

Fetal and Gynae Imaging (FGi) is happy to bring to you a Simulator based program on **first trimester ultrasound**.

The FTS plays a vital role in antenatal screening for fetal aneuploidies, fetal structural defects and maternal preeclampsia. However, this must be performed as per the prescribed guidelines by FMF and ISUOG to achieve the highest detection rate. This course aims to help you align your probe and minds to assess the fetus and the mother as per the guidelines. The course combines theory along with extensive hands-on practice.

The course will guide you to achieve the coveted FMF certification in Nuchal Translucency.

FGi takes pride in being the first in India to impart simulator training using the New Volumetric 360 Optical Transducer. This probe conveys a real-time experience of performing a transabdominal scan and eliminates the technical challenges of limited angles of movement.

demos

Dr Prathima Radhakrishnan
Facilitator

Dr Supriya Seshadri
Course Director

It is mandatory to have basic skills in 2D scanning as per standards, prior to enrolling for this course. This course will not address methodology of scans.

A structured and detailed learning on "how to scan" may be learnt in our simulator-based hands-on 1 day course on 'Basic obstetrics ultrasound'.

FGi O.P.U.S Team

Dr Jagruthi. C

Dr Hetali Parmar

Dr Ridhima Tejawani

Dr Shuba D.N

Dr Ursula D'Costa

Course curriculum

- Fetal biometry in first trimester, including measure of Crown Rump Length (CRL)
- Assessment of first trimester markers for aneuploidy (Nuchal translucency, nasal bone, vessel Doppler)
- Assessment of fetal anatomy in first trimester (normal & abnormal)
- First trimester screening for aneuploidy and preeclampsia

Venue:

Bangalore Fetal Medicine Centre
Kp Heights, #327,32B
4th floor 80 feet road,
HAL 2nd stage
Indiranagar
Bengaluru- 560038

Course dates: July 27th (Saturday) & 28th (Sunday), 9.00 AM to 5.00 PM

Course fees: Rs 23600/- (inclusive of GST)

Limited seats: 10 Delegates Only

For more details, contact:
