

Carlin Gas Burner Selection Guide

Using this Manual:

This guide contains an alphabetical listing of oil fired appliances with the recommended Carlin gas conversion burner(s) for each.

Residential Applications:

Carlin EZGas Pro burners for residential applications, are available in three configurations:

- Appliance Specific Burners— Factory configured for specific appliance. Includes welded flange, pre-drilled orifice, and factory mounted diffuser plate and air band.
 - Universal (Full Firing Range) Burners – Includes Adjustable Flange, Three Diffuser Plates (A, B and 9-Slot), Two Air Bands and a Field Drilled Orifice. Comes in two models: 10" tube for Boilers and a 14" tube for Water Heaters and Furnaces. To configure the burner, the installer uses the set-up guide and/or the installation manual shipped with the burner.
 - Multi-Fit Burners – Includes Adjustable Flange, One Diffuser Plate, One Air Band, and a Field Drilled Orifice. Each is designed to fit a variety of appliances within a given BTU range.
- Note: Carlin recommends that Wholesalers stocking the Multi-fit convert to the more versatile Universal Models.

Commercial Applications:

- **Appliance Specific Burners** - Commercial burners will come with a welded air tube flange, gas train, and pre-drilled orifice.
- **Adjustable Flange Burners** - Burners will come with an adjustable flange and the installer will need to follow the instructions in the set-up guide, and/or the installation manual.

Commercial burners listed are configured for standard gas pressure and require 5" to 14" of water column. If your incoming gas pressure is less than 5"wc running pressure you will require a low gas pressure train. Call the factory for additional information.

Note: This guide is updated frequently as test results are generated. If you do not see the appliance you are looking for please contact the factory for additional information.

Burner listing

Carlin EZGas Pro burners and 201GAS are C-UL listed, for use in the US or Canada, per ANSI Z21.17/CSA2.7 - latest edition, for use with natural gas or propane gas.

Commercial Gas Burners are C-UL listed, for use in the US or Canada, per UL795 /CGA3.4 - latest edition, for use with natural gas or propane gas.

Specify Canadian application when ordering the burner to obtain proper labeling and manuals.

Important: Carlin Gas Burners should be installed or serviced only by licensed trained professionals in accordance with Carlin's instructions and ANZI 21.8, *Installation of Gas Conversion Burners* and meet all local and national gas codes.

For covered burners use P/N 9887FR7 for the 3 section and P/N 98897FR6 for the 4 or 5 section boilers

Burner includes gasket under ignitor and grommet in access cover: kit # GSKTKIT1

Only use welded flange burners with G115 boilers.

G215 series - Not Recommended
