

Convert Canister Filters to Efficient Spin-On.

Fast.

Today's Need:

Reduce time and labor costs at every seasonal tune-up with a quick and efficient Spin-On filter conversion for systems using traditional up to B100 fuels.

Beckett Solution:

Beckett Spin-On Filter Adapter Kits easily convert canister filters to convenient spin-on style. With this semi-permanent installation, there is no need to disassemble or re-plumb the system in order to change the filter. Our solution saves space under tanks and is UL recognized up to B100.

The ONLY Spin-On solution for limited space under tanks.

At 5.25", the adapter and F99-10B filter are specifically designed to be the same size as the canister they are replacing. Perfect size for the tight space under the tank.

Scan the QR code to watch how quick and easy the adapter installs.

B100
UL LISTED

Beckett®

- Covert canister filter to a spin-on without the need to re-plumb the system. Labor savings now and on future tune-ups!
- A true B100 Solution – All seals and gaskets are B100 rated, and the F99-10B filter is UL Listed up to B100.
- The ONLY spin-on solution for limited space under tanks.
- Improved filtration efficiency for fuels up to B100. Quick and easy B100 compatible conversion.
- Filter adapter will “lock on” to the filter head for a semi-permanent installation. NO NEED to remove the adapter in the future.
- Adapter kits are available for all canister filter styles. Models available:
