GUH95A

GAS FURNACES

**CONSISTENT, AFFORDABLE
COMFORT ON DEMAND.**

COMFORT-AIRE® MAKES CHOOSING THE RIGHT FURNACE THE SIMPLEST CHOICE OF ALL.

A furnace can do more than make you comfortable. It can also make you feel confident. Comfort-Aire® builds every furnace to deliver on both counts. From rugged construction to energy efficiency to fast installation, it's the right choice to make every time.

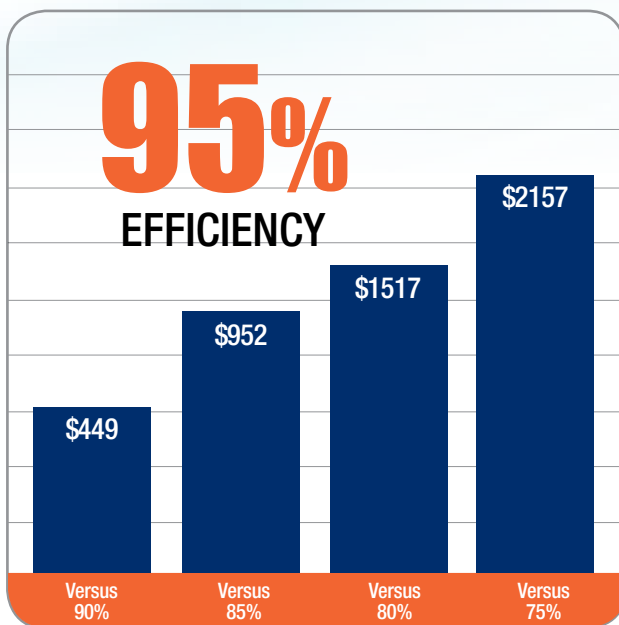

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider Comfort-Aire® systems, quality and value are givens. You're getting peace of mind with great features and smart designs that squeeze more efficiency out of every energy dollar. And best of all, you get it right now.

Comfort you can depend on every day.

The GUH95A is a smart choice for a more-efficient home. Its reliable single-stage motor and smartly designed heat exchanger create consistent temperatures that accommodate changing conditions in your home, so you'll always have plenty of cozy, warm air on hand whenever you need it. No matter what the weather is doing outside.

Over the years, a hardworking Comfort-Aire® furnace can save you hundreds of dollars on utility bills.

Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors. Chart depicts 5-year savings over less-efficient models.

Efficiency you can appreciate.

Because of the way it's designed, the GUH95A can offer impressive fuel efficiency even in miserably cold weather. In fact, its Annual Fuel Utilization Efficiency (AFUE) of 95% means a full 95% of the fuel it consumes is returned to you as heat you can feel. That means it can help you spend less on energy even when the weather is at its harshest.

WHEN YOU GET THE GUH95A, YOU GET A LOT. AND YOU GET IT NOW.

- 95% AFUE¹ means 95% of your fuel is converted into usable heat, for season-long savings
- A durable PSC blower motor will provide years of reliable operation
- The robust aluminized steel heat exchanger is crimped, not welded, for long life and safety
- Sealed service doors reduce burner and air noise
- An anti-vibration blower assembly reduces startup and shutdown noise for peace and quiet
- **Outstanding Warranty Coverage²** -
The primary and secondary heat exchangers are covered by a lifetime warranty; other components are covered for twelve years, with registration within 60 days of purchase. Limitations apply, see printed warranty for details.

¹ Like the miles-per-gallon rating on your automobile, the higher the AFUE rating, the lower your fuel costs. All furnaces manufactured today must meet minimum AFUE requirements. If your furnace is 10–15 years old, it probably falls below the current minimum and wastes energy.

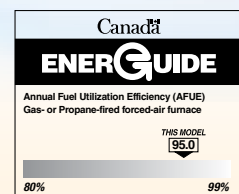

² Applies to residential applications only. For terms, conditions and exclusions, see full warranty at www.marsdelivers.com.

Not approved for use in mobile home applications.

MAKE THE COMFORT-AIRE® DECISION FOR IMMEDIATE RELIEF AND LONG-LASTING COMFORT.

When you think about everything Comfort-Aire® delivers, your decision is no decision at all. Don't wait for the consistent comfort you need. The performance and reliability you want are right here, and ready to go to work. **Comfort-Aire®. It's the right choice. Right now.**

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.

Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product. Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.
