IMPORTANT

• Please read this owner’s manual carefully and thoroughly before installing and operating your room air conditioner.
• Please retain this owner’s manual for future reference after reading it thoroughly.
FOR YOUR RECORDS
Write the model and serial numbers here:

Model #
Serial #

You can find them on a label on the side of each unit.
Dealer’s Name
Date Purchased

Staple your receipt to this page in the event you need it to prove date of purchase or for warranty issues.

READ THIS MANUAL
Inside you will find many helpful hints on how to use and maintain your air conditioner properly. Just a little preventive care on your part can save you a great deal of time and money over the life of your air conditioner.

You’ll find many answers to common problems in the chart of troubleshooting tips. If you review our chart of Troubleshooting Tips first, you may not need to call for service at all.

PRECAUTION
• Contact the authorized service technician for repair or maintenance of this unit.
• Contact the installer for installation of this unit.
• The air conditioner is not intended for use by young children or invalids without supervision.
• Young children should be supervised to ensure that they do not play with the air conditioner.
• When the power cord is to be replaced, replacement work shall be performed by authorized personnel only using only genuine replacement parts.
Safety Precautions

To prevent injury to the user or other people and property damage, the following instructions must be followed. Incorrect operation due to ignoring instruction will cause harm or damage. The seriousness is classified by the following indications.

⚠️ WARNING  This symbol indicates the possibility of death or serious injury.

⚠️ CAUTION  This symbol indicates the possibility of injury or damage.

Meanings of symbols used in this manual are as shown below.

Be sure not to do.

Be sure to follow the instruction.

Always use a power plug and socket with a ground terminal.

- There is a risk of electric shock.

Do not use a defective or underrated circuit breaker. Use the correctly rated breaker and fuse.

- There is risk of fire or electric shock.

For electrical work, contact the dealer, seller, a qualified electrician, or an Authorized Service Center. Do not disassemble or repair the product by yourself.

- There is risk of fire or electric shock.

Always ground the product as per the wiring diagram. Do not connect the ground wire to gas or water pipes lightening rod or telephone ground wire.

- There is risk of fire or electric shock.

Do not use a multi consent. Always use this appliance on a dedicated circuit and breaker.

- Otherwise it can cause electric shock or fire.

Always use the correctly rated breaker or fuse.

- There is risk of fire or electric shock.

Do not modify or extend the power cable. If the power cable or cord has scratches or skin peeled off or deteriorated then it must be replaced.

- There is risk of fire or electric shock.

For electrical work, contact the dealer, seller, a qualified electrician, or an Authorized Service Center. Do not disassemble or repair the product by yourself.

- There is risk of fire or electric shock.

Never install the outdoor unit on a moving base or a place from where it can fall down.

- The falling outdoor unit can cause damage or injury or even death of a person.

When the product is soaked (flooded or submerged) in water, contact an Authorized Service Center for repair before using it again.

- There is risk of fire or electric shock.

In outdoor unit the step-up capacitor supplies high voltage electricity to the electrical components. Be sure to discharge the capacitor completely before conducting the repair work.

- An charged capacitor can cause electrical shock.

When installing the unit, use the installation kit provided with the product.

- Otherwise the unit may fall and cause severe injury.

Always ground the product as per the wiring diagram. Do not connect the ground wire to gas or water pipes lightening rod or telephone ground wire.

- There is risk of fire or electric shock.

In outdoor unit the step-up capacitor supplies high voltage electricity to the electrical components. Be sure to discharge the capacitor completely before conducting the repair work.

- An charged capacitor can cause electrical shock.

When installing the unit, use the installation kit provided with the product.

- Otherwise the unit may fall and cause severe injury.

Always ground the product as per the wiring diagram. Do not connect the ground wire to gas or water pipes lightening rod or telephone ground wire.

- There is risk of fire or electric shock.

In outdoor unit the step-up capacitor supplies high voltage electricity to the electrical components. Be sure to discharge the capacitor completely before conducting the repair work.

- An charged capacitor can cause electrical shock.

When installing the unit, use the installation kit provided with the product.

