

HAP 10" Diameter Universal Clip Kit

Adjusts from 3" to 10" Diameter

Expansion Safety Tanks can be secured using one or two UNC1 Kits. Support Brackets can be secured to the stud without using Bullets.

The UNC1 kit can support pipes or spiral ducts overhead. The CB1 Carrier Bridge (sold separately) was used as the mounting point.

Vertical pipes or spiral ducts can be secured using a UNC1 Clip Kit and adding a 3/8" threaded rod that is bolted to the stud.

For additional security, two UNC1 Clips can be used with the 3/8" threaded rods that are bolted to each stud.

HAP UNIVERSAL CLIP KIT PRODUCT FEATURES

Stainless Steel Universal Support Strap adjusts from 3" to 10". Slide the strap through mounting bracket slots.

Insert strap end into worm gear assembly to tighten Universal Support Strap around the pipe, duct or the expansion tank.

Powder Coated Spring Steel Support Bracket has slots for the Universal Support Strap and a hole in the plate for the machine screw used securing the Bullet Nut.

Bullet nut and screw. One end of the Bullet accepts the machine screw while the opposite end of the Bullet accepts a 3/8" threaded rod.
