

The 8100 Energy Recovery Ventilator expels stale indoor air and brings in fresh outside air with minimal impact on the heating and cooling efforts of the HVAC system.

FEATURES

- + Provides a constant and controlled supply of fresh air year-round
- + EnergyMax® transfer core technology uses the conditioned air being expelled to heat the incoming fresh air in the winter, reducing value loss from indoor air
- + EnergyMax® core also removes moisture and cools the incoming fresh air in the summer the same way it warms the air in the winter
- + Unit is designed, when properly installed, to achieve ASHRAE standard 62.2-2010*
- + Can run continuously without a controller or on a schedule when wired to an 8120X ventilation controller*
- + Minimal maintenance required
- + Quiet operation

*Pat. No. 9,874,366

BENEFITS

- + Brings fresh air into the home
- + Helps remove moisture from incoming air during warmer months
- + Reduces indoor air pollution by expelling pollutants that can build up indoors
- + Reduces energy costs by tempering incoming fresh air with outgoing air

When properly installed and set, the Aprilaire Model 8100 will meet the mechanical ventilation requirements of:

- + ASHRAE standard 62.2-2010
- + 2012 & 2015 International Residential Code (IRC)
- + 2012 & 2015 International Mechanical Code (IMC)
