*PRODUCT LINE*

## IAQ

### Healthy Home System™

We offer a complete line of IAQ products designed to work independently or synergistically. When used in combination, they tie into the existing ductwork to transform the heating and cooling system into a Healthy Home System. The Healthy Home System goes beyond traditional technology to provide indoor air that is Fresh, Clean, and Pure.™

The Healthy Home System Control intelligently manages the central fan, even when not heating or cooling, to maximize the benefits of the Healthy Home System. The Fresh Air Damper provides fresh air ventilation by delivering fresh air automatically and efficiently. The Media Air Cleaner™ is a whole house air filtration system that combines minimum maintenance with maximum air cleaning capacity. The UV-Aire® germicidal lights continuously attack airborne mold, bacteria, and viruses while reducing mold growth on air conditioning coils. We offer 15 induct and two portable models, the most complete selection in the industry. Visit [fieldcontrols.com/healthyhomesystem](http://fieldcontrols.com/healthyhomesystem) for more information.

## Venting

Field Controls has developed the state-of-the-art in sidewall power venting. Our patented SWG Series is the safest, most efficient power venter available today. It combines the power unit, fan, and vent outlet in one complete, easy to install unit that significantly reduces motor noise. All Field power venters are designed to effectively vent oil and gas-fired furnaces, heaters, boilers, gas-fired water heaters, and fireplaces through the sidewall, thus eliminating the need for expensive, space consuming chimneys. Models are available for residential, commercial, and industrial use. Visit [fieldcontrols.com/venting](http://fieldcontrols.com/venting) for more information.

SWG

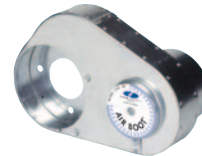

ComboVent™

PVG & PVO Power Venters

# Combustion

Field offers seven combustion air models designed for oil and gas appliances that solve problems related to “too tight” construction and confined space installations. Fan-in-a-Can® and Fan-in-a-Drum® models provide fresh air for residential, commercial, and industrial heating systems. Visit [fieldcontrols.com/cas](http://fieldcontrols.com/cas) for more information.

Field AirBoot®

CAS-3

# Draft

Field produces a wide variety of barometric draft controls for residential and commercial use on gas, oil, oil-gas, coal-fired, and/or wood-burning equipment. Field Controls is the undisputed leader in the manufacture of draft control equipment, with millions of installations worldwide. Models are available from 5” to 32”. Field draft inducers correct drafting/venting problems caused by short chimneys, undersized flue pipes, and negative building pressures. Visit [fieldcontrols.com/draftcontrol](http://fieldcontrols.com/draftcontrol) for more information.

# More Solutions

The Field 20+® Condensate Pump is designed to collect and remove condensation from air conditioning systems, 90+ condensing furnaces, and dehumidifiers.

20+® Condensate Pump

Field Air Boosters improve air flow and distribution of conditioned air to “problem” rooms in homes and businesses. There are nine models designed for round or square ducts, improving air flow, and heating/cooling efficiency.

AB-1

AB-4

The ClearWave® works without chemicals, salt or special plumbing to help reduce scale buildup and prevent scale formation, and works on all types of water pipe. Designed for use with commercial dishwashers, ice makers, coffee/tea makers, and boilers.

Field Controls was founded by Ted Field in 1927 in Evanston, Illinois, and moved to Kinston, North Carolina in 1977. Field Controls first specialized in large, custom-built draft controls and remains the worldwide leader in the manufacture of draft controls for oil, gas, and solid fuel applications. Field expanded its product line to include venting, combustion, and air purification products.