- Otherwise the unit may fall and cause severe injury.

Always ground the product as per the wiring diagram. Do not connect the ground wire to gas or water pipes lightening rod or telephone ground wire.

<td></td>
<td>• It may cause a problem for your neighbors and hence dispute.</td>
<td>• Low refrigerant levels may cause failure of product.</td>
</tr>
<tr>
<td>Do not use the product for special purposes, such as preserving foods, works of art, etc. It is a consumer air conditioner, not a precision refrigeration system.</td>
<td>Do not block the inlet or outlet of air flow.</td>
<td>Use a soft cloth to clean. Do not use harsh detergents, solvents or splashing water etc.</td>
</tr>
<tr>
<td>• There is risk of damage or loss of property.</td>
<td>• It may cause product failure.</td>
<td>• There is risk of fire, electric shock, or damage to the plastic parts of the product.</td>
</tr>
</tbody>
</table>

| Do not touch the metal parts of the product when removing the air filter. | Do not step on or put anything on the product. (outdoor units) | Always insert the filter securely after cleaning. Clean the filter every two weeks or more often if necessary. |
| • There is risk of personal injury. | • There is risk of personal injury and failure of product. | • A dirty filter reduces the efficiency. |

| Do not insert hands or other objects through the air inlet or outlet while the product is operating. | Be cautious when unpacking and installing the product. | If the refrigerant gas leaks during the repair, do not touch the leaking refrigerant gas. |
| • There are sharp and moving parts that could cause personal injury. | • Sharp edges could cause injury. | • The refrigerant gas can cause frostbite (cold burn) |

| Do not tilt the unit when removing or uninstalling it. | Do not mix air or gas other than the specified refrigerant used in the system. | If the refrigerant gas leaks during the installation, ventilate the area immediately. |
| • The condensed water inside can spill. | • If air enters the refrigerant system, an excessively high pressure results, causing equipment damage or injury. | • Otherwise it can be harmful for your health. |

| Dismantling the unit, treatment of the refrigerant oil and eventual parts should be done in accordance with local and national standards. | Replace the all batteries in the remote control with new ones of the same type. Do not mix old and new batteries or different types of batteries. | Do not recharge or disassemble the batteries. Do not dispose of batteries in a fire. |
| • There is risk of fire or product failure. | • There is risk of fire or product failure. | • They may burn or explode. |

| If the liquid from the batteries gets onto your skin or clothes, wash it well with clean water. Do not use the remote if the batteries have leaked. | If you eat the liquid from the batteries, brush your teeth and see doctor. Do not use the remote if the batteries have leaked. | Do not let the air conditioner run for a long time when the humidity is very high and a door or a window is left open. |
| • The chemicals in batteries could cause burns or other health hazards. | • The chemicals in batteries could cause burns or other health hazards. | • Moisture may condense and wet or damage furniture. |

| Do not expose your skin or kids or plants to the cool or hot air draft. | Do not drink the water drained from the product. | Use a firm stool or ladder when cleaning, maintaining or repairing the product at an height. |
| • This could harm to your health. | • It is not sanitary and could cause serious health issues. | • Be careful and avoid personal injury. |
Electrical Safety

⚠️ WARNING
- This appliance must be properly grounded.
  To minimize the risk of electric shock, you must always plug into a grounded outlet.
- Do not cut or remove the grounding prong from the power plug.
- Attaching the adapter ground terminal to the wall receptacle cover screw does not ground the appliance unless the cover screw is metal and not insulated, and the wall receptacle is grounded through the house wiring.
- If you have any doubt whether the air conditioner is properly grounded, have the wall receptacle and circuit checked by a qualified electrician.

Temporary Use of an Adapter

We strongly discourage the use of an adapter due to potential safety hazards. For temporary connections, use only a genuine adapter, available from most local hardware stores. Ensure that the large slot in the adapter is aligned with the large slot in the receptacle for a proper polarity connection.

To disconnect the power cord from the adapter, use one hand on each to avoid damaging the ground terminal. Avoid frequently unplugging the power cord as this can lead to eventual ground terminal damage.

