

Commercial Product Catalog

Innovation Has A Name.

It should come as no surprise that a company that has built its reputation on the concept of innovation continues to lead the industry with the broadest—and, yes, the most innovative—selection of water heaters and boilers in its long and storied history.

What *might* come as a surprise to some is the fact that we view this accomplishment as a mere beginning—an indication of even greater things still to come. For everyone here at A. O. Smith, it's never been just about outdoing what we have achieved in the past—it's always been about exceeding everyone's expectations for the future. Which is why you, our customers, can count on us to provide you with the perfect water heater solution for any application—day after day, year after year.

Table of Contents

- A. O. Smith Innovation and Quality 3

- Storage Tanks/Hot Water Generators 56–57
- Commercial Line Overview & Support Network 58–59

A. O. Smith innovation and quality...engineered into every product from the inside out.

The Eliminator™ Self-Cleaning Technology In Master-Fit® Models

A. O. Smith Master-Fit commercial gas water heaters have always provided maximum installation flexibility for both new construction and replacement applications. Now, Master-Fit offers The Eliminator for automatic self-cleaning protection against build-up of lime and other sediments.

As deposits of lime and other sediments accumulate inside the tank, they form a barrier between the burner and the water, concentrating heat around the critical weld areas. The result is reduced energy efficiency, higher operating costs, and greater risk of premature tank leaks.

The Eliminator directs incoming cold water under pressure to sweep the bottom of the tank to keep sediment moving so it doesn't accumulate.

With The Eliminator, every Master-Fit water heater can be expected to maintain its rated efficiency longer and deliver reliable service year after year.

PermaGlas® Ultra Coat™ Glass Coating

Nothing protects like it, and nobody offers it but A. O. Smith. PermaGlas Ultra Coat is an exclusive "slush coat" process that heat-bonds glass to each tank's inner surface after all connections and seams have been welded. Because it's a slush coating process instead of a spray-on coating, PermaGlas Ultra Coat covers and protects better.

And because A. O. Smith PermaGlas Ultra Coat is applied after the tank is welded, there is no chance of "weld burn" that can burn away normal glass lining and expose bare steel to water.

PermaGlas Ultra Coat provides protection for the tank's top, bottom, and outer shell and all weld seams.

All welds completed prior to PermaGlas Ultra Coat.

Once tanks are filled with PermaGlas, they are rotated (computer controlled) for precise, even coating.

Technician removes hand-hole clean-out to prepare it for the next step.

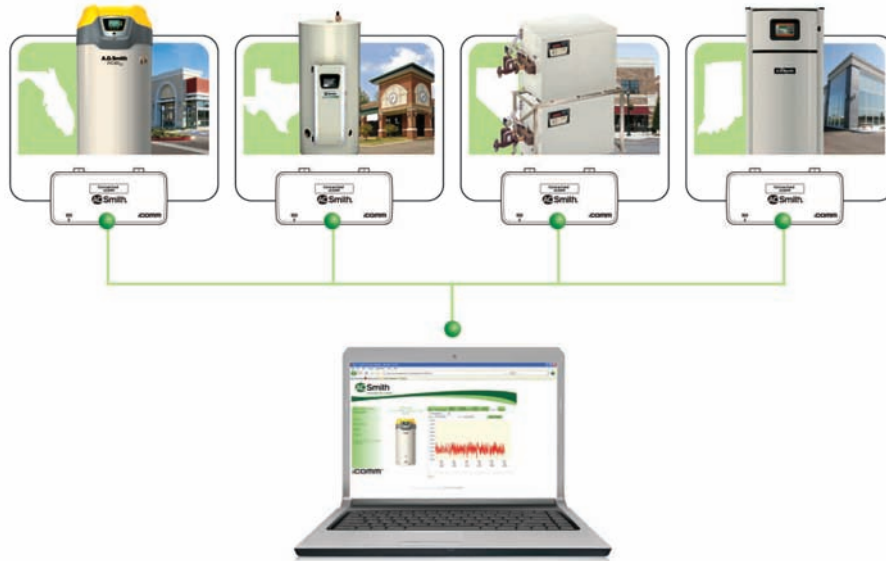

Tanks are then rotated further, allowing the excess PermaGlas to drain from the tank.

After pre-drying in 200°F ovens, the tanks are then fired to 1,600°F, fusing the PermaGlas to the steel tank.

iCOMM™ Remote Monitoring System

For information and ordering call 1-888-WATER02 or visit www.aosmithconnect.com

Hardware

MODEL NO.	ITEM	DESCRIPTION
ICMA	iCOMM Communications Module	Main communications board required for any iCOMM installation.
IMDA	iCOMM Multi-Device Adapter	Needed if more than one water heater will be connected to the control module. Order 1 MDA for each water installed.
IABA	iCOMM Alarm Box	Accessory alarm box that includes an audible alarm and alarm light.

Note: If using wireless internet an optional wireless adapter is needed to provide wired connection to the communications module. Recommended adapter Linksys WGA600N or equivalent

iCOMM Features

- Provides remote monitoring via www.aosmithconnect.com
- E-mail and text messaging of fault conditions
- Leak detection and notification
- Graphs unit performance and operational history
- BACnet compatibility with building management systems

iCOMM Requirements

- Facility must have "always on" internet (wired or wireless)
- iCOMM compatible water heater or boiler
- Annual iCOMM subscription

Compatible Units Include:

- Cyclone® Xi
- Custom Xi (DSE models) and Gold Xi (DVE models)
- Genesis® Boilers
- VF™ Variable Fire Series Boilers

iCOMM™ Subscription (required) per iCOMM Communication Module

Note - iCOMM subscription is required to utilize any and all functions of the iCOMM remote monitoring system or the "iCOMM Elite service". (See page 5 for more information). End user responsible for paying and maintaining annual subscription. Installation and subscription service fees are net prices paid directly by the end user. No distributor discounts are applicable.

For information and ordering call
1-888-WATER02 or visit
www.aosmithconnect.com

iCOMM™ *Elite* Monitoring Service

iCOMM™ ELITE

Complete Coverage, Total Peace

What is iCOMM™ Elite?

iCOMM™ Elite utilizes the latest technology in commercial water heating to allow us to interact with, proactively manage and monitor your A. O. Smith water heaters or boilers from anywhere in the world via the Internet. With this newly redesigned industry-exclusive service, A. O. Smith can monitor your water heaters around the clock, alert you instantly in case of a problem, and begin fixing any potential problems immediately. How is that for ultimate peace of mind?

Who is iCOMM Elite Designed For?

Any commercial water heater customers, ranging from small businesses with one water heater to national chain operations with thousands of locations.

Elite Compatible Units Include:

- Cyclone® Xi
- Custom Xi (DSE models) and Gold Xi (DVE models)

Valet Service on Any Warranty Claim!

Should you experience problems with any products that are still under warranty—it's time for the VIP treatment. We will do everything to get you back on track, and we mean everything. Our complete valet service includes a call before the service, handling all the logistics, repairing the product, and of course, superior service throughout the process.

Get iCOMM™ Elite in **3** Easy Steps

1. Confirm you have a compatible unit.
2. Verify that you have an Internet connection in the same room as the water heater(s).
3. Call 1-888-WATER02 to purchase and arrange installation.

iCOMM™ Subscription (required) per iCOMM Communication Module

Note - iCOMM subscription is required to utilize any and all functions of the iCOMM remote monitoring system or the "iCOMM Elite service". End user responsible for paying and maintaining annual subscription. Installation and subscription service fees are net prices paid directly by the end user. No distributor discounts are applicable.

Conservationist® BPD Gas Power Direct Vent Models

80% thermal efficiency, ideal for commercial applications and where negative air pressure is a problem

The Conservationist® BPD-75 tank-type commercial gas water heater is intended for applications such as small office buildings and duplex apartment homes. The BPD-75 features a power direct vent design with a factory-installed blower. The blower permits sealed combustion direct vent operation with separate venting and air intake runs from outside the structure. The BPD-75 offers installation versatility by allowing venting and intake runs up to 50 feet, using 3" Schedule 40 PVC pipe. The power direct vent design also eliminates the potential for performance and safety problems caused by negative air pressure, which is found in many commercial applications with inadequate indoor ventilation.

DynaClean™ II Automatic Sediment-Cleaning System

- Specially designed dip tube directs incoming cold water to create turbulence in the tank to reduce lime and sediment build-up
- Prolongs tank life, maintains high energy efficiency, maximizes hot water output

Quiet Modular Blower

- Built-in safety device prevents pilot or main burner operation if blower is not operating
- Blower has 110V/120V electrical system, with maximum 2A draw

Durable Brass Drain Valve

CSA Certified and ASME Rated T&P Relief Valve, Factory-Installed

Meets the Thermal Efficiency and Standby Loss Requirements of U. S. Department of Energy and Current Edition of ASHRAE/IESNA 90.1

Maximum Hydrostatic Working Pressure: 150 PSI

3-Year Limited Tank Warranty

All dimensions in inches

MODEL NO.	GAL. CAP.	BTU INPUT PER HOUR	FIRST HOUR DELIVERY RATING	RECOVERY			HT.	DIA.	APPROX. SHIP WEIGHT

BPD-75 Propane	75	65,000	112	148	59	42	69-5/8	26	352

Conservationist® BTF Gas Power Vent Single Flue Models

“Environmentally-Friendly” Non-CFC Foam Insulation

- Minimizes radiant heat loss.

Dip Tube

- Carries inlet water deep into tank.

Hot Surface Ignition

- Has a solid state ignition surface that does not flutter or blow out. Provides increased reliability and efficiency over spark ignition systems. Eliminates the pilot and saves energy.

Intelli-Vent™ Control

- Provides temperature control and LED diagnostics.

Glasslined Tank

- Glass specifically developed by A. O. Smith for water heaters is permanently fused to steel at 1600°F, providing years of corrosion protection and dependable use.

Anode

- Tank-mounted, screw-in replaceable anode for longer tank life.

High Input

- 80,000 BTU input assures plenty of hot water is available by providing faster recovery rates and higher first hour draws.

Burner

- High input, multiport burner for improved combustion efficiency and low NOx.

Turbo Shot™ Combustion System

- Air is precisely drawn through the combustion control port and exhausted through plastic pipe. Controlling the airflow through the heater enhances and regulates the combustion process. In standby mode, the combustion control port restricts air circulation through the heater.

Power Venting

- Provides more venting flexibility and savings. A new quiet blower allows exhaust venting through the roof or sidewall with plastic pipe such as PVC, CPVC, and ABS. Allowable vent lengths of up to 100 equivalent feet make installation easy in any situation. BTF-80 is a Category 3 (positive pressure non-condensing) appliance.

Conservationist® BT Gas Models

80% thermal efficiency, ideal for many commercial applications

Conservationist® BT models provide reliable, efficient service for applications such as office buildings and duplex/fourplex apartment homes.

CoreGard™ Anode Rod

- Stainless steel core won't corrode, won't break away

PermaGlas® Glass Lining

- Glass lining and anode rod protect steel tank from corrosion

Fully Automatic Controls

- Includes automatic safety shutoff gas if pilot is extinguished and high temperature energy cutoff (ECO)

Compact Design

- Smaller diameters and shorter heights for greater installation flexibility

Plastic Leg Construction

- Three-leg design

Piezo Ignitor

- Natural gas models only

Burner Head Mounted Pilot

- Natural gas models only

CSA Certified and ASME Rated T&P Relief Valve, Factory-Installed

Meets the Thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

80% Thermal Efficiency, ideal for applications requiring Low NOx

Induced Draft Low NOx BTN Gas Models

Conservationist® BTN models are equipped with a blower that produces a power-induced draft of make-up air prior to burner ignition.

