MULTI-POSITION VARIABLE SPEED AIR HANDLER

2-5 Ton with TXV

INVERTER DRIVEN HIGH EFFICIENCY HEAT PUMP

Up to 19 SEER2 & 9.0 HSPF2

HEAT  CONTROLLER

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider a **Comfort-Aire®** system, quality and value are a given. You're getting peace of mind with great features and a smart design.

Efficiency ratings

Consider the SEER ratings that measure system performance. Higher numbers mean greater efficiency and lower energy bills for you.

Superior coil protection

For durability in harsh environments Total Corrosion Protection Technology is featured on select **Comfort-Aire®** air conditioner units, protecting against corrosive elements and extending the life of your air conditioner for years to come.

Immediate savings

With a high-efficiency system, you may qualify for local utility and energy incentives as well as rebates.[†] Your **Comfort-Aire®** professional can provide you with the latest information so you can take full advantage of available money-saving opportunities.

Is it time to replace your unit?

It can be hard to decide whether to repair or replace. Here are a few things to keep in mind when you're deciding:

- **Age of the unit** – You might want to consider a new unit if your air conditioner is at least 10 years old.
- **Updates** – New technology makes units more efficient and easier to control. Plus, older units use obsolete refrigerant than can be very expensive if the air conditioner needs to be recharged.
- **Repair costs** – Once repair costs exceed 50% of the cost of a new unit, a new purchase should be considered.

[†] Check with your local utilities to confirm eligibility. Rebates and incentives for efficiency vary by locality and utility. Comfort-Aire does not make any representation, warranty, guarantee, or other assurance as to whether the each model qualifies or is eligible for rebates in your local area.

**WHATEVER YOUR NEEDS, A COMFORT-AIRE®
AIR CONDITIONER IS THE RIGHT CHOICE.**

COMPLIANT FOR ALL REGIONS

HP19V Inverter

Up to 19 SEER2 & 9.0 HSPF2

The Comfort-Aire® **HPV19V** inverter heat pump offers premium comfort at a price point designed to fit your budget. With ratings up to 19 SEER2 & 9.0 HSPF2. It offers superior performance and incredibly quiet operation - less than half the sound you typically hear from a 14 SEER single-stage heat pump. Other benefits include enhanced dehumidification and five operating modes to set your preferred balance of comfort and energy efficiency. Broad compatibility and long-term reliability can even help you save on replacement costs.

COMPLIANT FOR ALL REGIONS

AH19X

2-5 Ton with TXV

With an enhanced constant-torque blower motor, the **AH19X** helps bring energy efficiency and consistent temperature together for comfort you can rely on.

Comfort-Aire®

COME HOME TO COMFORT. COME HOME TO COMFORT-AIRE®

When you think about everything Comfort-Aire® delivers, your decision is easy. With Comfort-Aire®, all your heating and cooling questions are answered. The performance and reliability you want are right here, and ready to go to work.

Comfort-Aire®. It's the right choice.

"This product complies with all California product labeling laws including, but not limited to, the Safe Drinking Water and Toxic Enforcement Act of 1986, more commonly known as Proposition 65."

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.

Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product. Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.