⚠️ WARNING
- Never use the appliance with a broken adapter.

Symbols used in this Manual

⚠️ This symbol alerts you to the risk of electric shock.

⚠️ This symbol alerts you to hazards that may cause harm to the air conditioner.

NOTE This symbol indicates special notes.
Here is a brief introduction of the indoor and outdoor units. Please see the information specific to your indoor unit type.

**Indoor Units**

### [Standard Type]
- Air inlet
- Grille tab
- Front grille
- ON/OFF button
- Plasma filter (Optional)
- Air filter
- Air outlet
- Louvers (Vertical blades)
- Flap (Horizontal blade)

### [Artcool Mirror Type]
- Air inlet
- Air filter
- Plasma filter
- Air discharge
- Front panel
- Signal receiver
- ON/OFF button

### [Ceiling Cassette Type]
- Cabinet
- Air Discharge
- Front Panel
- Signal receiver
- Air Inlet

**Outdoor Unit**

- Air intake vents
- Control cover
- Connecting wire
- Connection pipe
- Drain hose
- Air outlet vents
- Base plate

※ The figure can be changed according to model.
Operating Instructions

How to insert the Batteries

1. Remove the battery cover by pulling it according to the arrow direction.
2. Insert new batteries making sure that the (+) and (-) of battery are installed correctly. (Battery Size = AAA)
3. Reattach the cover by sliding it back into position.

**NOTE**

1. Always use/replace both batteries of same type.
2. If the system is not to be used for a long time, remove the batteries to save their working life.
3. If the display screen of remote controller starts, fading replace both of the batteries.

Wireless Remote Controller Maintenance

1. Choose a suitable place where it's safe & easy to reach.
2. Fix the holder to wall etc with the supplied screws firmly.
3. Slide the remote controller inside the holder.

**NOTE**

1. Remote controller should never be exposed to direct sunlight.
2. Signal transmitter & receiver should always be clean for proper communication. Use a soft cloth to clean them.
3. In case some other appliances also get operated with remote control, change their position or consult your serviceman.
Operation Indication Lamps

[Standard/Artcool Mirror Type]

- **On/Off**: Lights up during the system operation, error code and auto restart setting.
- **Sleep mode**: Lights up during sleep mode auto operation.
- **Plasma**: The function illustrates its dynamic mode by using a multiple lighting system.
- **Timer**: Lights up during timer operation.
- **Defrost mode**: Lights up during defrost mode or *hot start operation*
- **Power Display**: Indicates the setting temperature and operation mode.

*Hot start operation*: Stops the indoor fan in heating operation for minutes to prevent cold air from blowing out from unit.

*In defrost mode unit stops heating operation for few minutes to remove formation of ice on the heat exchanger coils to maintain the efficiency.

[Ceiling Cassette Type]

- **On/Off**: Lights up during the system operation.
- **Filter Sign**: Lights up after 2400 hours from the time of first operating unit.
- **Timer**: Lights up during Timer operation.
- **Defrost Mode**: Lights up during Defrost Mode or Hot Start operation.(Heat pump model only)
- **Forced**: To operate the unit when the remote control can't be used for any reason.

Operating Method

1. The signal receiver is inside the unit.
2. Aim the remote controller towards the unit to operate it.
   There should not be any blockage in between.
Wireless Remote Controller

PLASMA Button (Optional)
Used to start or stop the plasma-purification function.

JET COOL Button
Speed cooling operates super high fan speed.

OPERATION MODE SELECTION Button
Used to select the operation mode.

FUNCTION SETTING Button
Used to set or clear Auto Clean or Amart Clean.

LCD LUMINOSITY Button (Optional)
Used to adjust LCD luminosity

SMART CLEAN Button (Optional)
Used to start or stop Smart Clean.

CLEAR ALL Button
Used to clear all timer.

ROOM TEMPERATURE SETTING Button
Used to select the room temperature.

ON/OFF Button
Used to turn on/off the unit.

INDOOR FAN SPEED SELECTION Button
Used to select fan speed in four steps low, medium, high and chaos.

UP/DOWN AIRFLOW Button
Used to stop or start louver movement and set the desired up/down airflow direction.

