DUCKT-STRIP.COM

THE ONLY RIP N' STRIP MINI-SPLIT CABLE[™]

Innovations

- Innovative Rip-N-Strip[™] technology
- No blade required
- Safer
- One wire covers interior/exterior compliance

Applications

- From the Mini-Split outdoor condensing unit to the indoor unit. Power and Control in 1 cable.
- 14/3 (14/2 w/grd) & 16/2 Stranded Conductors
- 75 °C Jacket, 90 °C Conductors, at least 60 °C Wet Locations

Standards & References

DUCKT-STRIP[®] meets the following standards and references:

- Underwriters Laboratories Standard 2988
 - Universal Hybrid Power and Signal/Control Cable
- Made in Hooksett, New Hampshire USA

Construction

The ONLY cable with complete end to end conductor isolation, as per NEC 725.136. UL and NEC approved for in the wall, through the wall installs.

Jacket is constructed with Patented Rip-N-Strip[™] grooves for easier separation of cables and removal of jacket.

Jacket

Conductors are covered with a gray and white, sunlight resistant, outdoor rated, direct buried approved PVC jacket.
