

Comfort-Cire®

GUH80A

GAS FURNACES

**THE SIMPLEST DECISION YOU
CAN MAKE THIS SEASON.**

**FEEL GREAT ABOUT YOUR
DECISION. THEN FEEL
GREAT ALL WINTER LONG.**

When you choose a Comfort-Aire® GUH80A furnace, you're selecting a well-built, hardworking piece of equipment that's designed to be rugged and reliable season after season. That's what makes it the right choice.

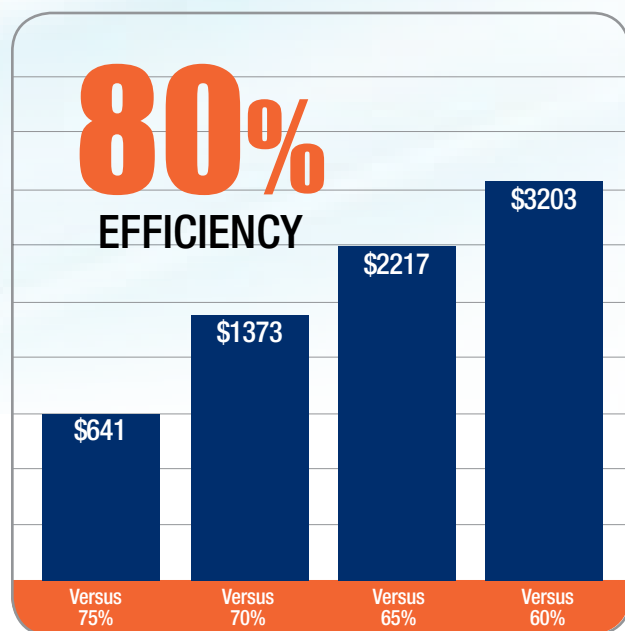

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider Comfort-Aire® systems, quality and value are givens. You're getting peace of mind with great features and smart designs that squeeze more efficiency out of every energy dollar. And best of all, you get it right now.

Comfort is built right in.

Inside every Comfort-Aire® GUH80A furnace, you'll find a rugged motor and smartly designed burners. These important details give the GUH80A long-lasting reliability with less operating noise and consistent temperatures that help you stay more comfortable.

Over the years, a hardworking Comfort-Aire® furnace can save you hundreds of dollars on utility bills.

Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors. Chart depicts 5-year savings over less-efficient models.

Smart in every way.

The GUH80A furnace offers an Annual Fuel Utilization Efficiency (AFUE) of 80%, meaning it can convert 80% of the fuel it uses into heat you can feel. So you stay comfortable, while spending less on utility bills.

A LOOK INSIDE THE RUGGED, HARDWORKING GUH80A.

- An 80% AFUE¹ means the GUH80A converts a full 80% of the fuel it consumes into usable heat. That can help you spend less on energy every month
- The aluminized steel heat exchanger resists corrosion, and is crimped instead of welded for long life and safety
- The anti-vibration blower assembly helps reduce noise during startup and shutdown for peaceful, quiet operation
- Every GUH80A is started and operated at the factory to ensure it performs as expected and provides the highest level of durability
- **Outstanding Warranty Coverage² -**
Our 80% furnaces are backed by a 20 year warranty on the heat exchanger, and 12 year warranty on other components, with registration within 60 days of purchase. Limitations apply, see printed warranty for details.

¹ Like the miles-per-gallon rating on your automobile, the higher the AFUE rating, the lower your fuel costs. All furnaces manufactured today must meet minimum AFUE requirements. If your furnace is 10–15 years old, it probably falls below the current minimum and wastes energy.

² Applies to residential applications only. For terms, conditions and exclusions, see full warranty at www.marsdelivers.com.

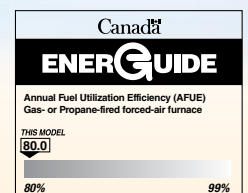

COMFORT-AIRE® - THE DECISION YOU'LL CELEBRATE.

When you think about everything Comfort-Aire® delivers, your decision is no decision at all. Stay cozy. Stay comfortable. The performance and reliability you want are right here, and ready to go to work.

Comfort-Aire®. It's the right choice. Right now.

Not approved for use in mobile home applications.

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.

Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product. Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.
