

Z-one™
Z1, Z2, Z3 Series

Function

The Z-one, a two-position spring return zone valve, is used in heating and air-conditioning systems. The Z-one series consist of a Z1 actuator which is easily attached to a Z2 (2-way) or Z3 (3-way) valve body. Z1 actuator is equipped with or without auxiliary switch.

The Z-one actuator has a synchronous motor that winds the return spring and moves the valve paddle to the desired position. When power is removed the actuator spring returns the valve paddle. 24V actuators use a sealed reed switch for end switch, requiring no minimum current load.

US Patent 7,048,251
Technical Characteristics of Body

Material:	- body:	forged brass (optional lead-free brass, see page 6 for certification statement)
	- seat:	machined brass
	- stem:	stainless steel
	- two o-ring seals	EPDM
	- paddle	EPDM
Medium:		water and glycol
Maximum percent of glycol:		50%
Temperature range:		32 to 240°F (0 – 115°C)
Max. static pressure:		15 psi (1 bar) steam 300 psi (20 bar)
Connection:	-press (lay length: 3-5/8"; overall length 5-5/8")	1/2", 3/4" 1"
	-sweat	1/2", 3/4" 1" & 1 1/4"
	- NPT	1/2", 3/4" & 1"
	- SAE flare	1/2"
	- inverted flare	1/2", 3/4" & 1" sweat, fittings separate
Lay length (press connections):		size 1/2 inch: 3 1/2"
		size 3/4 inch: 3 5/8"
		size 1 inch (PL): 5"
		size 1 1/4 inch: 4 1/8"

Technical Characteristics of Actuator

Material:	- base and cover:	polycarbonate
	- base plate:	aluminum
Motor:	- voltage:	24 VAC 50/60 Hz Class 2 120 VAC 50/60 Hz 208 VAC 50/60 Hz 230 VAC 50/60 Hz 277 VAC 50/60 Hz
	- current draw:	24 VAC – 300 mA 120 VAC – 55 mA 208 VAC – 30 mA 230 VAC – 25 mA 277 VAC – 20 mA

Wire lead length:
Power requirements:
Ambient temperature range:
Auxiliary switch:

6" (15cm), 24V only -18" (45cm)
5.0 W, 7 VA
32 - 125°F (170°F optional)
24 VAC: 0.0 A min,
0.4 A max, 24 V
120-277 VAC:
0.25A min, 5A max, 250 V
95% non-condensing
UL873, cUL Listed & CE
UL 1995 sec. 18 (air plenum & ducts)

Humidity:
Approvals:

Normally Open Actuators must be powered down during off-season.

Flow Characteristics

Connection size	Flow Coefficient	Max. Close-off ΔP
1/2"	1.0 Cv (0.9 kv)	75 PSI (517 kPa)
1/2"	2.5 Cv (2.2 kv)	50 PSI (345 kPa)
3/4"		
1/2"	3.5 Cv (3.0 kv)	30 PSI (207 kPa)
3/4"		
3/4"	5.0 Cv (4.3 kv)	25 PSI (172 kPa)
1"		
3/4"	7.5 Cv (6.5 kv)	20 PSI (138 kPa)
1"		
1"	7.5 Cv (6.5 kv)	20 PSI (138 kPa)
1 1/4"		

Installation

The valve can be installed vertically or horizontally, but not turned upside down.

- A 3-way valve cannot be transformed into a 2-way valve and vice versa.
- The flow is from A to B (see diagram below) and must be installed so the paddle closes against the direction of flow as indicated in the following diagrams.
- The 2-way valves can be installed on the supply or on the return; for correct installation it is necessary to respect the direction of flow indicated from the arrow on the body valve.

2-way installed on the supply

2-way installed on the return

2-way valve with normally closed actuator

3-way valve with normally closed actuator
(Note: 3-way uses only normally closed actuator)

3-way installed on the supply in diverting configuration

3-way installed on the return

Operation of Normally Closed Valve

	2-way	3-way
N.C. without power	Port "A" closed	Port "A" closed Port "B" opened Port "AB" opened
N.C. opened with power	Port "A" opened	Port "A" opened Port "B" closed Port "AB" opened
N.C. manually opened	Port "A" opened	Port "A" opened Port "B" opened Port "AB" opened

Manual Open (NC act only)

The manual opening is achieved by moving the manual opening lever to the locked position. When power is applied, the manual lever unlocks automatically.

