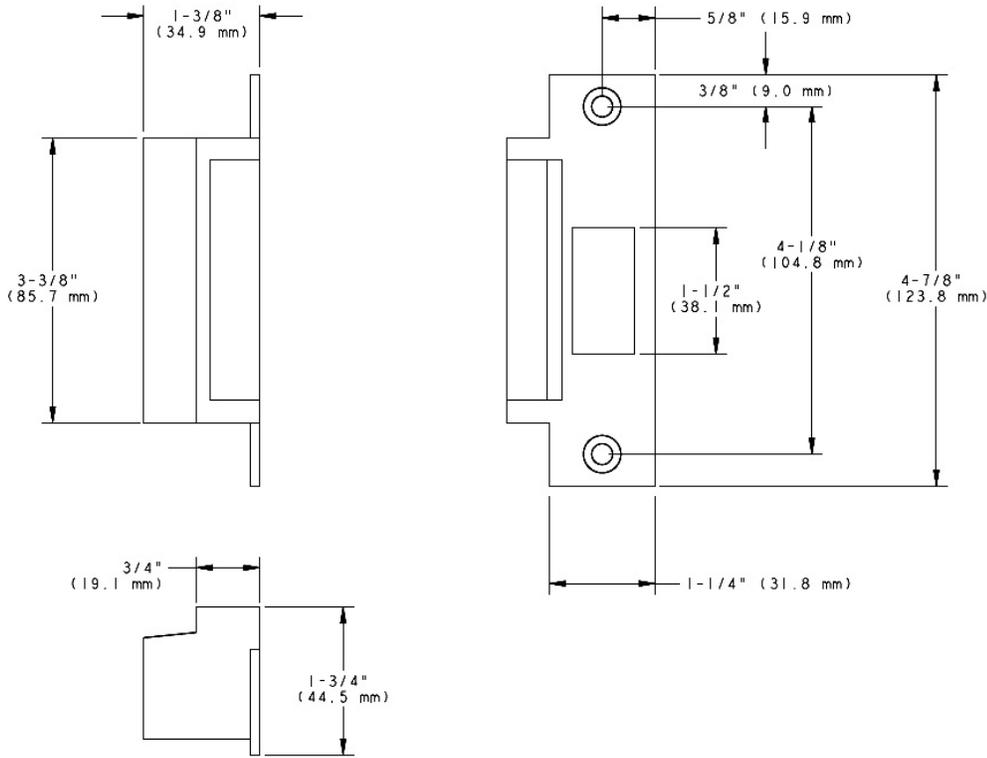

The 4200 series requires a DC regulated power supply, and the Schlage PS900 series power supplies are recommended.

Continuous duty=Energized 1 minute or more

# 5100 Series electric strikes for cylindrical locksets

## Overview

The Von Duprin 5100 electric strike has been designed to offer flexibility and convenience for locksmiths and security professionals. This easy-to-install electric strike was created for medium-duty applications, specifically to control traffic flow through interior and exterior openings in retail and commercial environments.

The 5100 electric strike is compatible with a wide range of cylindrical devices and is extremely versatile for field conversions. The combination of three faceplate options plus field selectable voltage and power fail modes allows it to be changed on the job site to create as many as 12 different configurations. An adjustable keeper also improves fit for applications with weather stripping or tight door preps. In short, the 5100 provides added convenience by ensuring the right parts are in the box to get the job done.

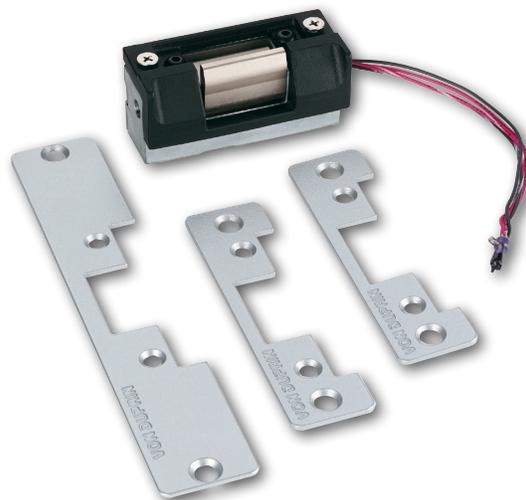

The 5100 was developed with Von Duprin's high standards and engineering expertise. Its heavy-duty construction and tamper-resistant design is able to withstand abuse. The 5100 is tested to over one million cycles and provides 1300 lbs holding strength.

## Features and benefits

- Designed for cylindrical applications
- Capable of 12 in-field configurations
- Three faceplates standard in every box
- Field selectable 12/24 voltage
- Non-handed. Internal solenoid design
- Field selectable power failure mode (fail-safe/fail-secure)
- Adjustable keeper
- Rectifier kits
- Available in three finishes
- Suitable for interior and exterior doors
- UL 1034 listed for burglary-resistant electric door strikes
- Static strength 1300 lbs
- Dynamic strength 70 ft-lbs
- Endurance 1,000,000 cycles

## Lockset compatibility

Keeper depth of  $\frac{1}{2}$ " is sufficient to accommodate all cylindrical locks up to  $\frac{5}{8}$ " throw and most aluminum narrow stile deadlatches.

## 5100 Series power requirements

### Power options

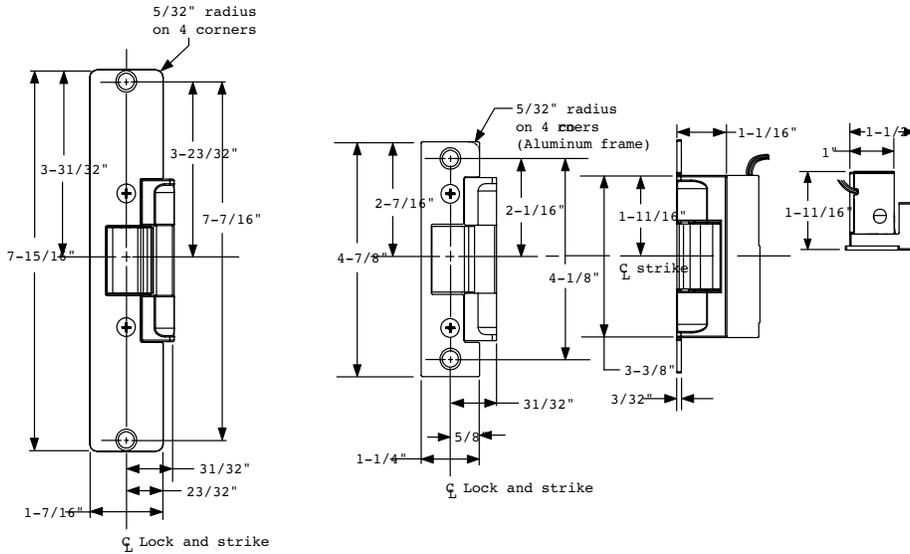

DC: Regulated power supplies (recommended)	PS902 power supply	
AD/DC: Conversion	Von Duprin SO-24 kit	
	12VDC	24VDC

# 6000 Series electric strikes

## Overview

### Von Duprin 6000 Series electric strikes

Von Duprin is the leading manufacturer of premium, heavy-duty electric strikes known for their reliability, durability and security.

Electric Strikes provide remote release of a locked door. They allow the door to be opened without retracting the latchbolt. This occurs by the releasing of the electric strike lip (sometimes called keeper or gate). When the door closes the beveled latchbolt rides over the lip and falls into the electric strike pocket.

### Von Duprin 6100 Series electric strikes

Electric strikes for use with rim exit devices

### Von Duprin 6200 Series electric strikes

Electric strikes for use with mortise/cylindrical locks

## Versatility

- Furnished 24VDC and 28VDC standard with 12VDC and AC operation optional. 16VDC solenoids available.
- Furnished fail secure (FSE) standard, with fail safe (FS) optional.
- Strike box is adjustable to compensate for misalignment of the door or frame.
- Two piece plug connectors are furnished for ease of installation and for removal during strike servicing.

## Durability

Developed with Von Duprin's high standards and engineering expertise.

- Heavy-duty stainless steel construction.

## Features and benefits

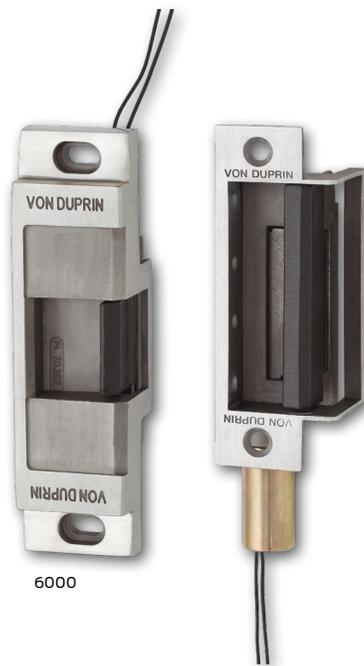

- Stainless steel construction
- Accepts 3/4" (19mm) throw latchbolt
- Six finishes
- Non-handed
- Fail secure
- Plug connectors

Specifications	12V	24V
Resistance in Ohms ± 10% @ 70°F	21	82
Watt-seated @ 70°F	7.5	8
Amps-seated @ 70°F	.6	.33
Amps-inrush @ 70°F	.6	.33

## To order, specify

1. **Model number**
2. **FS** (fail safe, when required)
3. **DS** or **DS-LC** (dual switch, when required)
4. **Voltage** 12VDC or 24VDC  
For 16V solenoids order separately
5. **SO12** or **SO24** (required when using AC)
6. **Finish:** 605, 606, 612, 613, 629, 630
7. **EB** (Entry buzzer), **FSE** only (when required)

**Note:** Information listed is for use on new applications. On retrofit applications, modification of the frame preparation may be required, consult factory.

## Options

### AC operation

SO12 and SO24 are rectifier kits to convert AC voltage to operate the DC solenoids. These kits are field installable and plug in-line to solenoid.

### Dual switch monitoring (DS and DS-LC)\* (Factory installed only)

Dual switch monitoring option has two SPDT contacts, one switch monitors the tripper which is depressed when the latchbolt is inserted into the strike pocket. The second switch monitors the condition of the strike lip, open or closed and locked.

DS is standard, rated 24V, operating range from 2 ampere to 50 milliamperes.

DS-LC low current gold contact switches for use on applications associated with computer control and monitoring, rated 24V, operating range 50 milliamperes or below.

### Fail secure — (FSE)

FSE — FAIL-SECURE electric strikes require power to be applied to unlock the strike lip. On loss of power, the strike is locked. Field convertible with parts.

### Fail safe — (FS)

FS — FAIL-SAFE electric strikes require power to be applied to lock the strike lip. On loss of power, the strike is unlocked. Building codes prohibit the use of fail-safe strikes on fire-rated openings. Field convertible with parts.

### Entry buzzer — (EB)

EB — Entry buzzer is available for use with fail-secure strikes. Installed in the frame and in parallel with the circuit, the buzzer will sound when the strike is unlocked.

### UL listed

UL Listed Burglary-Resistant and Electric Strike for fire doors and frames. A label for single doors and B label for double doors.

\* Dual Monitor Switches (DS or DS-LC) are not available on open back strikes.

# 6100 Series strikes for rim exit devices

## Overview

Von Duprin electric strikes are known for their reliability, durability and security. The 6100 Series is designed to withstand abuse. Its heavy-duty stainless steel construction is fully UL1034 and UL10C listed.

6100 Series electric strikes are designed for use with a variety of rim exit devices. They interface with the latch mechanism of the exit device. The movable lip (keeper) allows a door to open even when the latch bolt is extended. This feature, called remote release, provides added benefits such as increased convenience and efficiency. The 6100 Series also provides added security and traffic control.

6100 Series electric strikes can be used for retrofit applications or new construction. To assure the proper selection of an electric strike on new applications, lockset compatibility charts are shown below. When using a lockset not listed or when retrofitting a strike to an existing application, please contact Von Duprin technical support for application assistance.

The power failure mode of the 6100 can be specified at the time of order. Fail-secure is available for fire rated openings. In a fail-secure application, the door is normally locked. To unlock the door, power must be applied. Fail-safe strikes, which are commonly used for life safety applications, are non-fire-rated. To unlock a fail-safe strike, power is removed. The 6100 comes standard 24 VDC; 12 VDC and AC operation are optional.

## Features and benefits

- Non-handed design provides greater flexibility
- Strike box is adjustable to compensate for misalignment of the door or frame
- Two-piece plug connectors are furnished for ease of installation and for removal during strike servicing
- UL1034 burglary-resistant and UL10C electric strike for fire door
- Six finishes available to suite with existing hardware
- Durable stainless steel construction
- 24 VDC standard with 12 VDC and AC operation optional

Application notes	1	2	---	2, 4	3

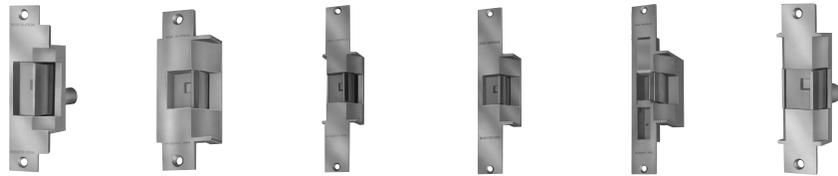

**Note:** 16 VDC and 28 VDC solenoid are sold as replacement parts for existing strikes. Please contact customer care for details.

### Application notes:

- For use with ANSI prep at standard height. Strike pocket inserts are provided to accommodate different manufacturers deadlocking trigger locations.
- For use on new installations with mortise locks without deadbolt or cylindrical locks on single door, hollow metal frame applications. Designed to replace Von Duprin 3140 or Folger Adam 712.
- Fits modified ANSI 115.2 cutout. Designed to replace Von Duprin 3146.
- Wood frame horizontal solenoid location differs from Folger Adam. May require frame prep modification when retrofitting.

# 6200 Series strikes for mortise or cylindrical devices

## 6300 Series surface mounted strike for rim exit devices

### Overview

Von Duprin electric strikes are known for their reliability, durability and security. The 6300 Series is designed to withstand abuse. Its heavy-duty stainless steel construction is fully UL1034 and UL10C Listed.

6300 Series electric strikes are designed for use with a variety of rim devices. It interfaces with the latch mechanism of the exit device. The movable lip (keeper) allows a door to open even when the latch bolt is extended. This feature, called remote release, provides added benefits such as increased convenience and efficiency. The 6300 Series also provides added security and traffic control.

6300 Series electric strikes are ideal for aftermarket applications. It is easy to install without modifying or altering the door frame. To assure the proper selection of an electric strike on new applications, lockset compatibility charts are shown on the next page. When using a lockset not listed or when retrofitting a strike to an existing application, please contact Von Duprin technical support for application assistance.

The 6300 is fail-secure (FSE) only to achieve compliance with UL10C for fire-rated openings. In a fail-secure application, the door is normally locked. To unlock the door, power must be applied. The 6300 strike can be used with either 12VDC or 24VDC. There are 2 connectors that ship with it and the appropriate connector for either 12VDC or 24VDC will be used, based upon the available voltage at the opening.

### Features and benefits

- Non-handed design provides greater flexibility
- Requires no alteration or cutting to existing frame
- UL1034 burglary-resistant and
- UL10C electric strike for fire door
- Stainless steel (satin) finish
- Durable stainless steel construction
- Field selectable voltage 12VDC or 24VDC
- Dynamic strength 70 ft-lbs

# 6400 Series modular strike for mortise and cylindrical locksets

## Overview

The 6400 electric door strike from Von Duprin is designed to be modular and highly configurable to fit nearly any mortise or cylindrical lock. This versatile strike allows the installer to insert and lock-in the deadbolt keeper or plug and deadlatch ramp anywhere within its 3 1/8" vertical opening to fit the latch position and functional needs. This, combined with a 1/8" horizontal adjustment, makes this easy-to-install design a good fit for installations where misalignment or a tight fit may be a problem.

