

User Instructions

Bluefin PXCLTLOH One Hand Ratchet PEX Clamp Tool

*This tool may be used for the following PEX sizes: 3/8", 1/2", 5/8" 3/4", and 1".
You may use the same jaws for all PEX sizes.

1. Prepare PEX tubing and fittings for clamping by sliding the clamp ring over the PEX tubing and inserting the fitting into the tubing.

2. Press down the release handle on the tool to open the jaws.

3. Insert the clamp ear into the jaw opening.

4. Close the handle firmly to close the clamp ear. This may be done repeatedly (up to 10 times) to cinch the ear completely if necessary.

5. Press down the releasing handle to open the jaws.

6. Check to make sure the fitting and clamp ring are tight.
