PENTEK® C SERIES
DUAL PURPOSE POWDER-ACTIVATED CARBON CARTRIDGES

AN ECONOMICAL SOLUTION FOR A WIDE RANGE OF RESIDENTIAL APPLICATIONS

Pentair® Pentek® C Series Cartridges offer an economical solution for all your general-purpose water filtration needs. Constructed of a carbon impregnated cellulose media, these dual-purpose cartridges filter out fine sediment particles and reduce unwanted taste, odor, and chlorine taste & odor from your tap water.* External netting provides additional strength and dirt-holding capacity.

C Series Cartridges are available in a variety of sizes and are nominally rated at 5-microns.

These dual-purpose cartridges are well suited for a wide range of residential applications, and make excellent polishing filters when used in process or closed-loop streams.

FEATURES/BENEFITS

Available in three lengths and three diameters
Basic chlorine reduction at a very good economic value
Both chlorine and sediment reduction
High flow rates possible due to low initial pressure drop
Good dirt holding capacity

General purpose taste and odor reduction for residential chlorinated water supplies
Polishing filter for process or closed-loop streams

SPECIFICATIONS

Filter Media – PAC impregnated cellulose
Endcaps – Vinyl plastisol

Netting – Polyethylene
Core – Polypropylene
Temperature Rating – 40-125°F (4.4-51.7°C)

The C1 is Tested and Certified by NSF International to NSF/ANSI Standard 42 for material requirements only.

* Based on manufacturer’s internal testing.

*Based on manufacturer’s internal testing.

NOTES: Increased flow rates may result in less effective chlorine reduction. Some harmless bacteria will attack cellulose media cartridges. If your cartridge seems to disintegrate or has a musty or moldy odor, switch to a synthetic media cartridge or consult the manufacturer. Estimated capacity tested at given flow rate using 2 ppm free available chlorine to 0.5 ppm breakthrough. WARNING: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
