

# Hydronic Mixing Block

February 2013

**viega**

## Make wiring, piping and programming simple and easy

The new hydronic mixing block is a highly engineered, user friendly, economical solution for controlling a radiant heating system. Easy to wire, easy to pipe and easy to program, the hydronic mixing block combines mixing, control, air elimination and a pump in a single unit which simplifies radiant installations.

### ***Features and benefits***

- Simple installation with only three connections
- Fittings and ports clearly labeled
- Mixing solution with built-in circulator, air vent and control
- Includes bracket, fittings and individually labeled components
- The control offers an intuitive menu structure that makes programming fast and simple
- Program and view only the settings selected

#### **Hydronic mixing block**

- Pumping and mixing block, compact enclosure

#### Components

3-Speed circulator, control, air vent, adapter fittings, bracket and sensors

**Model 2887.3**

	Wt (lb)	Quantity	Part No	DG	Price
	8.580	1	<b>56160</b>		\$1,289.00