Complies with SCAQMD Rule 1146.2 and other Air Quality Management Districts with Similar Requirements*

Category 1 Appliance

- Can be commonly vented with other Category 1 appliances and uses standard metal single-wall type "B" vent, connected directly to blower outlet

Factory-Mounted, Pre-Wired Blower

- With 6-foot power cord, provides pre-ignition draft

PermaGlas® Glasslined Tank

- Glass lining and anode rod protect steel tank from corrosion

Intelli-Vent™ Gas Control Valve

- Advanced electronic valve features polarity sensing to help ensure proper operation
- Easy-to-understand diagnostics and a nearly indestructible hot surface ignitor

Certified For Use On Combustible Flooring

Handhole Clean Out

- Allows easy maintenance

BTR Gas Models

80% thermal efficiency, self-cleaning,
easy to install

The Master-Fit® BTR series provides outstanding performance and maximum installation flexibility for both new construction and replacement applications. Each unit is designed to be as much as a foot shorter than the models they usually replace, and multiple options for placement of water connections and low installation clearances are additional installer-friendly features.

The Eliminator™ Self-Cleaning System

As deposits of lime and other sediments accumulate inside the tank, they form a barrier between the burner and the water, concentrating heat around the critical weld areas. The result is reduced energy efficiency, higher operating costs, and a greater risk of premature tank leaks. The Eliminator™ directs incoming cold water under pressure to sweep the bottom of the tank to keep sediment moving so it doesn't accumulate. Reduced sediment build-up helps maintain rated thermal efficiency and reduce water heating costs. The self-cleaning system also helps prolong tank life to ensure year after year of reliable service.

Factory-Installed Draft Diverter And Flue Damper

- Low-profile draft diverter helps for installation in tight spaces
- Automatic motorized flue damper helps minimize standby heat loss

Three Water Connection Options

- Hot and cold water connections can be made through front, top or rear of unit
- The Eliminator™ system operates when cold water is connected through front

PermaGlas® Ultra Coat™ Glasslining

- Exclusive process provides superior protection against corrosion
- CoreGard™ anode rods with stainless steel core provide additional corrosion protection

Optional Power Vent Kit Systems

- BTR 120-200 pln 9005381205
- BTR 250-500 pln 9003434205

Intermittent Electronic Ignition

- Eliminates standing pilot, saves energy
- Includes power ON/OFF switch
- Provides flame failure response in less than one second

Meets the Thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

CSA Certified and ASME Rated T&P Relief Valve, Factory-Installed

Maximum Hydrostatic Working Pressure: 160 PSI

Fully Automatic Control System

- Manual-reset gas shutoff device prevents excessive water temperature
- Electric temperature control for precise temperature regulation adjustable 120°F–180°F
- Gas pressure regulator and pilot filter

Handhole Clean Out

- Allows easy access to tank interior for cleaning

3-Year Limited Tank Warranty

5-Year Limited Tank Warranty
Optional

Master-Fit®

80% thermal efficiency, ideal for restaurant applications

BTR Gas Models Including Booster Models

The Master-Fit® BTR-151 and BTR-201 are designed for installation in “booster” applications to supply commercial dishwashers with very high temperature water. A booster water heater is normally used in conjunction with a standard water heater delivering hot water at a lower temperature to meet the non-dishwashing needs of a restaurant or other food service application. With 32 gallons stored, these compact units measure only 45” high, and hot and cold water connections can be made in the top, front or rear for installation versatility.

The Features Of The Master-Fit BTR Plus Booster Models:

Built-In Induced Draft Blower

- Produces power-induced draft of make-up air prior to burner ignition
- Provides more efficient control of heat through the flue collector
- No draft hood or barometric damper required

Rated As Category 1 Appliance

- Can be commonly vented with other Category 1 appliances, using standard metal type “B” vent

Meets the Thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

All dimensions in inches

*BTR-250(A), BTR-251(A) and BTR-275(A) models shipped with a 8” to 6” vent reducer.

Certified for both 6” or 8” vent.
**Height to top of vent connection.

Induced Draft BTN Gas Models

80% thermal efficiency—
Low NOx

ASME
(Optional)

Complies with
SCAQMD
Rule 1146.2

The Master-Fit® Plus BTN series meets Southern California and Texas low NOx standards and features induced-draft design. This provides more efficient control of heat through the flue collector. Like all Master-Fit water heaters, the BTN series provides outstanding performance and maximum installation flexibility for both new construction and replacement applications. Each unit is designed to be as much as a foot shorter than the models they usually replace, and multiple options for placement of water connections and low installation clearances are additional installer-friendly features.

The Eliminator™ Self-Cleaning System

As deposits of lime and other sediments accumulate inside the tank, they form a barrier between the burner and the water, concentrating heat around the critical weld areas. The result is reduced energy efficiency, higher operating costs, and a greater risk of premature tank leaks.

The Eliminator™ directs incoming cold water under pressure to sweep the bottom of the tank to keep sediment moving so it doesn't accumulate. Reduced sediment build-up helps maintain rated thermal efficiency and reduce water heating costs. The self-cleaning system also helps prolong tank life to ensure year after year of reliable service.

Built-In Induced Draft Blower

- Factory-mounted on top of unit and pre-wired for easy installation
- Provides power-induced draft of combustion make-up air prior to burner ignition
- Requires no draft hood or barometric damper

Rated As Category 1 Appliance

- An excellent option for retrofit and upgrade installations
- Uses standard metal single-wall type "B" vent, can be commonly vented with other Category 1 appliances
- Vent connects directly to blower outlet

Three Water Connection Options

- Hot and cold water connections can be made through front, top or rear of unit
- The Eliminator™ system operates when cold water is connected through front

PermaGlas® Ultra Coat™ Glass Lining

- Exclusive process provides superior protection against corrosion
- CoreGard™ anode rods with stainless steel core provide additional corrosion protection

Compliance

- Meets the Thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1
- Complies with SCAQMD Rule 1146.2 and other Air Quality Management Districts with similar requirements for low NOx emissions+

Control With Silicon Nitride Hot Surface Ignitor

- Digital solid-state diagnostic control system helps make installation and troubleshooting easy
- Digital Temperature Control adjusts thermostat setting from 120°F to 180°F, accurate to within $\pm 2^\circ\text{F}$
- Control includes Power On/Standby Indicator, ECO Open Indicator, Reset Status Indicator and Heating Mode Indicator
- Silicon nitride ignitor is rugged and dependable, equipped with separate flame prover rod
- Manual-reset gas shutoff device prevents excessive water temperature

CSA Certified and ASME Rated T&P Relief Valve, Factory-Installed

Intermittent Electronic Ignition With Solid-State Ignition Control

- Eliminates standing pilot, saves energy
- Includes power ON/OFF switch
- Provides flame failure response in less than one second

Maximum Hydrostatic Working Pressure: 160 PSI

Handhole Clean-Out

- Allows easy access to tank interior for cleaning

Plug Kits

- Pipe nipples and caps included to plug unused water connections

3-Year Limited Tank warranty

5-Year Limited Tank Warranty Optional

*Models meet 82% TE Utility Rebate.

BTN-199C models for sale in California only.

+After January 1, 2012, Models will no longer comply with SCAQMD Rule 1146.2 requirements for low NOx emissions.

Master-Fit
Plus

Cyclone® Xi BTH and BTX Gas Models

Up to 96% thermal efficiency, venting flexibility, outstanding value

The A. O. Smith Cyclone Xi is the industry's most technologically advanced commercial water heater. The BTH-300, BTH-400 and BTH-500 models take Cyclone Xi performance to the highest levels, with up to 96% thermal efficiency, a 130-gallon storage tank, and inputs of 300,000, 400,000 and 500,00 BTU. For high-demand applications, 2, 3 or 4 Cyclone units can be installed in a manifold configuration, delivering total storage up to 520 gallons and total input up to 2 million BTU. Cyclone Xi provides outstanding hot water output, with dramatic savings on operating costs compared to units with standard 80% efficiency. A. O. Smith's leading-edge engineering delivers conventional power vent or sealed combustion power direct vent versatility, low NOx emissions, and excellent space-saving characteristics.

Submerged Combustion Chamber, With Helical Heat Exchanger Coil

- Positioned in center of tank, surrounded by water to virtually eliminate radiant heat loss from chamber
- Spiral heat exchanger maximizes efficiency of heat transfer to the water stored in the tank
- Top mounted burner and spiral heat exchanger work together to minimize harmful effects of calcium/lime accumulation

PermaGlas® Ultra Coat™ Glass Lining

- Exclusive process provides superior protection against corrosion in varying water conditions
- Powered Anodes are of permanent design and do not require replacement unless damaged
- Both sides of heat exchanger coil are glasslined for protection against flue gas condensate inside coil

Advanced Electronic Control System with LCD Display

- iCOMM™ Compatible and can be monitored from remote locations. Call 1.888.WATER02 for more information
- Provides detailed water heater status information
- Precise temperature control
- Built-in diagnostics
- Run history information

Various Venting Options

- Conventional and sealed-combustion power venting (vertical or sidewall) allows for various venting options (See instruction manual for complete venting installation instructions and allowable venting lengths)
- Direct vent intake and exhaust pipe can terminate separately outside building or through single opening using concentric vent assembly
- Uses inexpensive PVC, CPVC or ABS pipe for venting

Compliance

- Meets the Thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

(models 120, 150, 199 & 250)

(models 300, 400 & 500)

Unrivalled Venting Versatility

The Cyclone Xi features power-vent and power direct vent design, allowing combustion air to be drawn from the equipment room conventionally or directly from the outdoor atmosphere through a sealed intake air pipe. Vent systems can be terminated vertically through the ceiling or horizontally through a sidewall.

Space-Saving Design For Installation Flexibility

- Top cover has rear cut-away for easy access to serviceable parts
- 0" installation clearances on sides and rear, 2" installation clearance on top, 4" alcove installation clearance in front of unit
- 0" clearance to combustibles (walls, floors, etc.)

Powered Anodes (Excluding BTX-100 Models)

- No maintenance required
- Superior tank protection
- Adjusts to water conditions

Revolutionary Heat Exchanger And Burner Systems

The internal helical heat exchanger keeps the hot flue gasses inside the heater longer, producing an extra-high rate of heat transfer, resulting in higher thermal efficiency. All Cyclone Xi models employ an ingenious top-mounted down-fire pre-mix burner, resulting in even higher efficiencies.

Cyclone® HE BTX-80

76,000 BTU, 90%
thermal efficiency

The 50-gallon power vent Cyclone HE is designed to produce more hot water than any commercial gas water heater in its class. Thanks to the internal helical heat exchanger—similar to the design of the industry-leading Cyclone Xi models—the unit achieves 90% thermal efficiency. With its small footprint and easy installation, Cyclone HE delivers heavy-duty performance for numerous light-duty smaller applications, making it a perfect choice for restaurants, offices and other applications.

