

AG200-004

Dual Air Gap for Double Drawer Dishwasher

Features:

- Can simultaneously drain both dishwasher drawers
- Accepts standard 5/8" I.D. hoses from a dual dishwasher
- Connects to drain with 7/8" I.D. hose
- Provides extra-long thread for mounting through a thick counter-top
- Provides super strong mounting nuts for easy and reliable installation
- UPC® listed, tested for compliance to IPC® and NSF® standards

General Description:

A dishwasher air gap is a critical component in maintaining a safe water supply. It prevents contaminants in the sink from flowing into the dishwasher and is required by code in most states.

The Amerigap® brand dual dishwasher air gap provides many advantages over other air gaps available on the market and also ensures safety and peace of mind that your water supply is clean.

A common misconception is that a "high loop" (routing a drain line under the counter, for instance) and a wye connection will provide the same function as an air gap; this is not true, because the continuous connection between dishwasher and drain line still will allow back-flow through siphoning.

This air gap is easy to use and legal to install in any state. The AG200-004 air gap is listed by UPC and tested for compliance with IPC and NSF standards.

Mechanical Specifications:

- Width: 5-1/2 inches
- Height above counter: 2-1/2 inches

Inlet/Outlet Specifications:

- Inlets: 5/8-inch OD
- Outlet: 7/8-inch OD

Accessories (included):

- Cover cap
- Bottom nut
- Mounting washer
- Top housing
- Mounting nut
- Top nut
- Inlet plug

Material

- Body: Polypropylene
- Decorative cap: Chrome plated ABS

Approvals

- UPC: Listed
- IPC: Tested by independent lab
- NSF: Tested by independent lab

Alternative PN:

- T52, Amerigap®
