This document is for information and instruction purposes. Mentor Graphics reserves the right to make changes in specifications and other information contained in this publication without prior notice, and the reader should, in all cases, consult Mentor Graphics to determine whether any changes have been made.

The terms and conditions governing the sale and licensing of Mentor Graphics products are set forth in written agreements between Mentor Graphics and its customers. No representation or other affirmation of fact contained in this publication shall be deemed to be a warranty or give rise to any liability of Mentor Graphics whatsoever.

MENTOR GRAPHICS MAKES NO WARRANTY OF ANY KIND WITH REGARD TO THIS MATERIAL INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

MENTOR GRAPHICS SHALL NOT BE LIABLE FOR ANY INCIDENTAL, INDIRECT, SPECIAL, OR CONSEQUENTIAL DAMAGES WHATSOEVER (INCLUDING BUT NOT LIMITED TO LOST PROFITS) ARISING OUT OF OR RELATED TO THIS PUBLICATION OR THE INFORMATION CONTAINED IN IT, EVEN IF MENTOR GRAPHICS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

U.S. GOVERNMENT LICENSE RIGHTS: The software and documentation were developed entirely at private expense and are commercial computer software and commercial computer software documentation within the meaning of the applicable acquisition regulations. Accordingly, pursuant to FAR 48 CFR 12.212 and DFARS 48 CFR 227.7202, use, duplication and disclosure by or for the U.S. Government or a U.S. Government subcontractor is subject solely to the terms and conditions set forth in the license agreement provided with the software, except for provisions which are contrary to applicable mandatory federal laws.

TRADEMARKS: The trademarks, logos and service marks ("Marks") used herein are the property of Mentor Graphics Corporation or other parties. No one is permitted to use these Marks without the prior written consent of Mentor Graphics or the owner of the Mark, as applicable. The use herein of a third-party Mark is not an attempt to indicate Mentor Graphics as a source of a product, but is intended to indicate a product from, or associated with, a particular third party. A current list of Mentor Graphics’ trademarks may be viewed at: www.mentor.com/trademarks.

End-User License Agreement: You can print a copy of the End-User License Agreement from: www.mentor.com/eula.

# Table of Contents

## Module 1
**Using the PCB Editor** ......................................................... 7
- Objectives ............................................................................. 7
- Expedition PCB Launch ....................................................... 8
- PCB Browser .......................................................................... 9
- PCB Viewer ........................................................................... 10
- PCB Planner ........................................................................... 11
- Design Source .......................................................................... 12
- PCB Editor Interface ............................................................... 13
- Panning and Zooming .............................................................. 14
- Mouse Strokes ......................................................................... 15
- Display Control ................................................................. 16
- Display Control — Layer ........................................................... 17
- Display Control — General ..................................................... 18
- Display Control — Part ............................................................ 19
- Display Control — Net ............................................................ 20
- Display Control — Hazard ...................................................... 21
- PCB Editor Modes ................................................................. 22
- Selecting Parts ...................................................................... 23
- Selecting Nets ....................................................................... 25
- Selecting Draw Objects ........................................................... 26
- Highlighting Objects ............................................................... 27
- Locating Objects .................................................................... 28
- File Viewer ............................................................................ 29
- Lab 1 ................................................................................. 30

## Module 2
**Setup Parameters** ................................................................. 31
- Objectives ............................................................................. 31
- Project Structure .................................................................. 32
- Setting Up Parameters ............................................................. 33
- Default Via ........................................................................... 34
- Blind and Buried Via Definitions ............................................ 35
- Micro Via Definitions .............................................................. 36
- Micro Via Clearances ............................................................... 37
- Layer Stackup ......................................................................... 39
- Setting Plane Layer Definitions .............................................. 40
- Editor Control ......................................................................... 41
- Lab 2 ................................................................................... 42
## Table of Contents

### Module 3
**Constraint Editor System**

- Objectives ................................................. 43
- What Is CES? ............................................. 44
- CES in the Design Flow ................................. 45
- Invoking CES From Expedition PCB .................. 46
- CES Main Window ........................................ 47
- CES Spreadsheets ........................................ 48
- Trace Widths ............................................. 50
- The Clearances Spreadsheet ............................ 51
- General Clearances ...................................... 52
- Timing Properties ........................................ 53
- Updating Design With Actual Values ................ 54
- Starting iCES ............................................. 55
- iCES GUI Overview ...................................... 56
- iCES GUI — Bars ........................................ 57
- iCES Tasks ................................................ 58
- iCES Clearances ......................................... 59
- iCES Width .............................................. 60
- iCES Match Groups ..................................... 61
- Lab 3 ...................................................... 62

### Module 4
**Verifying the Layout**

- Objectives ................................................ 63
- Batch DRC .................................................. 64
- Connectivity and Special Rules ........................... 65
- Advanced Element to Element Rules ................. 66
- Batch DRC Schemes ...................................... 67
- Reviewing DRC Hazards .................................. 68
- Measure Commands ....................................... 71
- Measure Modes .......................................... 72
- Measuring Minimum Distance Example ................ 73
- Measuring Distance Example ............................ 74
- Plane Clearances ......................................... 75
- Verifying Plane Data ..................................... 76
- Design Status ............................................ 77
- Lab 4 ...................................................... 78

### Appendix A
**Placing Parts** ........................................... 79

- Objectives ................................................ 79
- Editor Control Placement Settings .................... 80
- Placing Parts and Cells .................................. 81
- Moving Parts ............................................. 83
- Rotating Parts ........................................... 84
- Pushing Parts ........................................... 85
- Aligning Parts .......................................... 86