Helical Coil Heat Exchanger

- Submerged heat exchanger provides much greater heat transfer surface than standard straight flue tube
- Produces 90% thermal efficiency, which saves money on operating costs, and increases hot water output compared to standard-efficiency water heaters

Versatile Power Vent Design

- System allows combined vertical and horizontal vent runs, using 2 or 3" PVC, ABS or CPVC pipe

Modular Blower

- A condensate drain supplied to connect heat exchanger outlet to blower
- PVC Vent Attenuation Assembly (VAA) supplied for applications where extra-quiet operating environment is essential

High Output With Small Footprint

- 22" diameter, combined with 90% efficiency, 76,000 BTU input means Cyclone HE can be installed in less space than a larger 75-gallon unit with equal or better performance

PermaGlas® Ultra Coat™ Glass Lining

- A. O. Smith exclusive process provides superior protection against corrosion
- Protects all interior tank surfaces including inside and outside of helical heat exchanger

Intelli-Vent™ Gas Control

- Equipped with long-lasting silicon nitride hot surface ignitor—no standing pilot
- Advanced electronics for more precise control of water temperature and simplified system diagnostics
- 180°F maximum temperature setting

Side-Mounted Hot And Cold Recirculating Taps

- Allows Cyclone HE to be installed as part of combination space heating/water heating applications, or any system requiring a recirculating hot water loop
- Plugs for the recirculating taps are factory installed

Two Heavy-Duty Anode Rods

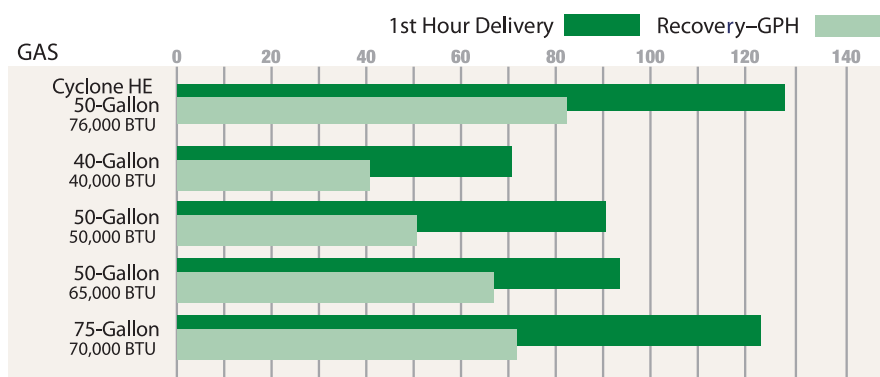

- Provide advanced protection against corrosion

Intelli-Vent™ is a Registered Trademark of Emerson Electric Company

Superior Heat Transfer

By utilizing the innovative internal heat exchanger coil, the Cyclone HE provides superior heat transfer characteristics, resulting in an unprecedented 90% thermal efficiency, far beyond a standard water heater design. Gallon for gallon, the Cyclone HE will heat water for significantly less, resulting in substantial savings on energy costs.

With as much power as larger water heaters in a standard 50-gallon footprint, the Cyclone HE is the natural choice for upgrading during a renovation. And the versatile power vent design allows combined vertical and horizontal vent runs of up to 128 equivalent feet. Cyclone HE provides superior savings on energy costs.

The classic Cyclone helical heat exchanger coil delivers 90% thermal efficiency.

SUGGESTED SPECIFICATION

Natural gas water heater shall be A. O. Smith Cyclone, HE model # BTX-80, with 90% thermal efficiency, a storage capacity of 50 gallons, an input rating of 76,000 BTU per hour, a recovery rating of 83 gallons per hour at 100°F rise and a maximum hydrostatic working pressure of 150 PSI. Water heater(s) shall be of power vent design, using 2 or 3" PVC pipe for horizontal and/or vertical vent runs.

Conservationist® Large-Volume Power Burner BTP & BTPN Gas Models

BTP-150-140 through BTP-600-2500
BTPN 150-300 through BTPN-600-2500

ASME

Complies with
SCAQMD
Rule 1146.2
California and Texas
(BTPN
Models only)

The Conservationist® high-volume power burner line includes the largest, most powerful A. O. Smith tank-type gas water heaters. With tank capacities up to 600 gallons and firing capacities up to 2.5 million BTU per hour, these large-volume high-output water heaters are capable of producing over 3,000 gallons (GPH) of hot water per hour at an 80°F rise. These heavy-duty industrial-grade water heaters are designed and built to handle the most demanding hot water heating requirements of large commercial and industrial users.

Power Gas Burner

- Suitable for natural or propane gas
- Electronic flame safeguard control with intermittent spark ignition
- Main and pilot automatic gas valves with gas pressure regulators
- Diaphragm air switch for proof of blower operation
- Flame inspection port

Fully Automatic Controls With Safety Shutoff

- High-temperature limit control (manual reset)
- CSA Certified and ASME Rated T&P Relief Valve
- Hinged-door control compartment for easy access
- Upper and lower thermostats for accurate temperature control
- Standard control is for 120°F-180°F water service
- Factory-installed low-water cutoff

Blue Diamond® Glass Lining

- Blue Diamond glass coating provides superior corrosion resistance compared to the industry-standard glass lining
- Equipped with multiple anode rods for additional corrosion protection

Heavy-Duty Jacket

- Heavy-gauge steel jacket with baked powder-coated finish for durability
- Two 3" handhole inspection openings

Maximum Hydrostatic Working Pressure

- All models: 160 PSI

Professional Start-Up Service Included

- Required for activating warranty and assuring quality performance

Codes And Standards

- Design-certified by UL (Underwriters Laboratories), according to ANSI Z21.10 standards
- Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1

Optional Low NOx Burners

- Low NOx burners from 300,000 BTUH up to 2 million BTUH
- Comply with SCAQMD Rule 1146.2 and other Air Quality Management Districts with Similar Requirements for low NOx emissions*

Conservationist® Large-Volume Power Burner BTP & BTPN Gas Models

Conservationist® BTP Options:

- Factory-approved mutual control arrangement
- 5 or 10-year extended limited warranty
- High or low water pressure switch
- AGA-rated T&P valve
- Modular graphic burner systems management on heaters with 270,000 BTU input and over
- Low NOx burner available on select models

Three-Year Limited Tank Warranty

- For complete information, consult written warranty or contact A. O. Smith

Other Conservationist® BTP Features:

- Two layers of high-temperature ceramic fiber insulation in combustion chamber
- Flame inspection port opening
- Mounted on rugged channel iron skids
- National board stamping
- ASME-rated temperature and pressure gauge
- Low-water cutoff
- Barometric draft regulator
- 120V control circuit
- Drain valve
- 180°F water service thermostats

†Models with an (N) are available in low NOx (include the "N" in the model number when ordering).

*After January 1, 2012, Models will not meet SCAQMD Rule 1146.2 requirements for low NOx emissions.

Power Burner Water Heaters Conservationist® Models

Power burner models provide thermal efficiencies of 80%

These gas power burner models provide an outstanding thermal efficiency of 80% or more and are suitable for commercial applications.

ASME

Standard on BTPN-140 thru 500, 540, 650 & 700 models

Complies with SCAQMD Rule 1146.2

(BTPN & BTPV Models only)

Small Volume BTP Quality Features:

- UL listed power burner
- ASME construction
- CSA Certified and ASME rated T&P relief valve
- Handhole cleanout(s) for easy maintenance
- Three-year limited tank warranty
- Fully automatic controls ensure safe, efficient operation
- Barometric draft damper ensures correct airflow in the vent
- Factory Start-up Included, required for activating warranty and assuring quality performance
- Mounted on rugged channel iron skids for easy transport during installation
- Multiple anodes for extra protection against tank corrosion
- Flame inspection port opening for visual inspection of flame characteristics during operation
- Spark pilot ignition
- Factory-installed burner for easy installation
- Complies with SCAQMD rule 1146.2 and other Air Quality Management Districts with similar requirements for low NOx emissions
- Meets the Thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1
- Contact Canadian customer service for availability in Canada
- 3-year limited tank warranty

Options (Not Available On All Models)

- 5-year limited tank warranty
- 3 vent options: atmospheric, sidewall and direct vent

Shown here is the power burner combustion chamber used in the BTP-540A, BTP-650A & BTP-740A models. These models can vent through a side wall up to 100 ft. without an external blower.

1. **Exclusive PermaGlas® Ultra Coat™ Glasslined Tank** protects tank surfaces and all welds from the corrosive effects of hot water.
2. **Proylite 3100 Chamber Wall** retains heat, ensuring cool operation and maximum heat transfer to water, not the room.
3. **Premix Combustion System** provides super clean low-NOx flame. Helps eliminate hot spots and uneven heat transfer.
4. **Sealed Combustion Chamber** reduces heat loss.

COF models provide thermal efficiencies of 80%

Conservationist® Duraclad Oil-Fired Small Volume Models

Our Duraclad COF-199 and larger models have an optional two-stage pump for use with below-grade oil storage tanks. Features include two handhole clean-outs for easy servicing. The large volume COBT models are available as a dual-fuel heater—natural gas as well as oil-fired.

Small Volume COF Quality Features:

- For small to medium-sized applications
- UL listed oil burner
- 180°F adjustable thermostat
- Single-stage oil pump for simple, efficient operation.
- Solenoid oil valve (standard on 455, 700)
- 3/4" drain valve
- CSA Certified and ASME rated T&P relief valve
- Two handhole clean-outs (COF-385 and larger, and ASME models) for easy maintenance.
- Barometric draft regulator provided for proper operation, ensures correct flow in the vent
- Foam insulation
- Intermittent ignition
- CoreGard™ anode rod with stainless steel core won't corrode, won't break off
- Flame observation port
- PermaGlas® glasslined tank with 160 PSI maximum working pressure
- 3-year limited tank warranty

Options

- Two-stage pump for use with underground oil storage tanks
- Oil solenoid safety valve
- ASME construction available on models COF-315 and larger
- 5-year limited tank warranty

ASME

Available on COF-315 and higher

Heavy-Duty Oil-Fired COF/COBT Models

Large Volume High Output Oil and Dual Fuel Water Heaters

Conservationist® COF models offer oil fuel burners (No. 1 or 2 oil). COBT models feature combination gas/oil powered burners for the versatility of operating with natural gas/propane and No. 1 or 2 oil. Conservationist COF/COBT models include some of the largest and most powerful A. O. Smith tank-type water heating systems available – with storage/input options up to 600 gallons/2,500,000 BTU/hour and recoveries as high as 2,424 gallons/hour at 100°F rise. All models feature fully automatic controls with safety shutoff, two thermostats (upper and lower) for accurate temperature control, and ASME tank construction.