Wiring Diagram

Removing the Actuator

1. Move the manual open lever to the lock open position.
2. Press the push button in and pull the actuator up.

Installing the Actuator

1. Move the manual open lever to the lock open position.
3. Verify the correct position of the valve stem into the mating actuator hole. Rotate stem if required to align.
4. Press the push button in and slide the actuator onto the valve body, release the push button.

SAFETY INSTRUCTION

This safety alert symbol will be used in this manual to draw attention to safety related instructions. When used, the safety alert symbol means **ATTENTION! BECOME ALERT! YOUR SAFETY IS INVOLVED!** FAILURE TO FOLLOW THESE INSTRUCTIONS MAY RESULT IN A SAFETY HAZARD.

WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

CAUTION: All work must be performed by qualified personnel trained in the proper application, installation, and maintenance of systems in accordance with all applicable codes and ordinances.

CAUTION: Over-tightening and breakage can occur with the use of Teflon pipe joint compounds. Teflon provides lubricity so that care must be exercised not to over-tighten joints. Failure to follow these instructions could result in property damage and/or personal injury.

CAUTION: System fluids are under pressure or temperature can be hazardous. Be sure the pressure has been reduced to zero and the system temperature is below 100°F (38°C). Failure to follow these instructions could result in property damage and/or personal injury.

CAUTION: Avoid locations with excessive moisture, explosive vapors, corrosive fumes or vibration. Failure to follow these instructions could result in stress corrosion resulting in property damage and/or personal injury.

Caleffi shall not be liable for damages resulting from stress corrosion, misapplication or misuse of its products.

Approval for low-lead brass: NSF/ANSI 372-2011, Drinking Water System Components-Lead Content Reduction of Lead in Drinking Water Act, California Health and Safety Code 116875 S.3874, Reduction of Lead in Drinking Water Act, certified by ICC-ES, file PMG-1360.

Leave this manual for the user.

CONSIGNE DE SÉCURITÉ

Ce symbole d'avertissement servira dans ce manuel à attirer l'attention sur la sécurité concernant instructions. Lorsqu'il est utilisé, ce symbole signifie.

ATTENTION! DEVEZ-VOUS ÊTRE ALERTES ! VOTRE SÉCURITÉ EST EN JEU ! NE PAS SUIVRE CES INSTRUCTIONS PEUT PROVOQUER UN RISQUE DE SÉCURITÉ.

AVERTISSEMENT: Ce produit peut vous exposer à des produits chimiques comme le plomb, qui est connu dans l'État de Californie pour causer le cancer, dommages à la naissance ou autre. Pour plus d'informations rendez-vous www.P65Warnings.ca.gov.

ATTENTION: Tous les travaux doivent être effectués par du personnel qualifié formé à la bonne application, installation et maintenance des systèmes conformément aux codes et règlements locaux.

ATTENTION: Un serrage excessif et la rupture peuvent se produire avec l'utilisation de raccords filetés de tuyaux téflon. Téflon fournit un pouvoir lubrifiant afin qu'il doit être prudent pour ne pas trop serrer les joints. Suivre ces instructions peut entraîner de propriété dommages et/ou des blessures.

ATTENTION: Système fluides sont sous pression ou de température peut s'avérer dangereuse. Veillez à ce que la pression a été réduite à zéro et la température du système est inférieure à 100°F (38 ° c). De suivre ces instructions peut entraîner des dommages matériels et/ou des blessures corporelles graves.

ATTENTION: Évitez les endroits avec une humidité excessive, les vapeurs explosives, les vapeurs corrosives ou les vibrations. Suivre ces instructions peut entraîner de la corrosion sous tension, ce qui entraîne des dommages matériels ou corporels.

Caleffi décline toute responsabilité pour dommages résultant de la corrosion, une mauvaise utilisation ou utilisation abusive de celui-ci produits.