As a 3-hour UL 10C listed strike, the 6400 Series is intended as a fail-secure only solution for fire-rated openings. Its durability and quality are shown by its grade 1 certification as a heavy-duty stainless steel strike with over 2,000,000 endurance cycles.

Use it as a time-saving, "go to" strike. The 6400 comes ready for use with prewired plug-in connectors for 12 or 24 VDC voltage that can be changed over to 12 or 24 VAC without a converter kit, two faceplates – one each for offset and centerline locks as well as a trim filler plate, mounting tabs and shims and a self-adhesive template for frame cuts. An optional "plug in" latchbolt monitor is also available and can be added in the field at any time after installation.

## Features and benefits

- Modular design fits cylindrical and nearly any mortise lock
- Heavy-duty stainless steel construction in BHMA 630 satin finish
- Vertical adjustments allow for alignment with a wide variety of mortise locks with offset latches
- Horizontal adjustment of up to 1/8" improves fit on tight door preps
- Can accommodate up to 1" deadbolt (for night latch only)
- Field selectable voltage 12 or 24VDC and 12 to 24VAC
- Plug-in voltage connectors are included for ease of installation and removal during strike servicing
- Optional plug-in latchbolt monitor can be added in the field
- Non-handed, unique internal solenoid design prevents keeper from heating up
- Low current draw (0.19 amps @ 24 VDC)
- Suitable for interior and exterior doors
- 3-hour fire-rated to UL 10C (fail secure only)
- UL 1034 listed for burglary-resistant electric door strikes
- UL 294 listed for access control system
- CSFM California State Fire Marshal listed
- Static strength: 1500 lbs
- Dynamic strength 70 ft-lbs

## Lockset compatibility

Vertical adjustment of the deadbolt keeper or deadlatch ramp allows for alignment with a wide variety of mortise locks with offset latches. Accommodates up to 1" deadbolt\*. Up to 1/8" horizontal adjustment for misaligned frames.

\* Night-latch function only, bolt will not release

## 6400 Series power requirements

Model	Mode	Voltage	Duty	Sound	Amps <sup>1</sup>	Ohms <sup>2</sup>
6400	Fail-locked	12 VDC	Continuous	Silent	.375	37
6400	Fail-locked	24 VDC	Continuous	Silent	.190	148
6400	Fail-locked	12-24 VAC	Intermittent	Buzz	.280 - .565	37

Intermittent duty = Energized less than 1 min. with duty ratio 1:5;  
Continuous duty = Energized 1 min. or more.

<sup>1</sup>Ratings are based on maximum current draw at +10°C and include initial power-up current draw.

<sup>2</sup>Nominal resistance at +25°C +/- 7% tolerance.

## Model specifications

Model number	6400
Latchbolt throw	(Also accommodates 1" deadbolt as a nightlatch only - no release)
Backbox depth	4 7/8" (Includes two face plates: Centerline and Off-set latch entries)
Backbox depth	1 3/4"
Finish	US 32D/BHMA 630
Lockset	Cylindrical, mortise, mortise exit
Number of doors	Single
Door/frame type	Hollow metal, aluminum and wood
Options	2 Rectifier kits: <ul style="list-style-type: none"> <li>• SO12 Converts 12 VAC voltage to 12 VDC to operate the solenoid</li> <li>• SO24 Converts 24 VAC voltage to 24 VDC to operate the solenoid (Entry buzzer)</li> </ul>
Certifications	ANSI/BHMA A156.31 Grade 1, 3-hour fire rated to UL 10C (FSE only), UL 1034, UL 294, CSFM
Applications notes	Modular electric strike ideal for aftermarket applications. Fail-secure only for fire-rated openings.

# 6400 Series modular strike for mortise and cylindrical locksets

## Wiring instructions

Use the appropriate wire harness supplied.

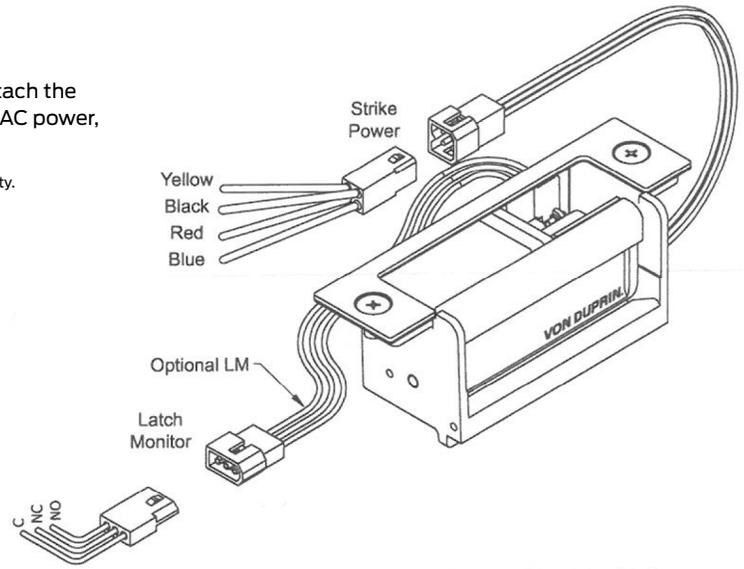

- 12V for 12VDC and 12-24VAC
- 24 for 24VDC only

Attach the red wire to (+) positive of the power supply. Attach the black wire to the (-) negative of the power supply. If using AC power, polarity is not observed.

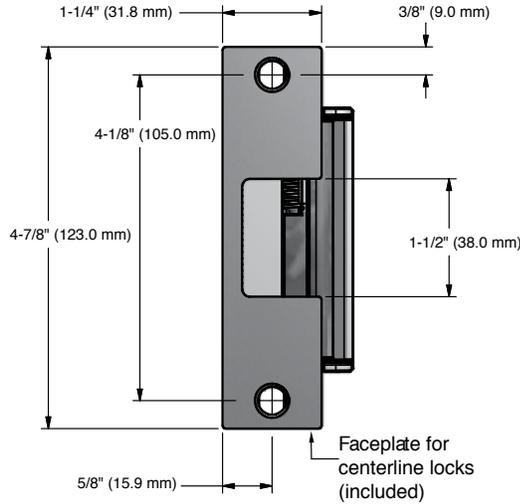

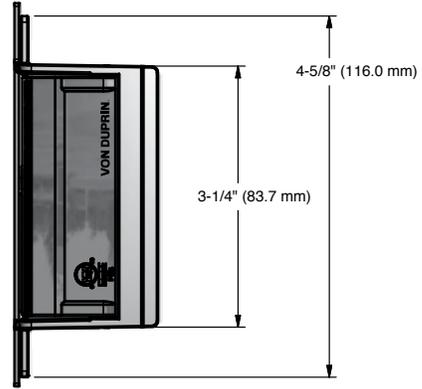

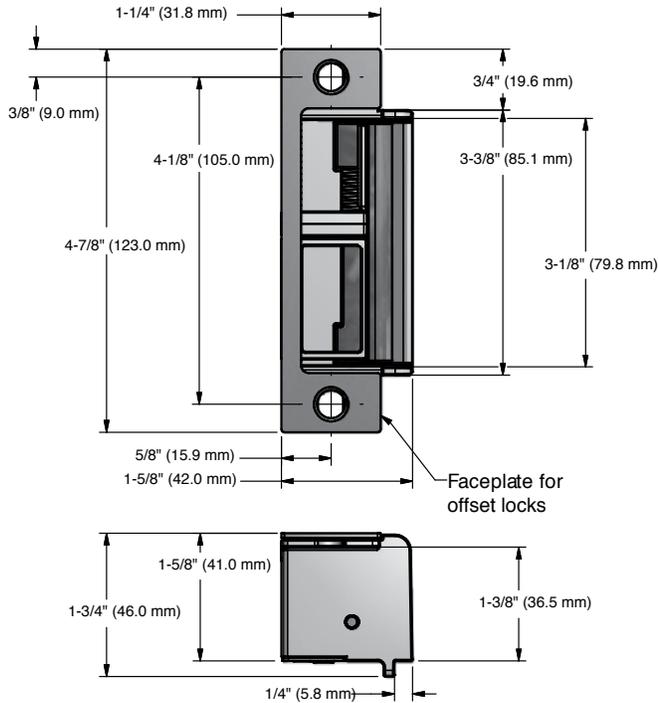

**Note:** If a suppression diode is required for access control, observe proper polarity.

## Latch monitor wires

- Black = Common (C)
- Blue = Normal Close (NC)
- Orange = Normal Open (NO)

# 6400 Series dimensions

**Note:** Not to scale. Specifications are subject to change without notice.

<sup>1</sup>Includes double door with mullion.

<sup>2</sup>Recommended on wood frames only if drop in replacement is needed for 3041, 42, 61, 62 on wood frames. Otherwise use 6211WF.

<sup>3</sup>Recommended on wood frames only if drop in replacement is needed for 310-2<sup>3</sup>/<sub>4</sub>, 310-2 on wood frames. Otherwise use 6211WF.

<sup>4</sup>Strike lip area cutout is slightly larger than Folger Adam.

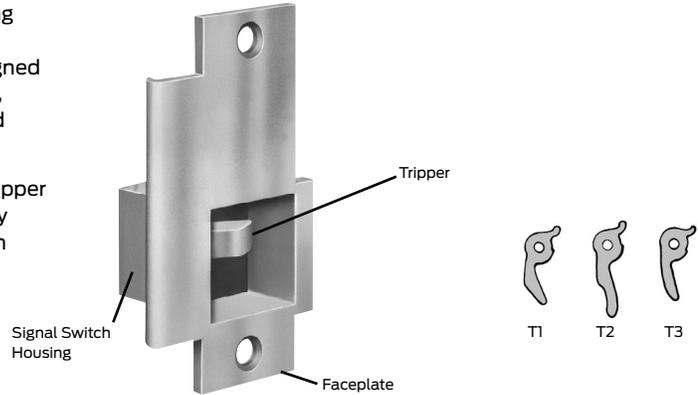

<sup>5</sup>Surface applied strike. Mounting hole locations different from Folger Adam.

<sup>6</sup>Wood frame horizontal solenoid location differs from Folger Adam. May require frame prep modification when retrofitting.

# Monitor strikes

Monitor strikes are designed to offer remote door monitoring through the use of a signal switch mounted in the strike to monitor the latch bolt. This series of monitor strikes is designed for use with Von Duprin and most other manufacturers' rim, mortise, surface and concealed vertical rod exit devices and cylindrical, mortise and unit type locks.

The monitor strike replaces the standard door strike. The tripper in the monitor strike is depressed when the latch bolt is fully inserted in the strike. The stainless steel tripper activates an electric switch.

**Note:** Tripper selection is based on the throw and shape of the latch bolt.

## Monitor strike electrical rating

SPDT Switch (single pole double throw): 24VDC @ 2 Amps (resistive)

Application notes	1	2	3

### Application notes:

- The 4263 is non-handed and features horizontal adjustment to compensate for misalignment of door and frame. 4263 may be used with a mullion. Tripper selection (-T1 or -T3) is based upon the lock to be used with.
- The 4268 features horizontal adjustment to compensate for misalignment of door and frame. 4268-T1 is not for use with mullions.
- For use on single or pair of doors with ANSI 115.3 frame cutout (frame modification required.) Tripper selection (-T1 or -T2) is based upon the lock to be used.

Certifications				UL list (GXHX R4504) fire exit hardware
Application notes	1	2	3	4

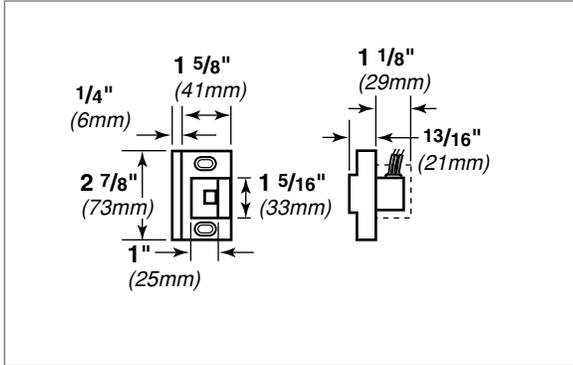

\* Special template required

#### Application notes:

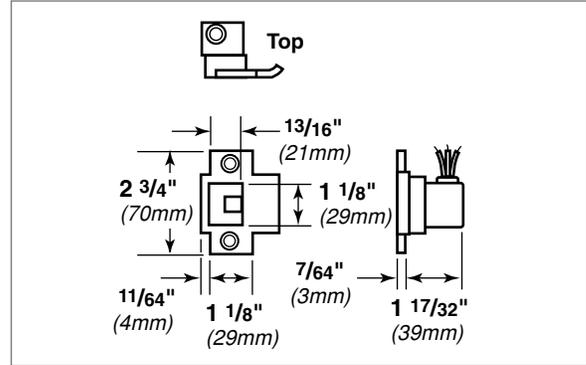

- For use on single or pair of doors with ANSI 115.2 frame cutout (frame modification required.) 4570-T1 is only used with T1.
- For use on single or double doors with ANSI 115.3 frame cutout (frame modification required.) 4670-T1 is only used with T1.
- For use with pair of doors where one leaf has concealed vertical rods. 4690-T2 is only used with T2.
- For use with pair of doors where both leaves have concealed vertical rods. 4690-1-T2 is only used with T2.

3. Handing required on model 4582, specify LHR or RHR
4. Finish: 605, 606, 612, 613, 625, 626

# Latch retraction

## Quiet electric latch retraction (QEL)

Quiet electric latch retraction (QEL) provides electronic control of an exit device for environments where limited operational noise is desired. These devices always provide mechanical egress. The electrified latch retraction can also be activated by an access system or building automation system to unlatch the exit device momentarily. Often the QEL is used with a credential reader and access control system to unlock the door momentarily for authorized users.

The QEL can also be configured to electronically retract the latch for an extended period of time to allow free entry. This is a convenient alternative to mechanical dogging. If manual dogging is required, the hex dogging option is available, to order specify HD-QEL. Special center case dogging is also available for 98/99 rim and vertical systems, specify SD-QEL.

The standard default QEL feature will retract the latch bolt and pushpad. If an active pushpad is required utilize the QEL-L option. This option will retract the latch bolt and maintain an active pushpad.

In some applications an audible indication of pushpad retraction is desired. The QEL-B (B-buzzer) option is a feature that can be added as a retrofit to a QEL device in the field that will send an audible notification of initial latchbolt retraction.

The QEL option is available on panic devices and fire rated devices. UL approved for Class II circuit applications.

The QEL option does not include the power transfer from door to frame, the power supply, or the control operator. Refer to EPT-2 power transfer and the PS902 or 914 power supply.

The PS902/914 with the 2RS, 4RL or 4R board is the minimum required. Other option boards available for other functions, see PS902/914 power supply for additional information.

The QEL has a low inrush current, so it can be used with standard Schlage power supplies. Calculate the peak current draw of all devices in the system to determine the required amperage of the supply.

The -2RS option board is designed to control two electric latch retraction devices and provide time delay.

### To order, specify:

1. Standard — use prefix QEL, example QEL99L
2. Special center case dogging — use prefix SD-QEL, example SD-QEL99L

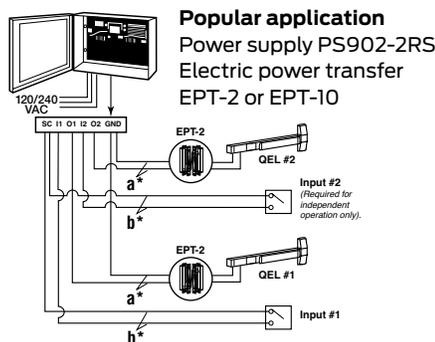

**Note:** Baseplate and modular QEL Conversion kits are available for field retrofit. Please see parts/service manual for part numbers. between the firing of outputs is required. The power transfer is also sold separately.