COF (Oil-Fired Models)

- Use either No. 1 or 2 fuel oil
- 3450 rpm motor
- Multi-annular fuel containment combustor head
- Oil ignition transformer
- Integral 2-stage fuel unit and oil safety valve

COBT (Combination Gas/Oil-Fired Models)

- Use either natural gas or propane and No. 1 or 2 fuel oil
- 3450 rpm motor
- Multi-annular fuel containment combustor head
- Gas/electric pilot and gas ignition transformer
- Pilot and main pressure regulators
- Air safety switch
- Manual fuel-selector switch
- Integral two-stage fuel unit

Fully Automatic Controls With Safety Shutoff

- High temperature limit control (manual reset)
- CSA Certified and ASME rated T&P relief valve
- Hinged-door control compartment for easy access
- Upper and lower thermostats for accurate temperature control

Blue Diamond® Glass Lining

- Blue Diamond coating provides superior corrosion resistance compared to industry-standard glass lining
- Equipped with multiple anode rods for additional corrosion protection

Heavy-Duty Jacket

- Heavy gauge steel jacket with baked powder-coated finish for durability
- Two 3" handhole inspection openings

Maximum Hydrostatic Working Pressures

- All COF and COBT models: 160 PSI

Compliance

- Meets the Thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

Professional Start-Up Service Included

- Required for activating warranty and assuring quality performance

Two Layers Of High Temperature Ceramic Fiber Insulation In Combustion Chamber

Flame Inspection Port Opening

Mounted On Rugged Channel Iron Skids

ASME Stamping

Low-Water Cutoff

3-Year Tank Limited Warranty

Conservationist COF/COBT Options

- Factory mutual approved control arrangement
- 5-year or 10-year extended limited warranty
- High or low water pressure switch
- 180°F water service thermostats
- CSA certified and ASME rated T&P relief valve
- Modular graphic burner systems management on heaters with 270,000 BTU input and greater

Air-to-Water Electric Heat Pump AWH Series

Electric Heat Pumps

Air-to-Water heat pump water heaters remove unwanted heat and humidity from the surrounding air and use it to heat water. The refrigeration-based system produces cool, dehumidified air for spot cooling or to reduce the load on air conditioning system.

Air-to-Water Heat Pump Water Heater Options:

- High Efficiency water heating
- "Environmentally-Friendly" Green Technology uses non-ozone depleting R-134a refrigerant
- Simplified Installation
- Efficient Scroll Compressor
- Coefficient of Performance (COP) between 3.9 and 4.2 for water heating
- Standard 208/230 VAC, 3 phase power (optional 460 VAC, 3 phase)
- Sanitary hot water for commercial or industrial uses
- Maximum 140°F final tank temperature at common indoor temps

Accessories Include:

- Digital Temp Controller with Tank Probe
- Metal Mesh Cleanable Filter
- Corrosive Duty Package; 316 stainless steel cabinet polyurethane coated evaporator coil and blower housing. Recommended for coastal areas.

*Performance rating at 75° F, 55% Relative Humidity and 100° incoming water temperature

**Blower design at 0.3" external static pressure

C.O.P. coefficient of performance

All models standard 208/230V, 3-phase, 60 Hz

Optional 460v 3ph 60Hz

Optional 240v 1ph 60Hz (available on AWH-35 and AWH-55 only)

DEN/DEL Electric Dura-Power™ Models

The Dura-Power™ DEN (standard upright) and DEL (lowboy) series is available with tank capacities from 6 through 119-gallons. They can be installed for non-simultaneous and single element operation (maximum input up to 6 KW), or for simultaneous dual-element operation (maximum input up to 12 KW).

Zinc-Plated Copper Sheath Heating Elements Standard

- Medium-watt density design disperses element temperature over larger surface contact area to minimize scale build-up, maximize efficiency and prolong element life
- Element options from 1.5 kW to 6 kW (non-simultaneous or simultaneous operation), recovers from 6 GPH to 49 GPH at 100°F rise

Standard Voltages For Easy Installation

- 120V, 277V single-phase, and 208V, 240V and 480V unbalanced 3-phase delta
- Easily converted to single-phase at terminal block (except for 208V with 6000W elements)
- Single-element heater, single-phase only (see chart for dual-element options)

Factory-Installed Terminal Block

- Provide electrical service to heater and connect to block (not supplied on 120V and 277V models)

Factory-Wired Controls

- Temperature control (adjustable from 110°F to 170°F on single element; 120°F to 180°F on dual-element models)
- Manual reset high temperature cutoff per element (dual-element models)
- Factory-wired for non-simultaneous operation; easily converted to simultaneous operation (3-phase models only)

Glasslined Tank

- Provides long-lasting protection against corrosion
- Equipped with anode rod for additional protection against corrosion

Compliance

- Meets the standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

Maximum Hydrostatic Working Pressure: 150 PSI

3-Year Limited Tank Warranty

- 5-year limited tank warranty optional

DRE/DVE Electric Gold and Gold Xi

Gold and Gold Xi DRE/DVE series available with 50, 80, and 119 gallon storage tanks, with input choices ranging from 6 kW to 54 kW. They can be used as recovery heaters for hot water supply service or as boosters for supplying sanitizing rinse water for dish washing.

Goldenrod® 24k gold-plated Elements Standard

- Superior scaling resistance, resulting in long term efficiency and damage protection
- Element sizes from 2 kW to 6 kW using 3, 6 or 9 elements provide input options from 6 kW to 54 kW, recovers from 25 GPH to 221 GPH at 100°F rise

Power Circuit Fusing For System Protection

- Safeguards elements and contactors from short circuits, overloading and line surges
- Meets National Electrical Code requirements that non-ASME tanks must have internal fusing when current draw exceeds 48 amps

208, 240 and 480V Options For Easy Installation

- Single-phase and 3-phase delta
- Field-convertible voltages 3-phase to single-phase (and vice versa) except for 208V/54 kW
- 277V single-phase also available

Factory-Installed Terminal Block

- Provide electrical service to heater and connect to block

Heavy-Duty Magnetic Contactors (DVE Models Only)

- UL-rated 100,000 cycles

Other Standard DRE/DVE Features

- Two anode rods for maximum corrosion protection
- Simplified circuitry, color coded for ease of service

- Bonderized undercoated baked enamel finished cabinets
- Brass Drain Valve
- CSA/ASME temperature and pressure relief valve

DRE Gold Model Controls

- DRE Gold models have surface mount temperature controls adjustable 120° to 180°F.
- Manual reset high-temperature cutoff

DVE Gold Xi Model Features

Advanced Electronic Controls

- iCOMM™ Compatible and can be monitored from remote locations. Call 1.888.WATER02 for more information.
- Plain English text and animated icons.
- Displays detailed operational and diagnostic information
- Fault or alert messages appear if an operational issue occurs
- Last 9 fault and alert messages saved with time stamp.

Economy Mode Operation

- Control system automatically lowers the operating set point by a programmed value during user-defined time periods
- Helps reduce operating costs during unoccupied or low demand periods

Precise Temperature Regulation

- Operating Set Point adjustable 90° to 190°F

- Banks of heating elements (3 elements per bank) are energized according to adjustable (1° to 20°) differential set points for each bank. Helps reduce short cycling and operating costs by matching kW output to load conditions
- Linear sequencing - first bank on is last bank off
- Helps reduce current surge/spikes and avoid peak demand charges
- Helps reduce operating costs during low load conditions
- Manual reset high-temperature cutoff

Compliance

- Meets the standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

3-Year Limited Tank Warranty

- 5-year limited tank warranty optional

ASME (Optional)

Heavy-Duty Custom Xi Electric DSE Models

The heavy-duty Custom Xi DSE series is available with storage capacities from 5 to 119 gallons. All tanks feature ASME tank construction. With input choices as high as 90 kW on 50 through 119 gallon models, the DSE Custom Xi series can be used for maximum-demand hot water supply service or as boosters for supplying sanitizing rinse water for dish washing.

Incoloy Sheath Heating Elements Standard

- Industrial-grade Incoloy sheathed heating elements are designed for rugged long-lasting commercial service, and can withstand sheath temperatures up to 1500°F
- Each heating element has three separate heating loops, which provides more heating surface, lower watt density and maximum recovery efficiency
- Prewired leads provide excellent protection against oxidation and scaling
- Input options from 3 kW to 90 kW, recoveries from 12 GPH to 369 GPH at 100°F rise

Standard Voltages For Easy Installation

- Single-phase and 3-phase
- Single-phase 208V and 240V are field-convertible to 3-phase
- All 208V and 240V at 24 kW and below are supplied as phase-convertible units (single-to 3-phase and vice versa)
- 277V single-phase also available (Contact A. O. Smith for 120V circuit availability)
- International voltages also available (check with factory)

Factory-Installed Terminal Block (units with more than one contactor)

Advanced Electronic Controls

- iCOMM™ Compatible and can be monitored from remote locations. Call 1.888.WATER02 for more information.
- Plain English text and animated icons
- Displays detailed operational and diagnostic information
- Fault or alert messages appear if an operational issue occurs.
- Last 9 fault and alert messages saved with time stamp.

Progressive Sequencing

- First heating element on is first heating element off.
- First heating element energized is rotated with each successive heating cycle on models with multiple heating elements.
- Evens out wear between heating elements.

Economy Mode Operation

- Control system automatically lowers the operating set point by a programmed value during user-defined time periods.
- Helps reduce operating costs during unoccupied or low demand periods

Precise Temperature Regulation

- Operating Set Point adjustable 90° to 190°F.
- Sequencing - Units with multiple element contactors are sequenced on with one second delay between stages. Adjustable modulating mode is optional.
- Helps reduce current surges/spikes and avoid peak demand charges.
- Manual reset high temperature cutoff.

Heavy-Duty Magnetic Contactors

Power Circuit Fusing For System Protection

Glasslined Tank, with ASME Construction

CSA Certified and ASME Rated T&P Relief Valve

Compliance

- Meets the standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

Brass Drain Valve

3-Year Limited Tank Warranty

- 5-year limited tank warranty optional

ASME

Optional Goldenrod® 24-carat gold-plated elements resist lime scale adhesion and sheath temperatures up to 1500° F.

Heavy-Duty CMC/SU Booster Electric Dura-Power™ Models

The Dura-Power™ commercial electric water heaters are designed to boost the water temperatures for applications such as commercial dishwashers, which require very high temperature sanitizing rinse...typically 180°F. Both 5-gallon countermount CMC models and 20-gallon SU models are available with inputs up to 54 kW. All models are also available with an optional stainless steel tank, for use with deionized water.

Incoloy-Sheath Heating Elements Standard

- Industrial-grade Incoloy sheathed heating elements are designed for rugged long-lasting commercial service and can withstand sheath temperatures up to 1500°F
- Each heating element has three separate heating loops, which provides more heating surface, lower watt density and maximum recovery efficiency
- Pre-wired leads provide excellent protection against oxidation and scaling
- Input options from 6 kW to 54 kW recovers from 62 GPH to 554 GPH at 40°F rise
- Deionized models equipped with stainless steel standard elements

A. O. Smith Goldenrod® Elements Optional

- Patent-pending 24K gold-plated sheath plus medium-watt density ensures even longer element life
- 600% higher resistance to scale build-up, compared to Incoloy elements
- Three-year warranty against failure due to lime scale build-up
- Not available on deionized models

Standard Voltages For Easy Installation

- Single-phase and 3-phase
- Single-phase 208V and 240V are field-convertible to 3-phase
- CMC models only, 208V and 240V at 24kW and below are supplied as phase-convertible units (single- to 3-phase and vice versa)
- 277V single-phase also available (Contact A. O. Smith for 120V circuit availability)

Immersion Thermostat For Efficient Control

- Close differential, immersion-type thermostat for superbly accurate temperature control
- Adjustable from 140°F to 185°F
- Manual reset, high-temperature cut-off

Power Circuit Fusing For System Protection

- Safeguards elements and contactors from short circuits, overloading and line surges
- Required by National Electric Code and UL when current draw exceeds 120A

Heavy-Duty Magnetic Contactors

- UL-rated 100,000 cycles

Factory-Wired 120V Circuit Controls

- 120V control circuit powered by fused transformer
- Eliminates need for 120V service connection

Compliance

- Meets the standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

ASME

Optional Goldenrod® 24-carat gold-plated elements resist lime scale adhesion and sheath temperatures up to 1500°F.

