

Specifications

NOTES:
All models rated at 140 psi pump pressure except the OUFB75-D3-1A.
All units shipped with high fire nozzle installed. Low fire nozzle included uninstalled.

Oil Furnaces

The compact Patriot 80 comes in a variety of configurations to fit virtually anywhere, including utility rooms, alcoves, closets, crawl spaces and attics. In addition to upflow, downflow/horizontal, rear flue and front flue versions, models are available in heat only or A/C ready combinations.

In selecting a furnace, oversizing is not recommended—the closer the heating output is matched to the heat loss of the residence, the more comfortable the homeowner will be while saving on fuel usage. With the Patriot 80, the model can be easily matched to the desired heating requirements: units are built with multiple firing rates and a simple nozzle change adjusts the firing rate to the heating requirement.

All Patriot 80 Oil Furnaces are covered by a limited Lifetime Warranty on the heat exchanger and a 5 Year Warranty on other parts. Some limitations apply, see printed warranty on web site for details.

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.

Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product. Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.

OIL FURNACES

Clean, Comfortable Oil Heat

Features

- 1 Foil-faced high density fiberglass insulation to minimize noise and heat loss
- 2 Heavy duty 14 gauge steel heat exchanger engineered for efficiency; covered by limited lifetime warranty
- 3 Available in upflow, downflow, horizontal, front or rear flue configurations
- 4 Corrosion-resistant steel cabinet construction with baked enamel finish for durability
- 5 Easy access stainless steel clean-out ports for complete servicing of heat exchanger

Highboy depicted; components representative of other configurations

GeniSys™ Advanced Burner Control

Designed for trouble-free operation, the control has programmable delays for valve on and motor off, and indicator lights to simplify system monitoring and diagnostics. Two communication ports allow the addition of alarm contacts and future wireless communications. Features include technician pump prime mode, limited reset and limited recycle, and welded relay protection.

Quiet, Clean Comfort

A dense, ceramic fiber combustion chamber provides a quiet and efficient operating furnace while foil-faced high density insulation reduces operation sound as well as heat loss. State-of-the-art engineering and top quality components combine to provide clean burning warm air comfort—plus many models come pre-wired to easily add central air conditioning (two to five ton cooling capacities).

- 6 State-of-the-art Beckett “AFG” burner with flame retention head, PSC burner motor and solid state ignition for smooth igniting
- 7 High temperature ceramic combustion chamber for quiet, high efficiency combustion
- 8 Multi-speed direct drive blower assembly with slide-out design and handy plug-in wiring (adjustable belt drive on OLRA200-BH)
- 9 Primary with integral fan center
- 10 Honeywell fan/limit for simple operation

Limited Lifetime Warranty
on Heat Exchanger

Efficiency and Versatility

The Patriot 80 oil furnace is exceptionally efficient and versatile thanks to its powerful heat exchanger that maximizes energy usage to minimize utility costs. Models feature multiple firing rates and capacities ranging from 58,000 to 196,000 BTUH, allowing a wide choice of heating efficiencies.

All models are AFUE rated at 80% or above.

Trouble-Free Maintenance

All components from the welded heat exchanger to the Beckett high efficiency oil burner with flame retention head are built to be reliable. With removable panels and easily accessed clean-out ports, all components are located for simple access and maintenance. In addition, the Patriot 80 features standard components should replacement parts be needed.
