Balanced Body Reformers now CE certified for 12 years!

June 22, 2022

Balanced Body has always believed that mindful movement like Pilates changes people's lives. Our passion for positive change has resulted in our becoming the world's largest provider of Pilates equipment and education. And the more people we can reach the better we think this world can be!

That's why it is exciting that 12 Balanced Body Reformers and Towers have now acquired a CE Marking, verifying the equipment's status as a Class I Medical Device across most of the EU. This means these pieces of equipment can be formally used in hospitals and health care settings by medical professionals across the European Union.