## Quiet electric latch retraction buzzer (QEL-B)

In some applications an audible indication of pushpad retraction is desired. The QEL-B (B-buzzer) option is a feature that can be added as a retrofit to a QEL device in the field that will send an audible notification of initial latchbolt retraction.

# ESL Von Duprin emergency secure lockdown

The emergency secure lockdown (ESL) option is ideal for high-occupancy spaces, such as auditorium-style classrooms with access control

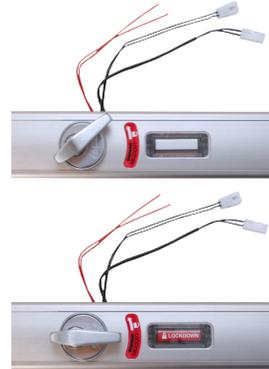

Occupants can turn the thumb turn (or cylinder key) of the ESL option installed, interrupting the power to the QEL motor, and electronically undocking to secure pull side of the door as well as sends a signal to the access control system. The visual indication assures the occupant the exit device has been put into secure lockdown mode.

**To order, specify:**

- Suffix: ESL Emergency secure lockdown.
- Specify device type and length with the ESL option.

Specify handing and finish

Note: ESL requires PS902-4R for single door (add -FA if fire rated), or PS904-4R-4R for double door (add FA to both -4R boards if fire rated).

# Delayed egress

## Chexit (CX) (with motor driven blocking actuator)

The Von Duprin Chexit device is designed for controlled egress applications. It meets both life safety and security needs, as well as the requirements of NFPA 101 for “Special Locking Arrangement” and IBC “Special Egress-Control Devices”. All control inputs, auxiliary locking, local alarm and remote signaling outputs are self-contained in the Chexit assembly. Numerous configurable options allow the device to be customized for the specific code or application requirements. The standard Chexit device sounds an alarm and keeps the door secured for 15 seconds following an exit attempt with immediate release upon fire.

The Chexit device includes a 6" x 20" decal for application on door.

“PUSH UNTIL ALARM SOUNDS. DOOR CAN BE OPENED IN 15 SECONDS”

### Chexit typical applications

Chexit single door with options – The Chexit is used as an access control device. The card reader allows access. Also shown in this application is an external horn and door position switch. The auxiliary horn is used for increased volume in remote locations.

Using a door position switch gives added security to the opening in case the door is not reclosed. Door position switch is recommended with Chexit. DPS improves security for door forced-open or held-open situations.

With the Chexit disarmed, the opening functions as a normal exit device. If card readers are required on both sides of the door, the normally closed contacts of the readers should be wired in series.

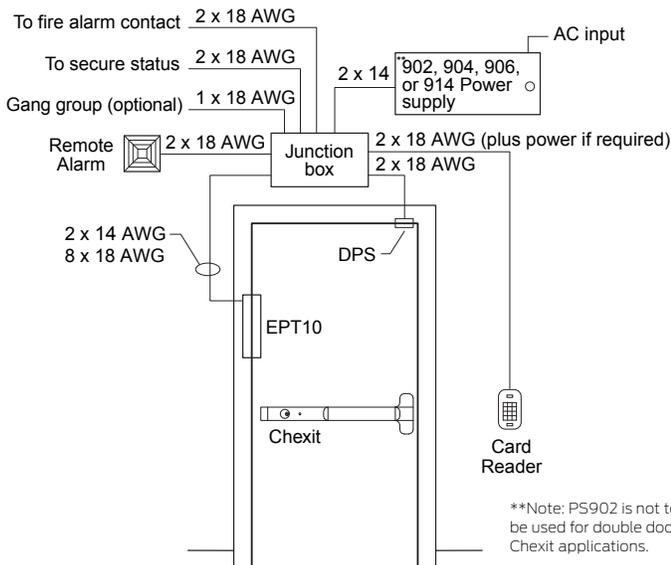

Figure 1. Riser diagram, single door

## Minimum door opening sizes for CX devices

Consult factory for other size requirements.

### Specifications / power supply

Input voltage – 24VDC

Input current inrush – 1.25A

Input current holding – 390mA

Alarm relay and Secure relay contact ratings – 24VDC, 1A

Fire alarm, inhibit and door position switch inputs require normally closed dry contacts.

### Power supply information for CX devices with motor driven blocking actuator

Power supply	Maximum number of devices
PS902 (up to 2 amps)	1 Chexit device
PS904 (up to 4 amps)	3 Chexit devices
PS906 (up to 6 amps)	4 Chexit devices
PS914 (up to 4 amps)	4 Chexit devices

When powering multiple components, verify that the amperage requirements of all components combined does not exceed the power supply output rating. Consult Installation Instructions for proper wire gauge and wire run requirements. Exceeding the recommended devices and/or not following Installation Instructions may void your warranty. For more information call Customer Care at 877-671-7011.

### To order, specify:

1. Prefix product description number “CX”. Ex: CX99L
2. Specify option. Ex: CX-RCM or CD-CX
3. Door size other than 3' (914mm)
4. Door thickness other than 1<sup>3</sup>/<sub>4</sub>" (45mm)
5. Finish
6. Handing, LHR or RHR. Required with “CD” option

**Note:** Chexit devices built after August 24, 2015 are built using motor driven blocking actuators that have decreased power supply and operating requirements. The information listed in this catalog references the power supply and operating requirements that are needed for the new products with motor driven blocking actuators. For information on devices built previous to August 24, 2015, please contact Customer Care at 877-671-7011.

## RCM Remote chexit module

Designed to provide the concept of the Chexit delayed exit system for door sizes smaller than the standard device can accommodate. The Chexit module is installed in a control box and mounted on the wall next to the door. Features and functions of the standard Chexit exit device are available on the RCM.

RCM Module

### Minimum door opening sizes for RCM devices

Consult factory for other size requirements.

Device	3' (914mm) Length	4' (1219mm) Length

### Specifications / power supply\*

Size – 3.75" x 5.57" x 2.50"

Input voltage – 24VDC

Input current inrush – 1.25A

Input current holding – 390mA

Alarm relay and Secure relay contact ratings – 24VDC, 1A

Fire alarm, Inhibit and Door position switch inputs require normally closed dry contacts.

### To order, specify:

See Chexit "How to order" on previous page.

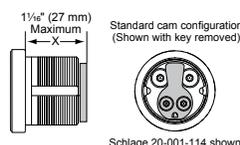

\*Note: The information listed in these pages reference the power supply and operating requirements for the redesigned RCM modules with motor driven blocking actuator that launched August 24, 2015. For information on devices built previous to August 24, 2015, please contact Customer Care at 877-671-7011.

### Options

**Cylinder dogging (CD)** — Special center case cylinder dogging option is available to allow push/pull operation of the Chexit, when disarmed and used in a heavy traffic area. Prefix device with "CD" and specify handing. (For Chexit, CD available on 98/99 rim and vertical only)

**Cylinders** — Cylinders are not furnished with the Chexit device and must be specified when ordering. Use 1¼" mortise cylinder with compression ring 36-083 with straight cam and orient cam as shown. Schlage cylinder 20-001-114 recommended for the device and the CD cylinder dogging option. See Schlage Pricebook for additional information.

## DE5300 Delayed egress system

Designed for controlled egress applications when used in conjunction with a magnetic lock. It meets both life safety and security needs, as well as the requirements of NFPA for "Special Locking Arrangement" and IBC "Special Egress-Control Devices". All control units, auxiliary locking, local alarm and remote signaling outputs are self-contained in the DE5300 assembly.

DE5300 Module

The DE5300 is commonly used on narrow stile doors where a standard or narrow stile Chexit is not practical. DE5300 Delayed Exit System uses a Chexit logic board and a Von Duprin RX-LC (low current request to exit) panic device to control a Schlage Electronics Direct Hold Magnetic Lock.

The Chexit module for the DE5300 is installed in a control box and mounted in the wall adjacent to the door. Features and functions of the standard Chexit exit device are available on the DE5300.

The DE5300 device includes a 6" x 20" decal for application on door. "PUSH UNTIL ALARM SOUNDS. DOOR CAN BE OPENED IN 15 SECONDS"

### Specifications / power supply requirements

Size – 3.75" x 5.57" x 2.50"

Input voltage – 24VDC

Input current – 1A

Alarm relay and Secure relay contact ratings – 24VDC, 1A

Fire alarm, Inhibit and Door position switch inputs require normally closed dry contacts.

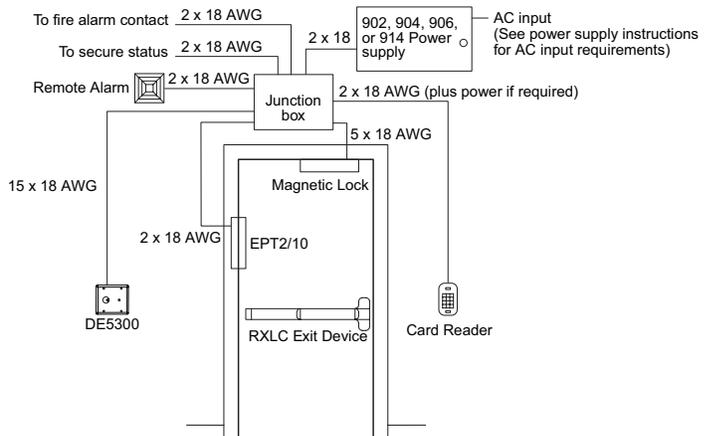

Figure 1. Riser diagram, single door

### To order, specify:

1. DE5300
2. M420/P, M450/P, or M490/P magnetic lock (order direct from Schlage Electronics)
3. RX-LC 22/33A/35A/98/99 device
4. PS900 Series
5. EPT-2/10

## Chexit, RCM and DE5300 features

The Chexit, Remote chexit module (RCM) or DE5300 devices have several features and options available to fit your applications. See below for more information.

### Inputs and outputs

#### Fire alarm input

This input releases the door immediately upon a fire alarm allowing immediate egress. The internal alarm can be silenced during a fire input via an onboard switch setting.

#### Inhibit input (access control)

This optional input is provided to allow authorized egress or entry when the device is Armed using an external card reader, key switch, etc. It also allows remote reset of the Chexit, RCM or DE5300 in an armed condition. The ability to reset alarms with the inhibit input can be disabled via an onboard switch setting.

#### Door position switch input

An optional Door Position Switch (DPS) can provide door position status to Chexit, RCM or DE5300 for additional security, ensuring that the door is closed, and can cause alarm when the door is left or forced open.

#### Gang bus

The gang bus allows a Chexit, RCM or DE5300 device to signal other Chexit, RCM or DE5300 devices when it enters the release delay, allowing multiple doors to release at the same time in an emergency. Up to 8 devices may be connected to the gang bus.

#### Alarm relay contacts

The alarm relay contacts are provided as a means to control a remote alarm, such as a horn or lamp, or signal an external monitor. The contacts can be configured with a jumper as normally open or normally closed, and become active upon entering an armed condition.

#### Secure relay contacts

The secure relay contacts are provided as a means to signal an external monitor. The contacts can be configured as normally open or normally closed with a jumper, and become active when the DPS indicates the door is closed and the push pad is locked.

### Delays

#### Release delay

When the push pad is pushed and the nuisance delay expires, the Chexit, RCM or DE5300 enters the release delay with alarm. During the release delay, the internal alarm sounds, the alarm relay activates, and the Chexit/RCM keeps the push pad or DE5300 magnetic lock, locked for 15 seconds (less any time already elapsed during the nuisance delay). Once started, the release delay sequence will not stop and the devices will unlock.

#### Nuisance delay

When a Chexit, RCM or DE5300 is located in a public area, it can be desirable to limit false releases when the push pad is accidentally pushed. The nuisance delay is the brief time a push pad can be accidentally pushed before the release delay sequence starts. If the nuisance time is set to 0 seconds the Chexit, RCM or DE5300 will enter release delay as soon as the push pad is pushed (when armed). Setting the nuisance time to 1, 2, or 3 seconds allows the push pad to be pressed for 1 to 3 seconds before the Chexit, RCM or DE5300 goes into release delay. If the nuisance audio and nuisance delay are both on, the internal alarm will pulse during the nuisance delay. The alarm relay does not activate during the nuisance delay. If the push pad is released before the nuisance delay expires, the Chexit, RCM or DE5300 will remain armed.

#### Rearm delay

The rearm delay is the amount of time after the key switch or inhibit input is deactivated to when the device rearms. It is designed to give someone time to pass through the door before rearming occurs. The rearm time can be changed via the onboard switch settings from 0 and 28 seconds in 2 second increments. If the rearm time is set to 30 seconds and a DPS is used, if the door is opened and the rearm time expires, there will be no alarm. The Chexit, RCM or DE5300 will rearm after the door is closed. If the door never opens, the Chexit, RCM or DE5300 will rearm after 30 seconds. If not using a DPS, the Chexit, RCM or DE5300 will always rearm in 30 seconds.

#### DPS delay

If the DPS detects that the door closed during the rearm delay, the Chexit, RCM or DE5300 ends the rearm delay and allows 2 seconds for the latch to clear the strike before rearming.

### Interface

#### Key switch

The key switch provides the means to arm or disarm/reset the Chexit, RCM or DE5300. Turning the key switch clockwise initiates the rearm delay, and turning the key switch counter-clockwise disarms/resets the Chexit, RCM or DE5300. The key switch allows the key to be removed in either the arm or the disarm/reset position.

#### Status indicator

The red status indicator displays the status of the Chexit, RCM or DE5300. The status indicator flashes slow if the Chexit, RCM or DE5300 is armed, flashes fast in an armed mode, is off when inhibited and on solid during rearm delay.

#### Internal alarm

The internal alarm sounds the status of the Chexit, RCM or DE5300. The internal alarm sounds continuously during and after a fire alarm or a release delay, pulses fast during the nuisance delay or a tamper and pulses slow during disarmed powerup mode.

### Settings

#### Armed powerup

When set to OFF, a power disruption and power return will put the Chexit, RCM or DE5300 in a disarmed, unlocked alarm mode.

#### Trim fail safe / fail secure (FS/FSE)

The trim input power can be set to FS (Fail Safe; locked when energized, unlocked when deenergized or during power failure) or FSE (Fail Secure; unlocked when energized, locked when deenergized or during power failure).

The trim must be bought or modified to physically function as FS or FSE. This on board setting only selects the trim input power.

### Trim operation overview

#### Rim and vertical application

Trim will not function when Chexit is armed.

#### Mortise application

Trim will function when Chexit is armed.

#### Chexit requiring pull side operation:

	Mechanical trim	Electric trim
Rim and vertical	Access control disarms Chexit. Rotate lever to enter.	Access control disarms Chexit and unlocks electric trim. Rotate lever to enter.*
Mortise	a) Use key to unlock lever. Rotate lever to enter. ** b) Use RX996L-M to disarm Chexit. Rotate lever to enter. ***	Access control disarms Chexit and unlocks electric trim or electric mortise lock. Rotate lever to enter.

\* Fail Secure Trim recommended. For Fail Safe applications, contact technical support to review application

\*\* Do not use Door Position Switch with Chexit in this application

\*\*\* Allows free ingress at all times

# Switches

## Request to exit (RX)

The RX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the pushpad.

The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply.

The RX switch option should not be used to control a load, but as a signalling switch (2 amps. resistive maximum).

The RX switch is available in a low current (LC) 50ma max switch. Most commonly used to signal low-current access control inputs.

### To order, specify:

- Standard – Use prefix RX, example RX99EO
- Low Current – Use prefix RX-LC, example RX-LC98EO

## Double request to exit (RX2)

The RX2 feature uses two RX switches.

### To order, specify:

- Standard – Use prefix RX2, example RX299EO

## Waterproof request to exit (WP-RX)

- Switch rated to IP67 – protected from contact with harmful dust and from immersion in water with a depth of up to 1 meter (3.3 feet) for up to 30 minutes
- Note:** All in-field electrical connections should be in compliance with IP67 to ensure trouble free operation.

## Latchbolt monitoring (LX)

The LX feature is used to signal the use of an opening. This device is equipped with one internal SPDT switch which monitors the latch bolt.

The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply.

The LX switch option should not be used to control a load, but as a signalling switch (2 amps. resistive maximum).

The LX switch is available in a low current (LC) switch. Most commonly used in computer operated monitoring systems.

### To order, specify:

- Standard – Use prefix LX, example LX99EO
- Low Current – Use prefix LX-LC, example LX-LC98EO

### Electrical rating for all switches:

- Standard – 2 Amp maximum @ 24VDC
- Low Current (LC) - below 50 Milliamps @ 24VDC

### LXNotes:

XP 98/99 uses LX-LC, factory installed only.  
98/9975, 5575, 8875 use the SS7500 lock body  
LX not recommended for CVC devices.

All RX and LX switches can be factory installed; most can be field installed.

## Signal switch (SS)

### Monitors pushpad and latch bolt

The SS feature is used to signal the unauthorized use of an opening. This device is equipped with two internal SPDT switches. One switch monitors both the pushpad and the latch bolt assembly, making the latch bolt tamper resistant, for positive security. An additional SPDT switch is connected to the 1 1/4" (32mm) mortise cylinder with straight cam for alarm "bypass." (Schlage cam reference L583-477). The device can be connected to a security console, or may be used as a single door alarm when used with a horn and power supply.

Pushpad reads: "Emergency Exit ONLY – Push to open and sound alarm." Pushpad is only available in US32D finish with red silk-screened lettering.

The SS mortise lock device is furnished with both the signal switch device and the SS7500 mortise lock. The SS7500 mortise lock has the versatility and advantages of the 7500 lock with the addition of signalling functions to monitor latch bolt operation and the trim locking function. The SS7500 mortise lock is supplied standard with the SS mortise lock device.

### To order, specify:

- Prefix SS, example SS99L
- Handing required, LHR or RHR

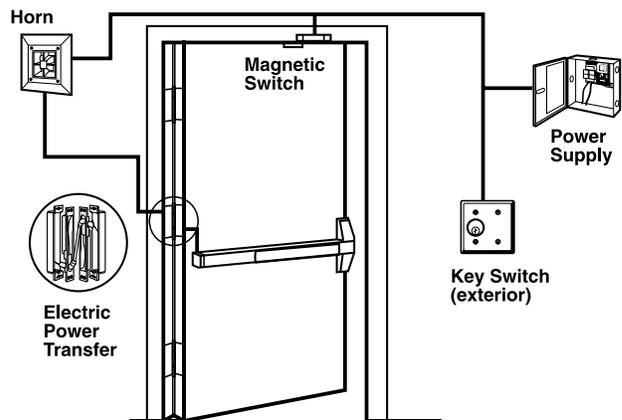

### Electrical ratings:

Up to 2.0 AMPS @ 24VDC

**Note:** SS is a factory installed option only.

## Popular SS Application

Unauthorized use of this opening will activate the local horn. The key switch permits inhibiting this system for authorized entry.

## Alarm kit

**Alarm kit (ALK)** is a simple yet effective way to deter unauthorized use of an opening. While the exit device is still a means of egress, the ALK kit contains an internal horn. When the touch bar is depressed, the horn sounds to provide an audible means of signaling that the opening has been violated. The alarm kit can be armed or disarmed by key thus allowing the exit device to be set in an armed or disarmed mode. The horn is rated at 85 decibels.

### For hardwire applications

The assembly includes both a 24VDC Input and External Inhibit standard. The External Inhibit provides remote arming and disarming.

The key switch uses a standard 1 1/4" (32mm) mortise cylinder with a straight cam (Schlage 20-001, L583-477 cam). The unit operates on one standard 9-volt alkaline battery. When the battery is weak, the horn will emit an intermittent low battery alert signal.

Auto reset (AR) option is available with this kit. This kit allows the device to resume the alarm option after a preset time. Preset times can be field selected at 1.5, 3, or 4.5 minutes.

Alarm kits are available with a choice of two switch kits, RX or LX. RX monitors the touchpad and is furnished standard. LX optional latch bolt monitoring is recommended for use with surface vertical rod exit devices or when alarm needs to sound from both the exit device and trim side of the door. Specify ALK-LX.

**Note:** For latch bolt monitoring on a 98/9975 with ALK, specify a SS7500 lock. LX switch not available for 98/9975 devices.

The ALK is available in two styles, 33A/99ALK, grooved cover and 35A/98ALK, smooth cover.

The ALK includes a 6" x 20" decal for application on door "EMERGENCY EXIT ONLY. ALARM WILL SOUND." RSS push bar trim can be used instead of the door decal, specify RSS push bar trim when ordering the device.

When the ALK is used, standard dogging is removed. If cylinder dogging is required there are two choices. Special center case dogging (SD) is available on 98/99 rim and vertical devices. Or, the ALK can be moved to the hinge side of the device to accommodate cylinder dogging (CD). Standard for 98/99; engineering special for 33/35A. Note size restrictions below.

### To order, specify:

1. Standard, 98 ALK
2. Special center case dogging, SD98 ALK (98/99 Series rim and vertical devices only)
3. Cylinder Dogging, CD98 ALK

### Minimum door opening sizes on ALK applications\*

Device	3' (914mm) Length	4' (1219mm) Length
98/98-F/99/99-F	2'10" (864mm)	3'4" (1016mm)

# Remote undocking and monitoring

In many institutional facilities, traffic is funneled through main perimeter openings equipped with access control. The remaining secondary perimeter openings utilize mechanical hardware, some of which is mechanically dogged (unlocked) and undogged (locked) to enable push/pull operation. The manual management and monitoring of these openings is inefficient and prone to human error.

The Von Duprin® RU retrofit kit for exit devices is a cost effective solution for these secondary openings that enables remote undocking for centralized lock down and door status monitoring. It connects wirelessly to our access control Physical Access Control Software (PACS) providers via an IP or RSI/RS-485 connection to the ENGAGE™ Gateway. It is a modular battery powered kit that can be added on to existing 98/99 and 33A/35A series devices. The RM option is a sensor only configuration for exit only or fire rate doors that require monitoring. It provides visibility to request to exit (RX), latchbolt monitor (LX) and door position switch (DPS).<sup>2</sup> This complementary solution enhances security by expanding the reach of the access control system to secondary openings that traditionally would go unaddressed because of the cost and complexity of running wires. Bringing these secondary openings online provides a more comprehensive perimeter security package.

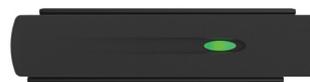

## Features & Benefits

- Access control managed via an IP or RSI/RS-485 connection to the ENGAGE Gateway through PACS providers
- Modular kit compatible with 98/99 and 33A/35A series devices
- Enables undocking for centralized lockdown (via real time IP or RS-485) or scheduled lockup (via Wi-Fi or real time IP or RS-485)
- Cylinder and hex mechanical dogging is maintained but can be overridden electronically
- Enables comprehensive view of door status via request to exit (RX), latchbolt monitor (LX) and door position switch (DPS)
- Sensor only configuration version (RM) available for exit only doors or fire rated doors
- Battery life up to 2 years with 4 standard AA batteries<sup>1</sup>
- Electronics Certifications: UL294 indoor, FCC Part 15 - Commercial

<sup>1</sup> Assuming dog and undog sequence use rate is two (2) cycles per day, exception notification rate is one occurrence every two (2) days, and door use of at least 200 cycles per day (sensor and wireless activity indication).

<sup>2</sup> RU using ENGAGE software or PAC solution via Wi-Fi is available for scheduled lock-up events only. This solution is not available for real time lockdown.

## Main Components of RU Kit

RU not compatible with exit devices with the following options:  
QEL, DI/CDSI/HDSI, RX2, AD, SD, SS, PN, ES/PL, CX, XP

RM not compatible with exit devices with the following options:  
DI/CDSI/HDSI, RX2, AD, SD, SS, PN, ES/PL, CX, XP

If the door and exit device are fire rated, and the exit device type is a 98/99-F Rim manufactured prior to April 1, 2018, a new center case will be required before proceeding with the installation of the RM kit. 98/99-F Rim Center Case Kit Less Cover, part number 050026.

# Motor driven electrified trim

- \* Sizes shown are without CD option.
- 3' devices with CD: cannot be cut.
  - 4' devices with CD: cut off 6" maximum

M996L/L-BE motor driven electrified breakaway lever trim provides remote locking and unlocking capabilities while incorporating the patented vandal-resistant trim design.

The motor can be energized from a distant controller, thus allowing access control of the opening. The control of stairwells in high-rise buildings is a common application for this trim. When electrically unlocked, the lever is operable. When electrically locked, the lever is rigid.

The vandal-resistant breakaway feature engages when more than 35 lbs. of torque pressure is applied to the locked lever. In breakaway mode, the lever dangles, internal components are protected from breakage, and the trim remains locked. Lever position is restored simply by pulling up on the lever.

The trim works with either 12VDC or 24VDC power supplies. The trim also comes with a field selectable dip switch for either Fail Safe (FS) or Fail Secure (FSE) functionality—no special configuration required.

The M996 key bypass options are:

- M996L (key functions as night latch mechanical override)
- M996L-BE (no key override, blank escutcheon)

The M996 trim can be ordered with a device, added to an existing 98/99 series device application, or a conversion kit can be added to an existing 996L/996L-BE, or E996L/E996L-BE trim.

## Features and benefits

- Vandal-resistant breakaway lever
- Dual voltage - works with either 12VDC or 24VDC power supplies
- Furnished Fail Safe (FS); convertible to Fail Secure (FSE) via dip switch
- Key bypass override (M996L), or no key bypass with blank escutcheon (M996L-BE)
- Field retrofit kits work for either mechanical 996 or updating solenoid driven E996
- Available with Allegion Connect (-CON)
- Field-reversible handing VonDuprin.com

## Specifications\*

24VDC FSA	0.08 amp in-rush*; 0.01 amp holding
24VDC FSE	0.59 amp in-rush*; 0.01 amp holding
12VDC FSA	0.13 amp in-rush*; 0.01 amp holding
12VDC FSE	1.12 amp in-rush*; 0.01 amp holding

## To order specify

- Use "M" prefix, example M996L
- Device type: R/V (rim/surface or concealed vertical rod/cable) or M (mortise)
- Fail mode: Furnished Fail Safe (FS) only; field convertible to Fail Secure (FSE) via dip switch
- Lever style: O6 lever is furnished standard if not specified
- Handing: RHR or LHR (RHR is furnished standard if not specified; field reversible)
- Finish: 605, 606, 612, 613, 619, 622, 625, 626, 643e, 693, 695
- Allegion Connect: Specify -CON if desired
- When ordering with device specify trim series with "M" prefix, example 9927L-BE 3' US26D M996L-BE
- When ordering M996 conversion kit, specify:

Description	Part #
996 R/V/C conversion to motorized kit	47273111
996 Mortise conversion to motorized kit	47273112

**Note:** For more ordering details, please reference Von Duprin catalog and price book.

## M996L electrical wiring

- Power input for M996L/L-BE is either 12 VDC or 24 VDC
- Two wires on the trim are non-polarized (18 AWG minimum)

## Power supply requirements

### Fail secure applications

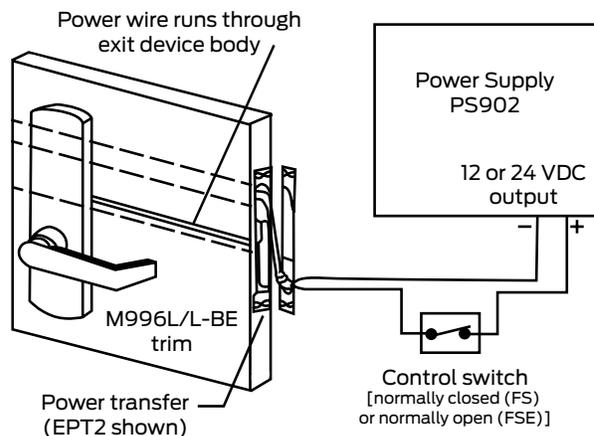

Maximum M996 per power supply (in-rush consideration) – no logic board case shown in chart

Power Supply	12VDC	24VDC
PS902*	2	4
PS904/PS914*	4	8
PS906	6	12

\*Adding 4RL board sequencing allows additional M996 per power supplies.

### Fail safe applications

Total in-rush of all M996 not to exceed power supply maximum current.

## Electrified mortise lock device

The electric mortise lock device has all the versatility and advantages of the standard mortise lock device, plus the advantage of being electrically controlled by a remote switching device, an access control system or an automatic fire alarm system. The device features the E7500 mortise lock. The E7500 controls the locking of the outside trim. When unlocked, the door remains latched, preserving the fire rating of the door and making it particularly useful where codes permit locking but require unlocking during a fire emergency. The outside trim cylinder retracts the latch bolt for mechanical override, night latch function. Only available with TP, K or L functions.

The E7500 lock contains a SPDT signal to monitor the outside trim condition (locked or unlocked) and a second SPDT signal switch to monitor the latch bolt.

### Standard features:

- Field reversible handing
- 24 VDC continuous duty solenoid

### Optional features:

- Fail safe (locked when energized, unlocked when de-energized or during power failure). Specify with suffix "FS."
- Fail secure (unlocked when energized, locked when de-energized or during power failure). Specify with suffix "FSE"
- 24 VAC (with SO option)
- 12 VDC
- 12 VAC (with SO option)

**Note:** Some Fire codes will require "Fail Safe" (FS) operation for stairwell doors. Be sure to specify the correct operation for your application.

### Electrical specifications:

- Solenoid — .60 AMPS @ 12VDC  
.30 AMPS @ 24VDC
- Each switch — Up to 2.0 AMPS @ 24VDC Maximum

The E option does not include the power transfer from door to frame, the power supply or the control operator. (Refer to EPT-10 and PS900 power supplies)

### To order, specify:

1. When ordering complete exit device, use prefix "E," example E9975. (When ordering the lock body separately, use E7500)
2. FS or FSE
3. 12V or 24V
4. See 98/99 Series catalog for lever design options.
5. DC or AC current

**Note:** Prior to ordering, check device catalog to confirm compatibility with a specific device.

### Electric mortise lock device

Adaptable for openings where continuous latching is required while the trim may be electrically locked or unlocked from a remote location—stairwells, exterior doors, etc.

### Minimum system requirements:

- PS902
- EPT-10 or electric hinge

# Power supplies

## PS900 Series power supplies

### Overview

The PS900 Series is a consolidated line of power supplies and accessories that offer enhanced flexibility and functionality specific to the changing needs of the access control market. The PS900 Series can be used in a variety of applications to convert high voltage AC power into the regulated low voltage DC outputs required by most access control devices. The PS900 Series protects devices downstream by providing Class 2\*, filtered and regulated power. The full line is UL294 certified.

### Features

- Constant output rating at both 12 VDC or 24 VDC provides superior performance ; includes field selectable jumper
- Flat mounting of option boards provides easier access to terminal blocks for connection of electrified devices
- High voltage protective cover
- Battery back-up board auto-selects voltage
- Fire alarm relay can be configured to provide either switched or un-switched outputs from a power supply
- PS914 designed with high inrush current for powering solenoid-driven EL exit devices
- Universal 120-240 VAC input
- Low voltage DC, regulated and filtered
- Electronic power limiting foldback circuit for AC current overload protection
- Fused primary input
- AC status monitor- isolated SPDT contacts
- AC input and DC output LED status indicators
- Cover mounted AC input indication
- Hinged cover with lock down screws

### Certifications

- UL 294 certified—the standard for access control
- Class 2 rated\*

The PS900 Series offers a variety of distribution options, including basic fuse protection, simple relay, and advanced logic providing complex sequencing and timing functions.

