

3/8" Compression Chrome Plated Thermostatic Mixing Valve w/ Check Valve

Lead Free

FEATURES

- **Working Pressure (PSI):** 30-150 – Works great in both low and high-pressure systems.
- **Temperature Range** – 95 - 120°F
- **Minimum Flow (GPM):** 0.25 – Guarantees a consistent flow rate for efficient water usage and steady performance.
- **Brass Construction** – Provides fantastic durability and corrosion resistance for a reliable and long-lasting plumbing system
- **Includes Check Valve** – Prevents backflow and protects the water supply from contamination
- **Compression x Compression connection**
