---

Faculty,

I am attaching a memo (one of my long ones) that explains the Koch proposal as it currently stands, and then offers my views of potential costs and benefits. Others may disagree with my views, of course, but this should at least provide a starting point for discussion at the meeting on Friday. The DeVoe Moore Center is already booked for something else so I will have to get a different room for the meeting. I will let you know where it will be when I find out.

Bruce