### Connectors on the power supply

Product	Schlage PS902	Schlage PS904	Schlage PS906	Von Duprin PS914
Amperage	2 amps	4 amps	6 amps	4 amps with 16 amp inrush
Distribution boards	1	2	3	2
Battery back-up board	1	1	1	1
EL Compatible	No	No	No	Yes

### Applications

The PS900 Series of power supplies works with many electrified devices including Schlage electromagnetic locks, Schlage AD-Series hardwired locks, Schlage electrified mechanical locks, Von Duprin electrified strikes , Von Duprin exit devices, and many other brands.

### Accessories

The PS900 Series features seven option boards for use in a variety of applications. All PS900 Series power supplies option boards are UL 294 certified.

### Option boards

**900-4R:** 4 relay controlled output board to power multiple devices

**900-4RL:** 4 relay distribution board with logic is field configurable for time delay function, auto operator, security interlock

**900-8F:** Provides 8 individually fuse-protected outputs, giving the flexibility to power multiple devices and provide another layer of protection

**900-8P:** Provides 8 individually PTC -protected (thermally protected) outputs, giving the flexibility to power multiple devices and provide another layer of protection

**900-FA:** Emergency interface relay integrates with fire alarm and is used to cut power in case of emergency\*\*

**900-BB:** Battery backup

**900-2RS:** 2 relay control board for electric latch panic devices (EL or QEL), electric strikes or electrified trim

**900-BBK:** Battery backup kit includes two 7A/hr batteries and provides up to four hours of backup power when cycled every 5 minutes at full load

### Additional options

**900-KL:** Key lock

**BAA:** Buy American Act compliant product

\* PS906, output rating exceeds Class 2 power limits, but can provide Class 2 rated outputs when used with 900-8P distribution board.

\*\* One fire alarm board can be connected directly to the PS902. If a fire alarm board is desired for the PS904, PS906 or PS914 it can be connected to a distribution board.

# Power transfers

## Electrical power transfer (EPT)

### Pneumatic transfer (PNT)

Electric Power Transfer provides a means of transferring electrical power from a door frame to the edge of a swinging door. The units are completely concealed when the door is in the closed position, and are ideal for installations involving abuse or heavy traffic.

Two models are available; EPT-2, two 18 gauge wires and EPT-10, ten 24 gauge wires. The EPT-2, EPT-10, and PNT-1 are UL listed as "miscellaneous fire door accessories". UL Listed for use on fire doors. PNT-1 has one 5/32" tube.

### Door applications:

Degree of opening	Hinge type	Door thickness
0-180	Up to 5" butt hinges	1 3/4"
0-180	Up to 3/4" offset pivots	1 3/4"
0-130	5 1/2" butt hinges	1 3/4"
0-110	6" butt hinges	1 3/4"
0-90	Swing clear hinges	1 3/4"

### Finishes

- 622 - Powder coated matte black
- 689 - Powder coated aluminum
- 695 - Powder coated bronze

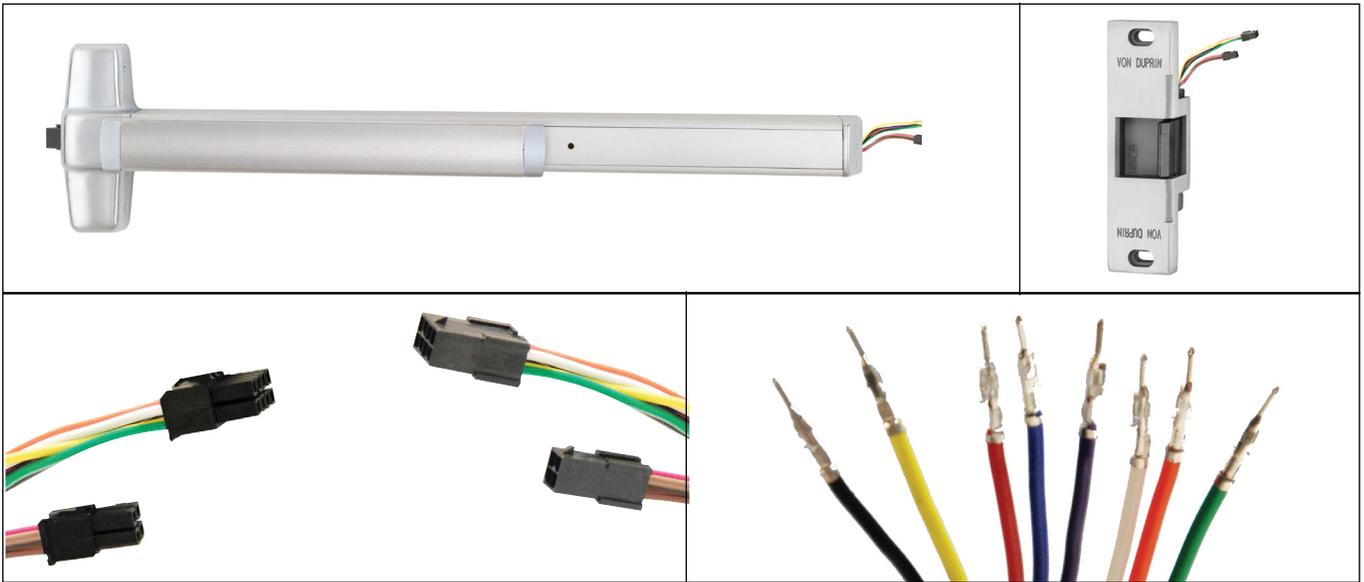

### Dimensions

Housing	9" x 1 1/4" x 1 5/8" (229mm x 32mm x 38mm)
EPT-2	Two 18 gauge wires, Up to 2 AMPS @ 24VDC, with a 16 AMPS Maximum Surge
EPT-10	Ten 24 gauge wires, Up to 1 AMPS @ 24VDC, with a 16 AMPS Maximum Surge
PNT-1	5/32" Tubing

### To order, specify:

1. EPT-2, EPT-10 or PNT-1
2. Finish: 622, 689, 695

# Allegion Connect

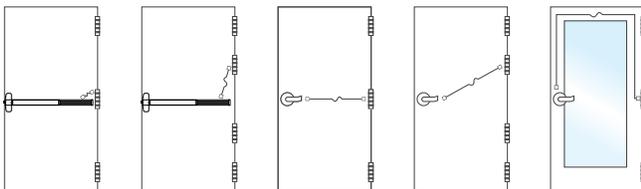

Allegion Connect features common interconnect components for many cross-category electrified options. Allegion Connect is a quick and easy way to connect power sources. There is no wire cutting; reducing installation and maintenance time ultimately cutting cost. After installation, Allegion Connect continues to provide benefits throughout the lifetime of the opening by offering a service kit for repairs or modifications in the future.

## Features and benefits

- **Quick:** common connections reducing installation time
- **Perfect Connections:** these factory installed connectors ensure the right wires match up every time
- **Protective:** the connectors protect the connection points throughout the installation process and lifetime of the opening
- **Interchangeable:** all Allegion Connect products utilize the same connectors
- **Maintenance:** you no longer need to cut away wire to disconnect Allegion products, also available as a service kit specifically for Connect products.

## Wire run options

Harness length	Connectors on both ends	Connectors on one end, crimped pins on the other end
6 Inches	CON-6	CON-6P
12 Inches	CON-12	CON-12P
26 Inches	CON-26	CON-26P
32 Inches	CON-32	CON-32P
38 Inches	CON-38	CON-38P
44 Inches	CON-44	CON-44P
50 Inches	CON-50	CON-50P
192 Inches	CON-192	CON-192P
<b>Power Supply Wire Harness = Connectors on one end, stripped leads on the other end</b>		
6 Inches	CON-6W - wire extension to power supply	

Consult door manufacturer for harness length requirements.

**Note:** You will need to purchase a separate wiring harness to go from exit device to hinge/EPT and an additional harness to go from hinge/EPT to power supply or access control system. Harness part numbers with ordering information can be located in the Schlage, Von Duprin and Falcon pricebooks. A service kit is available for order in the Schlage, Von Duprin and Falcon pricebooks. Included in this kit are male end plugs, female end plugs and pins to customize harnesses to your application.

**Note:** Must be ordered with exit devices and locks

## To order, specify:

1. Specify CON for Connect electronic options  
Example: QEL-99-EO-CON (99 Series quiet electric latch retraction exit only with Connect connectors)
2. Specify harness length; Consult door manufacturer for harness length
3. Specify Von Duprin EPT10-CON or Ives electrical thru-wire hinge

## RX330/RX350 Push pad

RX330

RX330 and RX350 bar features an active push pad with monitoring switch or "request to exit" switch, used to inhibit alarms for authorized exiting. The 330 grooved outer case and the 350 smooth outer case are designed as companion units for series 33A, 35A, 98 and 99 exit devices.

The internal SPDT switch should not be used to control a load, but as a signaling switch.

### Minimum door openings:

3' (914mm)	2'6" (762mm) to 3' (914mm)
4' (1219mm)	3'1" (940mm) to 4' (1219mm)

### To order, specify:

1. Prefix series 330 or 350 with "RX"
- Example, RX330
2. Size 3' or 4' (3' supplied standard if size not specified)
3. Finish: 605, 606, 612, 625, 626, 628, 7f10, 711

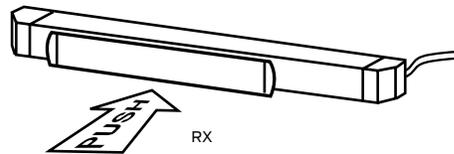

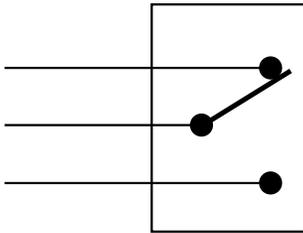

---

### Specifications

---

SPDT 0.5 ampere @ 24VDC

---

## GUARD-X Exit alarm lock

**2670 GUARD-X** provides secure, alarmed code-compliant protection for secondary emergency exits. The GUARD-X exit alarm lock readily identifies the door on which it is mounted as an emergency exit and secures the opening against unauthorized use. It is ideal for deterring theft in restaurants and retail establishments such as: discount stores, grocery stores, drug stores, clothing stores and sporting goods stores.

The GUARD-X lock provides secure protection through a large stainless steel deadbolt, which is 2" x 1/2" (51mm x 13mm) and has over 3/4" (19mm) throw. The engagement area into the strike is over 1 1/4" (32mm) square inches. The latch case protects the internal mechanism and resists tampering or vandalism from inside the door. This unit has been tested to withstand up to 1600 pounds of static load force against the door.

GUARD-X does not allow re-latching or resetting the alarm after an unauthorized exit, other than by an authorized person with a key. A 100-decibel alarm provides clear, attention getting warning for an unauthorized exit or attempted exit. The armed indicator light informs the owner that the alarm is armed, and an audible low-battery alert signals the owner to replace the battery when necessary.

A standard 9-volt battery powers the alarm. An exterior 9-volt power supply is available, Model PT-790, a 120VAC plug-in. When using the external power supply, the 9-volt battery functions as a battery backup during a power failure.

GUARD-X is armed and disarmed by key using a standard rim cylinder. It can be operated from the building exterior by a standard rim cylinder, so an authorized user can easily arm and disarm it to enter or exit the building when required. When using exterior operation a pull trim is recommended, use 210DT or 230DT. Rim cylinders are not furnished and must be ordered separately.

The 267 strike is furnished standard for single door applications. The optional 2609 strike is available for double door applications.

### Specifications

Touchbar height to finished floor	40" (1016mm) at center
Door width range	36" (914mm) to 48" (1219mm)
Touchbar projection —	
neutral	4 1/8" (103mm)
depressed	2 3/4" (70mm)
Latch case housing	7" (179mm) x 4 1/16" (103mm) x 4 1/8" (105mm)
Device length	32 1/2" (826mm)
Minimum stile requirement	Single door - 5 7/8", Double door - 6 1/4"

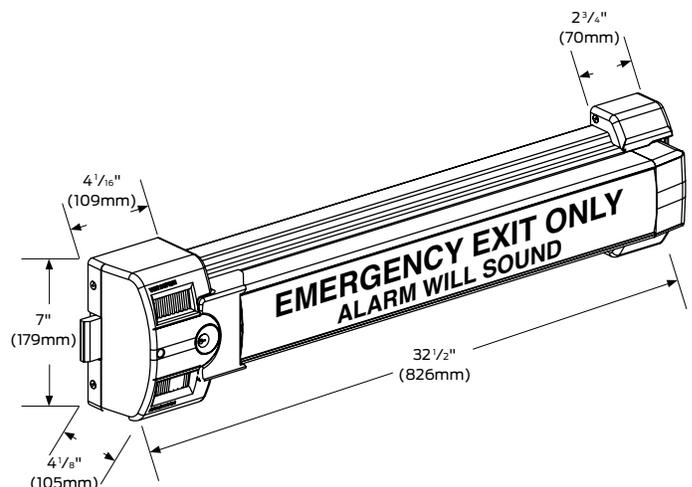

**Note:** Von Duprin trim does not thru-bolt to the Guard-X. Ives door pulls 8102-6 and 8105-6 offer dimensions that align and thru-bolt to the Guard-X Exit Lock - Order separately from Ives.

The GUARD-X non-handed design means the installer can mount it for either hand by just removing and reversing the "EMERGENCY EXIT - ALARM WILL SOUND" sign built into the device. The standard warning sign is in English with Braille; French and Spanish are available.

GUARD-X is UL/cUL listed for Panic Exit Hardware, complies with NFPA 101 Life Safety Code, meets UL305 requirements and is tested in accordance to ANSI A156.3 Grade 1 Panic Hardware. It is compliant with NFPA 101 Life Safety Code by providing a push pad that extends at least one-half the width of any door from 36" to 48" wide. The impact-resistant end caps meet UL305 requirements by providing a design that will not catch on clothing during egress.

### To order, specify:

1. Model 2670
2. Finish: 628, 710, 711
3. Strike if other than standard 267
4. Language if other than English
5. Specify rim cylinder or sex bolts if required
6. Outside trim if needed

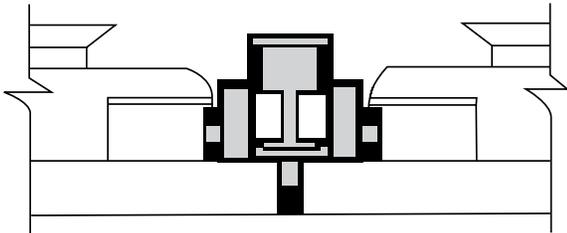

# Mullions

**Electrified removable mullions** are used with pairs of doors equipped with rim mounted exit devices.

Each includes an electric cable with five conductors wired to a twist-apart plug. The soffit fitting is supplied with a pre-wired mating socket.

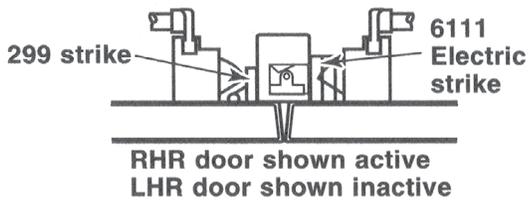

**4754** — Prepared for two 4263 monitor strikes. Use with all Von Duprin rim panic devices.

**4854** — Prepared for one 6111 electric strike and one 299 strike. Indicate handing for electric strike.

**9854** — Prepared for one 6111 electric strike and one 268 or 499F strike. Indicate handing for electric strike. UL Fire labeled for up to 3 hours on up to 8' x 8' (2438mm x 2438mm) openings using Von Duprin fire exit rim devices.