LEFT/RIGHT AIRFLOW Button (Optional)
Used to set the desired left/right (horizontal) airflow direction.

TIMER AND TIME SETTING Button
Used to set the time of starting or stopping and sleeping operation.

ROOM TEMPERATURE CHECKING Button
Used to check the room temperature.

°C/°F SWITCH Button
Used to switch temperature reading from Celsius to Fahrenheit.

RESET Button
Used to reset the remote controller.

NOTE
+ Some functions may not be operated and displayed depending on the product type.
Display temperature can be different from actual room temperature if the remote controller is installed at the place where sun-rays are falling directly or the place nearby heat source.

The actual product can be different from above contents depending upon model type.
Operation Mode

1. Press the ON/OFF BUTTON to turn the unit on. The unit will respond with a beep.

2. Open the door of the remote controller and press the operation mode button. Each time the button is pressed, the operation mode is shifted in the direction of the arrow.

3. For cooling or heating operation set the desired indoor temperature by pressing the ROOM TEMPERATURE SETTING BUTTONS.
   - For cooling the temperature can be set within 18°C~30°C (64°F~86°F) and for heating the temperature range is 16°C~30°C (60°F~86°F).
   - To raise the temperature
   - To lower the temperature

4. Set the fan speed with the remote controller. You can select the fan speed in four steps-low, medium, high and CHAOS by pressing the INDOOR FAN SPEED SELECTOR BUTTON. Each time the button is pressed, the fan speed mode is shifted.

   - CHAOS Air
   - Fan speed is on low.
   - Fan speed is on medium.
   - Fan speed is on high.

Natural wind by the CHAOS logic
- For fresher feeling, press the INDOOR FAN SPEED SELECTOR BUTTON selector and set to CHAOS mode.
- In this mode, the wind blows like a natural breeze by automatically changing fan speed according to the CHAOS logic.
Helpful information

Fan speed and cooling capacity.
The cooling/heating capacity indicated in the specification is the value when the fan speed is set to high, and the capacity will be lower at low or medium fan speed.
High fan speed is recommended when you wish to cool/heat the room quickly.

Healthy Dehumidification Operation

During Healthy Dehumidification Operation
- If you select the dehumidification mode on the OPERATION MODE SELECTION BUTTON, the product starts to run the dehumidification function. It automatically sets the room temperature and airflow volume to the best condition for dehumidification, based on the sensed current room temperature.
In this case, however, the setting temperature is not displayed on the remote controller and you are not able to control the room temperature either.
- During the healthy dehumidification function, the airflow volume is automatically set according to the optimization algorithm responding to the current room temperature status, so that the room condition is kept healthy and comfortable even in the very humid season.

Air Circulation Operation

This operation circulates the air without cooling or heating. It can be activated by pressing the OPERATION MODE SELECTION BUTTON. Once the air circulation is activated you can select the air speed by pressing the INDOOR FAN SPEED SELECTOR BUTTON.

NOTE
CHAOS Air economizes power consumption and prevents overcooling. The fan speed is automatically changed from high to low or vice versa, depending on the ambient temperature.

Auto Operation

In this operation mode, the system is automatically operated by the electronic controls.
- You can set the desired temperature between 64°F and 86°F for Auto Operation mode.

NOTE
You can set the fan speed in this operation mode only from the installed wired remote controller.
This function properly operates when you use the remote controller matching each model.
Jet Cool Operation

Jet cool function can be used to cool the room quickly in hot summer. When this function is turned on, the air conditioner runs in cooling operation mode with super high fan speed and 18°C setting temperature for 30 minutes for fast and effective cooling.

You can activate this operation by pressing the JET COOL BUTTON.
To change from jet cool mode to high fan speed cooling mode, press the JET COOL BUTTON or INDOOR FAN SPEED SELECTOR BUTTON or the ROOM TEMPERATURE SETTING BUTTON again.

**NOTE**
- Jet cool function cannot be activated during heating mode.
- Art Cool and Art Cool Wide models close the side discharges during jet cool operation, for strong cooling.

