

Cicero Database Updates

Summer 2018

Highlights from May, June, and July 2018

New and Noteworthy

District Match Delete Button

We know that address data is sensitive, and we take the safety and protection of your data seriously. Since the launch of District Match, we've allowed users to request deletion of their projects. New this summer is an automatic "Delete" button, which will accomplish the same task, and is accessible from your [Projects Page](#). Pressing the button deletes your original uploaded address file, as well as your completed project from our systems. If you choose not to delete your project, it will be available to access for one full year.

New API Documentation

API users may have noticed some changes to [our documentation](#) over the past few months. We've released new and improved docs that we hope will be more informative. Check them out and let us know what you think! We're always happy to hear feedback.
