

Siemens SQN70 Actuating Damper Motor

Description

All models of SQN70 and SQN71 actuators produced after April 1, 2021 have fine adjustment switch cams which are easily adjusted with a standard, flat blade screwdriver (not included). Every single cam is now adjusted using a screwdriver. Previously, some SQN7 switches may be adjusted coarsely via a lever tool which is no longer possible. The adjustment is now easier and more accurate with a screwdriver.

Notice

The color, wiring and functionality of the cams has not changed.