NEO PLASMA Purification Operation (Optional)

Plasma filter is a technology developed by LG to get rid of microscopic contaminants in the intake air by generating a plasma of high charge electrons. This plasma kills and destroys the contaminants completely to provide clean and hygienic air.

Plasma purification can be started by pressing the PLASMA BUTTON on the remote controller. Repressing it will deactivate the operation.

**NOTE**
This feature can be used in any operation mode and any fan speed can be used while plasma filter is functioning.
Auto Clean (Optional)

- During auto clean function, moistures left in indoor units after cooling operation or healthy dehumidification operation can be removed.

This function operate when the unit is turned off.

1. Press the FUNCTION SETTING button 1 time. Auto Clean symbol will blink.

2. Press the SET/CLEAR button to reserve or cancel the Auto Clean function.

   If the Auto Clean function is reserved, whenever the unit is turned off, the indoor fan is still running for about 30 minutes internally without cooling or dehumidification operation. Also the louver is closed. This dries up any remains of moisture & cleans the unit internally.

Display Luminosity (Artcool Mirror Type Only)

The Display Luminosity can be adjusted by using the remote control. Open the door of the remote controller, and press the LCD LUMINOSITY button. Display will be dark. Press the button again to set bright display.

⚠️ CAUTION
Because Display Luminosity is optional function, some product will not operate.
**Forced operation**

Operation procedures when the remote control can't be used. The operation will be started if the ON/OFF button is pressed. If you want to stop operation, re-press the button.

**Test operation**

During the TEST OPERATION, the unit operates in cooling mode at high speed fan, regardless of room temperature and resets in 18 minutes. During test operation, if remote controller signal is received, the unit operates as remote controller sets. If you want to use this operation, Press and hold the ON/OFF button for 3~5 seconds, then the buzzer sound 1 "beep". If you want to stop the operation, re-press the button.

<table>
<thead>
<tr>
<th>Operating mode</th>
<th>Room Temp. ≥ 24°C(75.2°F)</th>
<th>Room Temp. &lt; 24°C(75.2°F)</th>

</tbody>
</table>
Setting the Current Time

1. Press the TIMER button for 3 seconds.
2. Press TIME SETTING buttons until the desired time is set.
3. Press the SET / CLEAR button.

NOTE
Check the indicator for A.M. and P.M.

Timer Setting

1. Press the TIMER button to turn timer on or off.
2. Press TIME SETTING buttons until the desired time is set.
3. Press the SET / CLEAR button.

NOTE
Select one of the following 3 types of operation.

- Timer Sleep
- Timer On
- Timer Off

To cancel the Timer Setting

- If you wish to cancel all timer setting, press the CLEAR ALL button.

- If you wish to cancel each timer setting, press the TIMER button to turn timer sleep or on or off as you want. And then press the SET/CLEAR button aiming the remote controller at the signal receptor. (The timer lamp on the air conditioner and the display will go off.)
Up/Down Airflow Direction Control

The up/down airflow (Vertical Airflow) can be adjusted by using the remote controller.

1. Press the ON/OFF button to start the unit.
2. Press UP/DOWN AIRFLOW button and the louvers will swing up and down. Press the UP/DOWN AIRFLOW button again to set the vertical louver at the desired airflow direction.

**NOTICE**

- If you press the UP/DOWN AIRFLOW button, the horizontal airflow direction is changed automatically based on the Auto Swing algorithm to distribute the air in the room evenly and at the same time to make the human body feel more comfortable, as if enjoying a natural breeze.
- Always use the remote controller to adjust the up/down airflow direction. Manually moving the vertical airflow direction louver by hand, could damage the air conditioner.
- When the unit is shut off, the up/down airflow direction louver will close the air outlet vent of the system.

Left/Right Airflow Direction Control (Optional)

The left/right (horizontal) airflow can be adjusted by using the remote control.

1. Press the ON/OFF button to start the unit.
2. Press the LEFT/RIGHT AIRFLOW button and the louvers will swing left and right. Press the Horizontal Airflow Direction Control Button again to set the horizontal louver at the desired airflow direction.