*CMC-54 and SU-54 have three immersion heaters.

Heavy-Duty Premium Electric DVE/DHE Dura-Power™ Models

ASME

Optional Goldenrod®
24-carat gold-plated
elements resist lime
scale adhesion and
sheath temperatures
up to 1500° F.

Dura-Power™ commercial electric water heaters are built to the same high-quality standards as our gas models. These are the largest commercial electric's we manufacture. Ideal for use as recovery heaters for all types of large commercial and industrial applications or for large process potable hot water requirements. They can be customized to meet any special application with the large selection of available options.

Advanced Electronic Control (All Models 150 kW and Down)

A. O. Smith's new propriety electronic water heater control, provides precise + or - 1°F temperature control, that is ideal for industrial and food service applications where exact temperatures of hot water are needed.

- **Plain Text** – Animated icons display detailed operational and diagnostic information. Fault or Alert messages appear if an operational issue occurs.
- **Low Water Cut Off** – Factory standard on board low water cut-off uses a remote electronic immersion type probe to prevent energizing of the elements in the event of low water condition and eliminates accidental dry firing.
- **Progressive Modulating (only available on units 150 kW or less)** – Sizes the input of available elements to match current load conditions. Rotates and lead lags element loads to provide long life and equal wear.
- **Economy Mode Operation (only available on units 150 kW or less)** – Control system automatically lowers the operating set point by a programmed value during user defined time periods. Seven-day clock may be programmed for night set back and or weekend shutdown to reduce operating cost and save money.
- **iCOMM™ Compatible** – Units can be monitored from remote locations. Call 1.888.WATER02 for more information. Note: Up to 150 kW only. Units above 150 kW use analog controls.

Solid State Modulating Step Control (All Models 180 kW and up)

- Solid state electronic control device that modulates input to match load through progressive sequencing of steps (up to 20 steps with maximum of one per contactor).

Glasslined Tank

- Tank interior is coated with glass specially developed for use in water heaters. Tanks rated at 125 psi working pressure; 150 psi or 160 psi working pressure is optional. Vermin proof fiber glass insulation reduces costly heat loss. Constructed to Section IV of ASME code, and UL standards. Tanks have channel skid base. A 4" x 6" handhole is furnished on 500, 600 and 700-gallon models; 11" x 15" manhole is furnished on 800-gallon and larger sizes.

Incoloy Immersion Heaters

- Heavy-duty medium watt density elements (three immersion heater) have incoloy sheathing; provide excellent protection against oxidation and scaling. The input ranges from 15kW to 3000kW.

Fusing

- Control and power circuit fusing to meet N.E.C.

Compliance

- Meets the standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1.

Magnetic Contactor(s)

- Heavy duty UL rated for 100,000 cycles.

Other Standard Features

- Color-coded circuitry for easier servicing
- Anode rods for maximum corrosion protection
- Standard voltages include 208, 240, 480, 600 volt single or three-phase.
- For other voltages consult factory.
- Factory-installed terminal block(s)
- Cabinet has baked enamel finish
- Rewired element terminal leads
- Temperature and pressure relief valve
- 2" dial temperature gauge

Optional Dual-Energy Source Capability

- Provides emergency back up energy source or winter/summer boiler operation. Can be specified with optional water to water or steam to water heat exchangers. Both single and double wall heat exchangers are available. Complete control packages can be factory-installed for hook up and run capability.

Limited Warranty Outline

- 3-Year Limited Tank Warranty
- Optional 5-Year Limited Tank Warranty
- If the tank should leak any time during the first three years, under the terms of the warranty, A. O. Smith will repair or replace the heater; installation, labor, handling repair or replace the heater; installation, labor, handling and local delivery extra. THIS OUTLINE IS NOT A WARRANTY. For complete information, consult the written warranty or A. O. Smith Water Products Company. Warranty does not apply to product installed outside of the United States of America or its territorial possessions and Canada.

Options

■ Tank Linings

CEMENT – A special formulation of cement providing excellent corrosion protection. Available on 200-gallon and larger tanks.

EPOXY – A solventless two component epoxy lining applied to a minimum ten-mil (.010”) dry thickness. Available on 200-gallon and larger tanks.

■ **GOLDENROD® ELEMENTS** – Available with Optional Goldenrod® Elements - All DVE/DHE models are available with the Goldenrod® 24K gold plated elements (patent pending). Goldenrod® Elements provide long-life and five times the scaling resistance of standard incoloy elements. Goldenrod® Elements carry a three-year warranty against failure due to scale buildup.

■ **SPECIAL CONSTRUCTION** – Silicon Bronze Vessels are available for special applications or very corrosive water conditions. Consult factory for specific sizes.

■ **STAINLESS STEEL VESSELS** – Are available for deionized water. Built with stainless steel under rules of Section IV of the ASME Boiler and Pressure Vessel Code for operation on deionized water having a minimum specific resistivity of 10 megohm/cm.

■ **150 OR 160 PSI WORKING PRESSURE** – Must be specified at time of order.

Other Optional Features

■ **TEMPERATURE AND PRESSURE RELIEF VALVES** – For working pressures other than standard; consult factory.

■ **HORIZONTAL OR VERTICAL** – See specifications, most gallon capacities may be obtained in vertical or horizontal construction.

■ **CIRCULATING PUMP PACKAGE** – Circulating pump and piping sized to turn over entire storage capacity of tank once each hour. Recommended to optimize available water at temperature in horizontal tanks particularly where low draw conditions are anticipated.

■ **OPTIONAL INTERNATIONAL VOLTAGES** – 380 and 415 volts three-phase.

■ **3-1/2” DIAL-TYPE PRESSURE GAUGE** – Factory-installed.

■ **3-1/2” DIAL-TYPE TEMPERATURE GAUGE** – Factory-installed.

■ **11” x 15” MANHOLE** – Available as option on tanks 700 gallons or smaller.

Control Options

■ **COPPER TUBE TANK HEATER** – Double wall copper tube tank heaters are designed for heating potable water with both potable or non-potable liquids or steam, and are specifically engineered for installation in models DVE and DHE for dual-energy applications. Tank heaters have a positive fail-safe means of leak detection in the event of either tube failure to prevent mixture of heating medium and potable water. Singlewall heat exchangers are also available.

■ **TERMINAL BLOCKS** – Allows for remote connection to building demand limiter or other functions.

■ **AUTOMATIC RESET HIGH LIMIT** – A control that in the event of high temperature, interrupts power, de-energizing elements, automatic reset. (Standard with modulating step control).

■ **INDICATING LIGHTS** – Denotes heating stage(s) in operation. Up to one light per contactor is available.

■ **OVERRIDE SWITCHES** – A simple means of load control allows all or part of unit input to be controlled manually. Up to one switch per contactor is available

■ **SAFETY DOOR INTERLOCK** – Prevents opening of control panel door when heater power supply is on. NOTE: Once door is opened heater may be energized if necessary for service diagnosis.

■ **SHUNT TRIP CIRCUIT BREAKER** – A safety device (circuit breaker) which disconnects power to heater in the event of over-current, high temperature or low water level, breaker must be manually reset.

■ **CIRCUIT BREAKER** – A safety device which disconnects power to the heater in the event of overcurrent.

Automatic Circulating Water Heaters

The A. O. Smith high efficiency condensing XP Water Heater utilizes a state-of-the-art heat exchanger and control technology to provide large volumes of hot water for demanding commercial and industrial potable hot water applications. The all stainless steel water tube heat exchanger construction allows the XP Water Heater to operate in a continuous condensing mode while maximizing longevity and delivering thermal efficiencies as high as 99% when operating in low temperature applications.

A unique multi-burner design is control sequenced and modulated to produce turndown rates of up to 20:1. Precise temperature control and accurate load matching produce smooth system operation and eliminates wasteful short cycling and temperature overshooting.

Advanced Multi-Burner, Low NOx Combustion Technology

- Venturi-mixing gas / air ratio system - works with variable speed blower to precisely mix gas and air throughout firing range
- Fully modulating capability prevents energy-stealing short cycling and provides smooth system operation with higher overall system efficiencies

Low NOx Operation

- Complies with SCAQMD Rule 1146.2 for XWH1000 through XWH2000 and Rule 1146.1 for XWH2600 and XWH3400, and other air quality management districts with similar requirements for low NOx emissions

Advanced Sola Control

- Large touch screen user interface
- Factory standard with MODBUS protocol connections
- The latest in energy saving algorithms
- Includes remote tank temperature control to adjust tank temperature at the water heater - modulates the water heater to maintain tank set point temperature within +/-1 degree
- Water heater output control features 20:1 turndown ratio on models 2 million btuh and up, 10:1 turndown ratio on models 1.7 million btuh and down

All-Bronze Factory-Mounted Pump(s)

- Integrally mounted, wired, and controlled by the water heater control
- Factory-sized for proper flow between water heater and storage tank
- Allows 50 equivalent feet of piping between water heater and tank

Multi-Pass/Multi-Burner Condensing Stainless Steel Heat Exchanger

- Utilizes leading-edge multi-pass water tube heat exchanger to maximize heat transfer
- Designed for fully condensing operation throughout the heating range
- All heating surfaces are 316L stainless steel to provide a long and trouble-free service life
- Saves both fuel and operating cost with every heating cycle
- Impervious to thermal shock

XWH Model Commercial Gas Water Heaters

A unique multi-burner design

Direct Vent Flexibility

- Direct vent up to 100 equivalent feet of pipe
- Sidewall or vertical
- Lower installation cost with approved CPVC / PVC venting material – uses CPVC for first 10 feet and PVC thereafter
- Approved for use with UL approved AL29-4C® stainless steel venting materials

Factory Start-Up Included

- Required for activating warranty and assuring maximum operating performance. Contact your local sales representative or Authorized Start-Up Agent to arrange a FREE certified start-up.

Meets the Thermal Efficiency Requirements of the U.S. Department of Energy and Current Edition ASHRAE/IESNA 90.1

Up to 96% Thermal Efficiency (AHRI Certified)

5-Year Heat Exchanger Warranty

- For complete information, consult written warranty or contact A. O. Smith

Other XP Features:

- CSA certified to the ANSI Z21.10.3- CSA 4.3 water heater standard
- Honeywell sola control with color touch screen LCD display
 - Inlet / outlet and remote tank temperature display
 - Onboard Modbus communications
 - Logs faults, run time, cycles
 - Redundant flow and low water protection - factory installed LWCO and flow switch(s)
 - Multi-burner sequencing models 2 million btuh and up have 4 burners; models 1.7 million btuh and down have 2 burners
 - Redundant ignition controls – should one burner fail remaining burners continue to heat
 - Alarm buzzer
- Remote tank temperature sensor included
- 20:1 turndown ratio on models 2 million btuh and up, 10:1 turndown ratio on models 1.7 million btuh and down
- Horizontal and vertical direct and sidewall vent options up to 100 equivalent feet of piping
- Approved for CPVC / PVC plastic vent materials
- Meets ASME CSD-1/GE gap codes – factory standard
- Direct spark ignition
- Factory-installed electrical disconnect
- All bronze factory-mounted pump(s)
- 316L stainless steel heat exchanger
- ASME 160# working pressure
- ASME rated pressure relief valve – 125 PSI

XP Options:

- ASME HLW stamped heat exchanger(s)
- Condensate neutralization kit
- Vent termination kits
- Skid mounted systems

XWH 2000	8"	321764-001
XWH 2600		
XWH 3400	10"	321764-002

Please note: When direct or sidewall venting, the water heater's CSA certification requires that only the above approved vent and combustion air intake terminations be used.

