

PROTECT YOUR HOME, YOUR BUSINESS & YOUR POSSESSIONS FROM DEVASTATING WATER DAMAGE

The patent pending PipeBurst Pro is a new and revolutionary professional grade system that provides rapid flood protection. The PipeBurst Pro system protects home and commercial property, such as assisted living, hotels, apartments and manufacturing facilities, with the most complete protection against flood damage available on the market today.

Few events are more damaging to a home or business than a flood caused by a failed plumbing system or faulty appliances. Priceless photographs, expensive electronic equipment, along with irreplaceable company or personal records, can quickly become a total loss after just a few moments of exposure to water. Being prepared for leaks can not only help keep your family and business assets safe, it can also help minimize flood damage and reduce the time and costs of recovery.

Made in the U.S.A., PipeBurst Pro has over 35 years of proven manufacturing experience to draw it's quality from. Using high-tech wireless sensors and flexible controls, the PipeBurst Pro system instantly detects a problem before mold, warped flooring and other devastating damage can occur. The PipeBurst Pro easily integrates into any security system you may have and alerts you immediately if a problem occurs, even if you are away. Adding PipeBurst Pro to your home or business keeps your assets safe, minimizes flood damage and recovery costs, plus it can qualify your home or business for insurance discounts.

THE FIVE COMPONENTS THAT MAKE PIPEBURST PRO THE SMART CHOICE FOR STOPPING LEAKS AND WATER DAMAGE

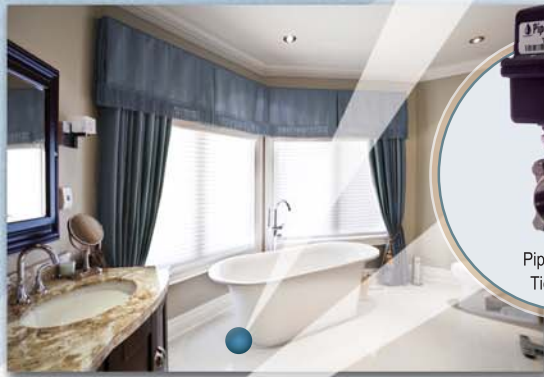

FloTrax™

FloTrax™ – A control panel, keypad, alarm, temperature sensor and two-way communication tracking device all in one, the FloTrax provides complete communication, monitoring and control for the entire PipeBurst Pro system. Unique technology, reliability and superior craftsmanship combine to make the FloTrax easy to install and intuitive to use.

FloodBug™ with SideKick™

FloodBug™ with SideKick™ – Get protection from leaks in those tight places where potential water leaks are most likely to occur with the wireless FloodBug and SideKick electronic water sensors. By wisely placing a FloodBug you can prevent a damaging flood and also be notified of the problem via your VIP, FloTrax and your alarm monitoring service. The FloodBug's gold-plated water sensor pins make the FloodBug more sensitive to water detection, a feature that sets the PipeBurst Pro apart from lower quality systems. When the FloodBug detects a leak, it will sound an alarm and send a signal to shut off the water supply to the affected area.

PipeBurst Pro™ TickerValve™

PipeBurst Pro™ TickerValve™ – Water is one of the most difficult fluids to control. But it is no match for the TickerValve. This ingenious, full-flow motorized component cycles back and forth in a 90-degree rotation arc. Our exclusive TickerValve features a ¾ second close time to stop leaks fast, and a SloFlo "ticking" action to open the valve in several slower steps. This prevents the surge of released energy from damaging your pipes when your home's plumbing is re-pressurized each time the TickerValve is opened. The Quick Close/SloFlo Open is an exclusive feature of PipeBurst Pro. Our TickerValve actuator's enclosure is waterproof. This exclusive waterproof feature and our proprietary sealing process has not been successfully duplicated by anyone industry wide!

VIP™ w/SideKick™

VIP™ w/SideKick™ – The VIP (Value Interface Panel) is the primary processing control unit for the PipeBurst Pro system. The VIP goes beyond simple water alarms offered by our competitors and successfully and pro-actively controls the potential damage from leaks inside your home or business. Use the VIP with a FloodBug or SideKick sensor to automatically turn off the water supply through our waterproof TickerValve. VIP shuts off the water supply, sounds an alarm and lights up an LED display to alert occupants.

Quick delivery and easy installation means your PipeBurst Pro can be protecting your business, home and family in just a few days. Contact us now so we can get PipeBurst Pro's peace of mind working for you too!