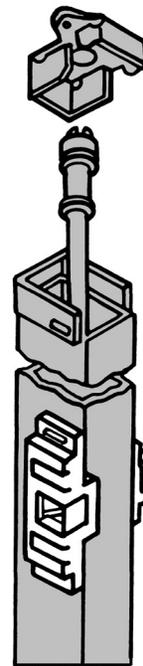

### 4854/9854 — Using one electric strike

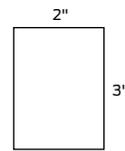

**KR** - Keyed removable option available on electrified removable mullion. Makes removal faster and easier by a single operation of the mortise cylinder. Once mullion is removed, large equipment or furniture can freely pass through the opening. The unit will self lock when re-installed, without use of the cylinder key. Uses 1 1/4" mortise cylinder with a straight cam (Schlage cam reference B502-191). Cylinders are sold separately. Prefix mullion model with "KR".

### To order, specify

1. Model number
2. Height of opening
3. Finish: 628, 693, 695
4. Handing if required
5. Centerline deviation (refer to device template for standard centerline)
6. Strikes, when required, should be ordered with device
7. For keyed removable option prefix model number with "KR", example KR9854

### Steel mullion dimensions

# PUSHING FORWARD™

Over a century ago, Von Duprin invented the first self-releasing fire exit device. Today we continue to push the envelope by delivering innovative solutions to challenging applications. Our durable panic and exit door hardware products are proven to perform and are backed by a team of experts. We provide flexible solutions and modular options to protect your investment well into the future.

## Quality

Von Duprin leads the industry with durable solutions that are proven in the field to perform under heavy use and abuse and backed by a team of experts experienced in door hardware application and code compliance.

## Flexibility

Von Duprin empowers you to embrace change by providing flexible solutions that can be modified over time as new trim, functions or other options are required, protecting your investment well into the future.

## Trust

Von Duprin designed the first self-releasing fire exit device more than a century ago and continues to advance fire and life safety, with innovation and best-in-class support to address your most challenging applications with code compliant solutions.

## ABOUT VON DUPRIN

As the pioneer in the industry, Von Duprin continues to advance the industry through customer-centric innovation, which delivers solutions to the most challenging applications.

Backed by high quality standards, Von Duprin exit devices were among the first in the industry certified to ANSI/BHMA A156.3 (2014) Grade 1. Our exit devices are tested to the highest standards and proven in the field to perform under heavy use and abuse, giving you peace of mind both now and in the future.

The versatile design can be easily upgraded to connect to a larger electronic ecosystem, empowering you to adapt with flexible solutions. You can configure numerous variations in the field without replacing your device and protecting your investment. This makes upgrades easy and cost effective.

### Flexible Solutions for Real-World Applications

Our brand's reputation, respect and legacy stem from that first exit device in 1908—and they continue because of the quality of Von Duprin® products we've produced since. Today, Von Duprin remains the trusted name in the industry by engineering products that meet the highest industry standards for fire and life safety. It's this dedication to providing customers with dependable products that ensures you can put your trust in the Von Duprin brand.

### Passion Driving Performance

Von Duprin's exit devices offer durable solutions that are proven in the field to perform under heavy use and abuse and backed by a team of experts experienced in door hardware application and code compliance. Allegion stands behind every Von Duprin product we make with unparalleled customer support thanks to our team of experts based in the U.S. that average more than 15 years of experience, so you are assured to receive expert advice.

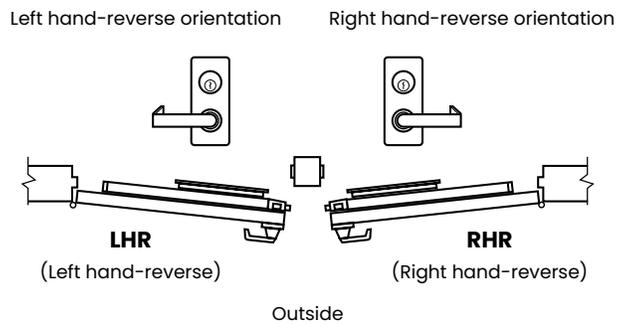

## ANSI Functions for Exit Hardware

# ANSI Functions for Exit Hardware

A variety of ANSI functions are offered with each series. Each device section of the catalog contains a chart showing the ANSI types and functions available in the series.

Function	
01	Exit only, no trim
02	Entrance by trim when actuating bar is locked down
03	Entrance by trim when latch bolt is retracted by key. Key removable only when locked
04	Entrance by trim when latch bolt is retracted by key or set in a retracted position by key
05	Entrance by thumbpiece. Key locks or unlocks thumbpiece
06	Entrance by thumbpiece only when released by key. Key removable only when locked
07	Entrance by thumbpiece. Inside key locks or unlocks thumbpiece. Outside key retracts latch
08	Entrance by knob or lever. Key locks or unlocks knob
09	Entrance by knob or lever only when released by key. Key removable only when locked
10	Entrance by knob or lever. Inside key locks or unlocks knob. Outside key retracts latch
11	Entrance by control turn piece. Key locks or unlocks control
12	Entrance by control turn piece only released by turning key. Key removable only when locked

### Door Handing

## Sex Bolts

Sex Bolts when ordered with devices may be furnished with screw lengths different than shown in Column B. On pages 7 and 8, Column B indicates popular sizes. Sex bolts ordered separately aren't furnished with screws. If screws are required, refer to [chart on pages 7 and 8](#) and order screws by description as a separate item. Other screw lengths may be used based on minimum and maximum allowable thread engagement, shown in column "C." Quantity required—refer to device section, quantities differ depending on outside trim.

425 sex bolts are required for 22/88/98/99 series fire rated devices when used on wood door applications. When wood doors are specified for these devices, sex bolts will be added to the device application unless SLM blocking package is specified.

825 sex bolts are required with 98-F/99-F rim devices on wood door applications using EO, NL, TP, K and L outside trims. Two 825 sex bolts will be added to the device application unless SLM blocking package is specified.

### To Order, Specify

1. Model number
2. Quantity (2 per package)
3. Finish
4. Door thickness other than 1-3/4" (44mm)

325

425

525

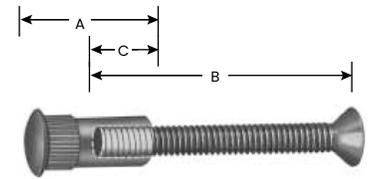

625A

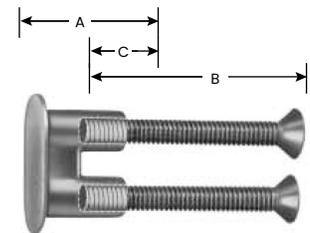

625B

825

325, 425, 625A &amp; 625B

Refer to [pages 7 and 8](#) for A, B, and C lengths.

## Vertical Rods

This page left intentionally blank.

**Cover Plates**

**229 Kit**

**(For 22 Rim Device)**

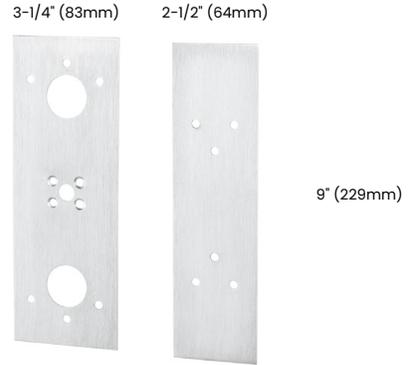

Kit contains inside and outside plates for hinge stile cutouts, an inside plate for the lock stile, and necessary screws. Plates are designed to cover cutouts required by most existing exit device installations. Specify finish.

**887 Kit**

**(For 88 Rim/8827 Devices)**

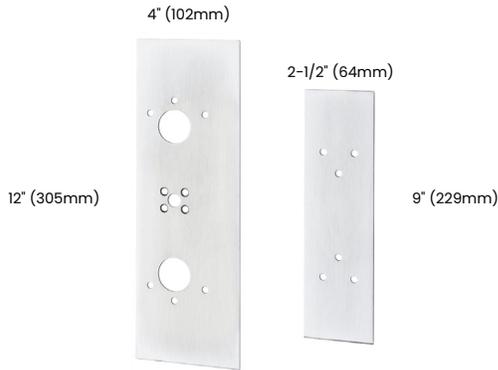

For use with rim/vertical device combinations on pairs of doors with ANSI cut-out. The 88 rim device backset is increased and exposes the 161 cutout when used with an 8827. Specify finish.

**882 Kit**

**(For 88 Rim Device)**

For use to cover mortise lock or discontinued device cut-outs. Specify finish.

**589 Kit**

**(For 5575 Device)**

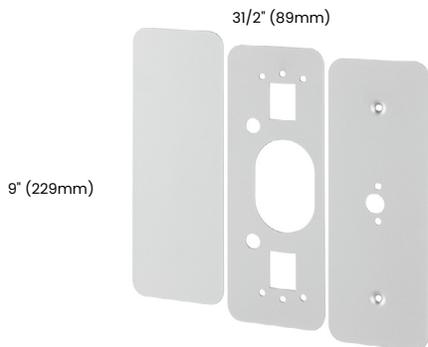

Kit contains plates for the lock stile and hinge side of the device, and necessary screws. Plates are designed to mount to device on wood door applications. The mortise lock cut-out interferes with device mounting. Specify finish and door width other than 1-3/4 inches (44mm).

**997 Kit**

**(For 98/99 Rim Device)**

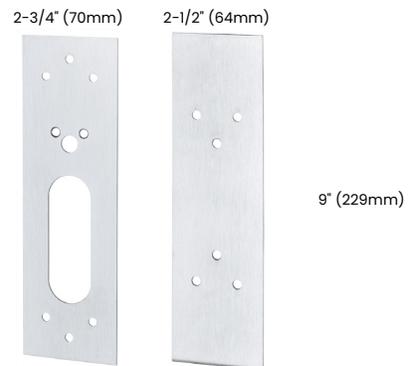

Kit contains inside and outside plates for hinge stile cutouts, an inside plate for lock stile, and necessary screws. Plates are designed to cover cutouts required by most existing exit device installations. Specify finish.

**888 Kit**

**(For 8875 or 8827 Devices)**

For use on doors with ANSI 161 cutouts. Device center case will not cover stock cutout. Specify finish.

## Cover Plates

### 889 Kit

#### (For 373L Control)

Required when 373L controls are used with sex bolts. Four studs on cover plate allow through bolting to the device center case. **Note:** Sex bolts must be used on wood or composite fire doors. Specify device type R, M, or V and finish.

### 998 Kit

#### (For 994L Trim)

For use with 994 lever trim to cover existing 992 lever trim cut-out. Specify finish.

### #10 WDA Kit

#### (For 370 Series Controls)

For wood door applications, used to cover up door preparations for control, also prevents the control from boring into the wood door. Finished to match control.

### 33A WDA Kit

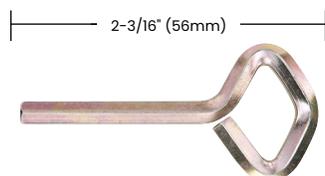

#### (For 360 Series Controls)

For wood door applications to cover up door preparations for control, also prevents the control from boring into the wood door. Finished to match control.

## Dog Keys

33A WDA Kit

2" (51mm)

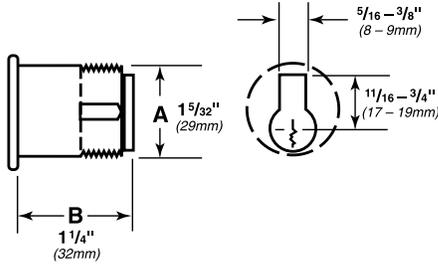

7-7/8" (200mm)

## Cylinders & Latches

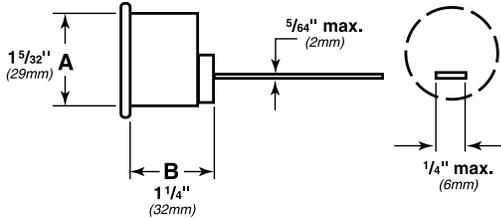

Cylinders are not furnished with device or trim and must be specified when ordering. Refer to exit device catalogs for cylinder requirements.

Mortise – 3215 (Schlage 20-001, L583-477 cam)

Rim – 3216 (Schlage 20-022)

## Glass Bead Kit – GBK

Glass bead conversion kits are used on doors with glass beads. Each kit consists of  $\frac{1}{4}''$  (6 mm) shim sets. GBK for surface vertical rod ships with  $\frac{1}{8}''$  (3 mm) shims for rod guides.

### To Order, Specify:

1. Device model, example: 99GBK
2. Device type (rim, mortise, surface vertical rod, concealed vertical rod)
3. Wood door, when used with concealed vertical rod
4. Specify if using with 499F strike
5. Finish

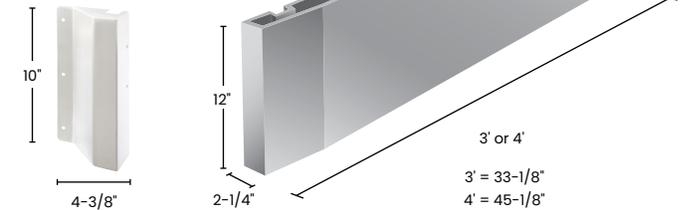

## RG-27 Vertical Rod & Latch Guard

RG-27 Series vertical rod and latch guards protect the bottom rods of exit devices from the damaging impacts of carts or gurneys passing through doors. (If bottom rods become damaged, the exit device will not function as intended and can jeopardize the ability to exit safely during an emergency.)

In addition to protecting the vertical rod, the guard provides a smooth, unobstructed surface so the door can be pushed open easily with the bumpers of a wheelchair. The latch guard portion is 10" high. The standard latch guard features a 45° ramp. The extended latch guard offers a continuous ramp in 3' or 4' widths.

All stainless steel construction in US32D finish. Latch guards can cover latches as large as  $1\frac{1}{4}''$  W x 10" H x  $1\frac{7}{8}''$  projection.

Latch Guard

## Models

<b>RGO</b>	Rod guard only (Projection 1-3/16")
<b>RG-27</b>	Rod and latch guard
<b>RG-27-3</b>	3' (914 mm) Rod guard and extended latch guard
<b>RG-27-4</b>	4' (1219 mm) Rod guard and extended latch guard
<b>LGO</b>	Latch guard only
<b>LGO-3</b>	3' (914 mm) Extended latch guard only
<b>LGO-4</b>	4' (1219 mm) Extended latch guard only

**Note:** Not for use on wood fire doors, except with SLM (special laminate material) blocking.

### To Order, Specify:

1. Model number
2. Handing (except on RGO)
3. Door material if other than hollow metal
4. Optional sex bolt mounting available

## 237 & 237L Two Point Latch

Series 237 two point latch assembly is ideal for spaces where occupancy does not require panic or fire exit hardware. This product is a perfect solution for many applications in schools, health care facilities, offices, and government facilities—regardless if the doors are inswing or outswing. It can be used on the inactive leaf of a pair of doors with a lockset or both leaves of a pair. It features a top soffit latch and ratchet release for long service life and dependability. Locking handles in many different configurations provide versatility to meet different customer needs.

Engineered to withstand severe weather conditions, the 237 series is also ideal for community shelters and safe rooms in accordance with FEMA 320 and 361 guidelines.

### Specifications Compliance

- I. UL listings:
  - Two- and Three-point Locks and Latches (for use on Fire Doors)—UL 10 C
    - Rating: 3HR pairs (double egress)
    - 90 min. pairs (swing same direction)
    - Door size: 8'0" X 8'0" Pairs (hollow metal only)

Furnished standard with one lever control assembly with mounting plate for the push side. This lever operation is always unlocked (L-BE). A second control lever can be ordered separately for the pull side, either model 378L-BE (always unlocked) or model 378L (with cylinder locking). Cylinders not included.