GAS PRESSURE REQUIREMENTS

MODELS (XWH)	TYPE OF GAS	MAXIMUM SUPPLY PRESSURE		MINIMUM SUPPLY PRESSURE	
		INCHES W. C.	kPa	INCHES W. C.	kPa
1000, 1300, 1700, 2000, 2500, 3400	Natural	14.0	3.49	4.0	1.0
	Propane	14.0	3.49	4.0	2.0

ELECTRICAL REQUIREMENTS

MODEL	SUPPLY VOLTAGE (VOLTS)	FREQUENCY (HZ)	CURRENT (AMPS)	ELECTRICAL NOTES:
XWH-1000	120V	60	30	A dedicated, single phase, 30/60 amp circuit breaker with a grounded neutral should be provided to supply power to the water heater.
XWH-1300	120V	60	30	
XWH-1700	120V	60	30	
XWH-2000	120V	60	60	A dedicated, single phase, 60/60 amp circuit breaker with a grounded neutral should be provided to supply power to the water heater.
XWH-2600	120V	60	60	
XWH-3400	120V	60	60	

FLOW RATE

RECOMMENDED FLOW RATES @ 0-12 GRAINS PER GALLON			
MODELS	TEMPERATURE RISE (ΔT °F)	GPM	PRESSURE LOSS IN FEET OF HEAD (P)
XWH 1000	25	70	17.5
XWH 1300	25	99	22
XWH 1700	25	129	23
XWH 2000	25	153	17.5
XWH 2600	25	198	22
XWH 3400	25	261	23

Notes: For hard water systems with water hardness greater than 12 grains per gallon, A. O. Smith recommends a water softener be installed and maintained.

The factory installed/supplied pump is sized to maintain a ΔT of 25°F through the water heater at 100% fire. In addition to the pressure loss through the water heater, the factory supplied pump is sized for an additional 50 feet of equivalent feet of piping between the water heater and a storage tank. Consult the factory for systems where the piping between the water heater and the tank exceed 50 equivalent feet.

Hydronic Heating Boilers

ASME CRN

The A. O. Smith high efficiency condensing XP Boiler utilizes a state-of-the-art heat exchanger and control technology to meet the rigorous demands of today's hydronic heating applications. The XP Boiler's all stainless steel water tube heat exchanger construction allows the XP Boiler to operate in a continuous condensing mode while maximizing longevity and delivering exceptional energy-saving performance. Low temperature applications such as heat pump and snow melting systems can see thermal efficiencies as high as 99%, a major savings over non-condensing competitive systems.

A unique multi-burner design is control sequenced and modulated to produce turndown rates of up to 20:1. Precise temperature control and accurate load matching results in smooth system operation and eliminates wasteful short cycling and temperature overshooting.

Advanced Multi-Burner, Low NOx Combustion Technology

- Venturi-mixing gas/air ratio system - works with variable speed blower to precisely mix gas and air throughout firing range
- Fully modulating capability prevents energy-stealing short cycling and provides smooth system operation with higher overall system efficiencies

Low NOx Operation

- Complies with SCAQMD Rule 1146.2 for XB1000 through XB2000 and Rule 1146.1 for XB2600 and XB3400, and other air quality management districts with similar requirements for low NOx emissions

Advanced Sola Control

- Large touch screen user interface
- Direct MODBUS protocol connections
- The latest in energy saving algorithms
- Outdoor reset is standard and includes remote outdoor temperature sensor - modulates the boiler to maintain desired system temperature within +/-1 degree
- Boiler output control features 20:1 turndown ratio on models 2 million btuh and up, 10:1 turndown ratio on models 1.7 million btuh and down

Factory-Mounted Secondary Pump(s) (optional)

- Recommended for primary/secondary piping systems
- Integrally mounted, wired, and controlled by the boiler control
- Factory-sized for proper flow through the boiler
- Allow up to 50 equivalent feet of piping between the boiler and the primary heating system

Multi-Pass/Multi-Burner Condensing Stainless Steel Heat Exchanger

- Utilizes leading-edge multi-pass water tube heat exchanger to maximize heat transfer
- Designed for fully condensing operation throughout the heating range
- All heating surfaces are 316L stainless steel to provide a long and trouble-free service life
- Saves fuel and operating cost with every heating cycle
- Impervious to thermal shock

Precise temperature control and accurate load matching results in smooth system operation

XB Model Boilers

Direct Vent Flexibility

- Direct vent up to 100 equivalent feet of pipe
- Sidewall or vertical
- Lower installation cost with approved CPVC/PVC venting material – uses CPVC for first 10 feet and PVC thereafter.
- Approved for use with UL approved AL29-4C® stainless steel venting materials

Factory Start-Up Included

- Required for activating warranty and assuring maximum operating performance. Contact your local sales representative or Authorized Start-Up Agent to arrange a FREE certified start-up.

Category IV Listed

- Approved for use with CPVC/PVC venting material – uses CPVC for first 10 feet then PVC thereafter or a UL approved AL 29-4C Stainless Steel venting material

Professional Start-Up Service Included

- Assures optimum performance for each installation

Meets the Thermal Efficiency Requirements of the U.S. Department of Energy and Current Edition ASHRAE/IESNA 90.1

10-Year Heat Exchanger Warranty

- For complete information, consult written warranty or contact A. O. Smith

Other XP Boiler Features:

- 93% thermal efficiency (AHRI certified)
- Certified to ANSI Z21.13-CSA 4.9
- Honeywell sola control with color touch screen LCD display
 - Inlet/outlet and remote loop temperature display
 - Onboard modbus communications
 - Logs faults, run time, cycles
 - Redundant flow and low water protection - factory-installed LWCO and flow switch(s)
 - Multi-burner sequencing models 2 million btuh and up have 4 burners; models 1.7 million btuh and down have 2 burners
 - Redundant ignition controls – should one burner fail remaining burners continue to heat
 - Alarm buzzer
 - Outdoor temperature sensor included
- 20:1 turndown models 2 million btuh and up, 10:1 turndown models 1.7 million btuh and down
- Horizontal and vertical direct and sidewall vent options up to 100 equivalent feet of piping
- Approved for CPVC/PVC plastic vent materials
- Meets ASME CSD-1/GE gap codes – factory standard
- Direct spark ignition
- Factory-installed electrical disconnect
- 316L Stainless steel heat exchanger
- ASME 160# working pressure
- ASME rated pressure relief valve – 50 PSI

XP Boiler Options:

- Factory-mounted secondary pump (recommended for primary/secondary piping systems)
- Condensate neutralization kit
- Vent termination kits
- Skid mounted systems

XB Model Boilers

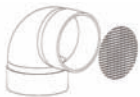

VERSATILE MULTI-VENTING CONFIGURATIONS

Direct or sidewall vent for up to 100 equivalent feet of pipe. Lower installation cost with approved CPVC/PVC venting material – uses CPVC for first 10 feet and PVC thereafter. Also approved for use with UL approved AL 29-4C stainless steel venting materials. For the detailed venting instructions review the XP boiler instruction manual at www.hotwater.com.

APPROVED VENT AND AIR INTAKE FITTINGS

EXHAUST/VENT TERMINATIONS (PVC)			
Models	Pipe Size	Vertical (PVC Rain Cap)	Horizontal (PVC Tee w/Screens)
XB 1000	6"		
XB 1300	8"		
XB 1700			
XB 2000			
XB 2600			
XB 3400	10"	320884-002	321765-002

AIR INTAKE TERMINATION (PVC)		
Models	Pipe Size	Combustion Air Intake (Elbow)
XB 1000	6"	
XB 1300		
XB 1700		
XB 2000	8"	321764-001
XB 2600		
XB 3400	10"	321764-002

Please note: When direct or sidewall venting, the boiler's CSA certification requires that only the above approved vent and combustion air intake terminations be used.

Dura-Max® DB/DW Gas Models

Up To 82% thermal efficiency hot water supply and hydronic heating boilers

The Dura-Max® series offers excellent performance and low-profile design flexibility for both new construction and retrofit applications. A double-row, extruded-finned copper tube heat exchanger provides exceptional heat transfer efficiency. Each unit features a small footprint with a built-in draft diverter for extra clearance to simplify installation. Reliable, quiet, drawer-mounted stainless steel burners resist corrosion, improve access for easy maintenance.

100% All Non-Ferrous Waterways

- All waterways 100% copper, brass or bronze... won't rust, resists thermal shock
- Heavy-duty bronze castings and copper heat exchange tubes
- Bronze removable return bends for easy access and inspection of individual tubes

Drawer Mounted, Stainless Steel Burners

- Quiet operation and efficient, reliable design
- Protects against corrosion and condensation deterioration common to aluminum burners
- Easy slide-out burner tray simplifies cleaning and maintenance

Compact, Low Profile Design

- Built-in draft diverter provides extra clearance in tight, retrofit installations
- Clean, compact jacket design for easy access and assembly
- Cool to touch and approved for combustible floors

Gasketless Wet Section

- Unique "O" ring design compresses to form water-tight seal positioned away from and outside the combustion chamber
- Isolated location offers optimum protection and years of service without gasket leaks

Intermittent Electronic Ignition

- Eliminates standing pilot, saves energy
- Includes power ON/OFF switch
- Provides flame failure response in less than one second

Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

5-Year Heat Exchanger Limited Warranty
(Domestic hot water supply)

10-Year Heat Exchanger Limited Warranty
(Hydronic heating applications)

Up To 82% thermal efficiency hot water supply and hydronic heating boilers

Burkay® HW Gas Models

Famous Burkay® reliability. Because of their lightweight and compact design, they may be easily transported on a two-wheel dolly replacing large boilers in a much smaller space. Burkay® models are for indoor use in installations requiring higher inputs...up to 670,000 BTU. They can be manifolded for unlimited fire power.

100% All Non-Ferrous Waterways

- All waterways 100% copper, brass or bronze... resists thermal shock and corrosion buildup

Low Profile Diverter

- Special design allows maximum installation flexibility

Copper Wall Combustion Chamber

- Coils of tightly wound copper tubing form a unique and highly efficient combustion chamber
- Optimum energy transfer achieved with integral extruded fin copper-finned tubes

Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

5-Year Heat Exchanger Limited Warranty (Domestic hot water supply)

10-Year Heat Exchanger Limited Warranty (Hydronic heating applications)

Production of +DB/DW Models will be discontinued in March 2012

Burkay® Genesis® GB/GW-300 thru 2500 Gas Water Boilers

84% thermal efficiency, extreme venting flexibility, outstanding value

Shown with optional factory mounted and wired secondary pump.