* Up/Down and Left/Right Airflow function isn’t shown on display of remote controller.

Auto Restart Function

This function is useful in the situation of power failure. When power regains after a failure this feature restore the previous operating condition and the air conditioner will run in the same settings.

**NOTE**

This feature is enabled by factory default setting, but you can disable it by pressing the ON/OFF button for 6 seconds. The unit will beep twice and the indicator lamp will blink 4 times.

To enable it, press the button again for 6 seconds. The unit will beep twice and the indicator lamp will blink 4 times.
Maintenance and Service

⚠️ CAUTION
Before performing any maintenance, turn off the main power to the system, disconnect the circuit breaker and unplug the power cord.

Standard/Artcool Mirror Type
Clean the unit with a soft dry cloth. Do not use bleach or abrasives.

⚠️ CAUTION
Never use any of these
- Water hotter than 40°C(104°F). It may cause deformation and discoloration.
- Volatile substances. They may damage the surface of the air conditioner.

Air Filters
The air filters behind the front panel / grill should be checked and cleaned once in every 2 weeks or more often if necessary. To remove the filters see the self explanatory diagrams for each model type. Clean the filters with a vacuum cleaner or warm soapy water. If dirt is not easily removed, wash with a solution of detergent in luke warm water. Dry well in shade after washing and reinstall the filters back in place.

Plasma Filters
The plasma filters behind the air filter should be checked and cleaned once in every 3 months or more often if necessary. To remove the filters see the self explanatory diagrams for each model type. Clean the filters with a vacuum cleaner. If it is dirty wash it with water and dry well in shade an install back in place.

Deodorizer Filters
Remove the deodorizer filters behind the air filter and expose them in direct sunlight for 2 hours. And then insert these filters into original position.

Removal of Filters
Open the front panel as shown. Then pull the filter tab slightly forward to remove the air filter. After removing the air filter remove the plasma and deodorizer filter by slightly pulling forward.

⚠️ Don’t touch this plasma filter within 10 seconds after opening the inlet grille, it may cause an electric shock.
How to use the front panel [Artcool Mirror Type]

1. Front panel closing
   Move the link upward and close the front panel.

2. Front panel removing
   Raise the link up to hook hanger and remove front panel forward.

Ceiling Cassette Type

Grille, Case and Remote Control
☐ Turn the system off before cleaning, To clean, wipe with a soft, dry cloth. Do not use bleach or abrasives.

NOTE
Supply power must be disconnected before cleaning the indoor unit.

Air Filters
The air filters behind the front grille should be checked and cleaned once every 2 weeks or more often if necessary.

Never use any of the followings:
- Water hotter than 40°C.
  Could cause deformation and/or discoloration.
- Volatile substances.
  Could damage the surfaces of the air conditioner.

1 Remove the Air filters.
  □ Take hold of the tab and pull slightly forward to remove the filter.

CAUTION: When the air filter is to be removed, do not touch the metal parts of the indoor unit. It may cause an injury.

2 Clean dirt from the air filter using a vacuum cleaner or washing with water.
  □ If dirt is conspicuous, wash with a neutral detergent in lukewarm water.
  □ If hot water (50°C or more) is used, it may be deformed.

3 After washing with water, dry well in the shade.
  □ Do not expose the air filter to direct sunlight or heat from a fire when drying it.

4 Install the air filter.
Operation Tips!

Do not overcool the room. This is not good for the health and wastes electricity.

Keep the room temperature uniform. Adjust the vertical and horizontal airflow direction to ensure a uniform temperature in the room.

Keep blinds or curtains closed. Do not let direct sunshine enter the room when the air conditioner is in operation.

Make sure that the doors and windows are shut tight. Avoid opening doors and windows as much as possible to keep the cool air in the room.

Clean the air filter regularly. Blockages in the air filter reduce the airflow and lower cooling and dehumidifying effects. Clean at least once every two weeks.

Ventilate the room occasionally. Since windows are kept closed, it is a good idea to open them and ventilate the room now and then.

Use high fan speed for effective and fast cooling. The unit gives its rated cooling capacity when the fan speed is high.
