

A work of art that works for you.

The slim profile, ultra-sleek Aprilaire Model 8570 Thermostat does more than just look great. It offers unsurpassed performance and premium features.

Easiest to operate: This consumer tested and proven thermostat features simple, menu-driven programming. Simply highlight "Menu Options" on the display and press "Select." You view the entire daily schedule on one screen as you make changes. And the Model 8570 automatically adjusts for daylight saving time.

Exceptional convenience: The Model 8570 provides maintenance alerts for key system accessories including: Aprilaire Humidifiers, UV Lamps and Air Cleaners, and tells you when service is needed. Your dealer's contact information can even be displayed at the touch of a button, and when properly equipped, the Model 8570 also displays outdoor temperature and indoor relative humidity.

The U.S. Department of Energy recommends programmable thermostats to save up to 30% on heating and cooling bills.

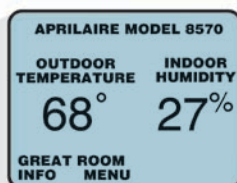

Intelligence gives you the most comfortable home environment possible.

For over 50 years, Aprilaire has been the leading brand for indoor air quality solutions. The new Model 8570 Thermostat continues this legacy. It is a technological advancement in thermostat convenience and control that can become the cornerstone of intelligent solutions for your indoor environment.

- **Easy to read:** Vibrant, soft blue backlighting allows the Model 8570 Thermostat to be viewed at any light level.
- **Constant comfort:** Your morning temperature setting is assured after an overnight setback through the use of special progressive recovery technology. This is accomplished while optimizing the equipment start time for energy efficiency.

Friendly programming: Easily view or change the program schedule on a single screen. Select to program every day individually, weekdays separately from weekends or every day the same. You can even program the fan to be "On" or "Automatic" during each event of the program. The program is permanently stored even in a power outage.

Information at your fingertips: Simply select the "info" setting, and when connected to an Aprilaire Automatic Humidifier, information such as outdoor temperature and indoor relative humidity can be viewed.

Simple maintenance: Monitors alert you when service is needed, conveniently displaying your dealer's name and phone number.

Save money: Holiday (vacation) hold allows the thermostat program to be overridden until your determined return date and time. Whether you're away for hours, days or weeks, you save energy and money and return to a comfortable home.