A. O. Smith Genesis boilers offer everything you could ask for in a non-condensing boiler. They provide the highest possible 84% thermal efficiency, outstanding venting flexibility, space-saving stackable design and a new, advanced Energy Management Control (EMC) system. Genesis models are available for installation indoors (GB/GW Series) or outdoors (GBO/GWO Series).

EMC-5000 Energy Management Control

- Patent pending
- Controls every electrical boiler function, including pump operation and main burner ignition, delivers precise temperature management with $\pm 1^\circ\text{F}$ accuracy
- Display panel shows current operating status and fault readings in easy-to-understand English instead of confusing numeric codes
- Display also shows temperature set points, outlet temperature, current inlet/outlet differential (ΔT) and tank temperature
- Help screens assist in boiler setup and explain all control options
- Includes 120V terminals for installation of secondary pump up to 1/3 HP allows control to cycle secondary pump for maximum efficiency, virtually eliminates standby heat loss at the boiler

Advanced Electronic Controls

- iCOMM™ Compatible and can be monitored from remote locations. Call 1.888.WATER02 for more information.

Network Ready for Future Remote Capabilities

Multi-Stage Firing System

- Multiple gas valve firing system ensures smooth operation, saves fuel and extends boiler life (Models GW/GB-300 through 750 are 2-stage firing; Models GW/GB-1000 through 1500 are 3-stage firing; Models GW/GB-1850 through 2500 are 4-stage firing)
- Prevents short cycling during low demand periods, delivers maximum output when demand is high

Available In Two Models

- Domestic hot water supply – GW models
- Hydronic heating – GB models

Low NOx Operation

- Complies with SCAQMD Rule 1146.2 and other Air Quality Management Districts with similar requirements for low NOx emissions+

Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1

10-Year Heat Exchanger Limited Warranty
(Hydronic heating applications)

5-Year Heat Exchanger Limited Warranty
(Domestic hot water supply)

Burkay® Genesis® GB/GW-1000 thru 2500 Gas Water Boilers

Complies with
SCAQMD
Rule 1146.2
California and Texas
California and Texas

ASME
CRN

Combustion Air Blower with Air Shutter
Adjusts to the application for maximum efficiency.

Top or Rear Exhaust

Extruded Finned-Copper Tube

- Finned-copper design delivers superior heat transfer and energy efficiency
- Self-baffling tube design assures even flow through heat exchanger
- Copper is lightweight, immune to rust and thermal shock
- Double-row configuration on 1,000,000 BTU input and higher...fits maximum heat transfer into minimum space

Removable Bronze or Glasslined Cast-Iron Headers
For easy inspection and service of waterways.

Cutaway shown is Genesis models 300 thru 750,000.

Hot Surface Ignition
More efficient and reliable than standing pilot.

Two to four-Stage Firing with Separate Remote Flame Sensors
For safety and extended ignitor life. Individual sensors for each stage.

Pressurized Combustion System
With pre-jet orifice for near-perfect air/gas mixture, clean combustion, low NOx.

Compliance

- Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA90.1+

+After January 1, 2012, Models will not meet SCAQMD Rule 1146.2 requirements for low NOx emissions.

Venting Flexibility

Direct Venting Examples

- Allows clean, uncontaminated air to be drawn directly into the unit
- Flue gas by-products are expelled through the wall to the outside
- Sidewall or vertical
- The boiler can be vented directly through an outside wall or vertically through the roof

Horizontal sidewall direct-venting rear intake/exhaust

Vertical direct-venting with horizontal combustion air intake rear intake/top exhaust

Vertical direct-venting top intake/exhaust

Horizontal direct-venting with vertical combustion air intake top intake/rear exhaust

Conventional Venting Examples

Horizontal sidewall-venting with rear exhaust

Conventional vertical-venting with top exhaust

See *Installation Manual* for complete venting installation instructions and maximum intake combustion air and exhaust venting distances.

Extruded Finned-Copper Tube

- Designed for maximum durability and serviceability
- Copper is lightweight for easier handling and immune to thermal shock

Other Genesis Features

- Alternate thermostat terminals (24V)
- CSA Certified and ASME rated T&P relief valve
- Factory-installed flow switch
- Manual reset high limit
- Blocked flue switch
- Fan proving switch
- Adjustable secondary pump delay
- Removable headers allow easy inspection of waterways

Genesis Options

- Factory-mounted and wired boiler pump for primary or secondary piping systems
- CSD-1 code
- New York and California code
- Alarm bell
- Dry contacts for any boiler failure
- E.M.S. stage control adapter
- Stack rack
- Low water cut off
- Sequencing control panel with outdoor reset for 1–8 boilers
- Combustible floor shield
- Cupro-nickel heat exchanger
- Extended venting kit
- CSA certified vent kits

Variable Fire Boilers

Up to 88% efficient, hot water supply boiler with modulating fire 4:1 turndown

The Art of Flexibility

The new VF Series variable fire copper tube boilers are designed with one thing in mind: to provide the best value to the customer. As a result, we're proud to introduce a more installation-friendly line that works well in more applications and requires less maintenance.

The secret to the stunning performance of the VF Series is its flexibility. The VF is capable of firing from 100% to 25% or a 4:1 turndown ratio. The boiler's output is based strictly on the current system demand and required BTUs needed to maintain the desired system set point temperature. The VF's modulating capability is virtually limitless.

The VF Boiler sets a high efficiency standard by combining thermal efficiencies up to 88% with a smoother, more energy-efficient overall system operation.

Small Size and Easy Service

Small Footprints, Zero Clearance To Combustibles On Sides of Unit

- Compact design, lightweight copper heat exchanger makes VF Series easier to move and install in limited spaces—perfect for retrofits
- Fits in an elevator, ideal for boiler rooms with limited access—only 30" wide
- Multiple boiler systems provide increased turndown and even smoother, more efficient system operation
- 4 boilers w/4:1 turndown = 16:1 total system turndown

Advanced Electronic Controls

- iCOMM™ Compatible and can be monitored from remote locations. Call 1.888.WATER02 for more information

Category IV Listed

Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1

Low NOx Operation

- Complies with SCAQMD Rule 1146.2 and other Air Quality Management Districts with similar requirements for Low NOx emissions

Other VF™ Boiler Features:

- ASME rated Pressure Relief Valve
- Factory-Mounted Flow Switch
- Low Gas Pressure Switch
- All Bronze Factory-Mounted Pump (Standard on VV hot water supply models)
- Digital Inlet/Outlet Temperature Read Out
- Manual Reset Hi Limit
- Network ready for future remote capabilities

5-Year Heat Exchanger Limited Warranty (Domestic hot water supply)

10-Year Heat Exchanger Limited Warranty (Hydronic heating applications)

CSD-1 Controls

VF™ Boiler Approved Options*

*For optional boiler equipment, see VF Boiler VB and VV spec sheets.

A

Combustion air intake—self adjusting, no air shutter required

B

EMC-5000 Modulating Control

C

Advanced pre-mix burner design precisely mixes air and gas prior to ignition for optimum performance. Complies with SCAQMD Rule 1146.2 and other Air Quality Management Districts with similar requirements for Low NOx emissions.

D

All non-heating components are outside of the combustion and flue collection areas; only the copper fin tubes are exposed to the products of combustion

E

Venturi-mixing gas/air ratio system works with variable speed blower to precisely mix gas and air throughout firing range, provides good operation with supply gas pressures down to 4" WC for natural gas (8" WC for propane) and is self-adjusting for altitudes up to 6,000 feet, all while providing low-NOx emissions that meet or exceed the most stringent standards

F

Heavy-duty ASME 160 PSI extruded finned copper tube heat exchanger—vertical, straight tube, two-pass design surrounds the burner with a 360° wall of copper finned tubing, making the entire heat exchanger resistant to thermal shock

G

The sealed heat exchanger flue collection system is constructed of AL29-4C stainless steel that resists corrosive flue gases

Versatile Multi-Venting Configurations

- Direct venting vertical and/or horizontal sidewall, with all combustion makeup air drawn from outside the building

70 Equivalent Feet Exhaust
 70 Equivalent Feet Intake
 90 Degree Elbows = 10 Feet
 45 Degree Elbows = 5 Feet
 Boot Tee = 5 Feet

- Conventional venting, vertical or horizontal sidewall

100 Equivalent Feet Max
 90 Degree Elbows = 10 Feet
 45 Degree Elbows = 5 Feet
 Boot Tee = 5 Feet

See Instruction Manual for complete venting installation instructions and maximum intake combustion air and exhaust venting distances.

Advanced EMC-5000 Modulating Control

The EMC-5000 Modulating Control provides true self-diagnostic capabilities to eliminate guesswork in troubleshooting. It is the most advanced boiler control we have ever offered, setting a new standard for copper boilers.

EMC-5000 Modulating Control

- Modulates the boiler to maintain tank temperature within $\pm 1^\circ$
- Infinite boiler output control between 100% to 25% fire
- LED read out – provides current boiler status in plain English with help screens to assist should a fault occur
- Controls and monitors every electrical boiler function with onboard diagnostics

Advanced Electronic Controls

- iCOMM™ Compatible and can be monitored from remote locations. Call 1.888.WATER02 for more information

Variable Fire (VF™) Boilers

Ac-U-Temp —A total hot water supply system using VF Series Boilers

With Ac-U-Temp, A. O. Smith makes it as easy as possible to install a complete packaged hot water supply system, combining 88% efficient VF Series Boilers with A. O. Smith storage tanks. A. O. Smith offers a wide range of available boiler/storage tank combinations using the Ac-U-Temp system. There are a number of standard boiler and tank configurations with tanks up to 1,000 gallons, or we can custom design and build an Ac-U-Temp system with tanks up to 10,000 gallons to meet your specifications and application requirements. Ac-U-Temp systems are shipped fully assembled, pre-piped and pre-wired. All the installer has to do is make the flue, gas, electrical and water connections, so field errors are minimized.

Consult your A. O. Smith representative for more information on the wide range of available boiler/storage tank combinations using the Ac-U-Temp system.

For complete specifications on the VF Series, consult the specification sheets at www.hotwater.com or contact your local A. O. Smith sales representative.

Ac-U-Temp Complete Hot Water Supply Systems

Built to order...factory-engineered and pre-assembled...easier to install

We've taken our best commercial boilers and tanks and made them available in a total system called Ac-U-Temp. Completely pre-piped and pre-wired, built to your specifications and skid-mounted, Ac-U-Temp systems streamline installation and reduce labor costs. Once on-site, the installer simply connects the flue, gas, electric supply, cold water make-up and hot water supply.

