ESYBOX MAX MODULAR WATER PRESSURE BOOSTER PUMP

CREATE YOUR BOOSTER MODULE SOLUTION OF UP TO FOUR PUMPS TO MEET DEMAND

The ESYBOX Max is a scalable booster pump solution for large homes, apartment buildings, hotels, light industrial use, hospitals, golf courses, and other applications where high pressure or high flow is needed.

APPLICATIONS

Esybox Max is the most compact and integrated booster set available compared with any traditional solution. It's not *larger* – it's modular.

Esybox Max is an integrated pumping system for water pressurization in commercial buildings. Available in two power sizes, it consists of modular elements that enable different configurations to meet the needs of medium to large condominiums and high-rise buildings up to 14 stories.

Each unit consists of single, double or triple connection base and the pumping units.

Now you only need to select from two different hydraulic models depending on the height of the building. Then you can create your booster set, with up to four pumps, to meet the demand.

CONDOMINIUM
Example: 10 floors
20 apartments

HOTEL
Example: 6 floors
80 Rooms

HOSPITAL
Example: 4 floors
100 Beds

SUITABLE FOR
PUMPING WATER FROM:
NO SELF-PRIMING

TANKS

MUNICIPAL WATER SUPPLY
where permitted by law

**ENERGY SAVINGS
UP TO 20%
COMPARED TO
TRADITIONAL SOLUTIONS***

AS QUICK AS A “CLICK”

Install Esydock into your pipework system and simply “plug” your pumps in. A final quick set up via the screen interface completes your installation project.

H2D DELIVERS BUILT-IN CONNECTIVITY

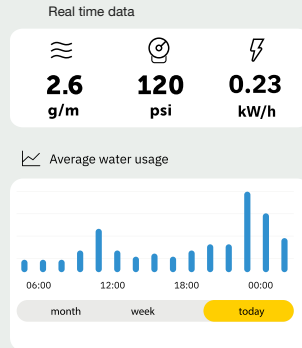

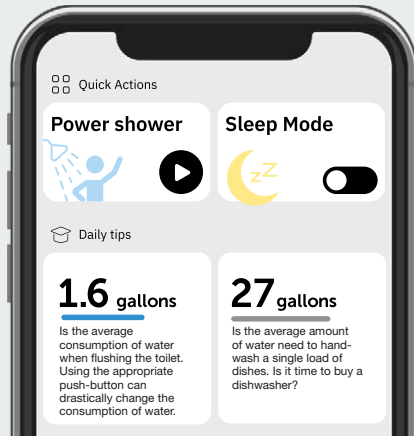

With DAB's cloud service, you can predict problems remotely and act quickly, without having to go to the installation site.

Configure and view operating parameters on the large Esybox Max display or with the H2D app and the integrated Wi-Fi module. You can monitor and configure remotely with active H2D service (internet connection required).

H2D INSTALLER BENEFITS - remote access, proactive monitoring, peace of mind for your customer. Once installation of the first pump is completed, Esybox Max automatically synchronizes the other pumps in the modular system.

H2D CUSTOMER BENEFITS - knowledge that the pump is performing how it needs to, and delivers added comfort features (Power Shower, lower water usage times).

Further details: internetofpumps.com

The modular OSA (On Site Assembly) feature allows for easy access to the installation area. This enables assembly on-site following our quick assembly steps.

ESY I/O

The expansion module (Esy I/O available accessory) makes it possible to interface Esybox Max with external input/output devices (eg: float switch, pressure switch remote alarm) and with the BMS ecosystem (Building Management System).
