

Comfort-Cire®

GUH92A

GAS FURNACES

**THE RIGHT CHOICE,
RIGHT WHEN YOU NEED IT.**

**WHEN YOU CHOOSE COMFORT-AIRE®,
YOU'RE CHOOSING TO FEEL GREAT.**

Built rugged and tested for toughness, every Comfort-Aire® furnace works hard to keep you cozy and energy smart. For your peace of mind, every Comfort-Aire® furnace is connected and fired up at the factory before shipping to ensure it performs well from the day it's installed. Comfort-Aire® is a simple choice to make, because it's always the right choice.

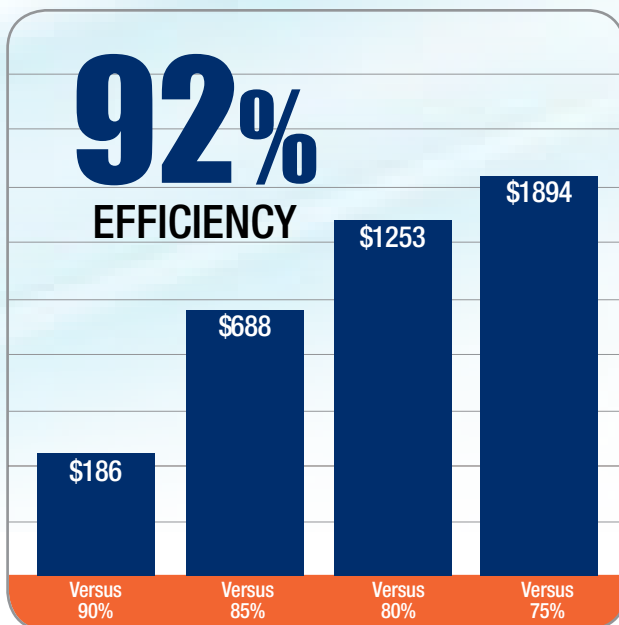

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider Comfort-Aire® systems, quality and value are givens. You're getting peace of mind with great features and smart designs that squeeze more efficiency out of every energy dollar. And best of all, you get it right now.

Comfort that doesn't quit.

With its powerful, single-speed PSC blower motor, the GUH92A delivers consistent temperatures and high-efficiency energy usage. So you will stay warm all winter without spending a lot on energy bills. And because the GUH92A is equipped with smaller burners than many other furnaces, it will operate more quietly.

Over the years, a hardworking Comfort-Aire® furnace can save you hundreds of dollars on utility bills.

Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors. Chart depicts 5-year savings over less-efficient models.

Efficiency helps you feel good in every way.

The GUH92A isn't only well-built and dependable, it's also energy efficient. Its Annual Fuel Utilization Efficiency (AFUE) of 92% means it converts 92% of the fuel it uses into heat you can feel. That means it can help you spend less on energy even when the weather is at its harshest.

THE COMFORT-AIRE® GUH92A IS A SMART CHOICE NO MATTER HOW YOU LOOK AT IT.

- 92% AFUE¹ means 92% of your fuel is turned into usable heat. So you'll save energy all winter long
- The rugged PSC motor will provide years of reliable operation
- The tough, dependable heat exchanger is made from aluminized steel for long life, and crimped instead of welded for durability and safety
- An anti-vibration blower assembly reduces sound levels on startup and shutdown
- **Outstanding Warranty Coverage²** -
The primary and secondary heat exchangers are covered by a lifetime warranty; other components are covered for twelve years, with registration within 60 days of purchase. Limitations apply, see printed warranty for details.

¹ Like the miles-per-gallon rating on your automobile, the higher the AFUE rating, the lower your fuel costs. All furnaces manufactured today must meet minimum AFUE requirements. If your furnace is 10–15 years old, it probably falls below the current minimum and wastes energy.

² Applies to residential applications only. For terms, conditions and exclusions, see full warranty at www.marsdelivers.com.

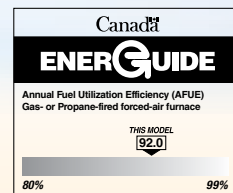

MAKE THE COMFORT-AIRE® DECISION FOR IMMEDIATE RELIEF AND LONG-LASTING COMFORT.

When you think about everything Comfort-Aire® delivers, your decision is no decision at all. Your family deserves immediate comfort. The performance and reliability you want are right here, and ready to go to work.

Comfort-Aire®. It's the right choice. Right now.

Not approved for use in mobile home applications.

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.

Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product. Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.