Tank Capacities

- Standard tank sizes from 80 to 1,000 gallons
- Custom tanks to 10,000 gallons

Eliminates Costly Field Errors

- Factory-engineered and assembled to assure proper pipe, pump and wired sizing
- Systems are pre-piped and wired to guarantee maximum system efficiency

Simplifies Installation

- Installer simply connects the flue, gas, electric supply, cold water make-up and hot water supply

Ac-U-Temp Storage Tanks

- Each tank is specially designed with tank opening locations that provide maximum tank draw efficiency and eliminate any unnecessary piping and connections
- Standard Ac-U-Tanks are factory jacketed and insulated (Bare tanks are also available)

Custom Ac-U-Temp Systems

- All systems are built to order to meet your specifications
- Many type of boiler and tank combinations are available

Multi-Boiler Systems

- High recovery systems that can meet any hot water demand
- Systems can be designed to provide 50%–100% back-up
- Boilers can be On & Off-fired or sequenced to meet changing system demands
- Sequenced multi-boiler systems that employ relatively small storage tanks are ideal for applications with constant, yet fluctuating hot water demands

Multi-Tank Systems

- For applications with low ceiling heights or unique installation challenges

Electric Back-Up

- Heavy-duty electric water heater elements and controls can be specified for up to 3,000 kW for 100% electric back-up
- Provides hot water even during natural gas curtailments

Superior I-Beam Skid

- For easy shipping
- Larger systems may be shipped on a split skid that is easily assembled during installation

Factory Hydrostatic And Fire-Tested Before Shipping

5-Year Heat Exchanger Module And 5-Year Limited Tank Warranty

Other Features

- CSA Certified and ASME rated T&P relief valve
- Tank temperature sensor
- Tank thermometer
- Isolation valves (Reliable ball valves)
- 125 PSI tank construction

Options

- All-bronze circulating pump
- Sequencing control panel for multi-boiler systems
- 150 PSI tank construction
- 11" X 16" manhole for easy maintenance
- Cement and epoxy tank linings available to meet special specifications
- Optional dual energy source capability

Shown below are standard Ac-U-Temp configurations* Custom designs are available to meet specific needs.

Genesis model stacked on a horizontal jacketed tank.

Genesis model placed in front of a horizontal jacketed tank.

Genesis model with a vertical horizontal storage tank.

Genesis model skid mounted in line with a horizontal jacketed tank.

*The four examples shown feature the Genesis boiler with various piping configurations with a jacketed insulated tank.

Heavy-Duty Electric Dura-Power™ Hot Water NW Boiler Models

Designed for use as a hot water boiler for space heating applications

ASME

Optional Goldenrod® 24-carat gold-plated elements resist lime scale adhesion and sheath temperatures up to 1500° F.

ASME Code Construction

- All vessels manufactured to applicable ASME code
- Vessels with maximum working pressure of 160 PSI or less (standard design is for 125 PSI) at 240°F maximum temperature bear the "H" symbol

Incoloy Immersion Heaters

- Heavy-duty medium-watt density elements (3 per immersion heater)
- Incoloy sheathing provides excellent protection against oxidation and scaling
- Inputs range from 450 kW to 6,000 kW

Control And Power Circuit Fusing

- Meets National Electrical Code
- 100,000A I.C. cartridge-type fuses protect all elements and contactors

Pilot Switch And Light

- Permits manual starting and stopping of heater by interrupting power to the control circuit
- Pilot light indicates when control circuit is energized

Heavy-Duty UL-Rated Magnetic Contactors Rated For 100,000

Low Water Cutoff

- Probe type, electric low water cutoff prevent energizing of elements in the even of low water condition

120V Control Circuit

- Powered by fused transformer

Modulating Step Control

- Solid state modulating step control modulates heat input to match load

1-Year Limited Tank Warranty

All dimensions in inches

MODEL NO.	GAL. CAP.	KILO-WATTS MAXIMUM	HT.**	WIDTH	DEPTH	INLET AND OUTLET*	BOILER DRAIN

NW-670	670	3300	96-1/2	78	68	8	2

NOTE: For boilers 3400 kW to 6000 kW, consult factory.

*All fittings under 4" will be threaded type. All fittings 4" and larger will be flanged.

**Where overall height is a problem, a larger diameter vessel with a reduced height may be furnished.

Designed for utilizing steam or high temperature boiler water as an energy source

Steam or Boiler Hot Water HWG Generator Systems

These skid-mounted water heater systems are completely assembled and packaged for use. All components are sized, piped and checked at the factory before shipment. HWG systems save labor and time, requiring only connection to heat source.

Packages include pressure regulators, temperature regulators, steamtraps, strainers and other custom items such as standard or optional features.

Tank and heat exchanger capacities will closely match those now available, 80 through 12,500 gallons and 0.9 through 214 square feet of heat transfer.

Insulation

- Models are insulated with fiberglass to meet the most current ASHRAE standards

Integral Pump

- System includes an integral bronze circulator pump

Steam Units

- Standard steam trim consists of temperature control valve, inlet and auxiliary steam traps, inlet and auxiliary strainers, steam pressure gauge with siphon, vacuum breaker and air vent

Boiler Units

- Standard boiler water trim includes temperature control valve and boiler water temperature gauge

Cathodic Protection

- Standard systems employing glass, cement or epoxy-lined tanks are fitted with magnesium anodes to help prevent corrosion

Gallon Sizes

- HWG models are available from 140 gallons to 12,500 gallons in both vertical and horizontal configurations

Additional Features

- ASME Code (Section IV)
- All copper recirculation with two bronze ball valves
- Flush-mounted temperature gauges and pressure gauges
- National Board Stamped
- CSA Certified and ASME rated T&P relief valve
- Heating coil Section VIII of ASME code

5-Year Limited Tank Warranty And 1-Year Limited Coil Warranty

Options

- Storage Tanks:** 150# through 160# PSI working pressure, ASME Section VIII construction, 4" X 6" handhole, 11" X 15" manhole, cement, epoxy or galvanized linings
- Water To Water:** Pilot (spring, air, temperature) operated temperature regulator, bypass loop in boiler water line for regulator isolation
- Steam To Water:** Pilot (spring, air, temperature) operated temperature regulator, bypass loop in steam line for temperature regulator, vacuum breaker

ASME

For GPH recoveries, consult specification sheet.

Custom Semi-Instantaneous Water Heaters HWI Models

Boiler Water or Steam

A. O. Smith's HWI models are available for operation with steam or boiler water as the energy source. They are factory assembled with components sized, piped and checked at the factory before shipment. HWI models are all space saving vertical models.

Control Features

- *Single Point Wiring*—Single 120V connection, controls including integral circulation
- *On/Off Switch*—Allows local on/off for service
- *Temperature Readout*—LED readout of water temperature
- *PID Temperature Control*—Modulates electrical control valve
- *Closes main valve if "over" temperature conditions exist*
- *Remote Temperature Signal*
- *Two-Wire RS485 Communication (MODBUS or ASCII)*

For additional information please call the factory with the following:

- *Required gallons per hour recovery needed*
- *Temperature rise needed; for example—40° to 140°*
- *Single or Double-Wall Coil*
- *If steam is the energy source, what is the steam pressure? For example—15 psi, 30 psi, etc.*
- *If boiler water is the energy source, what is the minimum boiler water temperature? For example - 180°, 140°, etc.*

Note: Orders cannot be processed until the above required information has been provided.

Custom Small and Large Volume Storage Tanks

Models (T, TL, TN ,TJ, TJV, TJH, TJVT)

These storage tanks are ideal for use with gas-fired copper heat exchanger equipment and other A. O. Smith hot water systems for storage of any potable water at temperatures of 180°F or lower. Sizes range from 80 to 12,500 gallons and custom models are available with special linings, heating coils (single-or double-wall), and accessories.

Glasslined Tank

- Internal surfaces exposed to water are glasslined per ASME, HLW procedures using an NSF approved glass-lining compound

Horizontal Or Vertical Mounting

- Except for TJ-80 (vertical only) and TL-500 (horizontal only)

Jacketed Tanks

- Tanks meet R12.5 minimum thermal insulation requirements of the U.S. Department of Energy and Current Edition of the ASHRAE/IESNA 90.1

Anodic Protection

- Magnesium anodes help extend tank life

ASME Construction

- Standard on TJV/TJH jacketed tanks; 100, 125, 150 & 160 PSI maximum working pressure available

5-Year Limited Tank Warranty

Options

- Manifold kits
- Flexible R-11 jackets for field installation
- Manholes/Handholes
- Factory-mounted temperature or pressure gauges
- Extended warranties
- Lifting lugs
- Military specifications

Other Linings Available

- Cement formulation provides excellent corrosion protection; available on 200-gallon and larger sizes
- Epoxy lining is suitable for cold or hot water storage; available on 200-gallon and larger sizes

Other Constructions

- Black steel, stainless and silicon bronze tanks are available for extreme severe or special applications; ASME is standard

ASME

Low Lead Content

Desired temperatures in A. O. Smith custom-lined hot water storage tanks can be maintained with special copper tube heating elements. Available for use with steam or boiler water, single- or double-wall construction.

Custom Tanks Built To Order For Any Need

A. O. Smith understands the variety of special needs you may have in designing a complete commercial hot water supply system. We can meet just about any need you specify, with our "HD" High-Draw Custom Storage Tanks from 80 to 10,000 gallons, all with ASME construction, and with an extensive menu of options, including:

- Cement, epoxy or glass linings
- Black steel tanks, stainless steel tanks, silicon bronze tanks
- Military specifications
- Manholes
- Handholes
- Lifting lugs
- Steam or hot water tank heaters
- Special and additional tank openings
- Ring and leg bases
- Horizontal tank saddles
- Factory-mounted temperature or pressure gauges

For complete specifications on A. O. Smith Commercial Storage Tanks, consult Specification Sheets at www.hotwater.com.

The industry's largest commercial product selection.

A. O. Smith's reputation for innovation continues to soar with our most complete line of products yet. With the trademark blend of innovative technology and energy-efficient solutions, our comprehensive line is the natural source for everything from the smallest commercial installation all the way up to the largest multi-structure complex.

We offer over 500 different commercial models, including gas fired, oil-fired and electric configurations, ranging in capacities from 5 to 10,000 gallons, with input range from 50,000 BTU to the equivalent of 2,500,000 BTU.

Through an inspired blend of innovation, efficiency and years of expertise, A. O. Smith continues to set the industry standard for performance and quality of water heaters, boilers and storage tanks.

No other company is better qualified to fill your hot water needs.

Knowledgeable people at your service.

To better serve our customers, A. O. Smith has over 200 manufacturer's representatives covering the United States and Canada. In addition, we have more than 400 factory-authorized service technicians to provide reliable, immediate warranty services. We also maintain a well-staffed Customer Care Facility in Ashland City, Tennessee, that can provide information on A. O. Smith products, sizing, competitive analysis, etc. A toll free number, (800) 527-1953 (M-F 7 a.m.–7 p.m. Central time), puts you in touch with the best technical information center anywhere.

A. O. Smith Customer Care Center

"Our job is to 'smooth the road' from proper product selection to installation, and to help customers over the 'potholes' of troubleshooting service."

Complete replacement parts support.

Our Parts Department carries replacement parts for every product A. O. Smith manufactures. We offer expert parts support and a wide range of shipping options, including same-day delivery, where available. Our toll free parts order number, (800) 433-2545 is answered 7 a.m. to 5 p.m., Central time, Monday through Friday. The parts order fax, (800) 433-2515, is available 24 hours a day. Fax orders received after 5:00 p.m. will be fulfilled the following business day.

A. O. Smith has manufacturing facilities located worldwide.

Plants are located in strategic locations throughout the United States, providing timely shipments to wholesalers. In addition, manufacturing plants are also located in Nanjing, China, to supply the ever increasing demand for water heaters to the expanding Far East. Juarez, Mexico; Stratford, Ontario; and Veldhoven, The Netherlands provide commercial electric and gas energy-saving models.
