

36" Nylon Heavy-Duty Cable Ties / Duct Straps, Natural

(Pack of 50)

FEATURES

- For use with UL Non-Metallic Air Ducts & Air Connectors.
- Long exposure to cold temperatures (32°F and below) or high heat and humidity (>90%RH) prior to installation will reduce the effectiveness of the strap and will cause brittleness and/or a decrease in tensile strength. For best results, keep bags sealed and stored at room temperature.

SKU	Length	Tensile Strength
