

WAGS™

**WATER HEATER
SAFETY VALVE**

THE ONE SHOT WONDER

No Hot Water! An exposed red indicator tab on your WAGS™ valve indicates the valve has activated due to a water leak. The WAGS™ valve has shut off the water supply (*and gas supply - if so equipped*).

If Activated, Now What? The WAGS™ valve is a single-use device and for safety concerns it cannot be reset, reused or rebuilt.

Contact Your Installation Plumber for a replacement WAGS™ valve to install on your new water heater. Return your activated valve to **receive a 30% Discount*** on your next WAGS™!

Essential protection against a disastrous water heater failure
