## 3/4" PVC Condensate J-Trap

### Applications:

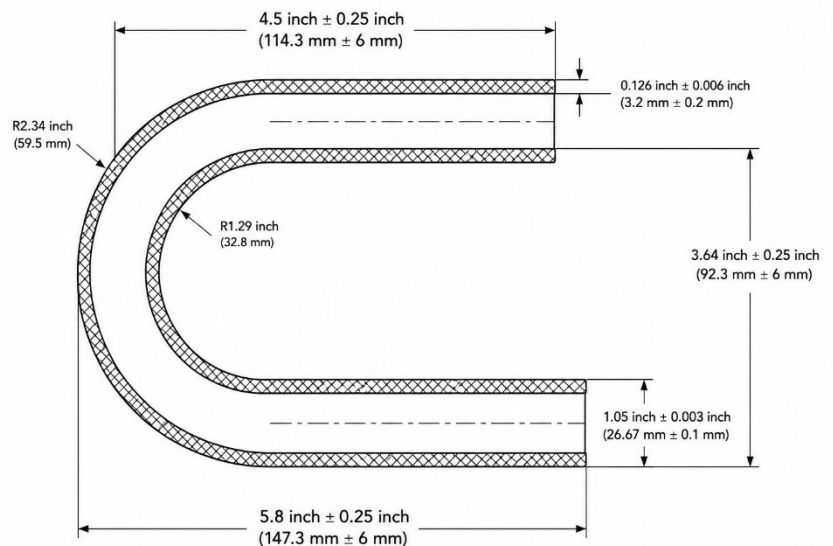

The 3/4" PVC Condensate J-Trap is designed for residential and light commercial HVAC condensate drain systems, providing a reliable water seal to help prevent sewer gases and odors from entering the building while ensuring proper condensate drainage. Its compact design offers installation flexibility, making it ideal for custom drain configurations, OEM equipment, air handlers, fan coil units, furnaces, condensate pumps, and retrofit applications where space is limited.

### Product Features

- Durable PVC construction
- Compact J-trap design for installation flexibility
- Designed for custom condensate drain assemblies
- Smooth interior promotes efficient condensate flow
- Corrosion- and chemical-resistant PVC construction
- Lightweight and easy to install
- Compatible with standard 3/4" PVC condensate drain piping
- Suitable for residential and light commercial HVAC applications
- Ideal for OEM, replacement, and retrofit installations

### Materials

- Schedule 40 PVC (Polyvinyl Chloride)

### Notes:

- All Dimensions are nominal
- Dimensions in inches (millimeters)
- Tolerance  $\pm$  0.005 inch ( $\pm$ 0.13mm) unless otherwise noted
- For use with HVAC condensate drain systems only
