MSA V-Gard full brim, V-Gard cap style,
V-Gard 500

Universal face shield

17-36001

Get a truly universal face shield for your safety helmet with the TruSpan® universal face shield system by HexArmor®. Preassembled and ready for action, TruSpan® adapts to multiple competitor helmet models and our own Ceros® XP to deliver comfortable, close-fitting face protection, complete with permanent TruShield® anti-fog and scratch-resistant technology.

When not in use, TruSpan® has tight nesting capabilities on top of the helmet for more compact, balanced comfort, or it can be easily removed. Plus, TruSpan® can be used with select slot-adapted earmuffs for a fully integrated system, as the helmets' side slots are not needed for attachment.

Engineered in Germany 

Product features

- Adaptable headgear frame with attached face shield designed for most full brim/cap-style safety helmets
- Pre-assembled and ready for immediate use
- Easily detach face shield when in nested position with a simple squeeze and pull of the side arms without removing head gear from helmet – an industry first and HexArmor® exclusive
- System allows tight-nested locking and resting positions for less strain and more balance
- Face shield clicks into two usable positions on the helmet, “active” and “nesting”, which secures face shield into place for use or non-use
- Face shield includes permanent TruShield® anti-fog coating on the inside and scratch-resistant hard coat on the outside
- Added sealing lip where TruSpan® meets the helmet’s brim protects against dirt/debris and chemical/splash risks
- Rubber headgear band is designed with robust, long-lasting EPDM material
- Compatible with select slot-adapted earmuffs, as headgear does not interfere with helmets’ side slots for attachment
- Components are dielectric, making system suitable for electrical work
- Wide coverage around the face with panoramic view
- Meets D3 liquid splash protection + 100% UV protection

Protective devices do not provide unlimited protection. Some operations may require machine guards, face shields, special filter lenses, or other safety equipment. Safety helmets do not provide complete protection against hazards, and should only be used in conjunction with the prescribed safety equipment for the application as well as defined safety practices.

UVEX SAFETY GROUP GmbH & Co. KG, parent company of HexArmor®, has achieved a Gold EcoVadis Rating, placing us in the top 5% of sustainable suppliers globally.
