HI VOLTAGE SEPARATION LO™

Introducing the **PSH450DB10-LVC** - a fully enclosed, UL-Listed DC power supply designed specifically for building automation controllers and devices. It's built to bring speed, safety, and reliability to your jobsites right out of the box.

- **MASSIVE LABOR SAVINGS**
  A fully enclosed, single-connection design solves field complexity and cuts down installation time.
- **ELIMINATE TIME CONSTRAINTS**
  Because it's already UL Listed, you can remove the cost and schedule delays of ad-hoc field certifications.
- **BUILT-IN REDUNDANCY**
  Five isolated 90W circuits ensure that if one circuit experiences an issue, the other four continue running without interruption.
- **PPE-FREE MAINTENANCE**
  A dedicated Low Voltage Control compartment allows your team to safely troubleshoot and adjust output voltages without needing heavy personal protective equipment.
- **TROUBLESHOOTING MADE SIMPLE**
  Features a primary panel switch, individual circuit breakers, and on-board diagnostic LEDs for instant status updates.

Stop building power solutions piece-by-piece in the field

Upgrade to a certified, pre-configured solution that protects your timeline and your bottom line

PSH450DB10-LVC can be utilized as a DC powered alternative to model PSH500AB10-LVC
