TIPS FOR SAVING ENERGY
- Keep the area around the inlet or outlet free of obstacles.
- Do not strongly press the refrigerant pipes onto the bottom frame.
- Do not use the power cord near the heating tools.
- Do not place obstacles around the flow inlet or outlet.
- Do not enter the control board with fingers or similar objects.
- Do not use any connectors other than the specified one.
- Do not press the Do not use the power cord near the heating tools.
- Do not place obstacles around the flow inlet or outlet.
- Do not enter the control board with fingers or similar objects.
- Do not use any connectors other than the specified one.

IMPORTANT SAFETY INSTRUCTIONS
READ ALL INSTRUCTIONS BEFORE USING THE APPLIANCE.

WARNING
- Always use the manual air conditioner in its intended indoor unit.
- Do not use the air conditioner if it has been damaged or when the operating period of the power supply is exceeded. Should the refrigerant leak and cause the safety limit to be exceeded, hazards due to gas leakage may increase.

CAUTION
- Do not strongly press the refrigerant pipes onto the bottom frame.
- Do not use the power cord near the heating tools.
- Do not place obstacles around the flow inlet or outlet.
- Do not enter the control board with fingers or similar objects.
- Do not use any connectors other than the specified one.

GEAR INSTALLATION
- Select a place where there are no obstacles and it is away from the neighbors.
- Select a place where there are no obstacles and it is away from the neighbors.

Flaring Work
- Make sure that the tubing and the flared work are not damaged by bending or twisting while the flaring work is being carried out.
- Make sure that the tubing and the flared work are not damaged by bending or twisting while the flaring work is being carried out.

Ducts in the Wall
- Make sure that there is no dust or debris in the ducts.
- Make sure that there is no dust or debris in the ducts.

Testing Running
- Check that the air outlet is not blocked by dust or debris.
- Check that the air outlet is not blocked by dust or debris.

CAUTION
- Do not use the power cord near the heating tools.
- Do not place obstacles around the flow inlet or outlet.
- Do not enter the control board with fingers or similar objects.
- Do not use any connectors other than the specified one.
