

45/5 MFD Round Dual Motor Run Capacitor

(370V)

FEATURES

- **Self-Healing** – the metallized polypropylene film can repair itself and continue functioning if small faults occur.
- **Oil Filled** – gives the capacitor higher capacitance and a longer service life.
- **Wide Operating Range** – The 370 VAC voltage range makes the capacitor more versatile and suitable for use in air conditioning and heating systems.
- **Metal Case** – protects the capacitor from moisture and oil.
- **Meets EIA 456 Specifications** – for metallized film dielectric capacitors for alternating current applications.
- **UL Listed** – This product has undergone rigorous testing and inspections to ensure that it's safe and reliable.
- **RoHS Compliant** – approved for use on commercial and residential jobs.