Lever operation meets all ADA requirements.

## Plunger Release Bracket Soffit Latch Assembly

Bottom Bolt Guide

304L Strike

### To Order, Specify:

1. Model number 237L-BE
2. Optional second control, 378L or 378L-BE
3. Handing (see charts below)
4. Finish

### Optional lever styles are available

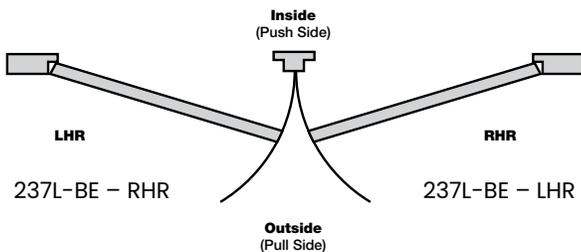

#03

#06  
(Standard)

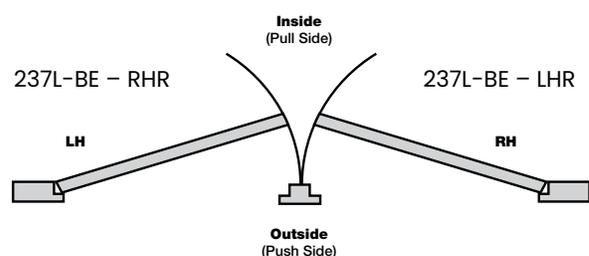

#17

## Handing – How to Order

### Outswing Door Application

### Push Side

**Note:** For inswing door applications that require locking on the push side, consult factory. Outswing door will be assumed if not specified.

## Mullions

**Removable steel mullions** Mullions provide single door performance in double door openings with rim devices. Mullions are easily removed by loosening bottom set screw and removing top fitting cover. The top mullion fitting is attached to the frame and is concealed by the fitting cover.

**Steel mullions** are 2" (51mm) wide and 3" (76mm) deep, with a wall thickness of 1/8" (3mm).

Mullions are shipped with mounting screws and prepared for strikes. Strikes are not included except where indicated.

Steel mullions are available in SP28 and SP313 finishes. Consult factory for other powder coat finish options.

**KR – Keyed removable steel mullions** makes removal faster and easier by a single operation of the mortise cylinder. Once mullion is removed, large equipment or furniture can freely pass through the opening. The unit will self lock when re-installed, without use of the cylinder key. Uses a 1-1/4" mortise cylinder with a straight cam (Schlage cam reference B502-191). Cylinders are sold separately. Prefix mullion model with "KR".

**Removable aluminum mullions** are 1-1/16" (27mm) wide on face closest to the door and 2-3/8" (60mm) at the widest point. The depth is 3-1/8" (79mm) with a wall thickness of 1/8" (3mm).

**Aluminum mullions** are available in US4, US10, US28, 313 and 315 finishes. Consult factory for other powder coat finish options.

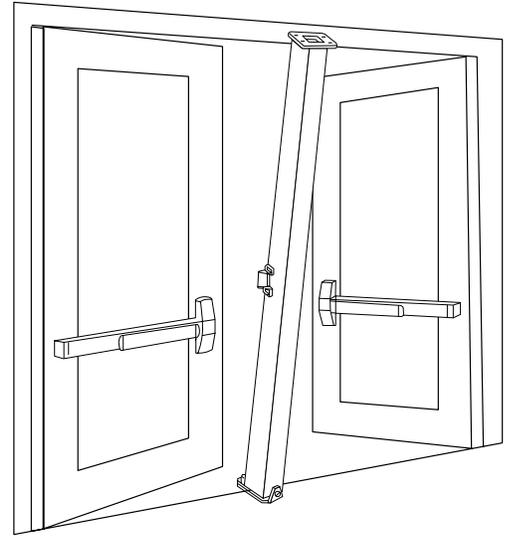

**Stock hollow metal applications** for devices mounted to cover ANSI 161 cutouts are higher than the standard mullion strike location. Consult the factory for special strike preparation or order a blank mullion. See below.

**Blank mullions** are furnished without strike preparation. They are used to mount devices at a strike height different from the standard mullion preparation.

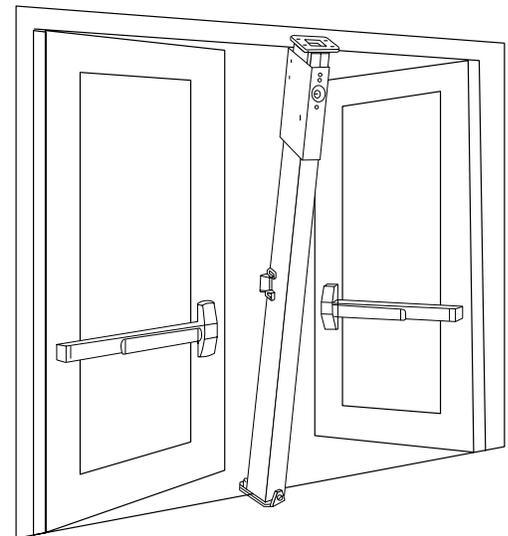

### To Order, Specify:

1. For keyed removable option on steel mullions, prefix model number with "KR"
2. Model number
3. Height of opening
4. Finish
5. Handing if required
6. Centerline deviation (refer to device template for standard centerline)
7. Strikes, when required, should be ordered with device
8. For keyed Removable option on steel mullions, prefix model number with "KR"

## Removable Mullions

## Keyed Removable Steel Mullions

## Mullions

### Steel Mullions

**1654** Prepared for two 1606 strikes. If 1606 strikes are not specified on the order, two per mullion will be added. Additional charges apply.

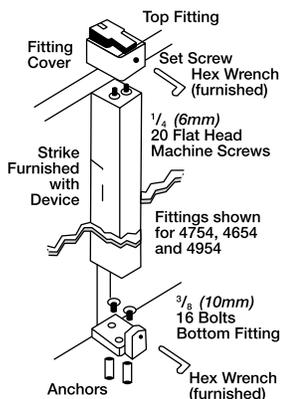

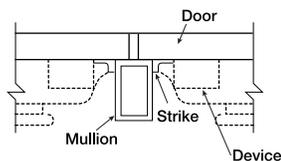

**4954** Prepared for 264 or 299 strikes. For use with all Von Duprin Panic rim devices. Note: Specify strike choice with device.

**9954** Prepared for and must be used with two 268 strikes (88-F device), or two 499F (22-F, 98-F, 99F devices). UL fire labeled mullion for up to 3 hour opening using Von Duprin fire exit rim devices. This mullion is not easily removed due to special fittings.

22-F and 88-F devices are rated up to 8' x 8" (2438mm x 2438mm).

98-F and 99-F devices are rated up to 10'0" (3048mm).

**Note:** If 268 or 499F strikes are not specified on the order, two per mullion will be added. Additional charges apply.

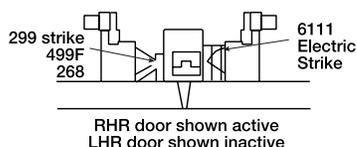

**4754** Prepared for two 4263 monitor strikes.

**4854** Prepared for one 299 and one 6111 electric strike. Indicate handing for electric strike.

**9854** Prepared for one 268 or 499F strike and one 6111 electric strike. Indicate handing for electric strike. UL fire labelled mullion for up to 3 hour openings up to 8' x 8' (2438mm x 2438mm) using Von Duprin fire exit rim devices.

### Aluminum Mullions

4854/9854 – Using one electric strike

**5654** Prepared for two 264 or 299 strikes with weatherstripping. Includes one set of 154 stabilizers.

**5754** Prepared and furnished with one 1408 double door strike. Includes one 154 stabilizer set. Note: specify device "less strike".

### Sizes for Mullions

**1654, 4954, 4754, 4854, 5654**

7' 2" (2184mm)  
8' 2" (2489mm)\*  
10' 2" (3099mm)\*

**9854, 9954**

7' 3" (2210mm)

8' 6" (2591mm)  
10' 6" (3200mm)

**KR9854\*\***

**KR9954\*\*\***

7' 5" (2261mm)  
8' 5" (2565mm)\*  
10' 5" (3175mm)\*

\* Only qualifying applications will be provided with UL Label.

\*\* Fire rated same as 9854

\*\*\* Fire rated same as 9954

Angle plate is used with narrow transom frames. The plate attaches to the transom extending the surface area needed to mount the mullion. Must be ordered separately. Specify finish.

154 Stabilizer is a two-piece interlocking set. One piece mounts on the mullion with the top mounting hole 5-3/16" (148mm) below the centerline of the strike; the other piece mounts on the door. Shims are provided to adjust for misalignment between the door and mullion.

The set maintains integrity between the door and mullion to prevent vandalism and to ensure contact between the device and strike as the doors expand and contract with temperature changes.

Furnished standard on aluminum mullions; optional for steel and all blank steel mullions.

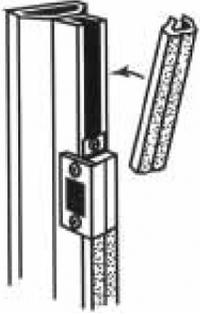

MT54 Storage kit is a set of floor and wall brackets that provide convenient storage of the keyed removable mullion when removed from the opening.

### To Order, Specify

1. Model MT54
2. Finish SP28, SP313, or SPBLK

## Weatherstripping

Weatherstripping prevents cold air from blowing between doors and mullion. It also serves as a silencer when the door is closed against the mullion. The silicone treated weatherstrip pile is bonded to a polypropylene backing. A slide-in molding houses the weatherstripping, covers mounting screws of the strike and extends to both the top and bottom of the mullion. Available on aluminum mullions only.

### Edging with Weatherstripping

## About Allegion

At Allegion (NYSE: ALLE), we design and manufacture innovative security and access solutions that help keep people safe where they live, learn, work and connect. We're pioneering safety with our strong legacy of brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Our comprehensive portfolio of hardware, software and electronic solutions is sold around the world and spans residential and commercial locks, door closer and exit devices, steel doors and frames, access control and workforce productivity systems.

This catalog contains products that currently comply with Buy America/Buy American and Trade Agreements Act requirements imposed by the federal government through the Buy America/Buy American Act (BAA) and Trade Agreements Act (TAA), respectively. The catalog is reviewed and updated on a semi-annually basis. Please be sure to visit <http://us.allegion.com/industries/government/resources> for the most current catalog revision.

It is our goal to make it as easy as possible to supply Allegion products for projects subject to Buy American (“BAA”) requirements and Trade Agreements Act (“TAA”) requirements. A brief description of some of the federal requirements can be found below. Please keep in mind that there are exceptions, exemptions and waivers to many of these requirements. Understanding all the factors that can affect a particular product or project can be confusing, which is why Allegion has a Government Services team to assist you. We are often able to provide product solutions based on these factors. Please direct product or project related inquiries by contacting us at [st-govtservices@allegion.com](mailto:st-govtservices@allegion.com).

To obtain product certification forms, e-mail your request to [st-govtservices@allegion.com](mailto:st-govtservices@allegion.com), and your request will be forwarded to the proper location.

All items in this catalog are subject to the prices, terms and conditions listed in the respective current product price books.

**What is the BAA?**

The Buy American Act establishes a preference for the federal government, when purchasing supplies for use in the United States, to purchase products mined, produced, or manufactured in the United States. Under the BAA, there is a two part test to determine whether an end product is domestic: (1) it must be “manufactured” in the United States; and (2) the cost of domestic components must exceed a certain percentage of the cost of all the components. For end products that do not consist wholly or predominantly of iron or steel or a combination of iron and steel, the cost of domestic components must exceed 60 of the cost of all components. For end products that consists wholly or predominantly of iron or steel or a combination of iron and steel, the cost of iron and steel must constitute less than 5% of the cost of all components. Neither the statute nor the regulations define “manufacture’s however, the Government Accountability Office (GAO) has stated that manufacturing necessitates that the “completion of the [end product] in the form required for use by the Government be carried out domestically.” Where an end product being sold to the federal government is a commercially available off-the-shelf (COTS) item, meaning the product is sold in

substantial quantities in the commercial marketplace in the same form, without modification, as it is offered to the U.S. government, the components test is waived(except, this waiver is not applicable to end products made wholly or predominantly of iron or a combination or iron).

**When could BAA apply?**

The BAA applies generally to federal acquisitions exceeding \$10,000. However, under the Trade Agreements Act (TAA), the Government has waived the BAA restriction for products from countries that have signed an international trade agreement with the United States (“designated countries”), or that meet certain other criteria, such as being a least developed country. In acquisitions covered by the TAA, offers of designated country products receive equal consideration with domestic offers.

**State contracts with federal funding**

Domestic preference restrictions may apply to state and local government acquisitions funded with federal dollars.

37 states have signed on to certain international agreements opening up procurements to products from certain designated countries (e.g., Taiwan), where the construction contract value exceeds the applicable threshold (e.g., currently \$7,864,000 for the WTO GPA). The below 13 have not signed on to any of the international agreements and therefore only domestic products are compliant where the ARRA Buy American requirement applies:

Alabama	Indiana	New Mexico
Ohio	West Virginia	Alaska
Nevada	North Carolina	South Carolina
Georgia	New Jersey	North Dakota
Virginia		

At this time none of the 50 states recognize or have agreed to participate in the NAFTA Trade Agreement, which includes Mexican products.

**The Government Strategic Accounts team is available to assist in determining what products are compliant for a specific state or local opportunity funded by federal dollars.**

The following named entities have agreed to give equal consideration to products substantially transformed in WTO-GPA countries, including Taiwan. Port Authority of New York and New Jersey Port of Baltimore.

**TAA - Trade Agreements Act**

The U.S. has entered into a number of international trade agreements, under which the U.S. agrees to waive the BAA and other discriminatory provisions for products from countries that are parties to the agreement. These agreements include the World Trade Organization Government Procurement Agreement (WTO GPA), a plurilateral agreement to which Taiwan, among other countries, has acceded, the North American Free Trade Agreement (NAFTA), and a number of other bilateral and multilateral free trade agreements (FTAs).

**When could TAA apply?**

The value of the acquisition is a determining factor in the applicability of the TAA, as the various international agreements set forth a dollar threshold for when they apply. In some cases, such as the WTO GPA, the threshold is periodically adjusted.

The below chart sets forth the current thresholds (as of January 2015) for applicability of the trade agreements most relevant to Allegion.

Trade Agreement	Construction contract (equal to or exceeding)
WTO GPA	\$7,864,000
USMCA (NAFTA) - Mexico	\$10,335,931
USMCA (NAFTA) - Canada	\$10,335,931

For purchases made through U.S. General Services Administration Schedule contracts, all acquisitions are covered by the TAA, dollar value of the individual order notwithstanding.

**FARS - Federal Acquisition Regulations**

A section of the U.S. Code of Federal Regulations detailing purchasing/procurement policies for the federal government.

**DFARS - Defense Federal Acquisition Regulations**

A section of the U.S. Code of Federal Regulations detailing purchasing/procurement policies for the Department of Defense (DoD).

**Construction project**

Any federally funded new construction or renovation work involving a General Contractor is generally considered a construction contract. Often, the word “construction” is noted in the contract.

**COTS - Commercially available Off The Shelf**

Any item, other than real property, that is of a type customarily used by the general public or nongovernmental purposes, and that 1) Has been sold, leased or licensed to the general public; or 2) Has been offered for sale, lease or license to the general public. Does not apply to Mexico end-products, as assembly and packaging is required in the United States. Does not apply to end products that consist wholly or predominantly of iron or steel or a combination of iron or steel.

**Department of Transportation (DOT)**

**requirements for Buy America:**

The various agencies under the DOT(e.g., FTA, FRA, FAA, FHWA , Amtrak) have Buy America statutory provisions, implemented by the agencies with agency-unique rules and exceptions. The most common of these is the FTA's Buy America requirements at 49 U.S.C. 5323(i)(1) and 49 C.F.R..661. Allegion can provide a Buy America certification letter for any of our brands within this catalog that are identified as country of origin USA.

**Environmental Protection Agency (EPA)**

Any water treatment facilities fall under the Buy America Act - USA products only.

**American Iron and Steel Act (AIS)**

The only product that Allegion can provide AIS documentation for at this time is the Steelcraft and Republic doors and frames that are listed in this compliance guide, which fall under the Buy America Act - USA products only using recycled steel.

Please note: The Buy America Act is listed on page 5. This differs from the Buy American Act discussed above.

## Additional order requirements

### Locks

Schlage	BAA transmittal required	Note on order
A Series	x	Clearly mark model number with - BAA suffix to receive USA country of origin products.
ALX Series	x

## Cylinders

All Schlage cylinders, tailpieces, cams and supporting parts are made in the USA at our manufacturing facility in Colorado Springs and qualify for BAA. This listing provides details on the availability of cylinder formats and Primus security options in patented keyway options only. However, any cylinders in Schlage legacy keyway options would also qualify as all are manufactured and assembled in the USA.

### Schlage

#### Electronic lock applications

Application	Patent protected keyway families <sup>1</sup>	Formats	Primus options	Primus UL 437	BAA COO
AD Series, CO Series, ND Series, NDE Series, L Series and LE Series	Classic Obverse <sup>1</sup> , EV 29 S and T	KIL and FSIC	Legacy, RP <sup>2</sup> , and XP	KIL only	USA
	Everest 29 R	KIL and FSIC as SL	Legacy and XP	KIL only	USA
		SFIC	--	--	--

#### Cylindrical lock applications

Application	Patent protected keyway families <sup>1</sup>	Formats	Primus options	Primus UL 437	BAA COO
A Series, ALX Series, and ND Series	Classic Obverse <sup>1</sup> , EV 29 S and T	KIL and FSIC	Legacy, RP <sup>2</sup> , and XP	KIL only	USA

	Everest 29 R	KIL and FSIC as SL	Legacy and XP	--	USA

#### Mortise and tubular lock applications

Application	Patent protected keyway families <sup>1</sup>	Formats	Primus options	Primus UL 437	BAA COO
L Series mortise <sup>4</sup> (including multi-point locks)	Classic Obverse <sup>1</sup> , EV 29 S and T	KIL and FSIC	Legacy, RP <sup>2</sup> , and XP	KIL only	USA
	Everest 29 R	KIL and FSIC as SL <sup>5</sup>	Legacy and XP	KIL only	USA
		SFIC	--	--	--

#### Deadbolt and deadlock applications

Application	Patent protected keyway families <sup>1</sup>	Formats	Primus options	Primus UL 437	BAA COO
B250 Series deadlock	Classic Obverse <sup>1</sup> , EV 29 S and T	KIL and FSIC	Legacy, RP <sup>2</sup> , and XP	KIL only	USA
	Everest 29 R	KIL and FSIC as SL	Legacy and XP	KIL only	USA
B500 Series deadbolt	Classic Obverse <sup>1</sup> , EV 29 S and T	KIL and FSIC	Legacy, RP <sup>2</sup> , and XP	KIL only	USA
	Everest 29 R	KIL and FSIC as SL	Legacy and XP	KIL only	USA
		SFIC	--	--	--
B600 Series	Classic Obverse <sup>1</sup> , EV 29 S and T	KIL and FSIC	--	--	USA
	Everest 29 R	KIL and FSIC as SL	--	--	USA
		SFIC	--	--	--
B700 Series and B800 Series	Classic Obverse <sup>1</sup> , EV 29 S and T	KIL and FSIC	Legacy, RP <sup>2</sup> , and XP	KIL only	USA
	Everest 29 R	KIL and FSIC as SL	Legacy and XP	KIL only	USA
		SFIC	--	--	USA

1. Classic Obverse and other legacy Everest (B, C, and D) keyways only gain patent protection in Primus cylinders.  
 2. Primus RP is exclusive to the Classic Obverse keyway families.  
 3. Not available for A Series locks.  
 4. Primus options are not available on L9485, L9486, LM9280, and LM/LMV9380 functions.

5. SL key mechanism in Primus options are available in limited trims and functions only.  
 6. Lockout function supported by Primus cylinders only. Not available in SL key mechanisms.  
 7. SL key mechanism is not available to fit Corbin Russwin CK4200 and UT5200 locks; SL in Primus UL 437 not available to fit CL3300.  
 8. Except B knobs.

#### Pivots

Product	Description	Finish	BAA COO	TAA COO
7212 Pivot	3/4" Offset pivots, 200 lb, top - header, btm - jamb	All	USA	-
7212V Pivot	3/4" Offset pivots, 200 lb, top - jamb, btm - jamb	All	USA	-
7215/7215F Pivot	3/4" Offset pivots, 500 lb, top - header, btm - jamb	All	USA	-
7222 Pivot	3/4" Offset pivots, 200 lb, top - header, btm - base	All	USA	-
7212-7212V-7222 INT	Intermediate pivot for 7212, 7212v and 7222	All	USA	-
7226/7226F Pivot	3/4" Offset pivots, 600 lb, top - header, btm - base	All	USA	-
7227/7227F Pivot	3/4" Offset pivots, 700 lb, top - header, btm - base	All	USA	-
7215-7226-7227 INT	Intermediate pivot for 7215, 7226 and 7227	All	USA	-
7215F-7226F-7227F INT	Intermediate pivot for 7215F, 7226F and 7227F	All	USA	-
7215PT-7226PT-7227PT	Power Transfer Pivot for 7215, 7226, 7227	All	USA	-
7230F Pivot	3/4" Offset pivots, 1000 lb, top - header, btm - base	All	USA	-
7237F Pivot	3/4" Offset pivots, 1750 lb, top - header, btm - base	All	USA	-
7230F-7237F INT	Intermediate pivot for 7230F, 7237F	All	USA	-
7244F Pivot	1 1/2" Offset pivots, 400 lb, top - header, btm - base	All	USA	-
7245F Pivot	1 1/2" Offset pivots, 500 lb, top - header, btm - base	All	USA	-
7244F-7245F INT	Intermediate pivot for 7244F, 7245F	All	USA	-
7253 Pivot	Center-hung pivot set, 300 lb, top - header, btm - base	All	USA	-
7255 Pivot	Center-hung pivot set, 500 lb, top - header, btm - base	All	USA	-
7255J Pivot	Center-hung pivot set, 500 lb, top - header, btm - jamb	All	USA	-
7256 Pivot	Center-hung pivot set, 600 lb, top - header, btm - base	All	USA	-
7259 Pivot	Center-hung pivot set, 1000 lb, top - header, btm - base	All	USA	-
91105F/91105F-PT	Pocket pivot/hinge and Power Transfer, 90 lb		USA	-

#### Protection plates, push/pull plates, and pulls

Product	Description	Finish	BAA COO	TAA COO
8200	Push plate	All	USA	-
8300 Series	Pull plates - 8302, 8303, 8305, 8311	All	USA	-
8400, 8402	Protection plates - all sizes	All	USA	-
9100 Series	Pushbar and Pull Combo - 9100HD, 9103EZHD, 9145EZHD, 9190HDm 9190EZHD	All	-	Canada
9264/9266	Long door pulls	All	-	Canada
VR810, VR814	Vandal resistant trim - all functions	All	USA	-
VR900, VR904	Vandal resistant trim - all functions	All	USA	-
VR910, VR914	Vandal resistant trim - all functions	All	USA	-

#### Carry bars

Product	Description	Finish	BAA COO
CB1	Carry bar	All	USA

#### Invisible latches

Product	Description	Finish	BAA COO	TAA COO
CL11	Invisible latch, 7/8" x 1 1/4" x 1 7/8"	All	-	Taiwan
CL12	Invisible latch, 9/8" x 1 1/4" x 2 1/4"	All	-	Taiwan
CL14	Auxiliary pusher for invisible latches	All	USA	-
CL21/CL21A	Four-way catch — full size doors w/hook plate	All	-	Taiwan
CL22	Three-way catch	All	-	Taiwan

#### Coordinators

Product	Description	Finish	BAA COO	TAA COO
COR7G	Gravity arm coordinator - 7" projection	All	-	Taiwan
COR9G	Gravity arm coordinator - 9" projection	All	-	Taiwan
COR32	Coordinator - 32" overall length	All	USA	-
COR42	Coordinator - 42" overall length	All	USA	-
COR52	Coordinator - 52" overall length	All	USA	-
COR60	Coordinator - 60" overall length	All	USA	-
COR72	Coordinator - 72" overall length	All	USA	-

#### Dust proof strikes

Product	Description	Finish	TAA COO
DP1	Dust-proof strike - threshold only	All	Taiwan
DP2	Dust-proof strike	All	Taiwan

#### Door viewer

Product	Description	Finish	TAA COO
U696	UL Listed door viewer (150°) - Fits 1 3/8" - 2 1/16"	All	Taiwan
698	Wide Angle door viewer - Fits 1 3/8" - 2 1/16"	All	Taiwan
U698	Wide Angle door viewer - Fits 1 3/8" - 2 1/16"	All	Taiwan
700	Door viewer (120°) - 1 3/8" - 2 1/16"	All	Taiwan
U700	UL Listed door viewer (120°) - 1 3/8" - 2 1/16"	All	Taiwan
701	Door viewer (120°) - Fits 2 1/8" - 2 5/8"	All	Taiwan
U701	UL Listed door viewer - Fits 2 1/8" - 2 5/8"	All	Taiwan

#### Flush bolts

Product	Description	Finish	BAA COO
FB31, FB32, FB33	Automatic flush bolt — metal	All	USA
FB41, FB42	Automatic flush bolt — wood	All	USA
FB51, FB52, FB53	Constant latching flush bolt — metal	All	USA
FB61, FB62	Constant latching flush bolt — wood	All	USA

#### Filler bars

Product	Description	Finish	BAA COO
FL20	Filler bar — 20" overall length	All	USA
FL32	Filler bar — 32" overall length	All	USA
FL44	Filler bar — 44" overall length	All	USA

#### Floor/door stops and holders

Product	Description	Finish	TAA COO
FS13, FS17	Dome stop	All	Taiwan
R14	Dome stop riser	All	Taiwan
FS434	Floor stop	US2C	Taiwan
FS18L	Security floor stop — 3 1/2" bumper	-	Taiwan
FS18S	Security floor stop	-	Taiwan
FS9	Semi-Automatic floor holder — 1 1/2" or less door to floor clearance	All	Taiwan
FS40, FS41, FS42, FS43	Automatic floor holder — 1/2" to 2 1/16" door to floor clearance	All	Taiwan
FS544-4"	Kick down door holder — iron	All	Taiwan
FS555-5"	Kick down door holder — iron	All	Taiwan
FS1153	Plunger-type door holder — 1 5/8" throw	US28	Taiwan
FS1154	Plunger-type door holder — 1 1/4" throw	All	Taiwan

## Auxiliary hardware

#### Lock guards

Product	Description	Finish	BAA COO
LG1	Lock guard with security pin	All	USA
LG7	Lock guard	All	USA
LG10	Lock guard	All	USA
LG11	Lock guard	All	USA
LG12	Lock guard - narrow	All	USA
LG13	Lock guard	All	USA
LG14	Lock guard	All	USA

#### Mounting brackets

Product	Description	Finish	BAA COO	TAA COO
MB1	Mounting bracket — stops over 2 1/2"	All	-	Taiwan
MB2	Mounting bracket — stops up to 2 1/2"	All	-	Taiwan

#### Roller latches

Product	Description	Finish	TAA COO
RL30, RL30-A	Roller latch	All	Taiwan
RL32, RL32-A	Roller latch	All	Taiwan
RL36, RL36A	Roller latch, light-duty, mortise	US32D	Taiwan
RL38	Roller latch, light-duty, surface mounted	US32D	Taiwan
RL1152	Combination roller latch/applied stop	All	Taiwan

#### Locking bolts

Product	Description	Finish	BAA COO	TAA COO
SBI630B	8" Steel bottom bolt	US2G, US26D	-	Taiwan
SBI630BL-1289	8" Locking bottom bolt	All	USA	-
SBI630BL-1360	8" Locking bottom bolt	All	USA	-
SBI630T	8" Steel top bolt	US2G, US26D	-	Taiwan
SBI630TB	8" Steel bolt with top and bottom strikes	US2G, US26D	-	Taiwan
SBI630TL-1289	8" Locking top bolt	All	USA	-
SBI630TL-1360	8" Locking top bolt	All	USA	-

#### Wall stops/holders

Product	Description	Finish	TAA COO
WS11, WS11X	Wall stop for drywall, masonry mounting	All	Taiwan
WS33, WS33X	Automatic holder and stop universal	US26D	Taiwan
WS20, WS20X	Automatic holder and stop universal	All	Taiwan
WS40	Wall stop for drywall, masonry mounting	All	Taiwan
WS45, WS45X	Manual holder and stop (drywall, masonry)	All	Taiwan
411R-W	Adhesive wall bumper	White	Taiwan

## System components and accessories

### Schlage

#### Pushbuttons/keyswitches

Product	Description	BAA COO
621 Series	1 1/4" Heavy duty pushbuttons	USA
623 Series	1 5/8" Heavy duty pushbuttons	USA
625 Series	2 3/4" Heavy duty pushbuttons	USA
630 Series	1 1/4" Extreme duty pushbuttons	USA
650 Series	Heavy duty keyswitches	USA
660 Series	Surface mini box distribution	USA
701 Series	Entry level pushbutton (round bottom)	USA
709 Series	Entry level pushbutton (square illuminated)	USA

#### Door position switches

Product	Description	BAA COO	TAA COO
674-OH	Overhead door floor mount	USA	-
679-05	Wood door and frame	USA	-
679-05HM	Hollow metal door and frame	USA	-
679-05WD	Wood door and metal frame	USA	-
7764	Concealed/flush mount	-	Mexico
7766	Surface mount	-	Mexico
FSS1	Door position high security switch	-	Australia

#### Electronic horns

Product	Description	TAA COO
1910-1	Selica horn, 12/24 VDC	Mexico

#### Power supplies

Product	Description	BAA COO
PS902BAA <sup>▲</sup>	Power supply, 2 Amp	USA
PS904BAA <sup>▲</sup>	Power supply, 4 Amp	USA
PS906BAA <sup>▲</sup>	Power supply, 6 Amp	USA

<sup>▲</sup> See page 8 for additional cost and order requirements. Option board selections must be made for power supply at time of order. See page 39.

#### Door cords

Product	Description	BAA COO
788 Series	3/8" Armored door cords	USA
798 Series	1/2" Armored door cords	USA

## System components and accessories

PS900 Option boards listed below MUST be ordered with a BAA compliant power supply in order to meet BAA compliance.

### Schlage and Von Duprin

#### Power supply option boards - PS900

Product	Description
900-4R	4 Independently controlled relays
900-4R FA	4 Independently controlled relays with FA
900-2RS	2 Relay board specifically for controlling Von Duprin exit devices
900-2RS FA	2 Relay board specifically for controlling Von Duprin exit devices
900-4RL	4 Relay board with integrated logic for controlling security interlocks, auto operators, and time delays
900-4RL FA	4 Relay board with integrated logic for controlling security interlocks, auto operators, and time delays with FA
900-8F	8 Fuse protected outputs
900-8F FA	8 Fuse protected outputs with FA
900-8P	8 PTC protected outputs
900-8P FA	8 PTC protected outputs with FA
900-BBK	Battery backup kit (includes two 7A/hr batteries)
900-BB	Battery backup board only
900-FA	Fire alarm relay (EIR) module

#### Power supply accessories - PS900

Product	Description
900-BAT	Backup battery pack (includes two 7A/hr batteries)
900-KL	Key lock

## System components and accessories
